Worksession

Present: Mayor Leni Sitnick, Presiding; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor M. Charles Cloninger

CONSENT:

Police Department Equipment Storage

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the U.S. Treasury Department, Bureau of Alcohol, Tobacco and Firearms regarding the use of an outdoor storage magazine.

The Asheville Police Department currently has a need to store equipment utilized by the Asheville Police Department Hazardous Device Team. The Bureau of Alcohol, Tobacco and Firearms (BATF) has designated funds to purchase a storage facility for our use at no cost to the City of Asheville. In return for the use of the storage facility, the City of Asheville must find a location to place the storage facility and allow the BATF access to one half of the storage facility.

A storage site has been identified and approved for facility placement which met federally mandated environmental guidelines, which include:

- Limited access to the facility
- Placement distances from inhabited areas
- Safety precautions

The BATF and the Asheville Police Department Hazardous Devices Team will utilize this storage facility.

The Asheville Police Department recommends that City Council authorize the City Manager to execute an agreement with the Bureau of Alcohol, Tobacco and Firearms to acquire and utilize this storage facility.

Upon inquiry of Councilwoman Bellamy, Police Chief Will Annarino described the types of things that would be stored in this facility.

Budget Amendment and Contract re: Urban Trail Station 2: Crossroads

Summary: The consideration of a budget amendment, in the amount of $59,000, for a grant appropriation for the Urban Trail's Station 2: "Crossroads" and a resolution authorizing the City Manager to enter into a contract with Grace Hanson Corporation and Knox Galleries to develop bronze sculptures of two wild turkeys, one sow pig and one piglet.

The Asheville Urban Trail Committee and the Parks and Recreation Department are working in partnership to complete construction of the Urban Trail. Station 2: "Crossroads" is one of the final stations leading to the completion of the Trail. "Crossroads" is located in front of the Vance Monument in downtown Asheville and signifies Asheville's early history of the Native American footpath of the Cherokee that later became the Buncombe Turnpike used by farmers to herd livestock on its way to southern markets.

The City of Asheville applied for a grant in December 2000 to the Janirve Foundation. The grant was recently awarded in the amount of $38,300. We have also received $15,000 in private donations and pledges for the remaining $5,700 balance. All funds are designated for cost associated with developing the bronze sculptures of turkeys and pigs at Station 2: "Crossroads".

The Urban Trail Committee drafted the turkey and pig concept for Crossroads, and reviewed works by bronze sculpture artists. Artist Grace Hanson through Knox Galleries was selected to develop life size, bronze sculptures of two wild turkeys, one sow pig and one piglet at a price of $36,500. The artist will commence work within five days of executing the contract agreement, and the work will be complete no later than December 2001.

The Parks and Recreation Department is responsible for the management and development of the Urban Trail along with the Urban Trail Committee.

The Parks and Recreation Department recommends City Council approve the budget amendment and resolution.

Downtown Milling Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Asphalt Unlimited of Asheville, N.C. to mill streets located in the Central Business District.

Street milling is the removal of old surface material to reduce street elevation and allow new material to match existing infrastructure, such as curbs and storm drains.

The City is in need of a contractor to provide milling services for streets in the downtown area. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for paving and resurfacing services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Asphalt Unlimited Company	100%	Yes	Yes	$2.50 a square yard
Slurry Pavers Inc.	No Bid	No Bid	No Bid	No Bid
Apac	No Bid	No Bid	No Bid	No Bid

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into a contract with Asphalt Unlimited of Asheville Inc.

Budget Amendment re: Police Department Grant

Summary: The consideration of a budget amendment, in the amount of $139,346, to appropriate federal grant and local funds to the Police Department budget to reduce crime and improve public safety.

City Council authorized the City Manager to submit a grant application to the US Department of Justice, Local Law Enforcement Block Grant Program (LLEBG) on August 8, 2000 (Resolution No. 00-141). The grant in the amount of $125,411 has been awarded. A local match of $13,935 is required. The source of the local match is 110 0603 483 5315.

Under the conditions of the grant, funds are to be used to reduce crime and improve public safety.

City staff recommends Council adopt the budget amendment.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

CONDITIONAL USE PERMIT

Planning & Development Director Scott Shuford said that a minimum of two weeks before Council's consideration of a conditional use permit (CUP) case, Planning and Development staff will send to Council a brief information sheet on the CUP request, including the location of the subject property, the type of request, and pertinent factual information about the property and request, such as acreage and zoning of the property, the date of the public hearing at which you will consider the CUP, and any special issues associated with the request (such as whether the CUP was submitted to correct a violation as in the Grandview case from Council's last meeting). This summary information is intended to keep Council informed of upcoming CUP cases and give Council an opportunity to visit the site in advance of the meeting.

City Attorney Oast and Mr. Shuford then reviewed with Council general process concerns. Concerns discussed included that the quasi-judicial format does not allow Council an opportunity to adequately research issues outside the public hearing; items that City Council should disclosure on the record, i.e., that they have visited the site, special knowledge of a particular issue, etc.; staff recommendations in staff reports can compromise City Council's ability to act or cause second-guessing if Council overrules staff or the Planning & Zoning Commission; relevancy of speaker's comments; time limits for individuals and group speakers; Council should have general discussion prior to voting; on CUP's, delay the vote until the next meeting to give staff time to investigate claims and relevancy of specific comments or conditions; need for definitions of the seven conditional use standards that need to be met; and the possibility of re-instituting a "sign-in" sheet to better facilitate public comment.

It was the consensus of City Council to direct staff to create a "citizens guide" that can be updated for planning and development processes to better inform the public about the City's public hearing procedures and development review processes, as well as to provide answers to frequently asked questions. Said guide should be placed on the City's webpage. Items that can be included in the guide would be advising the public that the spokesperson for a group can call witnesses and that there is a possibility that the vote on conditional use permits may be delayed until the next formal meeting.

Staff was directed to clarify in their recommendation that their recommendation is based upon information they have received prior to the official public hearing, and does not take into account any information that may be presented to Council for the record at their public hearing. In addition, Mr Shuford assured City Council that if staff hears information at the public hearing that may change their recommendation, they would bring that to Council's attention at the public hearing. City Council could then continue the public hearing pending receipt of further information.

Staff summaries will include relevant information about possible development alternatives to the requested CUP or conditional use zoning. The purpose of this information is to ensure that Council is clearly aware of reasonably anticipated potential development alternatives available to the applicant.

Staff was directed to create an information sheet on relevant public hearing procedures and basic ground rules. This information should be sent to property owners in the notice area and will also be available to those who attend the public hearing. Information on the sheet could contain information that petitions are not relevant information to be presented because the people who signed the petition are usually not present at the public hearing and are not allowed to be cross-examined.

City Council encouraged organized and coordinated presentations. It was the consensus of City Council to allow groups that demonstrate substantial organization additional time to speak, up to the length of the time taken by the applicant or 30 minutes, whichever is great. The organized group would be allowed to speak first, after the applicant's presentation, in order to get pertinent issues on the table as early as possible in the meeting.

It was the consensus of Council that after the public hearing is closed, that City Council hold their discussions prior to any motions being made.

City Council always has the option to postpone action on any conditional use permit or conditional use zoning to obtain additional information. This fact needs to be reinforced in order to manage expectations on the part of the applicant or public hearing attendees regarding Council coming to an immediate decision at the conclusion of the public hearing. Requests by City Council for additional information that would result in a postponement will be handled on a case-by-case basis.

It was the consensus of City Council to pause discussion at 10:00 p.m. to determine the willingness of Council to complete the agenda given the remaining issues for consideration and the number of potential public speakers.

It was the consensus of City Council to have the Planning staff attempt to define the current seven conditional use standards and bring back for City Council consideration any other standards they feel need to be addressed, e.g., impacts on significant natural and topographic features.

City staff was directed to provide a presentation board listing the conditional use permit standards so that Council and the public can refer to them during the deliberations at the public hearing.

City Attorney Oast said that he would have to research the issue if Council can talk with the neighborhood and/or applicant if the public hearing is postponed.

It was the consensus of City Council to not apply these changes to the April 10, 2001, conditional use permit public hearing regarding a parking lot at the corner of Charlotte Street and Edwin Place.

Mr. Shuford advised the Council that he would compile the directions given to him at this meeting.

APPOINTMENT TO PACK SQUARE CONSERVANCY INC. BOARD OF DIRECTORS

Mayor Sitnick said that she received a letter from Ms. Carol King, Chair of the Pack Square Conservancy Inc., in which she wrote that the Pack Square Renaissance Task Force has created the Pack Square Conservancy Inc., a 501 (c) (3) organization dedicated to making Pack Square Renaissance a reality. Their by-laws call for the appointment of a City Council member to their Board of Directors and they recommend City Council appoint Charles Worley. She said that Councilman Worley has been a volunteer member of the Pack Square Renaissance Task Force and has been present and involved at most of their meetings.

Councilwoman Bellamy moved to waive the rules and take formal action at the meeting. This motion was seconded by Councilwoman Field and carried unanimously.

Councilwoman Bellamy moved to appoint Councilman Charles Worley to the Pack Square Conservancy Inc. Board of Directors. This motion was seconded by Councilman Hay and carried unanimously.

CLOSED SESSION

At 5:38 p.m., Councilman Worley moved to go into closed session to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease – G.S. 143-318.11 (a) (5). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 6:02 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Mayor Sitnick and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 6:02 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – April 10, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Bellamy gave the invocation.

ADDITIONS TO THE AGENDA

Councilwoman Field asked that a matter dealing with the Building Code be placed under "Other Business"

Councilman Peterson asked that a matter dealing with the Civic Center be placed under "Other Business"

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL 8-14, 2001, AS "INTERNATIONAL BUILDING SAFETY WEEK"

Councilwoman Field read the proclamation proclaiming the week of April 8-14, 2001, as "International Building Safety Week" in the City of Asheville. She presented the proclamation to Director of Building Safety Terry Summey and Fire Chief Greg Grayson, who briefed City Council on some activities taking place during the week.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 27, 2000, AND THE WORKSESSION HELD ON ARIL 3, 2000

B. ORDINANCE NO. 2799 - BUDGET AMENDMENT TO ESTABLISH A BUDGET FOR THE URBAN TRAIL'S STATION 2: "CROSSROADS"

Summary: The consideration of a budget amendment, in the amount of $59,000, for a grant appropriation for the Urban Trail's Station 2: "Crossroads" and a resolution authorizing the City Manager to enter into a contract with Grace Hanson Corporation and Knox Galleries to develop bronze sculptures of two wild turkeys, one sow pig and one piglet.

The Asheville Urban Trail Committee and the Parks and Recreation Department are working in partnership to complete construction of the Urban Trail. Station 2: "Crossroads" is one of the final stations leading to the completion of the Trail. "Crossroads" is located in front of the Vance Monument in downtown Asheville and signifies Asheville's early history of the Native American footpath of the Cherokee that later became the Buncombe Turnpike used by farmers to herd livestock on its way to southern markets.

The City of Asheville applied for a grant in December 2000 to the Janirve Foundation. The grant was recently awarded in the amount of $38,300. We have also received $15,000 in private donations and pledges for the remaining $5,700 balance. All funds are designated for cost associated with developing the bronze sculptures of turkeys and pigs at Station 2: "Crossroads".

The Urban Trail Committee drafted the turkey and pig concept for Crossroads, and reviewed works by bronze sculpture artists. Artist Grace Hanson through Knox Galleries was selected to develop life size, bronze sculptures of two wild turkeys, one sow pig and one piglet at a price of $36,500. The artist will commence work within five days of executing the contract agreement, and the work will be complete no later than December 2001.

The Parks and Recreation Department is responsible for the management and development of the Urban Trail along with the Urban Trail Committee.

The Parks and Recreation Department recommends City Council approve the budget amendment and resolution.

ORDINANCE BOOK NO. 19 – PAGE 121

C. RESOLUTION NO. 01-47 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GRACE HANSON CORPORATION THROUGH KNOX GALLERIES FOR SCULPTURES FOR THE URBAN TRAIL STATION 2: "CROSSROADS"

Summary: See Consent Agenda Item "B" above.

RESOLUTION BOOK NO. 26 – PAGE 327

D. RESOLUTION NO. 01-48 RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE BUREAU OF ALCOHOL, TOBACCO AND FIREARMS REGARDING THE USE OF AN OUTDOOR STORAGE MAGAZINE

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the U.S. Treasury Department, Bureau of Alcohol, Tobacco and Firearms regarding the use of an outdoor storage magazine.

The Asheville Police Department currently has a need to store equipment utilized by the Asheville Police Department Hazardous Device Team. The Bureau of Alcohol, Tobacco and Firearms (BATF) has designated funds to purchase a storage facility for our use at no cost to the City of Asheville. In return for the use of the storage facility, the City of Asheville must find a location to place the storage facility and allow the BATF access to one half of the storage facility.

A storage site has been identified and approved for facility placement which met federally mandated environmental guidelines, which include:

- Limited access to the facility
- Placement distances from inhabited areas
- Safety precautions

The BATF and the Asheville Police Department Hazardous Devices Team will utilize this storage facility.

The Asheville Police Department recommends that City Council authorize the City Manager to execute an agreement with the Bureau of Alcohol, Tobacco and Firearms to acquire and utilize this storage facility.

RESOLUTION BOOK NO. 26 – PAGE 328

E. RESOLUTION NO. 01-49 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ASPHALT UNLIMITED OF ASHEVILLE, N.C., TO MILL STREETS LOCATED IN THE CENTRAL BUSINESS DISTRICT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Asphalt Unlimited of Asheville, N.C. to mill streets located in the Central Business District.

Street milling is the removal of old surface material to reduce street elevation and allow new material to match existing infrastructure, such as curbs and storm drains.

The City is in need of a contractor to provide milling services for streets in the downtown area. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for paving and resurfacing services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Asphalt Unlimited Company	100%	Yes	Yes	$2.50 a square yard
Slurry Pavers Inc.	No Bid	No Bid	No Bid	No Bid
Apac	No Bid	No Bid	No Bid	No Bid

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into a contract with Asphalt Unlimited of Asheville Inc.

RESOLUTION BOOK NO. 26 – PAGE 329

F. ORDINANCE NO. 2800 - BUDGET AMENDMENT TO APPROPRIATE FEDERAL GRANT AND LOCAL FUNDS TO THE POLICE DEPARTMENT BUDGET TO REDUCE CRIME AND IMPROVE PUBLIC SAFETY

Summary: The consideration of a budget amendment, in the amount of $139,346, to appropriate federal grant and local funds to the Police Department budget to reduce crime and improve public safety.

City Council authorized the City Manager to submit a grant application to the US Department of Justice, Local Law Enforcement Block Grant Program (LLEBG) on August 8, 2000 (Resolution No. 00-141). The grant in the amount of $125,411 has been awarded. A local match of $13,935 is required. The source of the local match is 110 0603 483 5315.

Under the conditions of the grant, funds are to be used to reduce crime and improve public safety.

City staff recommends Council adopt the budget amendment.

ORDINANCE BOOK NO. 19 – PAGE 123

G. **MOTION SETTING A PUBLIC HEARING ON APRIL 24, 2001, FOR THE 2001 CONSOLIDATED ACTION PLAN**

H. **MOTION SETTING A PUBLIC HEARING ON MAY 8, 2001, TO EXTEND THE CITY'S EXTRATERRITORIAL JURISDICTION IN THE FAIRWAY GATEWAY AREA, THE LONG SHOALS ROAD GATEWAY AREA, AND AN AREA AROUND SARDIS ROAD HAVING INDUSTRIAL POTENTIAL** – This item was pulled from the Consent Agenda for further discussion.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Field moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR FURTHER DISCUSSION

MOTION SETTING A PUBLIC HEARING ON MAY 8, 2001, TO EXTEND THE CITY'S EXTRATERRITORIAL JURISDICTION IN THE FAIRWAY GATEWAY AREA, THE LONG SHOALS ROAD GATEWAY AREA, AND AN AREA AROUND SARDIS ROAD HAVING INDUSTRIAL POTENTIAL

Councilman Peterson felt that it would be a good idea to have a meeting in these three areas prior to the actual zoning of the areas so that City staff can get input from those residents on how those areas should be zoned. Mr. Green said that they would try to have a community meeting scheduled prior to the assigning the zoning, but it will really depend on the scheduling of the meetings regarding the comprehensive plan.

Councilwoman Field moved to set a public hearing on May 8, 2001, to extend the City's extraterritorial jurisdiction in the Fairway gateway area, the Long Shoals Road gateway area, and an area around Sardis Road having industrial potential. This motion was seconded by Councilman Worley and carried unanimously.

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF THE AREA KNOWN AS OAKBROOK, PHASE 2, OF BILTMORE PARK LOCATED AT WHITE ASH DRIVE TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT**

ORDINANCE NO. 2801 - ORDINANCE TO ZONE THE AREA KNOWN AS OAKBROOK, PHASE 2, OF BILTMORE PARK LOCATED AT WHITE ASH DRIVE TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Sitnick opened the public hearing at 5:15 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to zone Oakbrook, Phase 2, of Biltmore Park located at White Ash Drive to RS-8 Residential Single-Family High Density District. This public hearing was legally advertised on March 30 and April 6, 2001.

The Planning and Zoning Commission, at their March 7, 2001, meeting, reviewed and recommended zoning the recently annexed parcels known Oakbrook Phase 2 as RS-8 Residential Single-Family High Density District. The property is located in the Biltmore Park development on Schenck Parkway, White Ash Drive and Dianthus Drive. This is a 24 acre area, consisting of 41 parcels, platted and being developed for a single-family residential subdivision. The adjacent property lies within the Biltmore Park development and is being developed with a mixture of uses.

The RS-8 District is designed to establish a high density residential area for single family dwellings where adequate infrastructure is in place to support the density and to stabilize and protect the residential character of existing neighborhoods while providing for a balanced mix of uses compatible with residential uses. Maximum density is 8 units per acre.

The RS-8 zoning will allow for higher density residential development in accordance with the Biltmore Park master plan, and the dimensions of the platted lots.

The Planning and Development staff recommends approval of the initial zoning of Oakbrook, Phase 2, as RS-8.

Upon inquiry of Councilman Worley, Mr. Benson said he would check to see if the common area was included in the legal advertisement and if not, would be zoned when the adjacent area is zoned.

Mayor Sitnick closed the public hearing at 5:18 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2801 including the extra lot, if it was advertised. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 125

B. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF THE AREA KNOWN AS BURNSIDE, PHASE 4, OF BILTMORE PARK LOCATED AT WHITE ASH DRIVE TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 2802 - ORDINANCE TO ZONE THE AREA KNOWN AS BURNSIDE, PHASE 4, OF BILTMORE PARK LOCATED AT WHITE ASH DRIVE TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT

Mayor Sitnick opened the public hearing at 5:19 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to zone Burnside, Phase 4, of Biltmore Park located at White Ash Drive to RS-4 Residential Single-Family

Medium Density District. This public hearing was legally advertised on March 30 and April 6, 2001.

The Planning and Zoning Commission, at their March 7, 2001, meeting, reviewed and recommended zoning the recently annexed parcels known Burnside, Phase 4 as RS-4 Residential Single-Family Medium Density District. The property is located in the Biltmore Park development on White Ash Drive. This is an 11.4 acre area, consisting of 12 parcels, platted and being developed for a single-family residential subdivision. The adjacent property lies within the Biltmore Park development and is being developed with a mixture of uses.

The RS-4 District is designed to establish a medium density residential area for single family dwellings where adequate infrastructure is in place to support the density and to stabilize and protect the residential character of existing neighborhoods while providing for a balanced mix of uses compatible with residential uses. Maximum density is 4 units per acre.

The RS-4 zoning will allow for medium density residential development in accordance with the Biltmore Park master plan, and the dimensions of the platted lots.

The Planning and Development staff recommends approval of the initial zoning of Burnside, Phase 4 as RS-4.

Mayor Sitnick closed the public hearing at 5:21 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2802. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 127

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT AT THE CORNER OF CHARLOTTE STREET AND EDWIN PLACE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:25 p.m.

Chief Planner Gerald Green submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), and City Exhibit 3 (Staff Report dated March 27, 2001), City Exhibit 4 (Large Site Plans), City Exhibit 5 (Staff Report dated April 10, 2001), and City Exhibit 6 (Charlotte Street Corridor Plan). This public hearing was advertised on March 16 and 23, 2001.

Mr. Green then said that this is the consideration of issuance of a conditional use permit for a parking lot to be located on property zoned RS-4 Residential Single Family Medium Density

District at the intersection of Charlotte Street and Edwin Place. The subject property contains 0.32 acres.

The applicants (Mr. and Mrs. Reiser) are requesting a conditional use permit (CUP) for an 11 space parking lot to be located on a vacant lot located at the corner of Charlotte Street and Edwin Place. (City Exhibit 7) Parking spaces in the proposed lot will be used by the businesses and offices located in the adjacent mixed use building, which has been recently renovated. In addition, the applicants have agreed to permit the parking lot to be used by the church located just north of the site. The project site is located at the end of the commercial section of Charlotte Street and is not within the Charlotte Street Transition Overlay District, although it is located within the Charlotte Street Corridor Plan study area. The approval of this ancillary use in this residential district holds the line on commercial intrusion into the residential zone. The site meets all the location requirements for ancillary uses in residential districts. Approximately 5,000 square feet of the site will be graded for the construction of the parking area. (City Exhibit 8) The parking area itself will be approximately 3,700 square feet. The site plans call for the parking area to be graveled in an effort to reduce run-off and to minimize the aesthetic impacts of the project. There is a ravine that runs east to west lot making access directly to this site from Lennox Street or from the parking lot behind the existing building difficult, if not impossible. The ravine also precludes the opportunity to move the parking area closer to the existing building. A number of trees and shrubs will be planted to serve as street trees and to buffer the site from adjacent uses. (City Exhibit 9) (City Exhibit 10) Low intensity bollard lighting will be used to minimize light intrusion on adjacent properties. The proposed hours of operation for the parking lot are 7 a.m. to 9 p.m. The major challenge with the proposed use is the traffic at the intersection of Charlotte Street and Edwin Place.

In developing the lot, the applicants worked with the City Traffic Engineer to identify the best traffic routing for the lot. As a result of working with the City Traffic Engineer and in order to minimize the impacts of the proposed parking lot on the existing traffic, the flow of traffic in the lot will be one way (entrance on Charlotte Street and exit on Edwin Place), with the exit being right turn only. He explained some of the reasons for this traffic flow pattern. No Traffic Impact Analysis was required for this project due to the small scale of the parking lot and to the fact that the parking lot will not attract additional traffic; it will only provide a safe parking area for customers and clients of businesses already located in the adjacent building.

The parking for the adjacent mixed use building currently has 4 spaces to the west of the building on Lennox Street, 4-5 spaces behind the building and customers and clients use on-street parking on both the west and east side of Charlotte Street.

The site location at the intersection of Charlotte Street and Edwin Place, which has remained vacant for more than 20 years, poses challenges for determining the best land use. The lot serves as the point of transition from the commercial area to the residential/institutional area. Although there are residential uses in the area, there are also commercial and institutional uses located on the adjacent corners of the intersection. It is difficult to expect this lot to remain vacant forever or to have a single family home developed on it. Under this proposal, and as stipulated by the ancillary use standards, the zoning of the property will not change from its current RS-4 designation. Until such time as residential or other appropriate development of the lot is proposed, it is appropriate to allow this small parking lot.

The Technical Review Committee (TRC), who took action to approve it with conditions, reviewed this project for compliance with the technical requirements of the Unified Development Ordinance (UDO). The site plan has been revised to meet all the conditions except (1) Submittal of grading and stormwater management plans (must be submitted prior to issuance of any grading or construction permits); and (2) Driveway permit must be approved for each proposed driveway (to be obtained prior to construction of driveways). Both of those conditions would be met after a CUP is approved for the project.

The site plan submitted and the conditions identified by City staff assure that the impacts of the proposed project on the surrounding uses are mitigated.

The findings that must be made by City Council in the issuance of a CUP for the project are listed below with staff analysis for each standard (City Exhibit 11).

1. The proposed use or development of the land will not materially endanger the public health and safety. The proposed parking lot will provide a safe off-street parking area for clients and customers of the uses located in the adjacent mixed-use building. Both pedestrian and vehicular safety will be enhanced by the construction of the proposed parking lot.
2. The proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region. The proposed parking lot will assure the successful operation of the adjacent mixed-use community businesses by providing adequate and safe off-street parking for customers and clients. The parking area will also be used by members of a neighboring church, lessening the amount of on-street parking in the area on Sunday mornings.
3. The proposed use or development of the land will not substantially injure the value of adjoining or abutting property. A parking lot at this location, constructed as designed, will not substantially injure the value of adjacent or abutting property. Similar parking lots in the area, including those at the Unitarian Church and the Manor Inn, have not injured the value of adjacent or abutting properties.
4. The proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. The proposed 11-space parking lot will cover less than 5,000 square feet of the 0.32-acre lot on which it is proposed to be located. A similarly sized portion of the property will be used for landscaping and buffering. Other parking lots in the area, including those at the Unitarian Church and the Manor Inn, are similarly sized or larger. The applicant is proposing a graveled parking lot in order to assure that it is in harmony with the character of the area.
5. The proposed use or development of the land will generally conform with comprehensive plan and other official plans adopted by the City. The Charlotte Street Corridor Plan, adopted in 1999, established several goals for the development of the corridor. Among these goals were the encouragement of shared parking, promoting mixed uses, and improving pedestrian safety. The proposed parking lot furthers the accomplishment of these goals.
6. The proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. All services are available at this location, as confirmed during the review of the proposed development by the TRC.
7. The proposed use will not cause undue traffic congestion or create a traffic hazard. The proposed parking lot will not create traffic; it will provide a safe location for off-street parking for the customers and clients of businesses and offices already located in the adjacent mixed-use building, as well as for members of the neighboring church. In developing plans for the parking lot, the design professional worked closely with the City's Traffic Engineer. The traffic flow and location of the driveways were identified with the input of the City's Traffic Engineer. Plans for the parking lot were reviewed and approved by the City's Traffic Engineer, who has determined that it will not create a traffic problem. Recent traffic counts in this area are:

    - Intersection of Charlotte Street and Edwin Place (AM Peak Hour) – 1200
    - Intersection of Charlotte Street and Edwin Place (PM Peak Hour) – 1300
    - Intersection of Charlotte Street and Edwin Place – 13,000 vehicles per day

- Charlotte Street south of Hillside Street – 18,623 vehicles per day
- Charlotte Street north of Edwin Place – 5,000 vehicles per day

In accordance with the Charlotte Street Corridor Plan, a traffic study for the section of Charlotte Street from the I-240 interchange north is currently underway. Although the major focus of this study is the lane configuration on this section of the street, we have asked the consultants doing the study to carefully examine the intersection of Charlotte Street and Edwin Place, and the impact of the parking lot on the intersection, as part of the study. The study, which will be completed in 60 to 90 days, may provide additional information regarding the best design of the parking lot.

Under the ancillary use standards, no further expansion is possible. The residential zoning of this parcel reserves the parcel for residential use at some point in the future. Although surface parking is not the highest and best use of the property, allowing it in the interim is an appropriate use to provide transition between the commercial uses and the residential/ institutional uses. This plan identified several goals for the future development of the corridor, among them the use of shared parking, using parking as a transition between commercial and residential areas, and promoting mixed use development. The approval of the CUP for the proposed project would further the accomplishment of all these goals. In addition, this parking lot helps to accomplish some of the policies set forth in the City's Smart Growth Policy, e.g. encouraging mixed uses, encouraging neighborhood scaled community businesses, and providing businesses which can be used by surrounding residential uses near those residential uses. Conditions recommended for the approval of the CUP for this project will ensure that the impacts on surrounding property owners are mitigated.

At the March 27, 2001, meeting, the City Council referred this matter to the Planning and Zoning Commission (Commission) for their review and recommendation. The Commission reviewed the project, heard comments from staff and the public, and discussed the proposed project. At the Commission meeting, 30 people spoke, not counting Ms. Reiser and her representative, Clay Mooney. Of these, 16 were opposed to the request, 13 were in support and one person simply asked a question.

Those who opposed the project cited several issues, some being, but are not limited to: traffic safety; negative impacts on property values; parking lot does not conform to the Charlotte Street Small Area Plan; project is incompatible with the neighborhood; on-street parking is available nearby on Edwin Place; the loss of open space; Conditional Use Standards No. 2 and 4 are not met; a drop-off zone should be created to address the child safety issue; a crosswalk should be provided on the east side of Charlotte Street; the parking lot design will force pedestrians to use the driveway apron to access the sidewalk creating a safety problem; noise, trash, lighting and other negative impacts on the immediately-adjoining property owner; the Reisers were unwilling to accommodate neighborhood concerns; and more traffic information is needed before making a decision.

Mr. Green then said that persons speaking in favor of the parking lot raised the following points, some being, but are not limited to: the high quality of the associated building rehabilitation project ensures that the design quality of the parking lot will also be very good; the quality and extent of the proposed landscaping is several times greater than other nearby projects; the parking lot will increase safety for visitors to the Reisers' building; increased landscaping will improve the harmony of the lot with the surrounding land uses; property values will not be negatively impacted; the parking lot supports a mixed use development as called for in City Smart Growth policies and in the Charlotte Street Small Area Plan; a much-needed handicapped parking space will be provided; and the parking lot addresses an historic parking problem.

At the Commission hearing, the applicant and her representative made the following comments in addition to those raised above in support of the project: the parking lot access design is acceptable to the City Traffic Engineer; runoff will be carefully controlled through a swale system; grading will be minimized to create a level parking lot at the same grade as the adjoining sidewalk; unloading of musical instruments and children from on-street parking spaces is dangerous; creation of a drop-off zone on Charlotte Street would require the elimination of several on-street parking spaces, further compounding the overall parking problem; lighting and buffering will be designed to minimize impacts on adjoining properties; and the owners are willing to record a deed restriction that will limit use of the subject property to residential use and/or the parking lot in perpetuity.

After over five hours of public comment and deliberation, the Commission voted 2-2 on a motion to approve the proposed parking lot subject to staff recommendations, plus consideration of the traffic study. In accordance with the Commission's rules of procedure, a tie vote results in the defeat of the motion so the formal recommendation to the City Council from the Commission is to deny the request.

The Commission deliberation centered on the following issues. Those supporting the motion to approve felt the seven approval standards had been met and that, in general, the parking lot provided a safer environment for persons visiting the Reisers' building, especially handicapped persons and children. Even if the project did not improve the traffic situation in this area, there was no evidence that the lot would exacerbate it. Those opposed to the motion to approve felt that traffic safety issues were not adequately accommodated by the site design and that loss of this corner site for other development (primarily residential) was significant in light of the other concerns. There was a general desire on the part of the Commission to see if the results of the impending Charlotte Street Traffic Study would create changes in the street and intersection design and operational characteristics that would improve the overall safety of the parking lot access from both Charlotte Street and Edwin Place.

As a result of comments made at the Commission meeting, staff identified several possible additional conditions for Council consideration:

- The hours of parking lot operation shall be between 7:00 a.m. and 9:00 p.m., seven days a week (lights off during non-operating hours).
- Edging material to protect the landscaping and the driveway edge shall be specified by the applicant and, after approval by the City, shall be installed by the applicant.
- Preparation of the subgrade for the gravel parking lot shall be as substantial as that provided in City specifications and standards for paved lots.
- Maintenance of the gravel parking lot shall be consistent with a plan developed by the applicant and acceptable to the City Engineer.
- The applicant shall dedicate an easement over the northeast portion of the site to allow the installation of a gateway monument or other feature to be designed by the City with input from the applicant, the neighborhood and the Historic Resources Commission; the applicant shall not be responsible for the construction, installation or maintenance of the gateway feature except to the degree desired by the applicant in his/her sole discretion.
- If consistent with applicable traffic engineering standards, and if otherwise acceptable to the City (following the traffic study), a median shall be constructed on Edwin Place to eliminate left turning traffic exiting the parking lot; the median is to be constructed at the applicants' expense.
- A pedestrian walkway shall be constructed through the parking lot to provide an alternative access point to the sidewalk in addition to the paved driveway apron.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council issue the CUP for an ancillary use (parking lot) to be located at 246 Charlotte Street with the following conditions:

1. Submittal of grading and stormwater management plans (must be submitted prior to issuance of any grading or construction permits).
2. Driveway permit must be approved for each proposed driveway (to be obtained prior to construction of driveways).
3. The hours of parking lot operation shall be between 7:00 a.m. and 9:00 p.m., seven days a week (lights off during non-operating hours).
4. Edging material to protect the landscaping and the driveway edge shall be specified by the applicant and, after approval by the City, shall be installed by the applicant.
5. Preparation of the subgrade for the gravel parking lot shall be as substantial as that provided in City specifications and standards for paved lots.
6. Maintenance of the gravel parking lot shall be consistent with a plan developed by the applicant and acceptable to the City Engineer.
7. The applicant shall dedicate an easement over the northeast portion of the site to allow the installation of a gateway monument or other feature to be designed by the City with input from the applicant, the neighborhood and the Historic Resources Commission; the applicant shall not be responsible for the construction, installation or maintenance of the gateway feature except to the degree desired by the applicant in his/her sole discretion.
8. If consistent with applicable traffic engineering standards, and if otherwise acceptable to the City (following the traffic study), a median shall be constructed on Edwin Place to eliminate left turning traffic exiting the parking lot; the median is to be constructed at the applicants' expense.
9. A pedestrian walkway shall be constructed through the parking lot to provide an alternative access point to the sidewalk in addition to the paved driveway apron.

Vice-Mayor Cloninger asked if the Charlotte Street traffic study would have the potential for coming up with alternative means of improving the parking situation for this building. Mr. Green said that even though the study was not originally designed to address this issue, City staff has asked the consultants to focus on this area and to study the parking lot and it's access points as part of the study. One of the items addressed in the plan will be a need to look at the traffic flow on Charlotte Street with an assessment on whether reducing the number of lanes, creating on-street parking, or other traffic calming measures would be appropriate.

Upon inquiry of Councilwoman Bellamy, Mr. Green explained where the current on-street parking (City Exhibit 7) exits around the building. In addition, Edwin Place allows on-street parking.

Councilwoman Bellamy asked how the parking lot would alleviate on-street parking. (City Exhibit 9) Mr. Green said that the most direct manner in which the parking lot would help the on-street parking problem is by providing alternative spaces for people loading and unloading children and instruments. Currently that is done on the street, but if the parking lot were constructed, they could park in the parking lot to load and unload.

Councilwoman Bellamy stated that from personal experience, she has witnessed people parking on Edwin Street all the way up to the stop sign on Charlotte Street. She asked how that would be addressed if the right-turn out exit was constructed on Edwin Street. Mr. Green said that the City would install a "No Parking Here to Corner" sign to eliminate people from parking in the area from the exit on Edwin Street up to Charlotte Street.

Upon inquiry of Councilwoman Bellamy, Mr. Green explained the sidewalk design on Edwin Street (City Exhibit 10) with the right-turn out exit design.

When Mayor Sitnick asked about a tree recently cut down on Edwin Street in the proximity vicinity of the proposed right- turn out exit, Mr. Green responded that the City's Arborist examined the tree, found it was not healthy and had the Public Works Department cut the tree down. He said that the tree was cut down before the applicants submitted their application for a CUP.

With regard to site distance with the current trees and new trees on Edwin Street, Mr. Green said that the two existing trees are mature trees and their crown is up high enough that it does not pose a site distance problem.

Councilman Hay noted that in the Charlotte Street Corridor Plan (Plan) (City Exhibit 6) this intersection is identified as a gateway. Mr. Green said that "gateway" is used in that Plan and several other small area plans to denote the entrance to neighborhood or the entrance to a certain commercial district. As an attempt to acknowledge that as an entrance to the Grove Park neighborhood, one of the conditions staff has recommended is that the applicant dedicate a corner for some appropriate gateway identification.

Councilman Hay said that the Plan states that the transition at Edwin Place and Charlotte Street "clearly transitions into a predominantly residential area. This transition should be articulated by creating landscaped medians on Edwin Place and Charlotte Street. The creation of medians would also serve to better channelize traffic at this location." He wondered if it is a specific part of the Plan that there be landscaped medians on Edwin Place and Charlotte Street. Mr. Green said that will be studied more closely as part of the traffic study that has just been initiated to determine if those would increase safety, where they should be located, the size, etc. This new traffic study will have to confirm that the medians will not create a less safe environment by putting the medians in. If the study indicates that the medians will impede the traffic flow, the Plan would have to be amended.

City Attorney Oast reminded Council that they are required to make its decision on the basis of the information that they receive at this public hearing. If a Council member has any special knowledge outside the context of this public hearing, other than visiting the site, they should divulge that at this time. All Council members stated that they had visited the site, and have received numerous faxes, e-mails and letters. Mayor Sitnick noted that she has recently moved out of the area which she lived for 16 years and is very familiar with the property in question. Councilwoman Field said that she attended a social in which Mrs. Reiser was attending also, however, they were careful not to talk about the proposed CUP.

Councilwoman Bellamy said that she received several phone calls regarding the Commission vote. One of the Commission members said they would not vote because they had a conflict. However, that Commission member did end up voting and created the tie vote. Some residents in the community felt that was not fair. City Attorney Oast responded that he did not hear anyone mention that they would not vote because of a conflict. One Commission member did appear at the TRC meeting and expressed some concern, but in his opinion, that did not disqualify that Commission member from participating in the discussion at the Commission's meeting.

Mr. Clay Mooney, landscape architect with Design Associates in Asheville representing the Reisers on this project, said that they are requesting a CUP to allow an 11 space gravel surface parking lot on a residentially zoned lot at the corner of Charlotte Street and Edwin Place. The property is just outside the Charlotte Street Transition Overlay District, they feel that the proposed parking lot will address, in a positive way, some of the goals of the Charlotte Street Corridor Plan (Plan). Shared parking which would serve multiple uses and users is encouraged in the Plan. The parking lot would serve mixed use neighborhood businesses which is another goal in the Plan. The parking lot would also be made available to other adjacent users, such as the church which has a severe parking shortage. The plans for the parking lot also incorporate bicycle parking and other pedestrian amenities, e.g. benches, etc. The parking lot also provides a handicapped parking space and access to the building, which presently doesn't exist. From an appearance standpoint, you only have to look at the level of quality and detail that the Reisers have put into the renovation of their building to see the degree of importance that they put on aesthetics. He presented a before and after photograph of the building. (Applicant Exhibit 1) The construction of the parking lot will be no different. The parking lot will be buffered from the adjacent property owner by a 20-foot wide buffer strip, as required by the UDO, and a 10-foot planting strip between the parking lot and Charlotte Street and Edwin Place also required by the UDO and recommended by the Plan. A minimum of 82 trees and shrubs will be installed to meet these buffering, screening and vehicular use area requirements. There are existing plant materials, trees and shrubs within the buffer area which will remain. He presented into evidence 14 site photographs which show the existing plant materials (Applicant Exhibit 2). The quantities of plant material shown for the buffer area were calculated as if no plants existed there. The UDO allows for a reduction in buffer planting if existing vegetation is preserved within the buffer area. To maximize the buffering and visual separation between the parking lot and the neighbors, they have chosen not to take advantage of this option. In effect the buffer plantings significantly exceeds the requirements of the UDO. The plant materials specified are in keeping with the quality and character of the neighborhood. The six large trees which will be removed for this project are black locust. Black locust trees are not listed in the existing City of Asheville Recommended Plant Material List, nor are they listed on the draft copy of the new expanded Recommended Plant Material List. The proposed hours of operation are from 7:00 a.m. to 9:00 p.m. Lighting for the parking lot will be approximately four feet in height. This is in an effort to minimize lighting on the adjacent property owners and to provide a more pedestrian and residential feel in character. Surfacing for the parking lot is gravel with a handicapped parking space and asphalt aprons at the entrance and exit. This is being done, as called for in the Plan, to minimize both large areas of asphalt and storm runoff volume. The asphalt aprons were requested by the City Traffic Engineer to minimize travel from the parking lot, migrating to the sidewalks and to the street. With regard to traffic and parking issues, they feel that a parking lot itself does not generate traffic -- they accommodate traffic from the businesses that occupy the building. In this case, the existing building dates back to the late 1920's. Of the businesses within the building, one has been there since 1975. The Music School, which utilizes the most square footage, has been there since 1996. The other three tenants are relatively new dating back to June and September of 2000. The building totals 7,900 square feet has 8 off-street parking spaces behind the building. There are 8 on-street public parallel parking spaces in front and beside the building on Charlotte and Lennox Street. There exists no handicapped parking. Across Charlotte Street is an unstripped, on-street parking area which is actually private property and intended for use by the adjacent businesses in the Manor office complex. However, it is used by everyone, including patrons to the Reisers' building and the Jewish Community Center. If a new building were to be constructed of the same square footage as the Reisers' building, within this same zoning district, it would be required by UDO standards, to have a minimum number of 19 off-street parking spaces. This figure includes a 25% reduction in the number of required spaces when the project is located within the CB-1 zoning district. No further provision is allowed within the UDO to reduce the required number of spaces, whether or not on-street parking exists. The proposed 11 parking spaces, plus the existing 8 parking spaces behind the building total 19 spaces -- precisely the minimum number of spaces the UDO requires for a building this size. This proposed parking lot is intended to alleviate some of the existing need for parking along Charlotte Street and also provide a safer means to access the Reisers' building, instead of parallel parking or having to cross Charlotte Street. Pedestrian safety was an important issue and goal in the Plan and we feel that this parking lot will help that situation. The Reisers' have been accused of not compromising with opponents of this project. The compromises they have been offered were the purchase of the lot and free legal services for the dedication of the lot as a conservation easement. Neither compromise offer addressed the Reisers' need for additional parking spaces to support the businesses within the building. To the contrary, the offered compromises were no parking area at all. Another discussed compromise was the installation of additional buffer plantings beside and behind the Van Buskirk residence, however, no further discussions regarding a specific request or amount was ever received from the Van Buskirks. During the preliminary design phase of the project, there were several compromises that the Reisers chose prior to the plans ever being submitted. The original number of parking spaces was 13, which was reduced to 11 in order to provide reduced impact to the site as well as provide better circulation. Gravel surfacing was chosen over asphalt to minimize visual and stormwater impacts to the area and available buffer credits were not utilized as they could have been. Another area of criticism for the project, particularly during the Planning & Zoning Commission meeting, was that the parking lot was designed to maximize this site and therefore out of scale with the surrounding area. The parking areas and sidewalks, as designed and submitted, utilized 32.2% of the 0.32 acre lot. In contrast, the amount of area required by the UDO for the 20-foot buffer and 10-foot wide planting strips along Charlotte Street and Edwin Place is 38.9% of the lot. Even portions of the remaining 17% of the lot received plantings to comply with requirements of the UDO. It is clear by these figures that the criticism regarding maximizing the site and the project being out of scale are unfounded. In summary, the key issues regarding the development of this parking lot are the zoning of this property will not change with the construction of this lot, it will remain an RS-4 zoned lot. In fact, the owners are willing to record a deed restriction that will limit the use of the property to residential use and/or the parking lot in perpetuity. The proposed parking spaces are needed to support the continued viability of mixed neighborhood-serving businesses that will also be available for shared parking, both of which are important components of smart growth and the Plan. The parking lot would serve as an appropriate transition use between commercial and residential uses. The lot is designed to be as unobtrusive as possible, particularly with respect to paving, runoff, lighting and landscaping. The lot will have a minimal impact with respect to increased traffic. The traffic flow pattern for the lot, as well as the entrance and exit configurations, were determined by two consultation meetings with the City Traffic Engineer. The parking lot area will afford increase safety to patrons of these neighborhood businesses who will be able to park there and not have to parallel park or to cross Charlotte Street. This is particularly important to patrons of the Music School, many of which have to cross Charlotte Street with their children to access the building. The landscaping, particularly the buffer, exceeds the minimum requirements of the UDO. The area required for UDO buffer and landscape strips exceeds the area of the parking lot and the sidewalk for the project. They comply and meet all of the City of Asheville's conditional use standards. There is no building on Charlotte Street that compares with the Reisers' building from a construction quality and detailing standpoint. In fact, this is the first building renovation or new construction project on Charlotte Street since the adoption of the Plan. This is an opportunity to provide a small parking area which will be attractively landscaped, sensitively lit, be pedestrian and amenity friendly, and minimizes it's impact from paving and runoff. Most importantly, we feel it addresses and exemplifies many of the goals of the Plan to the degree that it can be looked upon as the benchmark for future development and renovation projects on Charlotte Street. They request that they concur with the findings of the TRC and the recommendation of Planning & Development staff for approval of this CUP request.

Upon inquiry of Councilman Worley, Mr. Mooney said that the heaviest times of day that would generate the highest use of the parking lot would be approximately 3:30 p.m. to 7:00 p.m.

When Councilwoman Field asked about the dirt compaction on the lot, Mr. Mooney said that there will be very little water seeping through it so that you don't really get the penetration for a pervious surface. Mr. Mooney said that a concern was raised that the parking lot would become a mud hole. He felt that issue is more addressed with maintenance than with construction. However, the quickest way to assure that it would not become a mud hole, aside from maintenance, would be to compact it, as we would if it was a paved lot. He said that he would be happy to design the parking lot to be as previous as it can be as an effort to alleviate that concern.

Councilman Peterson asked if the gully adjacent to the building could be filled in for access. Mr. Mooney said that was looked at briefly, however, there is a 48-inch culvert with flowing water at all times. There would be substantial cost and issues regarding the piping of that. There is also an existing 12-inch sanitary sewer line that runs adjacent to that which could be potentially impacted. He said the grade change between those two will facilitate the extent of grading to such a degree that the potential would exist for construction of retaining walls and it was felt that that would be a more obtrusive eyesore than the design as submitted.

The following individuals spoke in favor of the proposed parking lot for several reasons, some being, but are not limited to: the high quality of the Reisers' building they have renovated ensures that the design quality of the parking lot will also be of high quality; the proposed area now is a ditch and with landscaping the area, it will almost look like a park; this area, after designed, will be a beautiful landscaped parking lot; over the years this lot has collected trash; dog-owners let their dogs defecate on the lot; parents with children trying to cross Charlotte Street need a safe place to load and unload; the parking lot complies with all seven conditional use standards; the owners should be praised in their willingness to take an eyesore lot and make it a beautiful improvement to the neighborhood; the apartment parking lots in the area have not hurt any of the property values in the area as evidenced by the fact that tax values constantly go up; the development of this lot will not have a negative impact on property values; this is an ideal use of this property since there needs to be development of mixed uses; property has been scrutinized at least 6 times by the professional City staff and it continues to be favorably approved by them; with no less than 15 parking lots on 4 streets within the area and none of them meeting the UDO standards, there has been no ill effect on property values because of those lots; people are concerned about the aesthetic value of the parking lot should realize that between 5 p.m. and 8:00 a.m. there is no less than 120 cars that are parked in the area on the streets and in front yards; the UDO standards are so good that the lot will be 250% better than the Manor across the street and at least 5 times better than all five parking lots surrounding this lot in the neighborhood; this will be the garden spot of the neighborhood; this parking lot will provide safety to children, elderly, handicapped and citizens of the community every day of the week; the Reisers have provided a sensitive solution without cost to anyone; parking is needed for that area; Reisers have been good custodians and caretakers of all their property; parking lot will be a beautiful gateway to the neighborhood; the parking lot will not create more traffic or contribute to it – but it will do the opposite; tenants and clientele of the Reisers' building need safe and accessible parking; the parking lot will take 11 cars off the street and will be safer for the students in the Music School; tenants of the Reisers' building have had to relocate due to parking problems; there is currently no handicapped parking; retail tenants in the Reiser building especially need to have adequate parking for their customers; some employees in the Reiser building currently have to park at the Jewish Community Center; this kind of renovation is something this community should support; the Neighborhood Association has not taken action to increase safety in the area by opposing the Grove Park Inn expansions or pursuing sidewalks, crosswalks, traffic signals, buried power lines, speed bumps, better law enforcement, meaningful traffic reduction, or any other improvement to the quality of life; and the Reisers could sell the property and who knows what could be built on that corner:

Mr. Chris Peterson, resident on Edwin Place
Ms. Dotty Stickney, area resident
Mr. Bob Long Jr., resident on Kimberly Avenue
Mr. Crawford Murphy, resident on Macon Avenue
Ms. Sherry Davis, speaking on behalf of elderly mother who lives in neighborhood
Mr. Bruce McTaggart, teacher at the Asheville Music School (Applicant Exhibit 3)
Ms. Anne Coombs, owner of the Asheville Music School
Dr. Thomas Burger, area resident
Ms. Norma Jean Snyder, owner Manor Gate Salon
Ms. Bee Seaburg, resident on Club Knoll Road and owner of The Gardeners Corner

Mr. Thurmond Williams, owner of an executive search firm that is a tenant of the Reisers and area resident

City Attorney Oast reminded City Council that some of the information Council has heard is hearsay, is not competent evidence. He cautioned City Council to base their decision on information that is not hearsay evidence. Also, any consideration of who the owners are of the property should not be taken into account because the property can change hands and the fact that the Reisers currently own it will be irrelevant.

Ms. Wanda Adams, President of the Grove Park-Sunset Association (Neighborhood Exhibits 1 and 2), requested a little more time than 10 minutes to address Council. Mayor Sitnick granted her request. Ms. Adams noted that the UDO states that City Council shall not approve a conditional use application unless all of the seven conditional use standards are met. If just one of the standards is not met, then City Council should not approve the conditional use application. This proposed parking lot does not meet six of the seven standards, therefore, City Council should not approve this request. The developer's plan does not meet Condition Nos. 1 or 7.

Ms. Adams said that with regard to Standard No. 7, the intersection of Charlotte Street and Edwin Place is already a congested corner where traffic backs up. The City's Traffic Engineer, Mr. Moule, provided her with a traffic count performed in 1999 at 105 Edwin Place (just down the street from the proposed curb-cut) noting that the peak traffic count was close to 10,000 cars per day. At this meeting she realized another traffic count has been performed showing 13,000 vehicles per day. This problem has not gotten better in the last two years. The parking lot plan has a one-way entrance from Charlotte Street and a one-way exit onto Edwin Place which would only add to this congestion and create a serious safety problem. The one-way exit onto Edwin Place is too close to the intersection not to cause safety problems. As noted in the minutes of the April 4, 2001, Planning & Zoning Commission (Commission) minutes, the City regulations require a distance of 40 feet from the tangent line of the intersection to the tangent line of the exit. However, the Planning staff has approved this plan with only 27.5 feet between those lines. After measuring these distances, the curb-cut is barely more than a car's length from the stop sign. Mr. Moule stated at the Commission meeting that he can grant variances to the City's traffic standards, however, Section 3.02 of the Asheville Standard Specification and Details Manual states "Driveways close to street intersections shall be at least 40 feet from the point of tangency of the radius curvature of the intersection street" and does not give the Traffic Engineer the right to vary this requirement. She questioned why this plan was approved by City staff if it did not meet City standards. She asked how can they feel assured that City staff has not disregarded other City regulations in approving this conditional use application. Also, if City staff did not require the developers to meet City requirements in this situation, how can they rely on them to enforce City regulations regarding the construction and future upkeep of this parking lot. To minimize the traffic hazard caused by the Edwin Place exit, the Engineering Department wants to limit use of this curb-cut for exit only and right-turn only. She feels that once the curb-cut is in place there is no guarantee that drivers will not disregard the sign and enter and exit as they please. The Police Department rarely enforces the existing signs posted along Edwin Place and Charlotte Street, such as the speed limit signs on Edwin Place or the "No Parking" and "No Thru Trucks" signs on Charlotte Street. She didn't feel they would enforce a right-turn only sign at this exit. Drivers will likely turn onto Edwin Place, spot the one-way exit from the parking lot and simply turn across traffic to enter the lot. She felt this curb-cut on Edwin will create a significant traffic hazard. For years residents along Kimberly Avenue and Edwin Place have asked the City to take steps to decrease the heavy traffic flow on these streets for the safety of their children and families. The current safety problems are not going to be corrected by putting 11 parking spaces on this residential lot. She felt that these safety problems could be corrected if Kimberly Avenue and Edwin Place were included in the City's traffic calming project, however, they were not.

Ms. Adams said that with regard to Standard No. 2, the developer's plan does not meet this standard as well. Additional parking is not needed because adequate parking already exists in this area. She drives the area frequently and has witnessed cars parked illegally on the vacant lot while there is plenty of available parking on Edwin Place. The developer and parents that are patrons of the music studio argue that it is dangerous for children to cross the street and that it is necessary to have the parking lot for their safety. It is not necessary for a child to cross a street at this location. All the parents have to do is to parallel park on Edwin Place, on the same side of the street as the commercial building, let the child get out of the car onto the sidewalk and simply walk a short distance to the music studio. The developers of this property overfilled the building with the apparent thought that the City would be sympathetic to this application and not force the use of the available on-street parking. Their use of children's safety as an issue is pretty transparent. The developers are the only ones that have a vested interest in this property being developed as a commercial parking lot.

With regard to Condition No. 3, Ms. Adams stated that this condition as not been met. She felt that if a person is looking to buy a residential home in the Grove Park area, they are not going to buy a house that is next door to a commercial parking lot, unless they are able to get it at a lower price than other available homes in the area. If this conditional use is approved and the property is used as a commercial parking lot for several years, it will be much more likely that a future city council will be pressured to rezone this lot as commercial property. The neighborhood residents are very opposed to this potential commercial creep into the neighborhood. When the Reisers purchased this property and while they were doing renovations on their building and leasing spaces to businesses, they knew it was a split use property with the corner lot zoned residential. The use of the commercial building should have been limited to businesses that could be accommodated by the existing parking spaces. After talking with Ms. Reiser and asking her what use she had planned for the residential lot when she purchased it, Ms. Reiser stated "a parking lot" and that she never had any plans to use the lot as it was zoned at the time of purchase. Developers should not be allowed to buy, build and then plead to change the zoning because they want additional parking to increase the value of their property while decreasing the property value of the adjacent property owner.

Ms. Adams stated that the developer's plan does not meet Standard No. 4. The corner of Charlotte Street and Edwin Place is an entrance to the Grove Park residential neighborhood and Association members are concerned about commercial encroachment and the erosion of the character of the Grove Park area which is listed in the National Registry of Historic Property. The Van Buskirks (adjoining property owners at 2 Edwin Place) have done a wonderful job in restoring and maintaining the William James Jr. House which is listed in the United States Department of Interior's National Register of Historic Places. Not only will there be increased traffic congestion, noise and outdoor lighting next door to their home, but the impervious surface to be created by the gravel and hard surface parking area will likely create stormwater drainage on their property, which is downhill to the proposed parking lot. There are also concerns about increased water drainage into the existing tributary of Reed Creek which flows through a culvert prior to surfacing behind homes on Murdock Avenue. Since the developer of this property is a real estate broker and owner of Appalachian Realty, after improvements are made to the property, it can be sold at a nice profit. Who knows what the next owner would want to do with the property. This also opens the door for a future owner of 2 Edwin Place, who is not neighborhood friendly, to request that the lot be rezoned commercial because it is next to a commercial parking lot. The line that marks where commercial development ends and where the residential neighborhood begins in this area is the edge of this commercial lot. Once this line is breached, where will this commercial encroachment end?

Standard No. 5 has not been met, Ms. Adams stated. Nearly a year has passed since the Charlotte Street Overlay District was adopted by City Council. At that time, Mayor Sitnick had requested that the speed limit reduction and the traffic analysis be performed on Charlotte Street as soon as possible. When Mr. Moule was asked about the progress on this, he stated that it would take at least another 60 days.

Ms. Adams summarized by stating that Council vote to protect the integrity of the neighborhood. More importantly, she requested Council vote for the safety of the children, senior citizens, residents of and visitors to their neighborhood as well as the thousands of people who walk and drive through this intersection on a daily basis by voting "no" to this application.

Ms. Adams entered into the record Neighborhood Exhibit 3, which is an e-mail regarding several inaccuracies in the minutes of the Planning & Zoning Commission meeting of April 4, 2001. She said the minutes are not an accurate representation of the comments from the Commission meeting. Chief Planner Gerald Green responded that the Commission was aware and agreed to having the draft minutes forwarded to City Council for information for this meeting. City Attorney Oast stated that the timeframe of the Commission meeting and this meeting did not permit the Commission to approve the minutes prior to being forwarded to City Council. He also noted that only the Planning & Zoning Commission has the right to correct the minutes.

Mr. Roger James Jr., resident of Albemarle Park said that he was speaking on behalf of Albemarle Park/Manor Grounds neighborhood. Sixty people in his neighborhood have registered their strong opposition to this parking lot and four people were in favor of it. (Neighborhood Exhibit 4) They requested City Council to revisit the ancillary use process as a whole. When Mr. Shuford was asked if the conditional use process was a success, he responded that there have been several recorded success stories for the CUP, however, he indicated that there have been negative results from the ancillary use process. We have a serious question about a person's ability to buy a residential lot and use it for a commercial purpose. He said that six of the seven conditional use standards have not been met. Even if one of the standards have not been met, the City Council must deny the application. The burden rests upon the applicant to show that the application is in compliance with all seven standards. (Neighborhood Exhibit 5).

With regard to Condition No. 1, Mr. James said the parking lot will materially endanger public health and safety by way of increased traffic congestion and accidents, as well as materially endangering a highly traveled pedestrian area.

With regard to Condition No. 7, Mr. James said that the proposed lot will cause undue traffic congestion and create further traffic hazards in a location which already has such congestion and traffic hazards. (Neighborhood Exhibit 6) He explained how this parking lot is a traffic congestion issue (1) lining up of cars at three immediate points; (2) circling affect of cars going through the lot to find, or not find a place to park; (3) addition of two more arteries into an already congested area of 13,000 cars that has three bus stops in the immediate area; and (4) significant number of traffic accidents at this location.

With regard to Condition No. 2, Mr. James stated that Ms. Reiser has stated to him that the parking lot is for the tenants of her building, not for the community. With 38 people working in the Reisers' building, is it not reasonable to assume that the 11 spaces will be filled at the beginning of the day by tenants and employees, leaving no available spaces for customers or clients of the building? This is a temporary business decision on the part of the Reisers but a permanent decision for the neighborhoods.

With regard to Condition No. 3, Mr. James entered into the record Neighborhood Exhibit 7, which is a letter from Randy Guess, State Certified General Real Estate Appraiser, which in part read "I have made an inspection of the site, as well as the plans for the proposed parking lot should the variance be allowed. In my professional opinion, the development of a parking lot such as the proposed lot would have a negative impact on the market value of 2 Edwin Place. ... as to whether the damage to the market value of the property would be 'substantial' ... my experience indicates that the very nature of the purchase of real estate dictates that any negative change in the market value of a property is substantial." There will be increased traffic, increased congestion, lights shining into the homes, and a number of other issues. Who will monitor the parking lot after 9:00 p.m.

With regard to Condition No. 4, Mr. James said there are no other parking lots on Edwin Place, therefore, it is not in keeping with the character, density or scale of the neighborhood.

With regard to Condition No. 5, Mr. James noted the City does have a comprehensive plan for this area – the Charlotte Street Corridor Plan. Neighbors and business owners have spent years coming up with that Plan. The Plan (City Exhibit 6) called for no additional curb cuts; encouraged less dominance by the automobile; promoted pedestrian activity/circulation and alternative means of transportation; and preserving green space.

Mr. James said that two alternative solutions is the 24 spaces of available parking on Edwin Place and the alternative of a turn out for parents to drop off children in front of the building. With regard to the Reisers compromising, the neighborhood has met with the Reisers on three separate occasions. The neighborhood has proposed changing the direction of the lot, reducing the number of spaces, buying the lot under the agreement that the neighborhood would turn it over to the City to be preserved as a greenspace, and placing a conservation easement on the property which the neighborhood would pay for and maintain. Every suggestion made, the Reisers did not acknowledge.

In summary, Mr. James urged City Council to deny the CUP, to revisit the ancillary use process, and to vote in keeping with the Planning & Zoning Commission to deny the permit (Neighborhood Exhibit 8).

The following individuals spoke in opposition of the proposed parking lot for several reasons, some being, but are not limited to: in 1998 there were two accidents, in 1999 there were seven accidents and in 2000 there were five accidents at this intersection – national average at any one intersection on a residential street in the United States is .026 per year and the intersection of Charlotte Street and Edwin Place in 2000 had an accident rate over 192 times higher than the national average; the designated handicapped space will require the driver to back into the entrance way of the lot in order to turn and exit; there are two bus stops in the immediate area which will affect the flow of traffic and hinder visibility; ingress and egress create traffic congestion; the parking lot will constitute a threat to the integrity of the National Register Grove Park Historic District through commercial encroachment; the parking lot or any other commercial use of this site will not be in harmony with the historic or residential character of the Grove Park neighborhood as defined in the original plan, the City of Asheville and the U.S. Dept. of Interior, the parking lot does not conform with the Charlotte Street Corridor Plan in that the Plan calls for open space and encourages green areas or 'pocket parks' to be created in areas with limited development potential; the lot will destroy the only open space from Edwin Place to Charlotte Street which would eliminate a variable from the balance of uses called for in the Charlotte Street Corridor Plan; the Planning & Zoning Commission did not recommend approval of this CUP; parking lot would decrease residential and historical values; residents are still dealing with problems caused by the issuance of a CUP granted in August of 1999 in another area of the city; the Reisers' building resides already in an island of ample, safe and unrestricted parking; pedestrians and vehicular safety are enhanced because this green space is zoned residential and because commercial parking does not exist on this site; there are already 9 marked spaces behind the Reisers' building on Lennox Street, 3 spaces next to the building and 5 cut-out spaces in front of the building for a total of 17 spaces; on Edwin Place there is plenty of unused parking all week long; there is a total of 37 parking spaces within a 3 minute walk to the Reisers' building, without crossing a street; pedestrians could face the possible hazard of a vehicle suddenly existing from a heavily landscaped curb-cut or a vehicle blocking the walkway during peak hours when traffic is backed up at the nearby stop sign; City should mark spaces on Edwin Place to show that ample parking is available; proposal conflicts with Charlotte Street Corridor Plan on many points and endangers public safety; curb-cuts are hazards and the curb-cuts from Charlotte Street to Edwin Place represent 30% of the distance from those two streets; the parking lot does not comply with the Charlotte Street Corridor Plan in that the Plan calls for the improvement of safety for all modes of transportation to less dominance of the automobile and promote pedestrian activity and circulation; if the CUP is granted, the corner will be permanently changed; a parking lot with all its negative effects for does not improve the appearance of Charlotte Street as another parking lot is not unique; once a parking lot is established and the use of the land is clearly commercial, the likelihood that the land will become residential again is remote; the gateway transition called for in the Plan will be destroyed by the encroachment of the clear commercial use of the property; this parking lot conflicts with City's adopted Smart Growth Policy which outlines taking a sustainable approach to development; there will be a loss of 4 on-street parking spaces on Edwin Street; there will be a loss of open space, trees, safe pedestrian pathway, as well as more attractive potential for in-fill housing development compatible to the surrounding neighborhood; the commercial parking lot is inconsistent with the goals of the City's Smart Growth Policy, the 2010 Plan, and the Consolidated Housing Plan; the exit and entrances on the proposed lot will be potentially blocked by on-street parked cars; graphic of trees circulated by the applicant on the parking lot misrepresents the true height at installation; there is a true value to mature trees; loss of trees will increase pollution, increase noise, potentially create a heat island in this area until the canopy of trees can reestablish itself to the maturity at that site; there is no active enforcement of zoning in the City of Asheville so there is an undue hardship on taxpayers to have the ordinance enforced; the area church is currently accommodated by on-street parking and the addition of 11 spaces will not substantially alter that need; since Charlotte Street is a major thoroughfare, if you put left-turn traffic against on-coming traffic then there will be more traffic congestion; need for cross-walks at that intersection; Reisers knew when they purchased the lot that it was zoned residential; the left turn into the Manor entrance from Charlotte Street and the left hand turn into the proposed parking lot from Charlotte Street would be too close to each other, if not directly at the same spot, causing a dangerous traffic bottleneck in both directions; there will be a loss of 4 spaces to gain 11 spaces; traffic study needs to be done before this issue is voted on by Council; who will enforce the non-use of the parking lot after 9:00 p.m.; the parking lot's 11 spaces will create confusion; one of the conditions suggested by staff for a deed restriction is unenforceable by the City; look to the Charlotte Street Corridor Plan and the Smart Growth Policies for other possible solutions to the Reisers' parking problems; reduce the four lanes on Charlotte Street to three lanes and put in a turning lane to allow more parking on Charlotte Street or a bicycle lane; need to cultivate residential uses in the City; traditional neighborhood development patterns should be recognized and encouraged as outlined in the City's Smart Growth Policies; we must recognize alternatives to development that protect private property rights as stated in the City's Smart Growth Policies; the adjoining property owner may not be able to obtain adequate home equity financing due to decreased valuation of home; parking lot will increase dirt, dust, noise, car lights and parking lot trash; there will be water run-off problems and erosion of gravel onto adjacent property; as gravel sinks into the ground the parking lot may turn into a mud hole; constant flow of traffic from parking lot onto Edwin Place will make those exiting rely on the kindness of other motorists to let them onto Edwin Place; Ms. Reiser stated that the proposed lot would be for the use of her tenants so how would that benefit the music students and other clients of the Reisers' building; possibility of turning the parking in front of the building to a 5-minute loading zone for dropping off students; the lot should be left alone until a more fitting use can be found for it; tenants chose to lease in the Reisers' building despite the parking situation; tenants of the Reisers' building have chosen not to share the parking behind the building with their customers, there is no place for parents to unload or load their children behind the building, nor is there a handicapped parking space behind that building; and Section 7.2.5 states that the parking lot can only be used for staff and customers – not for the church parking:

Ms. Eileen Warshaw, former construction manager for a City who administered a multi-million dollar project for street calming, traffic study and directional traffic flow (Neighborhood Exhibits 9 and 10) - noted she was not given ample opportunity to present information other than reading it in Neighborhood Exhibit 10.
Ms. Barbara Hodgson, area resident (Neighborhood Exhibits 11 and 12)
Ms. Jeanne' H. Warner, resident of Albemarle Park (Neighborhood Exhibit 13) – also read letter from Ms. Claire Payne (Neighborhood Exhibit 14)
Mr. Scott Riviere, area resident (Neighborhood Exhibits 15 and 16)
Mr. Mike Ward, Albemarle Park resident (Neighborhood Exhibits 17 and 18)
Ms. Juanita Landolfi, area resident (Neighborhood Exhibit 19)
Ms. Jane Mathews, Albemarle Park resident (Neighborhood Exhibit 20) – also presented letter from Esther and Leonard Pardue (Neighborhood Exhibit 21)
Mr. Mike Lewis, resident on Gracelyn Road
Mr. Phil Freeman, area resident (Neighborhood Exhibit 22)
Ms. Laurel Eide, South Asheville resident
Mr. Doug Michaels, area resident
Ms. Maggie Rotman, area resident
Mr. Bill Wescott, area resident
Ms. Mary Lois Kirby, Macon Avenue resident
Mr. Henry Kirby, Macon Avenue resident (Neighborhood Exhibit 23)
Mr. Charles Van Buskirk, adjacent property owner to proposed parking lot on Edwin Place (Neighborhood Exhibit 24)
Ms. Barbara Van Buskirk, adjacent property owner to proposed parking lot on Edwin Place
Mr. Joe Adams, resident on Lawrence Place – Objected to time limitations (Neighborhood Exhibit 25)

City Attorney Oast then explained the rebuttal process.

Mr. Clay Mooney responded to the following issues: (1) curb-cut issue on Edwin Place and the distance from the tangent point from the radius. Originally that design was 40 feet. Following the TRC meeting and a meeting with the City's Traffic Engineer, it was determined that to improve the desired circulation path and pattern and working of that exit, that by increasing that interior radius, that a right-turn only movement would be reinforced by decreasing that 40 foot distance; (2) regarding the overfilled building, they do not qualify under the City's current parking requirements as being overfilled; (3) regarding how the parking lot will detract from the historic area, he used the example of the New Morning Gallery in historic Biltmore Village as a shining example of how a parking lot can designed in an historic district; (4) regarding the parking spaces being used by tenants, it's common to have tenants be required to park elsewhere; (5) with regard to a change in direction for the parking lot, that was discussed several times with the City's Traffic Engineer and was examined in both directions. Frankly they didn't care which direction was used, and only through discussions with the City's Traffic Engineer was the present direction was decided upon; (6) regarding lack of compromise on the reduction of parking spaces, he noted that they were already reduced from 13 to 11 spaces. The landscaping strips and buffer areas take up more area than what the parking does. If a new building of this size were constructed in that zone, they would require to have 19 off-street parking spaces; (7) no matter how the lot is developed, it will require a curb-cut. There is no curb-cut from Edwin Place to Lennox Street and there will be only one curb-cut which is not uncommon between two streets; (8) the City of Asheville requires that an erosion and stormwater control plan be submitted and approved prior to the beginning of any work on this site. They meet and exceed all the requirements of the UDO without requesting any variances; (9) they wish to share the spaces with the church because that was one of the goals of the Charlotte Street Corridor Plan – to provide shared parking that would support mixed use neighborhood businesses with is what occupies the Reisers' building; (10) regarding the loss of any on-street parking spaces, they lose no parallel parking spaces on Charlotte Street nor Lennox Street; and (11) to provide a drop-off zone, they would lose all five parking spaces in front of the building. Also a drop-off zone is not a benefit to all of the users for the Reisers' building.

Mr. Joe Adams said the driveway has to be 20 feet wide and the plan shows it is only 16 feet wide. If Mr. Mooney had actually put the driveway down 40 feet, with 20 feet, he would not have enough for his additional 20 feet of buffer.

Ms. Wanda Adams stated that Mr. Mooney said a compromise had been reached and that they had made a change in the plans. She didn't know who the compromise was with – it was not with neighborhood representatives or with the adjoining property owner. No attempt was made by the developer applying for this CUP to meet with neighborhood representatives. Prior to the TRC meeting on November 20, 2000, she contacted the developer and asked her to meet with neighborhood representatives prior to the TRC meeting. Despite the UDO's recommendation that the developer meet in a pre-application stage, the developer responded that she was unable to arrange a time to meet with neighborhood representatives prior to the meeting. She did agree, however, to meet after the meeting (twice) but the opinion from the developer was that TRC has passed it, affixed conditions and felt they could get it passed with just the TRC conditions and it was not necessary to negotiate with neighborhood representative/ They would simply negotiate with the City's Traffic Engineer.

Mr. Roger James noted that the parking lot in Biltmore Village for New Morning Gallery is not zoned residential. He said that there was a residential driveway there, we would not expect 11 cars to be turning over periodically throughout the day. He asked for clarification on how many spots will actually be lost on Edwin Place and on Charlotte Street.

Ms. Jane Mathews clarified that the lot was grandfathered without the required off-street parking because of it's current zoning and lot's boundaries. She did not believe this was adequately advertised because the two "Z" signs are still out there on the property which were for the March meeting of City Council. She also asked for an exact date on when the tree on the property on Edwin Street was cut down because it was her recollection that it was after the TRC meeting. She said that the tree was not dead.

Mr. Green responded that there will be no parking spaces on Charlotte Street removed for the construction of the parking lot. He did not know the exact date on when the tree was cut down, but he thought it was sometime in November. The City's Arborist did examine the tree and it was slated for removal. Typically those issues are taken to the Tree Commission prior to removal and he will check with the Public Works Department to have them review the Tree Commission's minutes to find when that was discussed. With regard to the "Z" signs, since this meeting was continued from the City Council meeting in March, no new "Z" signs were put up. With regard to the comments made about not being able to trust City staff, he did not feel that was an appropriate statement in that staff does the utmost to assure that all plans that are brought before City Council meet all the standards of the ordinance. Staff will continue to work with the post-construction process to assure that everything shown on the site plan are in fact part of the project when it is constructed. In cases where the staff has the power to modify a requirement, it is only done in cases when it improves the safety of the situation.

Mr. Michael Moule, City's Traffic Engineer, said that approximately 3-5 spaces will need to be removed from the intersection on Edwin Place. In fact, it would be prudent to remove those spaces anyway since they are only used on a regular basis on Sundays.

Upon inquiry of Councilwoman Bellamy about the 3-5 spaces near the intersection of Edwin Place, Mr. Moule said that if the area is not signed for "No Parking" then it is legal to park there, except there are some other restrictions, e.g., fire hydrants, etc.

Upon inquiry of Vice-Mayor Cloninger, Ms. Coombs said that she has renewed her lease in the Reisers' building within the last five years.

Upon inquiry of Councilwoman Bellamy, Mr. James explained why he felt it was safer to have a right turn lane into the parking lot on Edwin Place and then have a right-turn lane out of the parking lot onto Charlotte Street, even though cut-through traffic is a valid point.

Mayor Sitnick asked if Mr. James was implying that if the Reisers agreed to the directional change of ingress and egress that the Albemarle Park Neighborhood Association would have voted in favor of this. Mr. James said that he could not speak for the Association, however, if there had been at least any dialogue from the Reisers, that would have shown the neighborhood a good faith effort but there was no good faith effort shown.

Councilwoman Field asked Ms. Warshaw if, when she talked to Urban Land Institute for the statistics she quoted, she told them that this is a major thoroughfare and not a neighborhood street. Mr. Warshaw said she told them it is not a major four-lane thoroughfare in a municipality, but it is used as a four-lane auxiliary street to avoid a major thoroughfare, i.e. Merrimon Avenue. Councilwoman Field noted that that Charlotte Street has been designated as a major thoroughfare.

Councilman Peterson questioned the 40 feet requirement from the tangent line of the intersection to the tangent line of the exit and the actual 27.5 foot distance. Mr. Moule said that the original plan was for 40 feet. In order to try to encourage the right-turn only out of that driveway and discourage the turn-in, he worked with the developer to reconfigure that driveway to encourage that movement. It did decrease the distance radius on Edwin Place for the driveway. With regard to City staff being able to vary the standards, he referred to Chapter 3 of the Asheville Standard Specifications and Details Manual (Manual) , in which it says that the City Engineer must approve standards which vary from this section or standards which are not contained herein. The City Engineer, Cathy Ball, has delegated issues having to deal with traffic and driveways to him as he has more expertise in those matter. Therefore, he can approve variations from the Manual. With that said, there are some things that they can do with the driveway to bring it a little further back as far as the actual radius. It's a fact that people exiting that driveway are going to have to rely on the courtesy of drivers to let them out.

When Councilman Peterson asked what the reason was for the 40 feet from the intersection, Mr. Moule said that conflicts are created when vehicles are turning from driveways near intersections. Since the exit is only right-turn only onto Edwin Place, that is one of the reasons why he felt he could reconfigure the driveway to get it further from the intersection.

Councilman Worley asked Mr. Moule what he felt an average turn-over rate in a parking lot of this nature would be on a per hour basis during the heaviest part of the day. Mr. Moule said this was very difficult to estimate based on the fact that the uses in the Reiser building are not common land uses in their manuals. He estimated that on the order of between 6 –15 entering vehicles during the peak p.m. hour and between 9-18 exiting vehicles in that p.m. peak hour. Anytime you add a curb-cut to a street, you increase a conflict point.

Upon inquiry of Councilman Worley, Mr. Moule said that there is always the possibility of the circling effect in the parking lot. It certainly would be hard to know before entering the lot whether there are empty spaces in the lot.

Upon inquiry of Mayor Sitnick, Mr. Moule said the only parking space that someone backing up could block the entrance to the lot would be the handicapped space (City Exhibits 12 and 13). Even though that is a possibility, the probability is low.

Mr. Moule then responded to questions regarding crash data.

Councilman Worley asked Mr. Moule if he thought that the traffic study that is underway on Charlotte Street would yield any useful information in connection with this particular project. Mr. Moule responded that he didn't think there would be any significant changes as to how this parking lot might more safely operate. He said the study should be completed in about 2-3 months.

Upon inquiry of Councilwoman Field, Mr. Green explained the issue of the mature trees vs. the buffering that the City requires.

Councilman Worley asked about the comment that the church could not share the parking lot. Mr. Green said that the definition for ancillary non-residential use states that "ancillary non-residential use means employee or customer parking ... associated with the principle non-residential use." The principle use will be those mixed-used businesses and offices in the Reiser building. The Unitarian Church parking would be a secondary use, only on Sunday mornings. Allowing it to be used a few hours a week for a secondary use does not limit it to the strict definition here.

Upon inquiry of Councilman Field, Mr. Green said that he has not heard anything from the testimony at this hearing to change staff's recommendation to City Council.

Upon inquiry of Mayor Sitnick regarding the definition of "value", City Attorney Oast said that if the value being referred to is in Condition No. 3, then he felt the term "value" means monetary value. All of the cases he has looked at suggests that it does mean that and he would strongly recommend City Council use that term to mean monetary value in the context of conditional use standards.

Mayor Sitnick closed the public hearing at 10:25 p.m.

Councilman Peterson said that based on the information provided by staff and evidence and testimony received at this public hearing, he was not convinced that the application meets the seven standards. He felt the proposed use would injure the value of the adjoining and abutting property. It's clear that even an 11 space parking lot that close to a residential home of that character and quality would decrease its value. Also looking at the Charlotte Street Corridor Plan and other plans that the City has adopted, it appears that it was clearly contemplated that this property would not be used for a commercial use – that it be used as residential. He didn't think it has been shown that this use conforms with the Comprehensive Plan or other official plans adopted by the City. He also had concerns that the proposed use potentially could endanger public health and safety or could create a traffic hazard, especially if the City's own standards require 40 feet from the driveway to the intersection. He said there are clearly reasons for those standards (to protect public safety and traffic prevent hazards).

Councilman Peterson moved to deny the application for a conditional use permit for ancillary use (parking lot) in a residential district at the corner of Charlotte Street and Edwin Place, based upon the evidence and testimony received at the public hearing. This motion was seconded by Vice-Mayor Cloninger.

Vice-Mayor Cloninger said that this was a very difficult decision for him. He thanked the Reisers for doing such an excellent job in developing their property. The concern that he has is in Condition No. 4. He is concerned that the parking lot will not be in harmony with the scale, bulk, density, and character of the area or neighborhood in which it is located. He knows it's not feasible, but if there were some way to put the parking lot up against the building and have access only from Charlotte Street, then he could support that. However, he understands that may not be possible. But given this is a gateway for the Edwin, Kimberly and Grove Park area, even with a conscientious attempt to landscape that parking lot, he was concerned the parking lot would not be the right kind of gateway for that area. A related concern he has with that is while he has no doubt that the Reisers would be very conscientious in maintaining the landscape in the parking lot, that property could change hands at anytime and there is no guarantee that subsequent owners would be as diligent as the Reisers would be in trying to keep that attractive. That corner could become deteriorated quickly. The Reisers did know at the time they purchased the property there was a parking problem. Similarly, the Music School has been in that building for five years and they have renewed the lease during that period of time. He did not question any concerns they have about traffic, they must feel that the situation is not so bad that they don't want to have their business there. Nevertheless, some genuine legitimate concerns were raised about safety. If this CUP is denied, he hoped that our traffic study would look that very carefully and try to come up with some alternative solutions in that area to make it safer.

Councilman Hay said that his expectation coming into this, based on what the Reisers did to their building, was that it would be a thoughtful project and that it would fit in the neighborhood in an appropriate way. It is well-designed and exactly the kind of thing we want people to be doing. Unfortunately, he cannot vote for the conditional use permit. His primary reason for voting against it was how it fits into the Charlotte Street Corridor Plan. An integral part of that plan is the traffic study. A lot of energy and intensive planning went into the Plan and we have an obligation to stick with the Plan. The Plan calls for medians at Charlotte Street and Edwin Place. If we are to preempt some of the Plan provisions by putting in a driveway and therefore having to build around decisions we make now, we are in effect not complying with the Plan. This would have been an easier project to review after the traffic study was done and after the recommendations about medians were decided upon. Whether we build the medians right away or not, at least driveway entrances could take into account what the Plan says. He did not feel the parking lot conforms with City plans.

Councilman Worley agreed this has been a difficult decision. He felt the parking lot will enhance the successful operation of the surrounding area. With regard to Condition No. 3 when the condition reads the proposed use ... will not substantially injure the value of adjoining property, he felt the only real adjoining property in question is the Van Buskirk property. He sees a graveled, well-buffered parking lot and particularly given the description of the buffering, he felt the buffering will very substantially hide this property from the adjoining properties so that the appearance of a parking lot next door will be minimal. He felt the parking lot does confirm with the Comprehensive Plan in that the Plan encourages shared parking, encourages pedestrian safety and walkability. This certainly does not create undue traffic congestion. It doesn't even create congestion – the traffic is already there. He didn't think it creates a traffic hazard, particularly with regard to the one-way in/one-way out. The only thing that does concern him is the possibility of medians being recommended by the traffic study currently underway. He regrets Council is having to deal with this now as opposed to after the results of those traffic studies. But, Council is dealing with this now and we have to deal with this on the basis of what we have now and what we know now. Based on his findings, he will vote against the motion.

Councilwoman Bellamy felt this does conform with City plans. When we look at the Smart Growth Policies, this piece of property conforms. The definition of smart growth reads in part that "it is a proposed City of Asheville development pattern that makes efficient use of our limited land, fully utilizing our urban services and infrastructure." She felt the developer has taken a good piece of property and presented a good plan. They went above and beyond what staff has requested as far as landscaping. City Council has to rely on City staff and their expertise in making the best decisions to vary from policies. She felt staff did take into consideration statistical information, policies, procedures and plans and also emotions, and they are recommending what they feel is conducive to that neighborhood. She felt the developer is invested in the neighborhood. The parking lot is not the disease of the neighborhood and may actually may help some of the diseased intersection. She said that she will trust the Traffic Engineer's findings in that he has the best interests for all the citizens in that area. This is a designated major thoroughfare, so it may require a little more than a purely neighborhood lot. She felt she could not support the motion because she felt they presented a very good case for a very good project.

Councilwoman Field said that she has tried for 10 years to support smart growth. She strongly believes that any use can be buffered appropriately from any other use. She said we must have transition districts and areas that are walkable. This kind of development is exactly what we need. She feels it is very appropriate in this area. She thoroughly understands protecting neighborhoods and she felt the neighborhoods are protected. But every neighborhood has a border and those borders require transitions. She felt this was an appropriate transition. This will leave an open space better designed than it is now.

Mayor Sitnick thanked the Reisers for their commitment to excellence in the renovation of their building. Regardless of how the vote is, she asked that (1) Edwin Place be marked and made more user friendly for parking; (2) one or two handicapped spaces be marked on Charlotte Street in front of the Reisers' building; and (3) the traffic study be completed as soon as possible. She felt that the lot could be improved with landscaping and a footpath could be created. Recognizing the difficulty of this area, especially in the summer when the Jewish Community Center is in full swing, and recognizing that this is already a major thoroughfare with a well-used intersection, and giving consideration from corners and intersections and curb-cuts and buffers, she has no doubt that if anyone can create a magnificent parking lot, it would be the Reisers. But, she would have to vote against the conditional use permit application. Condition No. 1 has not been met. The public health and safety is the most important issue. She also has concerns about Condition No. 3. She felt there is a great subjectivity to the defining of the word "value" to the Van Buskirks. With regard to Condition No. 5, she didn't know if the mixed use and sharing of lots in the Charlotte Street Corridor Plan was really what was intended. She felt there are enough parking lots in that area and there are enough curb-cuts in that area. With regard to Condition No. 7, she was not convinced that the traffic congestion caused by going in and out is the best solution for the parking needs of the Reisers' building and she would like to see those needs met. She said we already have a major thoroughfare that runs parallel to Charlotte Street and she doesn't want to create another Merrimon Avenue. We are already working on solutions to deal with the curb-cuts and the ins and outs on Merrimon Avenue. She does want to create an opportunity for the Reisers, the tenants and the users of the building to have safe, adequate, convenient, user-friendly parking but she doesn't feel that a parking lot on that corner is going to create it any better than the other possible solutions. She would support the motion denying the conditional use permit.

The motion made by Councilman Peterson and seconded by Vice-Mayor Cloninger to deny the application for a conditional use permit for ancillary use (parking lot) in a residential district at the corner of Charlotte Street and Edwin Place carried on a 4-3 vote, with Mayor Sitnick, Vice-Mayor Cloninger, Councilman Hay and Councilman Peterson voting "yes" and Councilwoman Bellamy, Councilwoman Field and Councilman Worley voting "no".

City Attorney Oast said that the would bring back an ordinance denying the conditional use permit with the conditions outlined above for City Council consideration at their next formal meeting on April 24, 2001.

At 11:01 p.m., Mayor Sitnick announced a 15 minute break.

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 01-50 - RESOLUTION INSTRUCTING CITY STAFF TO WORK WITH THE N.D. DEPT. OF TRANSPORTATION AND THE HAW CREEK COMMUNITY ASSOCIATION TO DEVELOP PEDESTRIAN CONNECTIVITY IN THE HAW CREEK COMMUNITY

City Engineer Cathy Ball said that on February 27, 2001, the Haw Creek Homeowners Association presented a resolution to City Council asking the City to request that the N. C. Dept. of Transportation (NC DOT) install a 3-foot paved shoulder as a "demonstration pedestrian safety initiative." City staff requested the opportunity to work with the neighborhood association to reach a more feasible pedestrian improvement in the Haw Creek Valley.

City staff met with members of the Haw Creek Homeowners Association to discuss options. Staff recommends that a resolution supporting an effort for the City to work with NC DOT and the Haw Creek Homeowners Association to develop a pedestrian connection in the Haw Creek community be presented to City Council for their approval. The members of the Haw Creek Homeowners Association were agreeable to a resolution with that intent.

Staff recommends that Council adopt a resolution requesting that a team be formed composed of City staff, NC DOT staff and the Haw Creek community officials. Said team will meet regularly to develop and implement short and long term goals to increase safety in the Haw Creek Valley and will review the progress of implementation of this overall plan until such time that sufficient pedestrian issues are addressed. The team will make an annual report to City Council.

Mr. Chris Pelly, member of the Haw Creek Community Association, said that the Association welcomes the partnership with the City.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-50. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 330

B. ORDINANCE NO. 2803 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A PARKING LOT IN A RESIDENTIAL DISTRICT AT 2 GRANDVIEW PLACE

Mayor Sitnick said that this public hearing was held on March 27, 2001.

City Attorney Oast said that City Council asked City staff to develop some conditions to address some of the concerns that were expressed at the public hearing.

Chief Planner Gerald Green passed out some photographs of the area. He said that this is the consideration of a motion to issue a Conditional Use Permit (CUP) for an ancillary parking lot in an RS-8 Residential Single-Family Medium Density District for property located at 2 Grandview Place off Tunnel Road.

The applicants are requesting a conditional use permit for a 17 space parking lot to be located on a vacant lot located at 2 Grandview Place. The customers of the adjacent restaurant (East Village Grill) located on Tunnel Road will use parking spaces in the proposed lot. The project site is located behind the commercial strip development located on Tunnel Road. The subject property contains approximately 0.3 acres. The site meets all the location requirements

2/30

for ancillary uses in residential districts. Grading and paving of the site has occurred in violation of the regulations and standards of the City of Asheville. The owner is seeking a conditional use permit to correct the violation. More than 10,000 square feet of the site has been graded for the construction of the parking area. Measures will be taken to minimize stormwater impact onto adjacent property. A number of trees will be planted to serve as street trees and buffer trees for the parking area.

He said that as a result of comments made at the City Council public hearing, staff recommends the following conditions be added to approval of the conditional use permit (CUP) for this project:

- The dumpsters must be moved south on the property to the edge of the lot for which the ancillary use is proposed so as not to block the view from the adjacent business. They must be screened as indicated on the site plan;
- A fence (chain link acceptable) must be installed from a point parallel to the northwest corner of the adjacent residential structure, located on property owned by C.L. Henderson, Inc., northward along the property line for a distance of 40 feet; and
- Extended operating hours, to coincide with hours of operation for the restaurant, must be approved for the parking lot. Parking lot lighting must be turned off when the parking lot is not in operation.

Based on information available to the Planning and Development Department in advance of the public hearing, staff recommended that the City Council issue the CUP for an ancillary use (parking lot) to be located at 2 Grandview Place with the following conditions:

1. Remove existing asphalt as required to install required landscaping;
2. The existing parking lot lighting must be shielded and/or directed away from adjacent residential uses;
3. Pedestrian access from upper lot to the restaurant must be provided in a location other than the driveway;
4. The west side of the lot must be curbed to direct stormwater into the stormwater drain;
5. Remove the chain link fence currently located at the rear of the property;
6. The existing water meter on the lot must be abandoned;
7. The dumpsters must be moved south on the property to the edge of the lot for which the ancillary use is proposed so as not to block the view from the adjacent business. They must be screened as indicated on the site plan;
8. A fence (chain link acceptable) must be installed from a point parallel to the northwest corner of the adjacent residential structure, located on property owned by C.L. Henderson, Inc., northward along the property line for a distance of 40 feet;
9. Extended operating hours, to coincide with hours of operation for the restaurant, must be approved for the parking lot. Parking lot lighting must be turned off when the parking lot is not in operation; and
10. The required improvements to the parking lot, as shown on the site plans and identified in the conditions attached to the Conditional Use Permit, must be completed within 60 days. If not completed within this time period, the CUP will be revoked and the site shall never be used for parking for commercial uses.

Upon inquiry of Vice-Mayor Cloninger, Mr. Green explained why landscaping islands are not required in this parking lot.

Councilman Worley moved to adopt Ordinance No. 2803, with the ten conditions outlined above as recommended by City staff, in addition to the following three conditions: (2) The dumpsters must be moved south on the property to the edge of the lot for which the ancillary use is proposed so as not to block the view from the adjacent business. They must be screened as indicated on the site plan; (2) A fence (chain link acceptable) must be installed from a point parallel to the northwest corner of the adjacent residential structure, located on property owned by C.L. Henderson, Inc., northward along the property line for a distance of 40 feet; and (3) Operating hours may be extended to coincide with hours of operation for the restaurant, but in no case past Midnight. Parking lot lighting must be turned off when the parking lot is not in operation. This motion was seconded by Councilwoman Bellamy.

Vice-Mayor Cloninger said that he would have to vote against this CUP. He would have no trouble voting in favor of it if the owner had followed the required steps in getting the appropriate permits. The fact is that the owner did not submit an erosion control plan or get an issuance of a grading permit, prior to the grading being done. Also, paving requires a conditional use permit that was not applied for prior to the initiation of the paving. He was concerned about the precedent this will set in that he fears that if other people find out that this has been approved, they may get impatient or won't feel like applying for a permit. Then they might decide to go ahead and do it and then go back to City Council and get approval for it after the fact. He just doesn't want to send that signal out. Sooner or later someone may do the paving in a manner that does not meet City standards and Council would not want to approve it. Because of the precedent this will sent, he will vote against it.

Councilman Hay appreciates Vice-Mayor Cloninger's concerns, but based on staff's recommendations, it is otherwise a good idea.

Councilman Worley also noted that City staff is looking at some penalties for moving forward in a situation like this without all the permits being approved.

Councilman Peterson felt that if this came before City Council prior to the work being done, Council may have approved some parking, but maybe not approved as much parking as the applicant has paved. He agreed with Vice-Mayor Cloninger that if City Council approves this, then we are sending a clear message that it's okay to develop your property and then once it's done City Council will give permission. He has a problem in that this looks to be clearly commercial intrusion into a residential area. He felt that City Council is sending the wrong message in approving the CUP with no limitations or penalties for violation of the ordinance.

Mr. Green said that the penalty that City staff is looking at for starting work without a zoning permit is doubling of the application fee (in this case it's $250 or $300).

The motion made by Councilman Worley and seconded by Councilwoman Bellamy to approve Ordnance No. 2803, granting the conditional use permit for ancillary use (parking lot) in a residential district at 2 Grandview Place with the 13 conditions listed above, was carried on a 4-3 vote, with Councilwoman Bellamy, Councilwoman Field, Councilman Hay and Councilwoman Worley voting "yes" and Mayor Sitnick, Vice-Mayor Cloninger and Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 - PAGE 129

V. NEW BUSINESS:

A. ORDINANCE NO. 2804 - ORDINANCE WAIVING THE UNIFIED DEVELOPMENT ORDINANCE REQUIREMENT FOR A SIDEWALK AT 655 BREVARD ROAD

Pedestrian and Bicycle Coordinator Oliver Gajda said that this is the consideration of a request to allow a partial fee waiver for the new commercial project located at 655 Brevard Road.

Section 7-11-6 of the Unified Development Ordinance (UDO) requires that new construction place sidewalks as specified in the Asheville Standard Specifications along street rights-of-way or pay a fee in lieu of constructing a sidewalk.

The developer for a new commercial project located at 655 Brevard Road is requesting consideration of an ordinance waiving the amount of the fee specified within Section 7-11-6 of the Unified Development Ordinance (UDO).

This development meets the requirements for paying a fee in lieu of construction per the UDO Section 7-11-6(c)(2) based upon the condition that sidewalks are scheduled to be installed as part State project which has been funded for construction. The State plans to widen this portion of Brevard Road within the next four years as outlined in the Transportation Improvement Plan (TIP). However, the developer is requesting a waiver of Section 7-11-6 of the UDO and that only 40% of the required fee in lieu of construction be paid. Per the NCDOT's Pedestrian Policy Guidelines, the City would be required to pay 40% of the costs of sidewalks to the State's matching contribution of 60%.

City staff recommends that City Council allow a partial fee waiver of 60% requiring the developer to pay the remaining 40% of the fee in lieu of construction for the new commercial project located at 655 Brevard Road.

Mr. Gajda said that City staff is looking to amend the Fees and Charges Manual to include this type of ruling where there is some sort of measure (like on the State's TIP) that City staff wouldn't need to bring these issues to City Council for approval.

Councilman Peterson said that City Council needs to be pretty certain at this stage that projects will be completed by NC DOT, so the City doesn't set a precedent of waiving the fees and the sidewalks don't get built.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2804. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 134

VI. OTHER BUSINESS:

Amendment to N. C. State Building Code

Councilwoman Field said that in 1996 City Council approved an amendment to Volume 5 of the N. C. State Building Code which is called the Asheville Amendment. That amendment was adopted by the Building Code Council. We are now in the process of adopting a new International Building Code and our amendment is no longer in compliance. The easiest way for us to amend it is to withdraw the amendment and that can be done by an administrative action.

It was the consensus of City Council to instruct the City Manager and City Attorney to draft a letter to the Building Code Council, for City Council approval at their April 24, 2001, meeting, asking them to withdraw the amendment.

Legislative Requests

Councilman Peterson stated that the cross-over deadline is April 26, 2001, and as yet there have been no bills introduced about additional funding sources for the Civic Center. There are a number of blank bills from our delegation that they have introduced. In addition, the City of Monroe has introduced a bill for a prepared food tax. Given the deadline is April 26, he suggested we ask one or more of our delegates to fill in one of their blank bills with similar sort of legislation or ask Senator Carter or Senator Metcalf if they might be able to amend the City of Monroe's prepared food tax bill to include Asheville. He was concerned that in two weeks from now we will not be able to get any kind of funding for the next two years. He also noted that the City of Charlotte advisory referendum bill was filed March 13, passed the House about 15 days later, and then passed the Senate about 2 days after that. His preference would be to do what the City of Monroe has done. They have asked that the City be given the authority to levy a prepared meals tax. If our legislators do not want to support giving Asheville the authority directly, then we should ask them to do something that the City of Charlotte did – with the advisory referendum for this fall.

He would like to formally ask our legislative delegation to take one of their blank bills and insert a straight prepared meals tax. And since they have indicated they want to see public support, we should ask them to include in that bill something similar to what Charlotte had regarding an advisory referendum.

Councilwoman Bellamy said her choice would be to have an advisory referendum.

Councilman Worley said that we have already formally asked them to introduce the bill and we have been following up and will continue to follow-up. He has no problem with that follow-up including a referendum if they won't introduce just a straight up bill.

Councilman Hay felt that a referendum sounds like a good way to get it done, but we want to make sure we do it at the right time. If we ask the question the wrong way, or the wrong time or without the proper development of the idea, we may not get the answer we want. He wanted to make sure we had a clearly articulated plan for what we were asking people to do, how we were going to spend the money, and what they are going to get for their money. He thinks we're well on the way to being at that point, but would hate to get the ball rolling towards a referendum and then find that we're not ready to present it,

Upon inquiry of Vice-Mayor Cloninger, City Attorney Oast said that one of the proposals that is in the legislature now, but he didn't think it's been introduced, is the County requested introduction of a bill that the City would benefit from which would be a local option sales tax.

It was the consensus of City Council to have staff report back to City Council at the April 17, 2001, worksession as to what the status of our legislative requests are with regard to the additional funding sources for the Civic Center.

Film Board Funding Request

At the request of Film Board Chairman David Quinn, Mayor Sitnick moved to appropriate up to $2,000 from the Contingency account to assist with the development of the Film Board website. The costs include the purchase of software needed to keep the site updated, a training program for the Board member who is voluntarily maintaining the site, and an "as needed" consulting service to provide back-up assistance as needed. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

280

Claims

The following claims were received by the City of Asheville during the period of March 23 – April 5, 2001: Wendy Dayton (Streets), Marilyn Briggs (Water), Stanley Combs (Water), BellSouth (Water), Marcus Robinson (Police), Brenda Graham (Parks & Recreation), Jeanine Helms (Fire), Ryan Lander (Asheville Transit) and Maximino Marales (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 12:07 a.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – April 17, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Edward C. Hay Jr.

CONSENT:

Schnabel Engineering Associates Task Force for Bee Tree Dam Construction Phase Engineering – For Information Only

Summary: The Regional Water Authority will consider authorizing the Chairman to execute Task Order No. 6 amending the Authority's contract with Schnabel Engineering Associates at their regular meeting on April 17, 2001.

The Regional Water Authority authorized an engineering services contract with Schnabel Engineering Associates in 1997 under the company's former name of Applied Geosciences & Engineering. Services were related to the needed reconstruction of a spillway for the Bee Tree Dam and other repairs and rehabilitation to both the Bee Tree Dam and the Burnette (North Fork) Dam. Since 1997, five Task Orders have been executed authorizing engineering services through the design and bidding phases of the project, and including the construction of the grouting of the Burnette Tunnel.

The project will be moving to the construction phase this month as Hickory Construction Company mobilizes to the sites. Task Order No. 6 addresses the engineering services for the construction phase. These services include contract administration, shop drawing review, field construction observation services, and quality control for concrete, geotechnical, and structural engineering. As part of these services, Schnabel will evaluate the construction quality closely enough to properly administer the construction contract and to provide an important engineering certification to the North Carolina Land Quality Section as required by Dam Safety regulations.

Schnabel initially requested a fee just over $750,000 for construction phase services. Through discussions of the service, the staff and Schnabel have been able to agree on a ceiling of $693,144, with fees billable based on the actual services provided which to some degree is a function of the length of the contract period (if the project is finished early, which is Hickory Construction Company's intention, the actual engineering fees will be less). The staff has also identified points where the engineer must get the Owner's permission to increase the level of observation services.

Article IV of the Supplemental Water Agreement authorizes the Regional Water Authority to award and amend contracts for engineering services. No action is required by the City Council but this report is offered for information only.

Semi-Annual Report of the Regional Water Authority – For Information Only

Summary: This is the semi-annual report for the Water Resources Department and the Regional Water Authority for July 1, 2000 – December 31, 2000.

Article IV, Section D of the Water Agreement states that the Authority shall make semi-annual reports to the City and County. Each year, in the early spring, staff provides a brief semi-annual update of the accomplishments of the Water Resources Department and the Authority. A more detailed annual report is provided in approximately October.

The semi-annual update for July 1, 2000, through December 31, 2000, highlights Phase I Water Distribution Improvements that were completed in December 2000, a $27 Million Five-Year Capital Improvements Plan that will be funded with two revenue bond issues in 2001 and 2002, and Critical Needs Projects that will be substantially funded with NC State Grants. This semi-annual update also summarizes the Watershed Projection Project, routine system maintenance, water supply and quality, and the education and efficiency program.

No action by the City Council is required.

Budget Amendment re: Grant for Carolinas Preservation Commission Conference

Summary: The consideration of a budget amendment, in the amount of $14,750, for the Carolinas Historic Preservation Commission Conference hosted by the Historic Resources Commission of Asheville and Buncombe County (HRC).

The purposes of the conference are to provide training for new commission members and staff and continuing education for those more experienced. This is the first year that this event is being offered jointly by North and South Carolina. The program reflects the experiences, expertise, and strengths of both states.

The University of North Carolina at Asheville will serve as conference headquarters. Sessions will be held on campus and in the historic districts. With six National Register districts, three locally designated districts, and over sixty individual National Register listings and landmarks, Asheville offers an especially rich environment for the field sessions and special events.

This conference will be a superb commissions-to-commissions training event. The North Carolina State Historic Preservation Office has awarded the HRC a $2,000 grant to cover the cost of the bus tour and honorarium. All other expenses will be covered by the $55 registration fee and includes all sessions, meals, and events.

City staff recommends adoption of the budget amendment.

Preventive Maintenance Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Paving Enterprises Inc. for the Preventative Maintenance Contract 2000-2001.

The City annually budgets for paving city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff reviewed several streets that were listed on the ITRE report and chose six streets to be maintained by application of both crack seal and a full coverage resurfacing treatment based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department has developed construction documents and specifications for preventative maintenance for Phifer Street, Kensington Drive, Jeffress Avenue, Mt. Vernon Place, Lucerne Avenue and Mountain Terrace.

The engineer's estimate for Contracted Pavement Preventative Maintenance 2000-2001, was $204,804 for these streets. Money for the project is currently budgeted in the Public Works Department's operating budget.

The project was advertised for one month. The Engineering Department received bids on February 28, 2001. Only one bid was received at this bid opening. The sealed bid was returned to the bidder unopened. The project was immediately re-advertised for one week. The Engineering

Department held a second bid opening on March 14, 2001. One bid was received and opened. The bid was $198,040.

The construction time for this phase of the project is identified as 90 calendar days in the contract documents.

City staff requests City Council authorize the City Manager to execute a contract with Paving Enterprises, Inc. in the amount of $198,040.00.

Contracted Paving Contract

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with APAC Carolina Inc. for the Contracted Paving 2000-2001.

The City annually budgets for paving city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff reviewed several streets that were listed on the ITRE report and chose six streets to be resurfaced based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department has developed construction documents and specifications for resurfacing Grindstaff Road, Hilliard Avenue (from Clingman Avenue to West Haywood Street), Melton Drive, Brookcliff Drive, Starmount Drive, and Russell Street.

The engineer's estimate for Contracted Paving 2000-2001 was $350,800 for these streets. Money for the project is currently budgeted in the Public Works Department's operating budget.

The project was advertised for one month. The Engineering Department received bids on February 28, 2001. Only one bid was received at this bid opening. The project was re-advertised for one week. The Engineering Department held a second bid opening on March 14, 2001. Two bids were received and opened. One bid was from APAC Carolina Inc. in the amount of $260,325.00, and the other bid was from Paving Enterprises Inc. in the amount of $304,643.39.

The construction time for this phase of the project is identified as 90 calendar days in the contract documents.

City staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with APAC Carolina Inc. in the amount of $260,325.00 for the Contracted Paving 2000-2001.

Upon inquiry of Councilwoman Bellamy, City Engineer Cathy Ball said that she would contact Mountain Housing Opportunities for possible coordination of projects in the Clingman Avenue area.

Grant Application to HUD for Lead Based Paint Hazard Control

Summary: The consideration of an application to the U. S. Department of Housing and Urban Development for a Lead-Based Paint Hazard Control Grant.

City staff is developing an application to the U.S. Department of Housing and Urban Development for approximately $1,700,000 to fund a three year program to reduce Lead-Based Paint Hazards in the City of Asheville and the Asheville Regional Housing Consortium Area (Buncombe, Henderson, Madison and Transylvania Counties).

This program, which is being developed in close coordination with UNC-A's Environmental Quality Institute (EQI) and other governmental and non-profit agencies, will identify housing units

284

occupied by low- and moderate-income families which contain lead-based paint. The level of risk in each unit will be assessed, and appropriate, cost-effective, hazard control measures will be carried out, followed by a clearance test to demonstrate that the unit is safe for occupancy.

This application will benefit greatly from its association with a national program, under development by EQI, to distribute do-it-yourself lead test kits to homeowners and renters and to follow up positive tests with advice and materials for the residents to carry out their own preventive controls. The partnership with EQI will provide both matching funds and a competitive edge for this application compared with others nationwide. The City will also partner with other non-profit agencies active in housing rehabilitation and repair.

The due date for the application is May 17, 2001.

City staff recommends approval of the resolution authorizing the grant application.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

METROPOLITAN SEWERAGE DISTRICT BOARD

Mr. Billy Clarke, attorney for the Metropolitan Sewerage District Board of Directors, briefed Council on exactly what the Metropolitan Sewerage District is and the Sewer Consolidation Agreement.

Mr. Tom Hartye, General Manager of the Metropolitan Sewerage District of Buncombe County (MSD), reviewed with Council their Capital Improvement Program, finances, and their Master Plan initiatives.

Mr. Hartye, along with former General Manager Bill Mull, answered various questions from City Council, some being but are not limited to: what is MSD's policy regarding extension of lines and why does MSD have that policy in place; does the Board take into account smart growth principles; and are there any plans to serve residents in the City limits who do not have sewer.

Councilwoman Field, MSD Board member, advised City Council on some other issues the MSD Board is dealing with at this time.

On behalf of City Council, Mayor Sitnick thanked the members and MSD staff for meeting with City Council.

REPORT FROM THE SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE

Mr. Jack Cecil, Chairman of the Sustainable Economic Development Plan (SEDP) Implementation Task Force said that City Council simultaneously adopted the SEDP and appointed the Implementation Task Force (ITF) on May 23, 2000. The ITF held its first meeting June 16, 2000, and has been meeting on a monthly basis ever since.

The Plan is oriented toward a goal of positioning Asheville to attract "knowledge-based" enterprises; and, it lists approximately fifty specific action strategies, divided among four broad priority areas, determined by citizens to be important to achieving that goal. The broad priority areas include: The Development Process, Real Estate, Riverfront, and Workforce/Education.

The ITF was appointed to serve in an advisory capacity. It was to prioritize the strategies outlined in the Plan, work with city staff on implementation options, and make recommendations to Council. In that capacity, and following that direction, the ITF has approved and is making a project recommendation for Council's endorsement.

Mr. Cecil then provided the following update on the work to date of the ITF in each of these areas:

DEVELOPMENT PROCESS: (1) The Task Force is recommending the city Planning Department encourage and provide for higher density, mixed use development via performance based ordinances and standards; and (2) Continued regular meetings with the development community are encouraged for input regarding specific proposals for changes, improvements, etc. to processes, standards, and ordinances. Both of these are the primary responsibility of internal city staff.

REAL ESTATE: (1) Addressing the shortage of industrial real estate is a key priority. Within the City, the Task Force recommends evaluating appropriate areas for redevelopment for industrial use as well as adapting zoning to permit light assembly and/or high tech manufacturing uses in some office or commercial areas; (2) The Task Force feels the longer term solution is to work cooperatively with Buncombe County and other adjacent jurisdictions on a regional approach for developing major industrial parks; (3) The Task Force recommends the city assist AB Tech in the development of the proposed incubator; and (4) The Task Force supports development of a sustainable land use pattern and has recommended the city Planning Department incorporate this approach in their new Comprehensive Plan. This approach would preserve quality neighborhoods, reserve areas for business and industry, continue a viable downtown, develop connecting transportation corridors, build greenways, and protect environmentally sensitive areas. As with the Development Process recommendations, these are also primarily the responsibility of city staff.

WORKFORCE EDUCATION & TRAINING: (1) A workforce skills assessment coupled with a business/industry needs assessment is recommended; (2) Cooperation between business & industry and education is needed to improve education & training service delivery; (3) Review current master plans at area institutions to determine how future workplace needs are being met; and (4) The Task Force recommends convening a "think tank" of retired and active CEOs to explore ways to improve workforce education and training. Frankly, most of these initiatives are already underway through the actions of the Asheville Area Chamber of Commerce, AdvantageWest, and A-B Technical Community College. The Task Force is currently determining what role, if any, the City has in any of these particular initiatives. Regardless of the extent of the City's involvement in this area, the fact that workforce education and training was deemed to be a priority area in the Plan is testament to the importance of labor force skills in attracting and retaining economic development activity. This is particularly true as the community tries to move toward competing in a more knowledge-based economy.

RIVERFRONT DEVELOPMENT: The Task Force recommends development of the Asheville Riverside Parkway. The Implementation Task Force is proposing that the collection of existing roads (roughly 9 miles) currently serving the riverfront corridor be renamed and redesigned into a unified, continuous, multi-lane "parkway" type roadway between the two points between the intersections of Swannanoa River Road at Tunnel Road in east Asheville and Broadway at 19-23 in northwest Asheville. It also includes that portion of the French Broad River that parallels Amboy Road between I-240 and Meadow Road. The "Riverside Parkway" would have a single name along the entire corridor (currently there are four different road names – Riverside Drive, Lyman St., Meadow Road, and Swannanoa River Road) and state and local signage would be created to identify the corridor and, placed so as to direct traffic to and through it. Redesign would incorporate a planted median, landscaping, pedestrian, bicycle, and transit facilities, and at various locations, public parking providing convenient access to a greenway. The group also advocates the city begin immediately to identify the specific "footprint" and fund construction of the greenway along both rivers. Amboy Road would remain so named but would also be redesigned and upgraded in a manner consistent with the Parkway. Finally, planning should integrate necessary improvements to other local "feeder" streets and roads connected to this corridor. The Task Force suggests that only after this infrastructure is planned, funding put in place, and construction underway, can a wholesale redevelopment of the corridor be advanced to the full extent of the vision as expressed in the goal statement.

ITF members held a meeting to discuss the proposal with staff in the Planning and Engineering Departments, and with the approval of the City Manager, those departments are preparing to incorporate the project into their work plans.

The ITF and City staff is recommending Council endorsement of the Riverside Parkway concept and granting staff authority to begin project planning.

Mr. Cecil responded to various questions from Council specifically noting that the ITF will be seeking public input into this project.

Mayor Sitnick suggested Mr. Cecil make this presentation to the Transportation Advisory Committee and the Transportation Coordinating Committee .

Mayor Sitnick suggested a representative from the ITF be involved with the green building roundtable which will be held in October. The roundtable will be to develop information for a green building guide which will contain information for to the community for green buildings. Mr. Cecil said that he would ask the ITF at their next meeting if someone would be interested in participating in that roundtable discussion.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

2001 CONSOLIDATED ACTION PLAN

Due to a conflict of interest, Councilman Worley moved to excuse Councilwoman Bellamy from participating in this matter. This motion was seconded by Councilman Peterson and carried unanimously.

Ms. Charlotte Caplan, Community Development Coordinator, said that the City expects to have available $1,839,656 in CDBG funds and $1,422,966 in HOME funds to spend on housing and community development activities in the fiscal year beginning July 1, 2001. The City's Housing and Community Development Committee (HCD) and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 22 CDBG-assisted and 14-HOME assisted projects.

In addition, the HCD Committee recommends that the City apply for a CDBG Section 108 Guaranteed Loan in the amount of $850,000 to assist Eagle/Market Streets Development Corporation in a major redevelopment effort in South Pack Square. A draft loan application is in preparation. It can be made part of the Action Plan or it can be submitted separately.

If approved, the funding will assist in adding or preserving 188 affordable housing units in the City and 162 units in the rest of the Consortium area (Buncombe, Henderson, Madison, and Transylvania Counties), will provide 3,300 Asheville residents with other needed services, and will assist in a major revitalization of the South Pack Square neighborhood.

Notice of the public hearing and a summary of the draft plan was published on April 6. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD on or before May 15, 2001.

No action is needed at the public hearing scheduled for April 24, 2001. Approval of the draft Action Plan is recommended at the May 8, 2001, Council Meeting.

UPDATE ON THE FEASIBILITY OF TWO-WAYING COLLEGE AND PATTON

City Engineer Cathy Ball said that this is an update from City staff on the status of the feasibility study evaluating the possibility of converting College Street and Patton Avenue from one-ways pairs back to two-way streets. She said that this information will be made available to the public and she wanted City Council to be briefed on the report first.

During the design of Prichard Park, staff recommended an evaluation of converting College Street and Patton Avenue from one-way pairs back to two-way streets. The reason for this request was to improve traffic access to some areas, to allow for an improved pedestrian environment, and to enhance the downtown as a destination. The consultant for the Prichard Park project briefly examined the possibility of the conversion but did not finalize the report due to budget and time constraints.

The City recently contracted with Kimley-Horn Associates to complete the feasibility study for converting College Street and Patton Avenue to two-way streets. Their study to date has determined that it is feasible to convert those streets to two-way traffic and still maintain an acceptable level of service at all of the intersections.

Mr. Mark McDonald, consultant with Kimley-Horn Associates, said that the study's purpose was to determine the operational feasibility of converting the existing College Street-Patton Avenue one-way pair in Asheville's Central Business District to a configuration that will reasonably accommodate two-way traffic patterns.

The study methodology included: (1) assemble data: traffic counts, intersection geometrics, timings, etc.; (2) grow and restrict volumes for horizon year 2003; (3) assume basic lane configurations and run preliminary analyses; (4) check needs against assumptions, revise and re-analyze; (5) identify critical conditions and develop recommendations; and (6) prepare intersection schematics and report.

Objectives included (1) accommodating traffic flow through the Central Business District; (2) retaining on-street parking wherever possible; (3) maintaining and enhancing a pedestrian-friendly atmosphere; and (4) coordination with plans for Pritchard Park and Pack Square.

The study results revealed that (1) conversion is feasible with the following traffic-related impacts: (a) reduced capacity and a general decline in level-of-service ratings; (b) more vehicle-vehicle and vehicle-pedestrian conflicts; and (c) the loss of 10-12 on-street parking spaces and several loading areas; and (2) implementation will require (a) the reconstruction of most intersections; and (b) significant upgrades to traffic signals, signing, and pavement markings.

Areas of concern were (1) "Ground Zero" at Pack Square (a) modify signal phasing for westbound N. Pack Square traffic; and (b) Biltmore Avenue/Broadway Street is a state route; changes must be approved by the N. C. Dept. of Transportation; and (2) Pritchard Park Triangle (a) divert primary through traffic eastbound onto College Street; and (b) direct northbound traffic onto Patton, then left onto Haywood.

Preliminary recommendations include (1) restrict northbound left turns from Biltmore Avenue at Patton Avenue; (2) restrict eastbound left turns from College Street at Haywood Street; (3) enlarge corner radii to accommodate new turning movements; (4) remove traffic signals at South Pack Square and Market Street; and Patton Avenue and Haywood Street/Church Street; (5) upgrade remaining signals to conform with MUTCD guidelines; (6) revise timing to accommodate new two-way patterns; (7) provide advance directional signing for eastbound through traffic; and (8) upgrade all pavement markings and signing.

Planning & Development Director Scott Shuford briefly explained some benefits for this change. They included: destination concept, improved access to businesses and parks along roadway and an improved pedestrian environment with calmed traffic.

Mr. Shuford explained that even though this is a feasible project, staff will report back to Council after analyzing the pros and cons of this possible conversion so City Council can make an informed decision.

Discussion surrounded whether we want people to come into downtown and look at the shops or just to get them through the downtown area as quickly as possible to get to another part of town. In addition, the cost for this project will be very important because there are many other areas in the community that need attention.

Ms. Ball said that the City is working with the N. C. Dept. of Transportation to study the feasibility of replacing traffic signal hardware and software in the City and if Council decides to proceed with this project, it could all be tied together to reduce the cost.

POLICY RE: APPOINTMENT OF COUNCIL MEMBERS TO BOARDS & COMMISSIONS

Mayor Sitnick said that she asked City Attorney Oast to prepare a policy regarding termination of Council member appointments to Boards and Commissions. Said policy reads:
"The Asheville City Council from time to time appoints one of its own members to serve on boards and commissions, and to represent Council's interest in the business that comes before that board or commission. It is not Council's practice to terminate its appointments prior to the expiration of the term for which the appointment was made, even where the authority exists to do so. However, with respect to any appointment of a Council member where that appointment is at the pleasure or discretion of Council, or with respect to which Council's power to terminate the appointment is not prescribed or limited by law or ordinance, Council reserves the right, in the event that the Council member appointed ceases to serve on the City Council, to terminate the appointment, and appoint a current member of the City Council. Nothing herein shall be construed to limit Council's appointment power, or the power to terminate appointments, with or without cause, with respect to any board or commission to which it may appointment members."

Mayor Sitnick pointed out that the reason that a Council member is appointed to a board is because some of our boards are authority-making boards and Council needs to make sure that their interests are being represented.

City Attorney Oast noted that this proposed policy doesn't give City Council any more power than they already have.

Vice-Mayor Cloninger said he would want to make the policy prospective.

Councilman Worley said that this policy will at least put each Council member on notice. However, he felt City Council should have the flexibility in dealing with each appointment on a case by case basis.

Councilwoman Field felt that just because a person is no longer a member of Council doesn't mean that they cease to be able to represent the Council.

Mayor Sitnick personally favored a policy that a Council member is automatically removed from a board if they are not reelected to Council and that it be effective at the next election. That way, the person going off the board won't feel like they have been assessed to be inadequate. She didn't think the proposed policy outlined above gives City Council the representation they need.

Councilman Peterson felt that having a current Council member on a board not only serves the board better, but City Council better as well. The current Council member has the knowledge of everything that is going on and that experience will serve the board better.

Vice-Mayor Cloninger felt that an automatic removal if not re-elected to Council is narrowing Council's options.

City Attorney Oast suggested not making this amendment to the City Council's Rules, but that it be a policy outside of the rules.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CITY WATER AUTHORITY REPRESENTATIVES

At the request of Mayor Sitnick, it was the consensus of City Council to invite the three City representatives to the Regional Water Authority to the May 1, 2001, worksession to discuss water-related issues.

The City Manager was also instructed to advise the Council when he would be ready to bring a comprehensive report to Council regarding the Water Authority, in particular problems with the Water Agreement and the issue the Water Authority is discussing of being a separate Authority.

CLOSED SESSION

At 6:35 p.m., Councilman Peterson moved to go into closed session to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease – G.S. 143-318.11 (a) (5) and that the meeting be moved to Room 209 of the City Hall Building. This motion was seconded by Councilman Worley and carried unanimously.

At 7:19 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 7:19 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – April 24, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson (left meeting at 7:02 p.m.); and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Hay gave the invocation.

ADDITIONS TO THE AGENDA

City Manager Westbrook asked that an item be added under "Other Business" regarding the May 1, 2001, worksession.

Mayor Sitnick requested that an item be added under "Other Business" regarding a request of Council.

Councilman Peterson stated that he would need to leave the meeting at 6:30 p.m. as he will be travelling to Durham, N.C.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 2001 AS "MOTORCYCLE AWARENESS MONTH"

Mayor Sitnick read the proclamation proclaiming May 2001 "Motorcycle Awareness Month " in the City of Asheville. She presented the proclamation to Mr. Eldon Moore who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING THE WEEK OF APRIL 29-MAY 5, 2001, AS "ASHEVILLE FIREFIGHTERS APPRECIATION WEEK"

Mayor Sitnick read the proclamation proclaiming April 29-May 5, 2001, as "Asheville Firefighters Appreciation Week" in the City of Asheville. She presented the proclamation to Fire Chief Greg Grayson and Captain David McFee, President of the Asheville Firefighters Association. Captain McFee briefed City Council on some activities taking place during the week.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 10, 2001, AND THE WORKSESSION HELD ON APRIL 17, 2001

B. ORDINANCE NO. 2805 – BUDGET AMENDMENT FOR THE CAROLINAS HISTORIC PRESERVATION COMMISSION CONFERENCE

Summary: The consideration of a budget amendment, in the amount of $14,750, for the Carolinas Historic Preservation Commission Conference hosted by the Historic Resources Commission of Asheville and Buncombe County (HRC).

The purposes of the conference are to provide training for new commission members and staff and continuing education for those more experienced. This is the first year that this event is being offered jointly by North and South Carolina. The program reflects the experiences, expertise, and strengths of both states.

The University of North Carolina at Asheville will serve as conference headquarters. Sessions will be held on campus and in the historic districts. With six National Register districts, three locally designated districts, and over sixty individual National Register listings and landmarks, Asheville offers an especially rich environment for the field sessions and special events.

This conference will be a superb commissions-to-commissions training event. The North Carolina State Historic Preservation Office has awarded the HRC a $2,000 grant to cover the cost of the bus tour and honorarium. All other expenses will be covered by the $55 registration fee and includes all sessions, meals, and events.

City staff recommends adoption of the budget amendment.

ORDINANCE BOOK NO. 19 – PAGE 135

C. RESOLUTION NO. 01-51 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PAVING ENTERPRISES INC. FOR THE CONTRACTED PAVEMENT PREVENTIVE MAINTENANCE 2000-01 PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Paving Enterprises Inc. for the Preventative Maintenance Contract 2000-2001.

The City annually budgets for paving city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff reviewed several streets that were listed on the ITRE report and chose six streets to be maintained by application of both crack seal and a full coverage resurfacing treatment based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department has developed construction documents and specifications for preventative maintenance for Phifer Street, Kensington Drive, Jeffress Avenue, Mt. Vernon Place, Lucerne Avenue and Mountain Terrace.

The engineer's estimate for Contracted Pavement Preventative Maintenance 2000-2001, was $204,804 for these streets. Money for the project is currently budgeted in the Public Works Department's operating budget.

The project was advertised for one month. The Engineering Department received bids on February 28, 2001. Only one bid was received at this bid opening. The sealed bid was returned to the bidder unopened. The project was immediately re-advertised for one week. The Engineering Department held a second bid opening on March 14, 2001. One bid was received and opened. The bid was $198,040.

The construction time for this phase of the project is identified as 90 calendar days in the contract documents.

City staff requests City Council authorize the City Manager to execute a contract with Paving Enterprises, Inc. in the amount of $198,040.00.

RESOLUTION BOOK NO. 26 – PAGE 331

D. RESOLUTION NO. 01-52 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH APAC CAROLINA INC. FOR THE CONTRACTED PAVING 2001-01 PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with APAC Carolina Inc. for the Contracted Paving 2000-2001.

The City annually budgets for paving city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff reviewed several streets that were listed on the ITRE report and chose six streets to be resurfaced based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department has developed construction documents and specifications for resurfacing Grindstaff Road, Hilliard Avenue (from Clingman Avenue to West Haywood Street), Melton Drive, Brookcliff Drive, Starmount Drive, and Russell Street.

The engineer's estimate for Contracted Paving 2000-2001 was $350,800 for these streets. Money for the project is currently budgeted in the Public Works Department's operating budget.

The project was advertised for one month. The Engineering Department received bids on February 28, 2001. Only one bid was received at this bid opening. The project was re-advertised for one week. The Engineering Department held a second bid opening on March 14, 2001. Two bids were received and opened. One bid was from APAC Carolina Inc. in the amount of $260,325.00, and the other bid was from Paving Enterprises Inc. in the amount of $304,643.39.

The construction time for this phase of the project is identified as 90 calendar days in the contract documents.

City staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with APAC Carolina Inc. in the amount of $260,325.00 for the Contracted Paving 2000-2001.

RESOLUTION BOOK NO. 26 – PAGE 333

E. MOTION SETTING A PUBLIC HEARING ON MAY 8, 2001, TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT AT 56 SHILOH ROAD

F. RESOLUTION NO. 01-53 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT FROM AND ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF HOUSING & URBAN DEVELOPMENT TO FUND A LEAD-BASED PAINT HAZARD CONTROL PROGRAM

Summary: The consideration of an application to the U. S. Department of Housing and Urban Development for a Lead-Based Paint Hazard Control Grant.

City staff is developing an application to the U.S. Department of Housing and Urban Development for approximately $1,700,000 to fund a three year program to reduce Lead-Based

Paint Hazards in the City of Asheville and the Asheville Regional Housing Consortium Area (Buncombe, Henderson, Madison and Transylvania Counties).

This program, which is being developed in close coordination with UNC-A's Environmental Quality Institute (EQI) and other governmental and non-profit agencies, will identify housing units occupied by low- and moderate-income families which contain lead-based paint. The level of risk in each unit will be assessed, and appropriate, cost-effective, hazard control measures will be carried out, followed by a clearance test to demonstrate that the unit is safe for occupancy.

This application will benefit greatly from its association with a national program, under development by EQI, to distribute do-it-yourself lead test kits to homeowners and renters and to follow up positive tests with advice and materials for the residents to carry out their own preventive controls. The partnership with EQI will provide both matching funds and a competitive edge for this application compared with others nationwide. The City will also partner with other non-profit agencies active in housing rehabilitation and repair.

The due date for the application is May 17, 2001.

City staff recommends approval of the resolution authorizing the grant application.

RESOLUTION BOOK NO. 26 – PAGE 335

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING FOR THE 2001 CONSOLIDATED ACTION PLAN

Due to a conflict of interest, Councilman Worley moved to excuse Councilwoman Bellamy from participating in this matter. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick opened the public hearing at 5:20 p.m.

Ms. Charlotte Caplan, Community Development Coordinator, said that the City expects to have available $1,839,656 in CDBG funds and $1,422,966 in HOME funds to spend on housing and community development activities in the fiscal year beginning July 1, 2001. The City's Housing and Community Development Committee (HCD) and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 22 CDBG-assisted and 14-HOME assisted projects.

In addition, the HCD Committee recommends that the City apply for a CDBG Section 108 Guaranteed Loan in the amount of $850,000 to assist Eagle/Market Streets Development Corporation in a major redevelopment effort in South Pack Square. A draft loan application will be submitted separately.

If approved, the funding will assist in adding or preserving 188 affordable housing units in the City and 162 units in the rest of the Consortium area (Buncombe, Henderson, Madison, and

Transylvania Counties), will provide 3,300 Asheville residents with other needed services, and will assist in a major revitalization of the South Pack Square neighborhood.

Notice of the public hearing and a summary of the draft plan was published on April 6. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD on or before May 15, 2001.

The State Housing Finance Agency has completed it's first round of evaluation of tax credit applications as a result of which it looks like one of the applications (Mountain Housing Opportunities' Northpoint Commons development in Woodfin) stands very little chance of success at the State level. That being the case, Mountain Housing Opportunities has requested reallocating $188,000 from this development to the higher ranked (by the State Finance Agency) Compton Place development in Asheville. City staff supports this and the Asheville Regional Housing Consortium Board is in favor as well. They would like to propose that this be included as an amendment to the Plan as originally proposed to reduce the funding for the Northpoint Commons by $188,000 and increase the HOME funding for Compton Place by $188,000.

City Attorney Oast recommended City Council vote on May 8 to amend the Plan to include the proposal by Mountain Housing Opportunities, if City Council wishes to support that amendment.

Upon inquiry of Councilman Peterson about Neighborhood Housing Services' financial status, Councilwoman Field explained that the City is going to allocate money to them, however, they will not release those funds until they are more stable. Ms. Caplan will monitor that closely.

Ms. Caplan said that Neighborhood Housing Services has done an excellent job in the past and they have taken necessary steps to reduce their overhead and salaries while they re-group and plan their next year's projects. She said that they have completed good, quality projects but some financial planning done at the start of the projects was not as far-sighted as it might have been.

Mayor Sitnick closed the public hearing at 5:36 p.m.

Mayor Sitnick said that approval of the draft Action Plan and any amendments will be considered by City Council at the May 8, 2001, City Council meeting.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2806 – ORDINANCE DENYING THE CONDITIONAL USE PERMIT FOR AN ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT AT THE CORNER OF CHARLOTTE STREET AND EDWIN PLACE

City Attorney Oast said that City Council held a public hearing on April 10, 2001, on this matter.

City Attorney Oast passed out a revised draft Order in which he explained the changes: (1) in Finding of Fact No. 4, he clarified where the vehicle counts occurred; (2) in the Conclusions (4) (d), he corrected the Section Number of Chapter 7; (3) in the ordinance, the addition of a repealer clause; (4) in the ordinance, the addition of the following language "if any section, subsection, clause or phrase of this ordinance is for any reason held to be invalid, then the entire ordinance shall likewise be invalid, and subject to modification or re-adoption as provided by law."' and (5) in the caption of the Order he removed the Reisers name and just left the address.

As recommended by Councilwoman Field, City Attorney Oast would amend the Conclusions No. 4 (e) to read: "There already exists on-street parking on Edwin Place ...."

City Attorney Oast responded to a clarification question from Councilman Worley regarding Finding of Fact No. 16.

As recommended by Vice-Mayor Cloninger, City Attorney Oast would amend Conclusion No. 4 to read: "The proposed parking lot is permissible as a conditional use on the subject property ...."

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that what City Council will be voting on is whether the Findings and Conclusions reflect the sense of Council from the evidence presented at the public hearing on April 10, 2001.

Mayor Sitnick said that Conclusion No. 4 (c), states that "the proposed use fails to comply with official plans of the City in that it introduces a commercial use onto a lot that is zoned to a residential classification ...." She asked that at a future worksession City Council determine whether or not a parking lot should be included as an ancillary use in a residential district. Councilwoman Field responded that the Planning & Zoning Commission will be considering that issue.

As recommended by Councilwoman Field, City Attorney Oast said that he would amend Conclusion No. 4 (c) to read: "The proposed use fails to comply with official plans of the City in that the corner serves as a transitional gateway between the residential uses to the north and the commercial uses to the south ...."

Mayor Sitnick personally felt that the "penalty" for a person who grades and paves a parking lot before obtaining permits is not a sufficient deterrent to make sure that it doesn't happen again. City Attorney Oast responded that he is working with the Planning & Development Department and will be bringing a report to City Council in the near future.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2806, with amendments outlined above. This motion was seconded by Councilman Peterson and carried on a 4-3 vote, with Mayor Sitnick, Vice-Mayor Cloninger, Councilman Hay and Councilman Peterson voting "yes" and Councilwoman Bellamy, Councilwoman Field and Councilman Worley voting "no."

ORDINANCE BOOK NO. 19 - PAGE 137

V. NEW BUSINESS:

A. RESOLUTION NO. 01-54 - RESOLUTION ENDORSING THE ASHEVILLE RIVERSIDE PARKWAY PROJECT

Economic Development Director Mac Williams said that at the April 17, 2001, City Council worksession, Mr. Jack Cecil, Chairman of the Sustainable Economic Development Plan (SEDP) Implementation Task Force provided an update on the activities of the Task Force. He also requested approval of a resolution endorsing a project proposal that addresses a number of strategies outlined in the Plan concerning Riverfront Redevelopment.

He said the Plan is oriented toward a goal of positioning Asheville to attract "knowledge-based" enterprises; and, it lists approximately fifty specific action strategies, divided among four broad priority areas, determined by citizens to be important to achieving that goal. The broad priority areas include: The Development Process, Real Estate, Riverfront, and Workforce/Education.

The ITF was appointed to serve in an advisory capacity. It was to prioritize the strategies outlined in the Plan, work with City staff on implementation options, and make recommendations to Council. In that capacity, and following that direction, the ITF has approved and is making a project recommendation for Council's endorsement. The project, a Riverside Parkway, was explained in detail at the April 17, 2001, worksession.

ITF members held a meeting to discuss the proposal with staff in the Planning and Engineering Departments, and with the approval of the City Manager, those departments are preparing to incorporate the project into their work plans.

The ITF and City staff is recommending Council endorsement of the Riverside Parkway concept and granting staff authority to begin project planning.

Mayor Sitnick said that last week at the Technical Advisory Committee meeting of the Metropolitan Planning Organization, she brought this issue up as requested by the ITF Committee Chair. She asked for the opportunity to get it on the Transportation Improvement Plan so that we can move forward with it.

Upon inquiry of Councilman Peterson, Mr. Williams stated this is an endorsement of a concept that ultimately would involve redesign, reconstruction and renaming of that corridor in the future. The actual changes may not occur for some time until after the public input process and the engineering, planning and funding is in place. City Manager Westbrook also explained that there will be City funding involved, but not in the next couple of years. He said the City has to get the N. C. Dept. of Transportation to get it on their projects list and fund it.

Mayor Sitnick said this is something for the established economy on the river corridors as well as inspiring future business, retail and residential.

Councilman Peterson questioned how many lanes are proposed. Mr. Williams said he didn't know in that this is just at the point of getting the process started so that engineering can start looking at a footprint.

After Ms. Hazel Fobes expressed concerns regarding the project, Mayor Sitnick explained that this is about beautifying existing roads and improving them, rather than digging them up or widening them. This is really just endorsement of a concept to explore the improvement of the roads on the river corridor.

Ms. Sharon Martin asked how much the study will cost the City taxpayers who will not be consulted on whether or not to spend the money on a study. Mr. Williams responded that City staff in the Planning and Development Department, the Engineering Departments, and other appropriate City departments will incorporate the project into their work plans.

Ms. Martin also expressed concern that the City is putting this as a priority, as far as development is concerned, when there are pressing infrastructure and sidewalks needs throughout the City.

Councilman Hay said that nothing in this concept building new streets or reallocates sidewalk dollars. Once City Council endorses the concept, as opportunities present themselves, there is a plan in place that they can relate to as other projects are started.

Mr. Sakata Brokaw felt that with more redevelopment on the river corridor with service-type businesses and parks, some of the older industrial businesses currently located there may feel pressured to move out.

Mr. Adam Baylus was concerned that this is all about growth and growth is not sustainable. He felt our tax dollars will finance economic development for a very small group of people who own property and businesses. He didn't see the job opportunities being generated through this kind of economic development as really having the trickle down effect that we are after. He felt there is a huge section of our population that wants sustainability but not in the context that is being presented by the City here.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Hay moved for the adoption of Resolution No. 01-54. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

RESOLUTION BOOK NO. 25 – PAGE 336

B. RESOLUTION NO. 01-55 – RESOLUTION ADOPTING POLICY REGARDING APPOINTMENT OF COUNCIL MEMBERS TO BOARDS AND COMMISSIONS

Mayor Sitnick said that she asked City Attorney Oast to prepare a policy regarding termination of Council member appointments to boards/commissions/authorities ("board"). Said policy reads: "The Asheville City Council from time to time appoints one of its own members to serve on boards and commissions, and to represent Council's interest in the business that comes before that board or commission. It is not Council's practice to terminate its appointments prior to the expiration of the term for which the appointment was made, even where the authority exists to do so. However, with respect to any appointment of a Council member where that appointment is at the pleasure or discretion of Council, or with respect to which Council's power to terminate the appointment is not prescribed or limited by law or ordinance, Council reserves the right, in the event that the Council member appointed ceases to serve on the City Council, to terminate the appointment, and appoint a current member of the City Council. Nothing herein shall be construed to limit Council's appointment power, or the power to terminate appointments, with or without cause, with respect to any board or commission to which it may appointment members."

Mayor Sitnick said that in the past City Council has had a policy that said when we make appointments to certain boards that a Council member must be represented on that board as the appointments are made. She said those are the A-B Crime Stoppers Board of Directors (one must be a Council member), the ADA Compliance Committee (one must be a Council member), the Asheville Downtown Commission (two must be Council members), the Citizens-Police Advisory Committee (one must be a Council member), the Film Board (one must be a Council member), the Police Officers & Firefighters Disability Review Board (one must be a Council member), the Regional Water Authority (two of the three City's appointments may be Council members), and the Tourism Development Authority (TDA) (one must be a Council member). She finds it curious that the a Council member "may" be appointed to the Water Authority - a group that has a very serious impact on the City and on our rate-payers and an appointment that really requires signification communication and liaison activity with the Council.

Mayor Sitnick said that City Council doesn't have a specific policy about what happens to a Council member appointed to a board that does not seek reelection or was not re-elected. She said that because there are certain things occurring in the community, she personally felt there was a need to explore this policy especially with an appointment like to the Water Authority or MSD, because a lot of things that City Council does are impacted by the Water Authority or sewer issues, e.g. economic development. Therefore, she felt there was a need to explore this appointment process about whether that former Council member remains on the board, whether that person remove themselves from the board, or whether the Council should have that authority.

City Attorney Oast said that for most of the boards that Council makes appoints to, those members including Council members, serve at the pleasure of Council. What is suggested here is a policy that essentially tells Council they can do what they already have the power to do, but it may serve to put those people on notice that at least part of the basis for their appointment is the fact they are Council members and if they lose that status, then their appointment may be subject for reconsideration.

Mayor Sitnick said that the two options discussed at the April 17, 2001, worksession was that if a person is not re-elected or has sought re-election, that (1) the former Council member is automatically removed from the board and replaced by a sitting member of Council; or (2) the Council has the option to review that appointment and either let it stand or replace that person with a sitting Council member.

Councilman Hay asked if Council made an appointment to the Metropolitan Sewerage District (MSD) Board, could Council revoke that appointment at some point, or if once the appointment is made, would it fall within MSD's rules on how to remove Board members. City Attorney Oast said that he would need to look at the rules or enabling authority for any particular board. However, typically most of those kinds of appointments are appointments that are at the pleasure of the appointing body, so they be revoked at anytime. There are some boards however, like the Board of Adjustment, that are for a specific term and Council can't revoke them.

Mayor Sitnick said that the philosophy behind appointing a City Council member to these boards is that the actual board is very involved in things that impact a lot of what City Council does and Council wants that direct connection. Those appointed members come back to the regular City Council meetings and let Council know what goes on at the board meetings.

Mayor Sitnick said that there is so much going on right now, this issue, with regard to the Water Authority, needs to be addressed now because she feels there is not a direct-enough line of communication and City Council has been in the dark. She didn't feel that calling representatives to the Water Authority in once or twice a year or quarterly is sufficient to keep Council up-to-date on what is going on with the Water Authority. There should be a general policy on the boards that Council feels strongly enough to appoint a member of Council that when that person is no longer a member of Council, that an automatic reappointment should occur. She personally feels that there are boards that City Council makes appointments to that really requires a direct link, e.g. Water Authority, MSD, TDA, and Economic Development Commission (EDC).

Councilwoman Bellamy agreed with Mayor Sitnick, however, she did not feel that Council should replace that member in the middle of their term. The next City Water Authority representative's term is up September 30, 2001 (Tommy Sellers).

Mayor Sitnick asked that if Council adopts this policy for the future that they don't do it at the discretion of Council, but that if a member from the Council is appointed and they don't get reappointed again, that it is an automatic replacement.

Councilman Peterson felt that because of the significant role that the Water Authority and MSD plays in the lives of our constituents that they expect City Council to have some more direct control. He felt Council might just want to focus on the Water Authority and MSD. He would be in favor of amending Council's policy to make it consistent with, for instance, the Film Board in which one member must be a Council member. He felt that not only will City Council be served better, but the board is served better as well because the current Council member has the knowledge of everything that is going on and that experience will serve them better.

Councilman Worley agreed that Council should have a policy to have Council members serving on these critical boards. However, he was not sure Council has the ability to set a policy, for example with the Water Authority, where we make an appointment and then we have the ability to remove that person if they cease to be a council member. One of the things you run up against are the creating documents that set up the appointment process of that particular board. The Water Authority by-laws set a three year term and there is a procedure by which a member may be removed. He didn't think there was any policy City Council could establish that would supercede that unless the City goes back to the County and re-negotiates a change in the Water Authority by-laws. He was in favor of adopting a policy that may ask or even encourage Council members who no longer sitting Council members who are appointed on some of these boards to step down, but he didn't think we can require it or make it automatic.

Vice-Mayor Cloninger said it only makes sense that Council have a policy where they reserve the right if they so choose to remove someone who is on a board who is no longer a member of City Council. But, Council should have the discretion to leave that person on that board if they want to. By having a closed door policy when someone is no longer on Council that they automatically have to leave the board is not in the best interests of the City. There may be a situation where someone is no longer on City Council but is a very effective advocate for the City's interest and may be more effective than any current member of Council. Also, if you lock it in that a position must be a member of Council, you could have a situation where, for some reason, no one on City Council is able to attend those meetings. Or, the one member of Council who is interested would not be as an effective advocate than the person already on the board. He felt Council should reserve the right to ask someone to step down, but not tie Council's hands.

Councilwoman Field felt City Council should have the flexibility and ability to make the best decision possible.

Mr. Jim Bannon, representing Smart Growth Partners, spoke in favor of having a Council member on the critical boards, such as the Water Authority and MSD, since they deal with water quality, land use planning and infrastructure.

Councilwoman Bellamy felt that all Council members should have the opportunity to serve on a board.

Mr. Hazel Fobes felt it was important for Council to have a liaison to all boards.

Ms. Sharon Martin said that the purpose of having a sitting Council member on a board is to ensure that information flows to facilitate good decisions. If a Council member is not on the board, the direct communication is not there. Also, the citizens elect City Council and City Council turns around and appoints a member to a board. If that person is no longer a member of Council, then they are not accountable to the people who elected them.

Mr. Peter Dawes felt City Council should require one of their three appointments to the Water Authority a member of City Council.

Councilman Hay moved to adopt Resolution No. 01-55 as prepared by City Attorney Oast above. This motion was seconded by Vice-Mayor Cloninger and carried on a 5-1 vote, with Mayor Sitnick voting "no". (Councilman Peterson left the meeting at 7:02 p.m.)

When Mayor Sitnick moved that City Council consider appointing a member of City Council to the Water Authority immediately, City Attorney Oast responded that he felt City Council would have to revoke one of it's appointments in order to create a vacancy on the Water Authority. Mayor Sitnick then requested at the next meeting that the City Attorney report back on how City Council can remove a member from the Water Authority whose term will be expiring September 30, 2001, and appoint a sitting Council member to that board.

Vice-Mayor Cloninger acknowledged the Mayor's right to ask the City Attorney for that information but opposed taking such action.

RESOLUTION BOOK NO. 26 – PAGE 337

C. CONSIDERATION OF MODIFICATIONS TO STATE BUILDING CODE APPLICABLE TO CITY OF ASHEVILLE

City Attorney Bob Oast said that at the City Council worksession on April 17, 2001, Councilwoman Field asked that he draft a letter to the N. C. Office of the State Fire Marshal asking that the Asheville amendments to the N. C. State Building Code Council be removed. That letter has been drafted and he asked for approval of that letter to be signed by the Mayor.

Fire Chief Greg Grayson reviewed with Council the following history of the fire protection water supply requirements for the City of Asheville and his recommendations:

- The state fire prevention code does not include fire protection water supply requirements, except for hazardous occupancies and for outdoor tire storage facilities. Facilities that are required to install automatic fire sprinkler systems must have adequate water supply to operate the systems.

- Within the state fire prevention code there are specific City of Asheville amendments, which do describe fire protection water supply requirements.

- These amendments were passed as a part of a local ordinance by the City Council then approved by the North Carolina State Building Code Council. The City ordinance covering fire protection water supply was passed by City Council on July 25, 1995. The ordinance became part of the State Building Code – Volume V – Fire Prevention on March 12, 1996.

- These amendments are a part of the state code therefore they are law. To deviate from the amendments in any way requires action by the State Building Code Council. Appeals are to the State Building Code Council.

- The standard used by the City of Asheville is amended from the National Fire Academy. The other top fifteen cities in North Carolina currently use the ISO schedule, the NFPA schedule or City Engineering Specifications to address water supply requirements. The amended National Fire Academy standard is less restrictive than the ISO schedule.

- Some cities do not have water supply gallons per minute minimum requirements. Instead, they use minimum water line sizing and water line looping and griding requirements as a substitute.

- Asheville determined water flow requirements were more effective for this community because the water line sizing is under the auspices of the regional water authority, not

301

directly under city government. Most North Carolina cities directly manage water line sizing without a regional water authority.

- Advantages for the Asheville standard being an integral part of the state code include formal acknowledgement across the state of established standards in Asheville. In addition, the local elected officials do not have to address this issue on a case-by-case basis.

- Disadvantages for the Asheville standard being a part of the state code is that some cities do not have a standard. In addition, the local elected officials cannot address the issue on a case-by-case basis. The standard is then under the control of the State Building Code Council.

- At this point, Asheville is the only North Carolina city which has fire protection water supply requirements as a part of the State Fire Prevention Code. Other cities did use this method in past years, but have removed the requirements from the state code in lieu of engineering specifications or ordinances.

- It is important to establish water supply requirements or line size requirements. Failure to do this will result in non-sprinkled commercial buildings that will have a negative effect on the city's overall fire insurance (ISO) rating. In addition, we strongly advocate automatic fire sprinkler systems as offering a superior level of fire protection while keeping the city's fire protection costs to a minimum.

- The state building code is changing as of January 1, 2002. We will need to take action before that time regarding our ordinance and amendments in order to be compatible with the new state building code.

- Should our fire protection water supply requirements move from state control to local control, it would be prudent for the established standard to apply to all buildings and facilities equally. To not take this approach would open the city up to a significant amount of liability in the event of a fire or other emergency.

Should the City Council decide to take action to change the fire protection water supply requirements, he suggested the following steps:

1. City Council makes the decision to remove the water supply requirements from the State Building Code. (City Ordinance – Appendix E of Chapter 6.)

2. Mayor Sitnick sends a letter to the State Building Code Council via the Office of State Fire Marshal indicating that the City Council desires to remove the fire protection water supply requirements from the State Building Code – Volume V – Fire Prevention, with a requested effective date.

3. Before the Building Code Council makes the request official, the City Council will need to approve fire protection water supply requirements be added to the City Engineering Standards and Specifications.

   (To reduce confusion, we would suggest that if we make this change that we go ahead and implement the fire protection water supply requirements consistent with the new State Building Code , which will become effective January, 2002).

This would move the fire protection water supply standards from control at the state level to control at the local level. We do have some other fire protection requirements that are in our ordinance that are also in the State Fire Prevention Code. Prior to January, 2002, we will need to approach Council to carry forward any items necessary with the implementation of the new state building code. These items include lock box requirements, required fire district designations and other related items.

Councilwoman Field stressed that we will not be less safe or do anything different than we are doing now – we will just remove it from the Fire Code so we will be in conformance with the International Code. She recommended that as soon as possible, that a group of individuals made up of the Building Safety Department, Fire Department, Engineering Department, and representatives from the architectural community and engineering community to sit down and figure out what is the best way to handle this.

Councilman Worley moved to authorize the Mayor to send a letter to the N. C. Office of the State Fire Marshal asking that the Asheville amendments to the N. C. State Building Code Council be removed. This motion was secondea by Councilwoman and carried unanimously.

VI. OTHER BUSINESS:

A. RESOLUTION NO. 01-56 – RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE

Upon request of City Manager Westbrook, Councilwoman Bellamy moved to adopt Resolution No. 01-56 to (1) cancel the May 1, 2001, worksession, and (2) schedule the joint meeting with the Buncombe County Commissioners on May 29, 2001, at the Asheville Civic Center. Said meeting will begin at 3:00 p.m. in the Asheville Civic Center Banquet Room with a tour beginning at 2:30 p.m. in the lobby of the Asheville Civic Center. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 338

B. NON-BETTERMENT COSTS

Upon request of Mayor Sitnick, Councilwoman Bellamy moved to send a request in writing to Buncombe County, Henderson County and the Regional Water Authority that they support the non-betterment legislation that is currently in Raleigh by making phone calls, sending letters or personal contact with our state delegation. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Mickey Mahaffee

Mr. Mickey Mahaffee, representing Peacemakers, stated that, in his opinion, the 1995 Water Agreement with Henderson County has not been fair to Henderson County.

Comments by Lola Fay

Ms. Lola Fay, representing the Asheville Area War Tax Resistors, stated that 47% of our tax dollars goes to past and current military. Since the group won't use their money for death and destruction, incarceration and obliteration, six years ago their war tax resistance group was formed around a common theme of taxes for life, not for death. They believe in paying taxes for the betterment of their society. She presented checks of resistant war taxes to a representative of Prison Books, Asheville Global Report, and Shunyata.

Comments by Sakata Brokaw

Mr. Sakata Brokaw felt that two lanes should be adequate for the Asheville Riverside Parkway Project, not multi-lanes similar to Broadway.

Comments by Dan Waterman

Mr. Dan Waterman, representing N.C. Hemp, felt there was a need for an audit of the City.

Comments by Dave Mitler

Mr. Dave Mitler, representing Asheville People for Cannabis Education, complained about a parking ticket he received and questioned the City's penalty provisions.

Comments by Hazel Fobes

Ms. Hazel Fobes, representing Citizens for Safe Drinking Water and Air, thanked City Council for beginning their appointment process to the Clean Air Community Trust Board. With regard to the Asheville Riverside Parkway Project, she was in favor of the Project, however, was concerned that there were no drawings available to see what the nine-mile project would look like. She announced a public hearing on May 9, 2001, at 5:30 p.m. in the First Floor North Conference Room in City Hall regarding the Regional Water Authority's budget.

Claims

The following claims were received by the City of Asheville during the period of April 6-19, 2001: Sandra Wells (Water), James R. Dutton (Water), Dale Houck (Water), Faith McCallister (Water), Deanna McClain (Streets), Brady Blackburn (Streets), BellSouth (Traffic Engineering) and Doris Richardson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The City has received the following Complaint on April 19, 2001, regarding Ginny Godfrey v. Asheville Police Department and William Annarino as Agent. The nature of the proceeding is a complaint for participating in the undue felonious assault and battery upon a civilian female, and failure to follow proper and reasonable procedure when criminal activity has been reported. This matter will be handled in-house.

Closed Session

At 8:25 p.m., Councilman Hay moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations - G.S. 143-318.11(a)(4); (2) To prevent disclosure of information that is privileged or confidential pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that renders the information to be discussed confidential is N. C. Gen. Stat. 160A-168, the Personnel Privacy Act. - G.S. 143-318.11(a)(1); and (3) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Henderson County, Cane Creek Water and Sewer District, Asheville-Buncombe-

304

Henderson Water Authority, Buncombe County, City of Asheville, Frances C. Briggs, Myrna R. Hendrix, Rose Investments, Travis M. Bach, Haywood and Ruth Plott, Howard and Doris Meece, Mary Ann Quarngesser, Allyn Family Real Estate Limited Partnership, Thantex Specialties, Hubbell Realty Development, Alliance-Carolina Tool & Mold, Medical Action Industries, Cutler-Hammer, Eaton Corporation, City of Asheville, and Carolina Power & Light - G.S. 143-318.11(a)(3). This motion was seconded by Councilman Worley and carried unanimously.

At 9:18 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

OTHER MATTERS

There followed a brief discussion about the extraterritorial jurisdiction/annexation moratorium bills that had been introduced by Representative Crawford and that they had been "killed" on reconsideration in committee.

There was also a brief discussion of the closed session bills regarding their effects on current processes. City Manager Westbrook briefly discussed our legislative proposals for this session.

In response to a question from Councilwoman Field, City Manager Westbrook explained that millions of dollars had been given to the now-departed developer of the private portions of the Grove Arcade were not true.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9: 32 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – May 8, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Peterson gave the invocation.

On behalf of City Council, Mayor Sitnick and Councilman Peterson expressed their sympathy on the recent death of Mr. E. Benson Slosman.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 10, 2001, AS "PARKS AND RECREATION VOLUNTEER RECOGNITION DAY"

Mayor Sitnick read the proclamation proclaiming May 10, 2001, as "Parks and Recreation Volunteer Recognition Day " in the City of Asheville. She presented the proclamation to Mr. Buster Brown, Bill Fulp Community Service Award Recipient; Mr. Irby Brinson, Mr. Jeff Joyce, Ms. Laura Loftis and Mr. Bill Fulp.

B. PROCLAMATION PROCLAIMING MAY 19-25, 2001, AS "NATIONAL SAFE BOATING WEEK"

Mayor Sitnick read the proclamation proclaiming May 19-25, 2001, as "National Safe Boating Week" in the City of Asheville. She presented the proclamation to Mr. Bill Swan, who thanked City Council for taking time to recognize the week.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 24, 2001

B. RESOLUTION NO. 01-57 - RESOLUTION SETTING A PUBLIC HEARING FOR MAY 22, 2001, TO CONSIDER THE DEMOLITION OF A DWELLING LOCATED ON WYATT STREET

RESOLUTION BOOK NO. 19 – PAGE 339

C. RESOLUTION NO. 01-58 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH LUMINA BUILDERS INC. TO FURNISH AND INSTALL THE FINISHED SURFACE TREATMENT AND DASHERBOARDS FOR THE OUTDOOR ROLLER HOCKEY RINK AT THE FRENCH BROAD RIVER PARK

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Lumina Builders Inc. to furnish and install the finished surface treatment and dasherboards for the outdoor roller hockey rink at the French Broad River Park.

The City of Asheville is continuing its development of the French Broad River Park which entails numerous recreational activities within the westernmost tract of land along Amboy Road. Among these activities is an outdoor roller hockey rink that will be a unique asset to the community. The project is funded through City of Asheville funds which are supplemented by the Parks and Recreation Trust Fund Grant. City staff is preparing the site to be paved via a private contractor. In order to complete the construction of this rink, staff has put out to bid the materials and installation of the finished skating surface treatment (a plexifor system) and dasherboards (fiberglass). Lumina Builders, Inc., was the lowest responsible bidder to furnish and install these elements at a cost of $74,780.

The Parks and Recreation Department recommends that City Council authorize a contract for the outdoor roller hockey rink at the French Broad River Park.

RESOLUTION BOOK NO. 19 – PAGE 341

D. RESOLUTION NO. 01-59 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AMENDED AGREEMENT WITH CAROLINA POWER & LIGHT COMPANY TO INSTALL ATHLETIC FIELD LIGHTING AT THE FRENCH BROAD RIVER PARK – PHASE IV

Summary: The consideration of a resolution authorizing the City Manager to amend the agreement with Carolina Power & Light (CP&L) to install athletic field lighting at the French Broad River Park – Phase IV.

Several years ago, the City entered into an agreement with CP&L to install ballfield lights at Murphy-Oakley and Weaver Parks. This agreement allowed for the City to pay a monthly fee for the installation of the lights; therefore, reducing capital expenditures. After review by the City Attorney's Office, it has been determined that an amendment can be made to the existing contract which will allow us to enter into an agreement with CP&L to provide athletic lighting at French Broad River Park – Phase IV. This lighting will include lights for the volleyball area, roller hockey/basketball arena, and soccer/baseball field. These features will be included in the first phase of development and will be ready for use as early as July of this year. The cost associated for lighting the area will include the following breakdown:

Volleyball	$ 58,000
Roller hockey/basketball	$ 50,000
Soccer/baseball	$115,800

The Department is currently negotiating a fee structure which will include an up front base payment. With future monthly installment payments, this will allow for the City to receive the best possible price for the installation of the lights and will allow for the lights to be paid for over a period of years.

The Parks and Recreation Department staff requests City Council authorize an amendment to the existing CP&L contract.

RESOLUTION BOOK NO. 19 – PAGE 342

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT AT 56 SHILOH ROAD

Mayor Sitnick announced that a letter dated May 2, 2001, has been received by Mr. George W. Morosani requesting "a two week's continuance of this matter until May 22."

When Mr. Jim Brooks, owner of 56 Shiloh Road, advised Council that his house address is 56 Shiloh Road and he is not asking for any type of conditional use permit, Planning & Development Director Scott Shuford advised City Council that they will ascertain if there is a problem with the street address and if necessary, will re-advertise.

Vice-Mayor Cloninger moved to continue this public hearing until May 22, 2001. This motion was seconded by Councilwoman Field and carried unanimously.

CLOSED SESSION

City Attorney Oast said that in light of the action that Buncombe County took last week with respect to zoning parts of the County, he felt like City Council needs to hear from him about some of the legal aspects of that and he requested Council move to go into a brief closed session for that purpose.

At 5:26 p.m., Councilman Hay moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including consultation regarding the legal effect of Buncombe County's action of May 1, 2001, to establish zoning for parts of the County. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Worley.

Councilwoman Bellamy said this was abnormal to go into closed session in the middle of a regular Council meeting. She suggested City Council hear the closed session issue after the meeting and then consider the issue in two weeks.

Vice-Mayor Cloninger said that he didn't think he would be in a position to vote on the issue of the extraterritorial jurisdiction tonight, so he would favor a two week postponement of the hearing as well.

Councilman Worley said Council may not want to consider making any decision today but Council could go forward with the public hearing and then continue remainder of public hearing for two weeks. This would give Council the opportunity to digest the information received by the City Attorney and take into account the comments from the public hearing.

Councilman Hay said he was not sure, until he hears the City Attorney's report, what the legal issues are about whether there is a consequence in postponing the hearing. He was not in any hurry to hold the public hearing, but he did want to know if there any legal consequences of not making any decisions tonight.

Mayor Sitnick said that since this is such an unusual request by the City Attorney, that there must be a good reason for it. She preferred going into closed session for a brief period of time and then come back out and make a decision on whether to hold the public hearing. Her general thought is that if people come for the advertised public hearing, then Council should afford them the opportunity to speak and not inconvenience them and make them come back.

308

Councilwoman Bellamy again expressed her concern of going into closed session in the middle of a formal meeting, especially when prior closed session matters have traditionally been longer than 10-15 minutes.

Councilwoman Field felt that if the closed session would be limited to 10 minutes, she would have no problem in voting to go into closed session at this time.

At 5:37 p.m., Councilman Hay moved to amend his motion to go into closed session for no longer than 10 minutes. This amendment was accepted by Councilman Worley. Said amended motion carried on a 6-1 vote, with Councilwoman Bellamy voting "no".

At 5:45 p.m., Councilman Hay moved to come out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

Councilwoman Bellamy pointed out for the record that her objection for voting against the closed session was not for the consideration of the extraterritorial jurisdiction, but for the procedure.

B. PUBLIC HEARING TO EXTEND THE CITY'S EXTRATERRITORIAL JURISDICTION IN THE FAIRWAY ROAD/US 74 AREA, THE LONG SHOALS ROAD AREA, AND THE US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA

Urban Planner Paul Benson opened the general public hearing at 5:47 p.m. He said the public hearing was advertised on April 27 and May 4, 2001.

Using a map, Mr. Benson said Planning staff has prepared three ordinances that would extend the City of Asheville's extraterritorial planning jurisdiction (ETJ) in three separate areas: Fairview Road/US 74; Long Shoals Road; and US 19-23/Sarids Road/Sand Hill Road/Brevard Road.

State law permits cities to extend extraterritorial jurisdiction at least one mile beyond their corporate limits in areas of critical concern to the City based upon existing or projected urban development. There are three reasons for extending ETJ into these areas: (1) protection of land suitable for industrial development; (2) management of growth in rapidly developing areas; and (3) control of growth along key city gateways. Each of these areas meet some of this criteria. These extensions are supported by officially adopted plans and policies as evidenced in the 1989 Addendum to the 2010 Plan and by the Sustainable Economic Development Task Force Report.

Totals for all three areas are: 5,869 acres and 1,612 properties. By way of comparison, the City's existing ETJ is about 7,300 acres, and the entire existing planning jurisdiction of the City, including the corporate limits and the existing ETJ, is about 33,700 acres.

Zoning will be assigned to these areas based on an evaluation of existing land uses, relationship to development in the City, existing and planned infrastructure, and any other relevant factors.

ORDINANCE NO. 2807 - ORDINANCE EXTENDING THE CITY'S EXTRATERRITORIAL JURISDICTION TO INCLUDE AN AREA KNOWN AS THE FAIRWAY ROAD/US 74 AREA

Mayor Sitnick opened the public hearing at 5:55 p.m.

Mr. Benson said this area, to the east of the City, includes a large stretch of the Blue Ridge Parkway right-of-way, and land extending southeast on both the north and south sides of US Highway 74 (Charlotte Highway), as shown of the Highway 74 Area ETJ Extension map. The area includes residential areas off Avondale Road and areas to the north off Hemphill Drive. This area includes 832 acres and 273 properties. Generally the boundaries are described by property lines and the center of the Blue Ridge Parkway extending to the south. This is a gateway area to the City and an area that is also experiencing rapid urban development.

Councilman Peterson asked if there was any consideration given to extending the ETJ on the east side of the Blue Ridge Parkway. Mr. Benson responded that state law stipulates that they follow features that are readily identifiable on the ground to the maximum extent possible. He said they could have followed the eastern right-of-way for the Blue Ridge Parkway, but they wanted to use a feature that was very clear on the ground. He said a property line can be identified, but not as readily identifiable. So, to make the boundary as strong as possible, they tried to follow road centerlines wherever possible.

Mayor Sitnick said that there are some small farms in this area. She was concerned they will be out of compliance if the ETJ is extended into their area and if at some point in the future it becomes more urbanized. She wants to make sure that the small privately owned family farms are preserved, allowed to expand, and allowed to continue their operations. She wondered if a special zoning designation of "agri-land" or "small farms" could be created in order to preserve those family farms that have been in existence for a long time. The thought driving them out is not acceptable to her.

Mr. Benson said that there is an interpretation issued by former Planning & Development Director Julia Cogburn that bona fide farms are exempt from our zoning regulations and the Planning Department has been operating under that interpretation. In addition, as we get into the zoning of the area, there are a number of options that can be looked at and certainly drafting a new rural residential zoning district would be a possibility. During the Unified Development Ordinance discussions, that issue was looked at and decided that, at that time, that they were not including enough agricultural land to justify the district.

Planning & Development Director Scott Shuford said that City Council is only voting on zoning the areas at this time, only on whether to extend the ETJ into the areas. He said they are operating under an interpretation with farms inside the City in that they are not regulating their use for these small-type farms. That would be an interpretation they will continue, unless they find that they need to create a separate zoning district as Mr. Benson indicated to accommodate those uses. One of the purposes behind extending the ETJ is to go after land uses which are facing development pressure and changes in their pattern. If there are small farms in somewhat isolated circumstances that need protection, they are not likely to faced with the same level of development pressure anyway and so accommodating them would make sense. One qualification, however, is one of the purposes of this is to establish, in effect, an industrial-only zoning designation for land that would be considered prime industrial and there may be farms in those areas, but they could continue as non-conforming uses.

City Attorney Oast said that any existing farm, as any other kind of existing use, would be allowed to continue under the non-conforming use provisions of our Code. As Mr. Shuford pointed out, the City is currently operating under an interpretation with respect to small farms that would extend into this area.

Councilman Worley said that he felt the concern is not so much as grandfathering, but in the case of a small farm, if the owner of the small farm wants to expand. If that interpretation permits that, then that is fine.

Mr. Shuford said that is a valid concern and one shared by City staff. There is a farm in this particular area and the owner has talked with the Planning staff about her plans to expand her operation. Mr. Shuford said that he feels she is covered by that interpretation and will be happy to put that in writing for her protection.

Councilwoman Field said that the area along the Blue Ridge Parkway looks very undeveloped and wondered what the zoning designation would be. Mr. Benson responded that is a very steep hillside and that the area is all within the right-of-way of the Blue Ridge Parkway. Without having done a lot of study, he said it would probably be RS-2

Councilwoman Field said that maybe at the same time staff is looking at the possibility of some type of farm designation, that they look into the possibility of a zoning designation for publicly-owned parks, as previously been raised by Mayor Sitnick and discussed by City Council.

Mr. Walter Plaue was concerned about implementing some type of zoning that, at some future date, may preclude the owner of that property from either selling it or subdividing it.

City Attorney Oast said that nothing City Council is doing tonight would limit the ability of anyone in these areas to subdivide their property.

Upon inquiry of Councilman Worley, Mr. Shuford said that these small farms would be zoned whatever is appropriate for the surrounding area, but under the interpretation would be exempt from complying with those zoning regulations as long as they continue to operate as a farm.

Upon inquiry of Councilwoman Field, City Attorney Oast said that working farms do enjoy special tax recognition.

In response to Councilman Peterson, Mr. Shuford said that currently within our existing ETJ, not just the three areas under consideration tonight, the City enforces only its zoning and its subdivision regulations. The City does not enforce stormwater management regulations, erosion control regulations, junked vehicle ordinances or building permit and inspection requirements. Those are ones that we are eligible to pursue. We considered suggesting to Council that we move in that direction and assume those in our existing ETJ, and of course we would suggest it here in the proposed three areas, but as a result of the State budget crunch and our need to respect our neighbors, Buncombe County, with regard to the potential funding implications that might pertain to them if we took away their building permit revenue. We felt it better to not recommend to Council that we take that action this year.

When Mr. Peter Dawes asked why include the Blue Ridge Parkway right-of-way into the ETJ area, Mr. Benson said it is a movement into the urbanized area on US 74.

Mr. John Herron said that residents are afraid to come to the meeting and speak out. He felt that government is taxing people to death. In addition, he felt the City already can't handle what they already have. He strongly opposed the City taking away the property owner's right to do what they want with their land.

Mayor Sitnick said the City doesn't consider ETJ or annexation in a vacuum. The state law that allows cities to consider an ETJ and to consider an annexation is a state law for a reason. The reason why cities, not just Asheville, are allowed to consider ETJ extensions is as those areas around the city become more urbanized with more streets and more homeowners, most of those people either work in the city or come into the city for their retail, social needs, social service needs, entertainment, and their medical needs. They come into the city and they use the city's infrastructure - streets and sidewalks, etc. The people who pay for that infrastructure are the Asheville City taxpayers alone. They also pay for the use of infrastructure used by tourists and other regional residents who come into the City for those same reasons. The reason the state has this law that allows cities to extend their ETJ and annex, which are two different things, is to make sure that some of the burden is taken off the city taxpayer who pays City taxes and County taxes. The City doesn't have any desire to put an undue burden on County neighbors, but they also need to make sure that there is not an undue burden on the Asheville taxpayer as these urban areas and subdivisions grow around the City.

Mr. Shuford read from the Municipal Government in North Carolina by the Institute of Government as follows "It is in the city's interest to ensure that areas will ultimately be brought into the city are developed in a manner consistent with the city's development standards and land use planning objectives and served by appropriate public facilities. Otherwise, unplanned growth and substandard development may thwart municipal annexation. In addition, even when the city has no annexation ambitions, unplanned growth and substandard development may have detrimental effects on nearby city areas."

Mayor Sitnick closed the public hearing at 6:20 p.m.

City Attorney Oast passed out a slightly revised ordinance which reference is made to the area being one of critical concern to the City as evidenced by the 1989 addendum to the City's comprehensive plan.

Vice-Mayor Cloninger moved to adopt Ordinance No. 2807. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 143

ORDINANCE NO. 2808 - ORDINANCE EXTENDING THE CITY'S EXTRATERRITORIAL JURISDICTION TO INCLUDE THE AREA KNOWN AS THE LONG SHOALS ROAD AREA

Mayor Sitnick opened the public hearing at 6:22 p.m.

Mr. Benson said that this area includes a substantial amount of land owned by Biltmore Farms Inc., as well as property west of the French Broad River on both the north and south sides of Long Shoals Road, as shown on the Long Shoals Road Area ETJ Extension map. This area includes 1,831 acres and 176 properties.

Mr. John Herron again said the City should not be able to tell people what to do with their property.

Mr. Walter Plaue felt that one reason people get emotion about being taken into an ETJ area is that it's the first step to annexation. Even though there is no taxation under the ETJ, it's just a matter of time. He felt that even though County residents use the City's infrastructure, they spent their money in the City. The City's existing infrastructure is not maintained currently and if the City doesn't have the money to fix it now, how can they expect to fix it when more area is annexed. He said that agencies are doing their best to provide low income housing in the area, but raising taxes makes it more difficult for low income people to afford housing.

Mayor Sitnick stressed that the City does not tax in the ETJ areas and it does not mean that the City is going to annex them. She said there are many ETJ areas around the City that have never been annexed.

Mr. Shuford said that the City is unable to annex until the area reaches an urban level of density and there are very specific and tight state statutes that deal with what those provisions are. Large areas of undeveloped land are not subject to annexation regardless of whether they are in the ETJ or not. The ETJ does not create a taxing authority for the City nor does it automatically presume that the area will be annexed.

Mr. Peter Dawes said that state law says the no municipality can extend their ETJ in a zoned area and Buncombe County zoned this property last week. City Attorney Oast responded that Mr. Dawes is correct – that a city cannot expand an ETJ area into an area that has been zoned. To the extent that questions exist regarding the validity of Buncombe County's zoning, his recommendation is that City Council proceed.

Mayor Sitnick closed the public hearing at 6:38 p.m.

City Attorney Oast passed out a slightly revised ordinance which reference is made to the area being one of critical concern to the City as evidenced by the 1989 addendum to the City's comprehensive plan.

Vice-Mayor Cloninger moved to adopt Ordinance No. 2808. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 145

ORDINANCE NO. 2809 - ORDINANCE EXTENDING THE CITY'S EXTRATERRITORIAL JURISDICTION TO INCLUDE THE AREA KNOWN AS THE US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA

Mayor Sitnick opened the public hearing at 6:39 p.m.

Mr. Benson said that this area includes a large area south of I-40 to the west of the city, sweeping southeastward along US 19-23, Sand Hill Road, Sardis Road and Brevard Road to the west of I-26, as shown on the West Area ETJ Extension map. This area includes 3,206 acres and 1,163 properties. He said the area on Sardis Road is a prime area for industrial development. He said this extension would fulfill Council's policy of protecting potential industrial development. In addition, it also includes some large tracts around the Enka and BASF property that are suitable for industrial development.

Mr. James Wright spoke against extending the City's ETJ into this area. He felt this was taxation with representation. He was opposed to the City telling the residents what they can do with their own property. He said that if he wanted to be in the City, he would have moved into the City. He felt the public hearing was not at a time when most people could attend it since most people work until 5:00 p.m. or 6:00 p.m. He felt the City can't take of what they already have.

Upon inquiry by Mr. Peter Dawes again about Buncombe County's recent zoning, City Attorney Oast said that in his opinion, if City Council proceed with the extension of the ETJ, then it will be a valid ordinance.

Upon inquiry of Mr. Jim Herron, Mr. Benson said that basically what the City is doing now in the existing ETJ is regulating land subdivision so that when a property owner subdivides land, the City makes sure that the streets are adequate that go into each lot and if utilities are available to the property that they are extended by the developer. So that in the future, property owners don't have problems with failing septic tanks and roads that are falling apart. As far as zoning is concerned, Planning staff looks at existing patterns.

Mayor Sitnick closed the individual and general public hearing at 6:51 p.m.

City Attorney Oast passed out a slightly revised ordinance which reference is made to the area being one of critical concern to the City as evidenced by the 1989 addendum to the City's comprehensive plan.

Councilman Worley moved to adopt Ordinance No. 2809. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 147

IV. UNFINISHED BUSINESS:

A. CONSIDERATION OF CITY COUNCIL APPOINTMENT TO REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE AND HENDERSON

Mayor Sitnick said that since she requested this matter be placed on the agenda, she wanted to address it. It has been brought to her attention that, at this time because of the complexity of our appointment process and policies that she would be willing to leave the membership of the Regional Water Authority as it is at the present time. She said that she will be attending the Regional Water Authority meeting on Tuesday, May 15, 2001, at 8:45 a.m. in the First Floor North Conference Room in the City Hall Building. She said that she will be making some general comments about non-betterment costs and other things. She encouraged other members of Council to attend the meeting as well. She said that City staff will be reporting on the Regional Water Authority to City Council at their May 15, 2001, worksession.

She said that if, after attending the May 15 Regional Water Authority meeting, she feels there is a need for further explanation and dialogue, she will consider calling together a meeting of participants who are concerned about this issue and who are participating in this issue. Some may include Buncombe County, Henderson County, City Council and members of the Regional Water Authority.

V. NEW BUSINESS:

A. RESOLUTION NO. 01-60 - RESOLUTION AUTHORIZING SUBMISSION TO THE U.S. DEPT. OF HOUSING & URBAN DEVELOPMENT OF THE CONSOLIDATED ANNUAL ACTION PLAN 2001-02

Due to a conflict of interest, Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter. This motion was seconded by Councilman Peterson and carried unanimously.

Community Development Director Charlotte Caplan said that the public hearing on this matter was held on April 24, 2001.

Ms. Caplan said that the City expects to have available $1,839,656 in CDBG funds and $1,422,966 in HOME funds to spend on housing and community development activities in the fiscal year beginning July 1, 2001. The City's Housing and Community Development Committee (HCD) and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 22 CDBG-assisted and 14-HOME assisted projects.

In addition, the HCD Committee recommends that the City apply for a CDBG Section 108 Guaranteed Loan in the amount of $850,000 to assist Eagle/Market Streets Development

Corporation in a major redevelopment effort in South Pack Square. A draft loan application will be submitted separately.

If approved, the funding will assist in adding or preserving 188 affordable housing units in the City and 162 units in the rest of the Consortium area (Buncombe, Henderson, Madison, and Transylvania Counties), will provide 3,300 Asheville residents with other needed services, and will assist in a major revitalization of the South Pack Square neighborhood.

Notice of the public hearing and a summary of the draft plan was published on April 6. A 30-day public comment period is required by federal regulations. The final plan must be submitted to HUD on or before May 15, 2001.

Pursuant to a request by Mountain Housing Opportunities, and supported by City staff and the HCD Committee), a Plan amendment has been requested (and incorporated into the resolution) to reduce the funding for the Mountain Housing Opportunities' Northpoint Commons by $188,000 and increase the HOME funding for Mountain Housing Opportunities' Compton Place by $188,000.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Field moved for the adoption of Resolution No. 01-60, as amended above. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 343

B. RESOLUTION NO. 01-61 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE THE GRANT AND LICENSE AGREEMENT WITH FOOD LION LLC FOR SPONSORSHIP OF THE SKATEPARK LOCATED AT FLINT AND CHERRY STREETS

Parks and Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing an agreement with Food Lion for partial funding of the SkatePark located at Flint and Cherry Streets.

The Parks and Recreation Department, for the past several months, has been working with Food Lion to enter into an agreement for funding of the SkatePark located at Flint and Cherry Streets. This agreement represents a 10-year commitment by Food Lion to make the SkatePark a reality. The negotiations for this contract include naming rights, Food Lion sponsorship, and the ability for Food Lion to solicit other sponsors to assist with the funding. The agreement would commence on May 1, 2001, with final payment being made on May 1, 2007.

The Parks and Recreation Department requests City Council approval for the Mayor to execute the grant and license agreement with Food Lion, LLC, for sponsorship of the SkatePark.

On behalf of City Council, Mayor Sitnick praised the work of Mr. Brinson in making this SkatePark a reality. She thanked Doritos and Mountain Dew for their sponsorship as well.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-61. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 344

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of April 20-26, 2001: Marie Sheldon (Water), Darrel Hankins (Water), Harry Griffin Jr. (Police), Pat King (Water) and David Curry (Water).

The following claims were received during the period of April 27 – May 3, 2001: June Parler (Water) and Randy Lanford (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City has received a complaint on April 30, 2001, from Buncombe County regarding tax foreclosure proceedings for unpaid real estate taxes. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Sharon Martin

Ms. Sharon Martin stressed to Council the need for the City and County to communicate. She felt that because of the lack of communication, it becomes a conflict issue instead of a cooperation consideration. She said taxpayers are the ones who lose out when the City and County don't communicate.

Comments by Mark Long

Mr. Mark Long felt that 3-5 days to obtain a street entertainment permit is too long. His art of fire dancing gives the tourists who visit Asheville something to see and it adds to the vitality and positive vibe of Asheville. He encouraged the City to look into solutions for the problems it's Sister City San Cristobal, Mexico, is experiencing. In addition, he felt it was time for the City to look possibly at re-dedicating the City-owned monument downtown to Leonard Peltier.

Comments by Adam Baylus

Upon inquiry of Mr. Adam Baylus, Mayor Sitnick said that she has not received a letter from the Mayor of Canton regarding an appeal to City Council to cooperate and discuss the building of their civic center and raceway. She said that City Council will discuss this request when it is received.

Comments by Mayor Sitnick regarding E. Benson Slosman

Mayor Sitnick asked for City Council to consider honoring the memory and legacy of Mr. E. Benson Slosman with an appropriate commemoration. She said that he was a major contributor to the revitalization and restoration of Asheville.

Councilman Peterson suggested something with the Biltmore Train Station and Councilwoman Bellamy mentioned the greenway along the Swannanoa River Road.

Councilman Hay said that the Community Foundation has established a fund in Mr. Slosman's name and it may be that they have some goals, projects or specific ideas connected with that Fund that the City can partner with. Mayor Sitnick asked City staff set up a meeting with a representative from the Community Foundation, appropriate City staff, and interested Council members to discuss this issue.

Comments by Councilwoman Bellamy

Councilwoman Bellamy congratulated Principal Ray at Hall Fletcher for being the runner-up for the N. C. Principal of the Year. In addition, she congratulated Mr. Jackson who currently who works at Randolph Elementary as a 4th Grade teacher because he will take on the responsibility of operating the KIPP Academy.

Closed Session

At 7:23 p.m., Vice-Mayor Cloninger moved to go into closed session (1) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease - G.S. 143-318.11(a)(5); and (2) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4). This motion was seconded by Councilman Worley and carried unanimously.

At 8:57 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Councilwoman Bellamy and carried unanimously (Vice-Mayor Cloninger and Mayor Sitnick were both excused from the last closed session item regarding economic development).

MEETING RECONVENED

The meeting was reconvened in the Council Chamber with Councilwoman Field presiding.

Councilman Worley moved to set a public hearing on May 22, 2001, to consider authorizing the City to enter into an agreement with Blue Ridge Motion Pictures LLC for economic development incentives pursuant to the City's Economic Development Policy, and as authorized pursuant to N. C. Gen. Stat. sec. 158-7.1. This motion was seconded by Councilman Hay and carried unanimously.

VIII. ADJOURNMENT:

Councilwoman Field adjourned the meeting at 9:01 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – May 15, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Sitnick asked for a moment of silence for former Council member Gary "Rock" McClure who died on Monday, May 14, 2001.

CONSENT:

New Street Name of "Proctor Drive"

Summary: The consideration of a resolution accepting the new proposed street name "Proctor Drive."

Marcell Proctor, owner of lots in Watkins Estates Subdivision, has petitioned the City of Asheville to accept the street name " Proctor Drive." The new street will begin at Caribou Road and end at cul-de-sac on Proctor Drive.

City staff recommends adoption of the resolution.

New Street Name of "St. Davids Court"

Summary: The consideration of a resolution accepting the new proposed street name "St. Davids Court."

Thomas Yurchenco, owner of lots in St. Davids Subdivision, has petitioned the City of Asheville to accept the street name " St. Davids Court." The new street will begin at Liberty Street and end at cul-de-sac on St. Davids Court.

City staff recommends adoption of the resolution.

Investment Policy

Summary: The consideration of a resolution adopting the City of Asheville Investment Policy.

The City of Asheville invests its public funds in a manner which will provide the highest investment return with reasonable security while meeting the daily cash flow demands of the City. The Finance Department of the City actively manages the City's investment program with the major objective of the preservation of capital, provision of liquidity and maximization of investment earnings. The investment program has been in compliance and continues to comply with North Carolina General Statutes, requirements of the Local Government Commission, and the investment practice recommendations of the Government Finance Officers Association. The Investment Policy formalizes and standardizes compliance with those requirements and recommendations.

Staff recommends the City Council adopt the resolution and City of Asheville Investment Policy.

Office Space for VISION

Summary: The consideration a request to allow the continued use of City office space for the VISION.

The City of Asheville has provided office space to the VISION of Asheville-Buncombe County (VISION) since Spring 1996. The office space is located in the City Development Office at 29 Haywood Street and has been provided at no cost. The city also provides funding to the VISION through "outside agency" funding.

In a letter dated March 30, 2001, from VISION Board Chair Albert L. Sneed Jr. Mr. Sneed requests the City continue to grant an in kind donation of office space and existing support services (including two parking passes to the Rankin Street Parking Garage) for Fiscal Year 2001-02. The VISION Board has expressed gratitude to the City and the "ideal location" for the office space. In looking at the upcoming year, City staff is not aware of any changes in the City Development Office layout or staffing levels that will require the space currently utilized by VISION. In fact, staff has recently worked with VISION to develop a floor layout plan that will accommodate both parties needs at minimum cost to VISION. Therefore, the current space arrangement is recommended to be granted for the upcoming Fiscal Year 2001-02.

Staff recommends that Council grant the request of the VISION by a motion to approve the request thereby providing the continued use of donated office space, the existing level of support services and two parking passes to the Rankin Street Parking Garage for Fiscal Year 2001-02.

Amendment to Regional Water Authority By-Laws

Summary: The consideration of an amendment to the Regional Water Authority's By-Laws to permit members to attend meetings by teleconference for purpose of a quorum.

The resolution would approve amending Article I, Section IV of the By-Laws of the Regional Water Authority of Asheville, Buncombe & Henderson to permit an Authority member to be considered present at an Authority meeting, or a Committee meeting, both for purposes of a quorum and for voting rights, by telephone conference. The Chairman of the Water Authority, or the Chairman of a Committee in the case of a Committee meeting, must authorize each specific attendance by conference call. Of course, the use of this technology would be limited to the availability of the phone system in the meeting room; presently both the North Conference Room and the Gilewicz Conference Room have the capability for a teleconference to one remote location.

As with any amendment to the By-Laws, this amendment must also be submitted to the Buncombe County Board of Commissioners. A By-Laws amendment must be approved by two of the three boards (Authority, City Council, County Commissioners) to become effective.

The Regional Water Authority approved this amendment to the Authority's By-Laws at their April 17, 2001, meeting.

The Regional Water Authority of Asheville, Buncombe and Henderson recommends City Council approval of the by-law amendment.

Re-Certification of Asheville Regional Housing Consortium

Summary: The consideration of a resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium to continue receiving entitlement allocations under the HOME grant program.

The City of Asheville entered into a Joint Cooperation Agreement with twelve governmental units within Region B on March 31, 1992, and formed the Asheville Regional Housing Consortium. On February 12, 2001, the City sent a letter to HUD stating its intent to participate again as a consortium in the HOME program, and also stating it will submit to HUD prior to June 30, 2001, all other required documents for participation, including a new Cooperation Agreement and authorizing resolutions from member governmental units.

The Cooperation Agreement states in Section 14: "The Lead Entity and the Cooperating Units agree to remain in the Consortium at least through September 30, 2004. Thereafter, each party shall continue to participate in the Consortium to the extent required by HUD regulations or other applicable law."

Since formation of the Consortium in 1992, the region has received entitlement allocations totaling $10,519,837. The City of Asheville has received $3,347,822 for its affordable housing programs and administrative costs as Lead Entity since the beginning of the program.

Community Development staff recommends adoption of the resolution.

Annual Contract for Auditing Services for Fiscal Year 2000-01

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2000-2001.

N.C. General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit for the three (3) Fiscal Years 1997-98, 1998-99 and 1999-2000. City Council selected Crisp Hughes Evans LLP to conduct these audits with the option to be re-engaged annually for two more years. They completed the Fiscal Years 1997-98, 1998-99 and 1999-2000 audits and have now submitted an engagement letter for the Fiscal Year 2000-2001 audit. The fee has been estimated at $54,000. Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution.

Councilwoman Bellamy requested additional budget information to include prior year's actual budget vs. actual expenditures for comparison purposes.

Advertise Offer to Purchase Disposal Parcel 157 on Jordan Street

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 157 in the East End/Valley Street Community for the tax value of $2,400.00.

Disposal Parcel 157 is a substandard lot located on the south side of Jordan Street comprising 3,920± square feet. The lot is rectangular in shape and mostly flat about street level then sloping down to the rear. The bid from William Boyle includes the proposal to combine the property with adjoining property currently owned by Mr. Boyle on Jordan Street. No construction is planned.

Approval of the resolution will establish the tax value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Land & Water Conservation Fund Grant

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation, for funds, through the Land and Water Conservation Fund via the National Park Service, to assist with the development of French Broad River Park, Phase IV.

French Broad River Park, Phase IV, represents the City of Asheville's next phase of a major greenway and park system being developed along the French Broad River on Amboy Road. The final master plan is complete, and the first phase of construction is underway. The park will include greenways, bicycle facilities, lawn bowling, volleyball and soccer complex, softball field, playground, restrooms, roller hockey, open space, picnic shelter, parking, and a welcome center. Phase IV will also connect to a planned N. C. Dept. of Transportation funded greenway from Hominy Creek on the west, and eventually to the Amboy Road greenway to the east.

The Parks and Recreation Department and RiverLink are in partnership to implement an ambitious fundraising plan to raise over $2 million to build the park. To date, $620,000 has been raised.

The Parks and Recreation Department is requesting $250,000 to $300,000 in grant funds from the Land and Water Conservation Fund which requires a 50% cash or in-kind match. The match is available in cash, labor, equipment, project management and technical support through Parks and Recreation and RiverLink.

The Parks and Recreation Department recommends the City apply for and enter into an agreement for grant funds with the North Carolina Department of Environment and Natural Resources to assist with the construction of the French Broad River Park, Phase IV.

Grant from Clean Water Trust Fund for Regional Stormwater Retention Facility in West-End Clingman Area

Summary: The consideration of a resolution to apply for and enter into an agreement with the Clean Water Management Trust Fund to assist with the purchase, construction and maintenance of two regional retention facilities in the West End/Clingman area.

The WECAN Community Charette suggested that two regional retention facilities be constructed to handle stormwater runoff from the area. One of the facilities is proposed to be located on property belonging to Mr. Tom Honea. The other facility is proposed to be located on property belonging to Mountain Housing Opportunities. Mr. Honea approached Mountain Housing Opportunities staff about purchasing a portion of his property for the above purpose.

The City is interested in assisting with this project because it is a more desirable solution to managing stormwater than individual stormwater facilities for every site. A regional wet stormwater facility allows impurities from the stormwater to settle out before the water is discharged into the stream. Additionally, the grant from the Clean Water Management Trust Fund must be requested by the City. Mountain Housing Opportunities is not an eligible agency for the grant.

The City is requesting approximately $250,000 in the grant. The grant does not require a match; however, some match is recommended. We propose to match the $250,000 request with the land (for the second stormwater facility) that belongs to Mountain Housing Opportunities. Mountain Housing Opportunities would be required to deed the land to the City of Asheville prior to receiving the grant.

The Engineering Department recommends the City apply for a grant to assist with the purchase, construction and maintenance of two regional retention facilities in the West End/Clingman area.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PRESENTATION ON THE WATER AUTHORITY AND RELATED ISSUES

City Manager Westbrook said that this update will cover key trends and land use implications, financial trends and challenges, information on American Freightways – A Flawed Business Model, examples of regional authorities – pros and cons, and a summary and staff recommendations.

He asked Council to pay special attention to three key items (1) What business model is most appropriate for the Regional Water Authority (Authority) to pursue; (2) water supply is a regional asset; and (3) water distribution is a local decision based upon land use, economic development and other political factors.

Planning & Development Director Scott Shuford explained the economic development trends and outlined Asheville's population density, concluding that City and County development patterns and population growth rates reflect suburbanization rather than urbanization. Sprawl development is expensive to serve. Sixty percent of water customers are in the City. We are selling less water than 10 years ago and we are selling it through a much more dispersed distribution pattern.

Mr. Shuford also outlined land use issues, concluding that water service distribution directly determines the land use patterns and directly affects the economic development prospects of a community, and decisions regarding water service distribution should be determined by the political jurisdiction having land use control.

Finance Director Bill Schaefer said that the current depreciated assets of the water system are $97.9 million and the current system produces a revenue stream of over $19 million per year. He reviewed with Council the "equity" in the water system and explained that the Sullivan Act precludes a differential rate structure for the City of Asheville. He explained in detail the financial challenges with the current regional water agreement which are (1) funding new water lines; and (2) organizational considerations. In conclusion, the current operation follows a flawed business model in that (1) the definitions in the Water Agreement are difficult to implement; and (2) the financial burden of running new water lines is inequitably borne by Asheville and Buncombe water customers.

Water Resources Director Tom Frederick explained why a request for water service from American Freightways is a "flawed" business model. The current interlocal agreement with Henderson County requires separate accounting books for every "regional water line." The requested "regional water line" to serve American Freightways is just over 500 feet long. If separate accounting had been set up for the water system in Buncombe County for every 500 feet of water line, there would now be over 12,000 separate sets of accounting books to manage the finances of the water system. He said that it is not the fault of the City Water Resources Department nor the fault of the Henderson County Utilities staff that the agreement is not working. The problem is the process (or business model) defined in the agreement for building water lines, which is ambiguous on the details and is incredibly bureaucratic. The process can only be changed by amending the agreement, which requires action of the Henderson County Board of Commissioners, the Buncombe County Board of Commissioners, City Council and the current Regional Water Authority. At the April 17, 2001, meeting of the Regional Water Authority, Authority members discussed that the Regional Water Agreement may need amending. He concluded that there is a serious need for a better business model that builds water lines in Henderson County, without wasteful accounting and legal expenses, and the overlap of multiple governmental organizations overseeing administrative detail.

Mr. Frederick then explained why the Orange County Water & Sewer Authority was not a good example of a regional water authority. He then went on to explain, in detail, why the Piedmont Triad was a good example of a regional water authority. In conclusion, he said that City staff has concluded that the Piedmont Triad Water and Sewer Authority offers a better model for this region to follow in developing a regional authority for addressing the regional water lines of Buncombe and Henderson Counties.

City Manager Westbrook summarized the report as follows: (1) each political jurisdiction (Asheville, Buncombe County and Henderson County) has separate and unique water services and growth management needs; (2) Henderson County believes a "true" G. s. 162A water authority will best meet their needs; (3) the current regional water agreement represents a "flawed" business model; (4) water supply is a regional asset; (5) water distribution is a local decision based upon land use, economic development, and other political factors; (6) financial inequities exist when Asheville and Buncombe County residents pay for Henderson County water lines; and (7) implementation of the Piedmont Triad model (G.S. 162-A) over Mills River assets would allow Henderson County sole discretion over growth management decisions. In conclusion, regional management structures should be limited only to manage assets which are truly regional in nature. Decisions regarding local issues, such as where to extend or replace water lines within a community, should be made by the governing board of that community.

City Manager Westbrook recommended that the "flawed" business model be fixed by (1) establishing the Mills River Treatment Facility, water supply intake and the 24" transmission line as a regional water authority organized under N. C. Gen. Stat. sec. 162-A; (2) allowing authority to have 3-4 local government customers buying wholesale water at wholesale rates; and (3) separating water distribution issues by local political jurisdiction.

Step One to begin implementation of fixing the "flawed" business model includes (1) City Council negotiating with Buncombe County and Henderson County regarding the best way to regionally manage current water system assets inside Henderson County; and (2) City Council inviting the City of Hendersonville to participate in the negotiations. Step Two is the City of Asheville and Buncombe County should jointly review the Supplemental Water Agreement to determine if changes are needed in the management of water system assets within Buncombe County.

Discussion surrounded the different components of the presentation and City Council asked numerous questions, made several comments and offered suggestions regarding the information presented.

requested "regional water line" to serve American Freightways is just over 500 feet long. If separate accounting had been set up for the water system in Buncombe County for every 500 feet of water line, there would now be over 12,000 separate sets of accounting books to manage the finances of the water system. City Manager Westbrook recommended that the "flawed" business model be fixed by (1) establishing the Mills River Treatment Facility, water supply intake and the 24" transmission line as a regional water authority organized under N. C. Gen. Stat. sec. 162-A; (2) allowing authority to have 3-4 local government customers buying wholesale water at wholesale rates; and (3) separating water distribution issues by local political jurisdiction.

Step One to begin implementation of fixing the "flawed" business model includes (1) City Council negotiating with Buncombe County and Henderson County regarding the best way to regionally manage current water system assets inside Henderson County; and (2) City Council inviting the City of Hendersonville to participate in the negotiations. Step Two is the City of Asheville and Buncombe County should jointly review the Supplemental Water Agreement to determine if changes are needed in the management of water system assets within Buncombe County.

Discussion surrounded the different components of the presentation and City Council asked numerous questions, made several comments and offered suggestions regarding the information presented.

It was the consensus of Council that this is a good framework within which to begin discussions. City staff should investigate ways in which this would benefit the other parties to the agreement.

Mayor Sitnick reiterated to Council her comments at the Regional Water Authority meeting earlier in the day. She asked the Authority to support the bills exempting Asheville from the non-betterment waterline relocation costs. She explained her delay in responding to a letter Chairman Tate had written to her. She encouraged better communication between the Authority and City Council. With regard to the Water Agreement, the Authority seems to be unhappy with parts of it as well as City Council. She suggested we call the Henderson County Commissioners, the Buncombe County Commissioners, members of the Water Authority and City Council and start a substantive, comprehensive dialogue on where we go from here.

REGIONAL WATER AUTHORITY CITY REPRESENTATIVES

Mr. Lewis Daniels, Mr. Tommy Sellers and Mr. Ted Patton, Regional Water Authority City representatives, answered various water-related questions from City Council. They all agreed that the Piedmont Triad model is a good platform to begin discussions.

Mayor Sitnick felt there should be some type of media education seminar so the media can help educate the public on this issue.

Discussion then surrounded how the presentation by City staff should be viewed by the Buncombe County Commissioners, Henderson County Commissioners, and the entire Regional Water Authority in order to start the education process and start the dialogue in a major community-wide way.

It was the consensus of City Council to have the City staff make their presentation (as they did at this worksession) at the next Water Authority meeting, inviting the Buncombe County Commissioners and Henderson County Commissioners. The presentation can be held in the Council Chamber and a video tape made to be shown on the Government Channel.

LICENSE AGREEMENT WITH TRITON PCS FOR CONCEALED WIRELESS COMMUNICATION TOWER AT 300 MERRIMON AVENUE

At the request of City staff, this matter was removed from the agenda.

BENEFICIAL FILL SITE (AZALEA ROAD PROPERTY)

Public Works Director Mark Combs said that the City's White Fawn Reservoir was closed to beneficial fill dumping on February 2, 2001. To facilitate Water Maintenance and Streets Division's needs regarding a close, accessible and long term beneficial fill site, staff has been gathering specific information for the further potential development of the property, as directed by Council.

On April 3, 2001, City Council approved resolutions to purchase 155 acres of property on Azalea Road for long term development as a park, sports fields and potential beneficial fill site.

Potential short term beneficial fill options such as materials recycling and small, isolated sites would certainly aid in primary site longevity; however such options do not mitigate the need for a central, city owned and operated site which will serve the city's beneficial fill needs for the next 15 or more years. Also, the siting and development of small satellite operations pose significant liability and operations challenges to the City.

Concurrent with the recent purchase of the property, staff has initiated the following actions:

1. On January 31st Council directed staff to prepare a proposal regarding potential development of the property;
2. On February 2nd the White Fawn Reservoir was closed. Beneficial fill material is currently being placed in the Buncombe County Landfill in Alexander. In addition to tip fees, the 17 mile (one-way) trip has reduced operational efficiency by an estimated 30-50% due to travel time.
3. To date (12 weeks), the City has paid $90,907.84 to Buncombe County, which is an average of $7,576 per week, or $30,304 per month. Annual cost projections remain tenuous due to seasonal construction variances and emergencies; however, based on past experience, Water staff estimates tip fees at $500,000 per year and Department of Public Works staff estimates $175,000.
4. Staff developed a scope of services for an operation plan contract with the engineering firm of Woolpert, LLP, who will work with their sub-consultant, Froehling and Robertson, Inc. to prepare a plan which will incorporate the following:

    → Contour map;
    → Soil and Erosion Control Plan;
    → Plan for stabilization of existing slopes;
    → Plan for protection of existing river banks if necessary;
    → Design of upgrade to existing road if necessary;
    → Identify soil borrow source;
    → Work procedures for operation of site coordinated with Park plan;
    → Site grading plan (for grading permit application);
    → Prepare documents necessary for all permits as required; and
    → Flexibility (for slope and grade design) consistent with the final Parks & Recreation Master Plan (1st public meeting May 24th).

Estimated Operation plan cost: **$39,500** (4 to 6 weeks to complete plan)

5. On April 10th staff met with Dan LaMontagne, NC DENR, at the Azalea site regarding an allegation from a citizen that 'toxic wastes' were polluting the Swannanoa River. Subsequently, Mr. LaMontagne's has gathered site samples and should receive test results in mid to late June. Based on the consultant's original site examination, staff is confident that the site is not toxic to the surrounding waters and property.

6. On April 23rd staff met with and provided specific site information to Patrick Lance and Alex Perry (WNC Nature Center) regarding their concern of potential impacts of a beneficial fill site up stream from the Center.

Based on staff's further research and investigation as directed by Council, we recommend the following:

a. Appropriate $75,000 to the Public Works Department for tip fees from February through June 30th (Water Department staff estimates FY 00-01 tip fees of $110,000):
b. Appropriate $39,500 for a contract amendment with Woolpert LLP to develop a site operation plan; and
c. Direct staff to return to Council with a draft operation plan for Council review and approval with appropriate public input, as determined by City Council.

Contingent on Council's approval to proceed with a site plan, staff will report back to Council regarding specific construction and operations dates as plans are completed, as directed.

Councilman Worley asked for additional information regarding recycling of materials.

Discussion surrounded why the White Fawn Reservoir filled up so quickly.

Councilman Peterson explained why he had a concern that going to Azalea Road may not be the most cost-effective alternative. In addition, he wondered if the City could use the material to fill in worthless land in the City.

Vice-Mayor Cloninger and Councilman Hay requested additional information showing that other sites had been investigated and the reasons those sites are not an option anymore.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to separate the two budget amendments on the next formal City Council agenda.

SALE AND/OR TRADE OF CITY PROPERTY FOR THE JAIL DETENTION CENTER

City Manager Westbrook stated that this item needs to be pulled from the agenda pending further discussion with City Council.

REPORTS FROM THE OUTSIDE AGENCY COMMITTEE AND THE FEES & CHARGES COMMITTEE

Budget Director Ben Durant passed out the outside agency funding requests and recommendations from the City Council Outside Agency Committee. He noted that the Committee's recommendation for 2001-02 is $310,000 which is a decrease of $63,000 from 2000-01 budget.

Mr. Durant explained why the Committee had recommended $40,000 to be allocated to the A-B Community Relations Council (CRC) (their request was $63,000). After Councilman Hay advised Council that the CRC's funding is being reduced from Buncombe County and CDBG funds. Executive Director Bob Smith advised Councilman Hay that if their budget is cut by the City, they may well have no choice but to close down. It was the consensus of City Council to recommend $63,000 funding to the CRC and advise them of problems encountered with their application that need to be corrected and if they are not addressed, those problems will be considered the next time a funding request is made.

Mayor Sitnick suggested that every agency that is awarded outside agency funding be scheduled in for a worksession next year to find out what that agency is doing. Vice-Mayor Cloninger didn't think that was necessary and felt the Outside Agency Committee is capable of handling that.

Councilman Hay felt the entire outside agency funding process needs to be looked at in that, for instance, the Economic Development Commission should not be competing for funds with the One Youth at a Time agency.

Mayor Sitnick was very much opposed to funding the Visitor's Center $100,000 in that the Chamber of Commerce did little or nothing to help City Council with the room tax.

Mayor Sitnick questioned the no funding for the Coalition of Asheville Neighborhoods. Vice-Mayor Cloninger explained the Committee's position with regard to that request.

Mayor Sitnick urged City Council to support the Kids Voting in the amount of $1,000 as a symbol of City Council's support.

It was the consensus of City Council to vote separately on each of the outside agency funding requests when the ordinance is brought before City Council for adoption.

City Council then discussed the report of the recommendations from the City Council Fees & Charges Committee.

RESOLUTION NO. 01-63 – RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION'S 2001 EVENTS

City Manage Westbrook said that this is the consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville Downtown Association's 2001 events at specific locations and times.

For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the Downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities*. The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Councilman Worley moved to suspend the rules and take formal action at this meeting since the first event begins Friday, May 18, 2001. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved to adopt Resolution No. 01-63. This motion was seconded by Councilwoman Field and carried on a 6-1 vote, with Councilwoman Bellamy voting "no".

RESOLUTION BOOK NO. 26 – PAGE 346

CLOSED SESSION

At 7:50 p.m., Councilman Hay moved to go into closed session for the following reasons: (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4); and (2) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease - G.S. 143-318.11(a)(5). This motion was seconded by Councilwoman Field and carried unanimously.

At 9:36 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9:36 p.m.

Magdalen Burleson
CITY CLERK

Keni Sitnick
MAYOR

Tuesday – May 22, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Worley gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 01-62 – RESOLUTION REAFFIRMING SISTER CITY RELATIONSHIP

Councilman Worley read the resolution reaffirming the Sister City relationship with Saumur, France.

Councilman Worley moved for the adoption of Resolution No. 01-62. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 345

ADDITION TO THE AGENDA

It was the consensus of City Council, at the request City Attorney Oast, to add a resolution authorizing cancellation of the Biltmore Farms Deed of Trust and release of the Letter of Credit to the Consent Agenda.

II. CONSENT AGENDA:

At the request of Councilwoman Bellamy, Councilman Worley moved to remove Consent Agenda Items H and L from the consent agenda to be considered separately due to a conflict of interest by Councilwoman Bellamy. This motion was seconded by Councilwoman Field and carried unanimously.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 8, 2000, AND THE WORKSESSION HELD ON MAY 15, 2000

B. MOTION SETTING A PUBLIC HEARING ON JUNE 12, 2001, TO ADOPT THE FISCAL YEAR 2001-02 ANNUAL OPERATING BUDGET

C. RESOLUTION NO. 01-64 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "PROCTOR DRIVE"

Summary: The consideration of a resolution accepting the new proposed street name "Proctor Drive."

Marcell Proctor, owner of lots in Watkins Estates Subdivision, has petitioned the City of Asheville to accept the street name " Proctor Drive." The new street will begin at Caribou Road and end at cul-de-sac on Proctor Drive.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 348

D. RESOLUTION NO. 01-65 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "ST. DAVIDS COURT"

Summary: The consideration of a resolution accepting the new proposed street name "St. Davids Court."

Thomas Yurchenco, owner of lots in St. Davids Subdivision, has petitioned the City of Asheville to accept the street name " St. Davids Court." The new street will begin at Liberty Street and end at cul-de-sac on St. Davids Court.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 349

E. RESOLUTION NO. 01-66 - RESOLUTION APPROVING THE CITY OF ASHEVILLE INVESTMENT POLICY

Summary: The consideration of a resolution adopting the City of Asheville Investment Policy.

The City of Asheville invests its public funds in a manner which will provide the highest investment return with reasonable security while meeting the daily cash flow demands of the City. The Finance Department of the City actively manages the City's investment program with the major objective of the preservation of capital, provision of liquidity and maximization of investment earnings. The investment program has been in compliance and continues to comply with North Carolina General Statutes, requirements of the Local Government Commission, and the investment practice recommendations of the Government Finance Officers Association. The Investment Policy formalizes and standardizes compliance with those requirements and recommendations.

Staff recommends the City Council adopt the resolution and City of Asheville Investment Policy.

RESOLUTION BOOK NO. 26 – PAGE 350

F. MOTION GRANTING THE REQUEST OF VISION FOR ASHEVILLE-BUNCOMBE COUNTY TO (1) CONTINUE USING DONATED CITY OFFICE SPACE AT 29 HAYWOOD STREET, (2) USE OF EXISTING LEVEL OF SUPPORT SERVICES, AND (3) TWO PARKING PASSES TO THE RANKIN STREET PARKING GARAGE FOR USE BY THE VISION STAFF

Summary: The consideration a request to allow the continued use of City office space for the VISION.

The City of Asheville has provided office space to the VISION of Asheville-Buncombe County (VISION) since Spring 1996. The office space is located in the City Development Office at 29 Haywood Street and has been provided at no cost. The city also provides funding to the VISION through "outside agency" funding.

In a letter dated March 30, 2001, from VISION Board Chair Albert L. Sneed Jr. Mr. Sneed requests the City continue to grant an in kind donation of office space and existing support services (including two parking passes to the Rankin Street Parking Garage) for Fiscal Year 2001-02. The VISION Board has expressed gratitude to the City and the "ideal location" for the office space. In looking at the upcoming year, City staff is not aware of any changes in the City Development Office layout or staffing levels that will require the space currently utilized by VISION. Therefore, the current space arrangement is recommended to be granted for the upcoming Fiscal Year 2001-02.

Staff recommends that Council grant the request of the VISION by a motion to approve the request thereby providing the continued use of donated office space, the existing level of support services and two parking passes to the Rankin Street Parking Garage for Fiscal Year 2001-02.

G. RESOLUTION NO. 01-67 - RESOLUTION APPROVING AN AMENDMENT TO THE REGIONAL WATER AUTHORITY'S BY-LAWS TO PERMIT MEMBERS TO ATTEND MEETINGS BY TELECONFERENCE FOR PURPOSE OF A QUORUM

Summary: The consideration of an amendment to the Regional Water Authority's By-Laws to permit members to attend meetings by teleconference for purpose of a quorum.

The resolution would approve amending Article I, Section IV of the By-Laws of the Regional Water Authority of Asheville, Buncombe & Henderson to permit an Authority member to be considered present at an Authority meeting, or a Committee meeting, both for purposes of a quorum and for voting rights, by telephone conference. The Chairman of the Water Authority, or the Chairman of a Committee in the case of a Committee meeting, must authorize each specific attendance by conference call. Of course, the use of this technology would be limited to the availability of the phone system in the meeting room; presently both the North Conference Room and the Gilewicz Conference Room have the capability for a teleconference to one remote location.

As with any amendment to the By-Laws, this amendment must also be submitted to the Buncombe County Board of Commissioners. A By-Laws amendment must be approved by two of the three boards (Authority, City Council, County Commissioners) to become effective.

The Regional Water Authority approved this amendment to the Authority's By-Laws at their April 17, 2001, meeting.

The Regional Water Authority of Asheville, Buncombe and Henderson recommends City Council approval of the by-law amendment.

RESOLUTION BOOK NO. 26 – PAGE 356

H. RESOLUTION RE-CERTIFYING THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

This matter was pulled from the Consent Agenda due to a conflict of interest.

I. RESOLUTION NO. 01-68 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH CRISP HUGHES EVANS LLP FOR AUDITING SERVICES FOR FISCAL YEAR 2000-01

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2000-2001.

N.C. General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit for the three (3) Fiscal Years 1997-98, 1998-99 and 1999-2000. City Council selected Crisp Hughes Evans LLP to conduct these audits with the option to be re-engaged annually for two more years. They completed the Fiscal Years 1997-98, 1998-99 and 1999-2000 audits and have now submitted an engagement letter for the Fiscal Year 2000-2001 audit. The fee has been estimated at $54,000. Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution.

RESOLUTION BOOK NO. 26 – PAGE 357

J. RESOLUTION NO. 01-69 - RESOLUTION ESTABLISHING MINIMUM PRICE AND DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING DISPOSAL PARCEL 157 ON JORDAN IN THE EAST END/VALLEY STREET COMMUNITY

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 157 in the East End/Valley Street Community for the tax value of $2,400.00.

Disposal Parcel 157 is a substandard lot located on the south side of Jordan Street comprising 3,920± square feet. The lot is rectangular in shape and mostly flat about street level then sloping down to the rear. The bid from William Boyle includes the proposal to combine the property with adjoining property currently owned by Mr. Boyle on Jordan Street. No construction is planned.

Approval of the resolution will establish the tax value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 358

K. RESOLUTION NO. 01-70 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES FOR A GRANT TO ASSIST WITH THE DEVELOPMENT OF THE FRENCH BROAD RIVER PARK, PHASE IV

Summary: The consideration of a resolution to apply for and enter into an agreement with the N. C. Dept. of Environment and Natural Resources, Division of Parks and Recreation, for

332

funds, through the Land and Water Conservation Fund via the National Park Service, to assist with the development of French Broad River Park, Phase IV.

French Broad River Park, Phase IV, represents the City of Asheville's next phase of a major greenway and park system being developed along the French Broad River on Amboy Road. The final master plan is complete, and the first phase of construction is underway. The park will include greenways, bicycle facilities, lawn bowling, volleyball and soccer complex, softball field, playground, restrooms, roller hockey, open space, picnic shelter, parking, and a welcome center. Phase IV will also connect to a planned N. C. Dept. of Transportation funded greenway from Hominy Creek on the west, and eventually to the Amboy Road greenway to the east.

The Parks and Recreation Department and RiverLink are in partnership to implement an ambitious fundraising plan to raise over $2 million to build the park. To date, $620,000 has been raised.

The Parks and Recreation Department is requesting $250,000 to $300,000 in grant funds from the Land and Water Conservation Fund which requires a 50% cash or in-kind match. The match is available in cash, labor, equipment, project management and technical support through Parks and Recreation and RiverLink.

The Parks and Recreation Department recommends the City apply for and enter into an agreement for grant funds with the North Carolina Department of Environment and Natural Resources to assist with the construction of the French Broad River Park, Phase IV.

RESOLUTION BOOK NO. 26 – PAGE 359

L. RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE CLEAN WATER TRUST FUND FOR A GRANT TO ASSIST WITH THE PURCHASE, CONSTRUCTION AND MAINTENANCE OF TWO REGIONAL RETENTION FACILITIES IN THE WEST END/CLINGMAN AREA

This matter was pulled from the Consent Agenda due to a conflict of interest.

M. RESOLUTION NO. 01-71 - RESOLUTION AUTHORIZING CANCELLATION OF A DEED OF TRUST AND RELEASE OF LETTER OF CREDIT

City Attorney Oast said that this is the consideration of a resolution authorizing cancellation of a Deed of Trust

In 1997, the City entered into an agreement with Biltmore Farms, Inc. and the Western North Carolina Regional Economic Development Non-Profit Corporation for the development of a high-tech / flex building at Broadlands Industrial Park. The City's part of the agreement was to fund the construction through the issuance of taxable Certificates of Participation, secured by a Deed of Trust on the property and a letter of credit from Biltmore Farms.

The construction has been completed and the loan has been paid off, and Biltmore Farms has otherwise satisfied its obligations to the City under the agreement, and has requested cancellation of the Deed of Trust and release of the letter of credit. The City staff agrees that this should be done.

funds, through the Land and Water Conservation Fund via the National Park Service, to assist with the development of French Broad River Park, Phase IV.

French Broad River Park, Phase IV, represents the City of Asheville's next phase of a major greenway and park system being developed along the French Broad River on Amboy Road. The Parks and Recreation Department and RiverLink are in partnership to implement an ambitious fundraising plan to raise over $2 million to build the park. To date, $620,000 has been raised.

The Parks and Recreation Department is requesting $250,000 to $300,000 in grant funds from the Land and Water Conservation Fund which requires a 50% cash or in-kind match. The match is available in cash, labor, equipment, project management and technical support through Parks and Recreation and RiverLink.

The Parks and Recreation Department recommends the City apply for and enter into an agreement for grant funds with the North Carolina Department of Environment and Natural Resources to assist with the construction of the French Broad River Park, Phase IV.

RESOLUTION BOOK NO. 26 – PAGE 359

L. RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE CLEAN WATER TRUST FUND FOR A GRANT TO ASSIST WITH THE PURCHASE, CONSTRUCTION AND MAINTENANCE OF TWO REGIONAL RETENTION FACILITIES IN THE WEST END/CLINGMAN AREA

This matter was pulled from the Consent Agenda due to a conflict of interest.

M. RESOLUTION NO. 01-71 - RESOLUTION AUTHORIZING CANCELLATION OF A DEED OF TRUST AND RELEASE OF LETTER OF CREDIT

City Attorney Oast said that this is the consideration of a resolution authorizing cancellation of a Deed of Trust

In 1997, the City entered into an agreement with Biltmore Farms, Inc. and the Western North Carolina Regional Economic Development Non-Profit Corporation for the development of a high-tech / flex building at Broadlands Industrial Park. The City's part of the agreement was to fund the construction through the issuance of taxable Certificates of Participation, secured by a Deed of Trust on the property and a letter of credit from Biltmore Farms.

The construction has been completed and the loan has been paid off, and Biltmore Farms has otherwise satisfied its obligations to the City under the agreement, and has requested cancellation of the Deed of Trust and release of the letter of credit. The City staff agrees that this should be done.

City staff recommends adoption of a resolution authorizing cancellation of the Biltmore Farms Deed of Trust and release of the letter of credit.

Councilman Worley stated that this was very successful for the City and for Biltmore Farms. It was a good investment and a good payback.

RESOLUTION BOOK NO. 26 – PAGE 360

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Worley moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEMS PULLED FROM CONSENT AGENDA

A. RESOLUTION NO. 01-72 - RESOLUTION RE-CERTIFYING THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: The consideration of a resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium to continue receiving entitlement allocations under the HOME grant program.

The City of Asheville entered into a Joint Cooperation Agreement with twelve governmental units within Region B on March 31, 1992, and formed the Asheville Regional Housing Consortium. On February 12, 2001, the City sent a letter to HUD stating its intent to participate again as a consortium in the HOME program, and also stating it will submit to HUD prior to June 30, 2001, all other required documents for participation, including a new Cooperation Agreement and authorizing resolutions from member governmental units.

The Cooperation Agreement states in Section 14: "The Lead Entity and the Cooperating Units agree to remain in the Consortium at least through September 30, 2004. Thereafter, each party shall continue to participate in the Consortium to the extent required by HUD regulations or other applicable law."

Since formation of the Consortium in 1992, the region has received entitlement allocations totaling $10,519,837. The City of Asheville has received $3,347,822 for its affordable housing programs and administrative costs as Lead Entity since the beginning of the program.

Community Development staff recommends adoption of the resolution.

Councilman Hay moved for the adoption of Resolution No. 01-72. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 361

B. RESOLUTION NO. 01-73 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE CLEAN WATER TRUST FUND FOR A GRANT TO ASSIST WITH THE PURCHASE,

CONSTRUCTION AND MAINTENANCE OF TWO REGIONAL RETENTION FACILITIES IN THE WEST END/CLINGMAN AREA

Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: The consideration of a resolution to apply for and enter into an agreement with the Clean Water Management Trust Fund to assist with the purchase, construction and maintenance of two regional retention facilities in the West End/Clingman area.

The WECAN Community Charette suggested that two regional retention facilities be constructed to handle stormwater runoff from the area. One of the facilities is proposed to be located on property belonging to Mr. Tom Honea. The other facility is proposed to be located on property belonging to Mountain Housing Opportunities. Mr. Honea approached Mountain Housing Opportunities staff about purchasing a portion of his property for the above purpose.

The City is interested in assisting with this project because it is a more desirable solution to managing stormwater than individual stormwater facilities for every site. A regional wet stormwater facility allows impurities from the stormwater to settle out before the water is discharged into the stream. Additionally, the grant from the Clean Water Management Trust Fund must be requested by the City. Mountain Housing Opportunities is not an eligible agency for the grant.

The City is requesting approximately $250,000 in the grant. The grant does not require a match; however, some match is recommended. We propose to match the $250,000 request with the land (for the second stormwater facility) that belongs to Mountain Housing Opportunities. Mountain Housing Opportunities would be required to deed the land to the City of Asheville prior to receiving the grant.

The Engineering Department recommends the City apply for a grant to assist with the purchase, construction and maintenance of two regional retention facilities in the West End/Clingman area.

Councilman Hay moved for the adoption of Resolution No. 01-73. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 362

III. PUBLIC HEARINGS:

A. PUBLIC HEARING REGARDING AN AGREEMENT WITH BLUE RIDGE MOTION PICTURES LLC FOR ECONOMIC DEVELOPMENT INCENTIVES PURSUANT TO THE CITY'S ECONOMIC DEVELOPMENT POLICY

RESOLUTION NO. 01-74 – RESOLUTION OFFERING ECONOMIC DEVELOPMENT INCENTIVE GRANT TO BLUE RIDGE MOTION PICTURES LLC

Councilman Hay moved to excuse Mayor Sitnick and Vice-Mayor Cloninger from participating in this matter due to conflicts of interest, and that Councilwoman Field be appointed to preside in the Mayor and Vice-Mayor's absence. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Vice-Mayor Cloninger explained that his conflict of interest was that his law firm represents Blue Ridge Motion Pictures LLC.

Councilwoman Field opened the public hearing at 5:18 p.m.

Economic Development Director Mac Williams said that the consideration of a resolution approving an economic development incentive grant to a company proposing to develop a movie production studio. This public hearing was advertised on May 11, 2001.

Blue Ridge Motion Pictures, LLC is a start-up company proposing to purchase property inside the City limits of Asheville and, on that property, to renovate an existing building and build new facilities for the purpose of operating a movie production studios facility.

The site, located at 12 Old Charlotte Highway, is a 40-acre tract with an existing industrial facility of 178,000 square feet owned and currently occupied by Asheville Velour, a manufacturer of textile products. Asheville Velour will sell the site to Blue Ridge Motion Pictures, LLC, but will remain in operation in the facility as a tenant. According to representatives of both parties, this project will not result in the loss of the current manufacturing jobs at the site.

Blue Ridge Motion Pictures, LLC, is proposing new capital investment of $16 million to be in place by December 31, 2003. This investment is in addition to that required to purchase the property (scheduled for late May/early June 2001). The new investments would cover renovations to the existing building, installation of equipment, and new construction of soundstages and other related structures necessary to provide a full service studio for their own productions and for rental of space and/or equipment to other production companies. The firm also intends to create at least 20 full time jobs at an average annual salary range of between $25,000 and $45,000.

Based on the stated level of investment of $16 million, the firm would qualify for a Level 3 Grant as provided for by the City of Asheville Economic Development Incentives Policy. Per the policy, *"the grant is calculated and based upon the actual value, schedule and payment of property taxes. After the industry has paid in full its annual property tax and met all other criteria as outlined in the grant document, the City will pay the industry the annual installment of the grant required."*

Level 3 Grants (when investment levels are of $10 million or greater) allow grants of up to 85% of new taxes for up to 5 years. The total grant amount would equal $380,800 payable in 5 annual installments of $76,160 each beginning in January, 2004. The calculation determining the grant is as follows:

CALCULATION OF LEVEL 3 GRANT

NEW INVESTMENT		$16,000,000	(div. by $100)
NEW TAX BASE VALUE	$	160,000	(x current rate - $.56/$100)
NEW ANNUAL TAX REVENUE	$	89,600	(x grant amount - .85)
ANNUAL GRANT AMOUNT	$	76,160	(x grant term – 5 years)
TOTAL GRANT AMOUNT	$	380,800	

Payment of the grant funds would not begin until 2004 and after City has received documentation of actual values and payment in full of property taxes. Company will have been in operation locally nearly 8 years before total grant payment is made.

Other policy criteria apply as follows:

A. Jurisdiction – The project is within the city limits of the City of Asheville.
B. Scope:
   1. Project proposes to exceed capital investment minimum of $1,500,000.
   2. Company does not have minimum of 3 years operating history. However, a majority of the principals have a demonstrated history in the industry; and, given the nature of this project and its potential impact to enhance the growth of this industry sector locally, waiver of this criteria should be considered.
   3. There is a commitment to a minimum of 5 permanent new jobs.
   4. The location and type of business is consistent with City plans and policies.
   5. There is evidence of equity participation but at less than the 10% minimum of total project cost. However, the level of equity participation in the purchase of the property reportedly significantly exceeds 10%. Also, company representatives have reported capability to secure funding for total project as proposed. Council flexibility regarding this criteria should be considered.
   6. Proposed minimum salary exceeds Average Weekly County Wage for industry type.
   7. Proposed use of funds is in accordance with policy.
   8. Additional incentive funding may be available from other local governments and/or the State.

The grant document, in the form of a performance agreement, has been drafted according to the terms outlined above and has been accepted by representatives of Blue Ridge Motion Pictures, LLC. Acceptance and execution of the agreement and provision of the grant, or not, by Council is the subject of a formal public hearing pursuant to N. C. Gen. Stat. sec. 158-7.1.

The terms of the agreement being considered and the notice of the public hearing have been published in accordance with the referenced statute.

Mr. Williams said that part of a sentence in the payment of grant section of the agreement was inadvertently omitted in which City Council has before them. That omission has been corrected in the original agreement and Blue Ridge Motion Pictures, LLC, is aware of it.

City staff recommends Council accept and execute the proposed Performance Agreement and offer the economic development incentive grant to Blue Ridge Motion Pictures, LLC under the terms and conditions in that Agreement.

Mr. W. Louis Bissette, attorney for Blue Ridge Motion Pictures, LLC, spoke of support of this agreement stating that it is a great development for the City and for Blue Ridge Motion Pictures.

Mr. Tom Barkstedt, Partner for Blue Ridge Motion Pictures, spoke about the multi-talent in the area and that they have the largest studio rental in the United States. He said that he was pleased to be working with the City on this venture.

When Councilwoman Field said that our Public Access Channel Commission is looking for a small space, Mr. Barkstedt said that they could work something out in their building.

Mr. Fred English suggested the City of Asheville just give the company a tax break instead of loaning them money. Councilwoman Field explained that the State of North Carolina does not allow cities to give tax breaks.

Ms. Diana Bilbrey, member of the Film Board, spoke in support of this agreement and talked about the other benefits that will be derived from this motion picture studio coming to Asheville.

Mr. Paul Garrra has been involved with the film industry for 25 years and it's his opinion that the economic climate relative to a movie studio is excellent.

Mr. Chris Thurmond spoke in support of this venture.

Mr. Kurt Mann, owner of Ironwood Productions, spoke in support of this partnership.

Ms. Susan O'Neil felt this company has the possibility of bringing a great deal of development to Asheville, however, wanted to make sure that the development is compatible and sustainable with our present environment.

Ms. Gail Wurthner, member of the Film Board, spoke how this is a clean industry with a good product.

Mr. Kevin Rollins suggested City residents be given a tax break.

Mr. Johnny Sawyer, Secretary-Treasurer of the International Brotherhood of Teamsters – Local 61 in Asheville, spoke in support of this venture in that when movies are in town, they spend their money locally and local people are hired.

Ms. Leanne Campbell, Partner of Blue Ridge Motion Pictures LLC, spoke in support of this venture and noted that they are cleaning up the site.

Mr. William Meredith felt that if the company is investing $16 million here, then why do they need taxpayers money for a grant.

Councilwoman Field explained that this is new tax dollars – the taxes that this company will pay to the City of Asheville - that the City is granting back a portion to them.

Mr. Peter Loewer, member on the Film Board, spoke in support of this venture and noted that this is one of the most welcome industries Asheville has ever had.

Mr. Chad Slagle, actor, stated that this is an incredible opportunity for the City of Asheville to bring in revenue to the surrounding areas.

Mr. Rob Best wants to make sure that vehicles access this property off of Swannanoa River Road.

Councilwoman Field closed the public hearing at 5:52 p.m.

Councilwoman Field said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Hay moved for the adoption of Resolution No. 01-74 authorizing the Mayor to execute an agreement with Blue Ridge Motion Pictures Inc. This motion was seconded by Councilwoman Bellamy.

City Attorney Oast asked that the motion authorize the City Manager to sign the agreement instead of the Mayor due to her conflict of interest. Councilman Hay and Councilwoman Bellamy both accepted that amendment to the motion.

Councilman Hay said that our economic development policies are at work and that is worth acknowledging and celebrating at the same time.

Councilwoman Worley emphasized that this is a grant to attract economic development. The amount of the grant is less than the new taxes that will be generated by that economic development - taxes we would not receive if this economic development did not come to Asheville. He felt this was a real bargain for Asheville to give the grant and in return receive all the benefits.

The amended motion made by Councilman Hay and seconded by Councilwoman Bellamy carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 363

ANNEXATION PUBLIC HEARINGS

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE LOWES AREA

Mayor Sitnick opened the public hearing at 6:00 p.m.

Mr. Paul Benson, Urban Planner II, said that this public hearing was advertised on April 17 and 27, 2001. He said that he has filed a certification of notification with the City Clerk, as follows: "(1) Buncombe County tax listings were obtained from the Buncombe County tax office on March 13, 2001; (2) on April 2, 2001, 39 letters, including a notice of property owner's rights, a map and description were mailed to property owners identified from said property tax listings of Buncombe County; (3) on or before April 23, 2001, one letter to the property owners was returned to his office; (4) on April 16, 2001, the returned letter was re-mailed by certified mail to either a new address provided by the Post Office on the returned envelope or to the same address; and (5) on April 24, 2001, letters were sent to the solid waste providers identified as being active in the affected area, with said letters including the Resolutions of Intent adopted by the City Council on March 13, 2001."

City Clerk Burleson filed a certification of notification as follows: "(1) on April 2, 2001, a statement of impact was delivered to the Clerk of the Buncombe County Board of Commissions; and (2) a published notification in the Asheville Citizen-Times on April 17, 2001, and April 27, 2001, included a notice of property owner's rights, a map, and a description of the areas being considered for annexation. On March 26, 2001, a letter was received from the Enka-Candler Fire & Rescue Department Inc.; on March 29, 2001, a letter was received from the Skyland Fire Department; on April 18, 2001, a letter was received from the Reynolds Volunteer Fire Department Inc.; and on April 26, 2001, a letter was received from the Haw Creek Fire & Rescue, all requesting to receive a good faith offer from the City of Asheville for fire protection services." The maps of the proposed annexations, the Annexation Services Plan and the property owners list have been displayed in the Office of the City Clerk for public inspection beginning March 30, 2001.

Mr. Benson explained that purpose of this hearing is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the area, and all residents of the City the opportunity to be heard. The effective date of annexation will be June 30, 2002.

The Lowes area includes 74 acres, subdivided into 39 properties, there area 88 dwelling units with an estimated population of 181 persons. This area fills a notch in the existing corporate limits and makes a more consistent city boundary along the south side of Old Haywood Road.

Mr. Benson then summarized the plan as follows: The Lowes area qualifies for annexation in that at least 60% of the lots are developed, and 60% of the acreage of properties that are either vacant or in residential use are subdivided into lots of 3 acres or less. It also qualifies in that it has an estimated population density of at least 2.3 persons per acre. Police protection is to be extended on effective date of annexation with no increase in personnel or equipment. Fire protection is to be contracted from the Enka-Candler Rural Fire Department (.06/9/6) and supplemented by the City to bring service up to City standards. Solid waste collection is to be extended on the effective date of annexation with no increase in personnel, or equipment. New customers would receive the automated collection service. Street maintenance services are not planned for the Lowes Area at this time. However, property owners located on private roads may petition for City maintenance provided that adequate public right-of-way is provided. Water distribution in the Lowes Area 2,000 linear feet of 6" and 4" water line are planned, along with 3 new fire hydrants. Construction is scheduled to be complete by June 30th, 2004. Sewer collection in the Lowes Area 1,250 linear feet of 8" sewer line is planned to be constructed by June 30, 2004. City Financial Impact - Annual Expenses = $8,525; Annual Revenues = $94,389; and Capital Expenditures = $404,352.

Upon inquiry of Councilman Peterson, Mr. Benson said that the policy is basically to extend water lines to every occupied property and sewer lines to within 300 feet of every occupied property.

Mr. Fred English, resident in East Asheville, felt that City Council should take care of what they already have before bringing in more residents that don't even want to be annexed.

Mayor Sitnick closed the public hearing at 6:07 p.m.

Mayor Sitnick said that the ordinance to extend the corporate limits into this area will be considered by City Council on June 12, 2001.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE UPPER SONDLEY AREA

Mayor Sitnick opened the public hearing at 6:08 p.m.

Mr. Paul Benson, Urban Planner II, said that this public hearing was advertised on April 17 and 27, 2001. He said that he has filed a certification of notification with the City Clerk, as follows: "(1) Buncombe County tax listings were obtained from the Buncombe County tax office on March 13, 2001; (2) on April 2, 2001, 18 letters, including a notice of property owner's rights, a map and description were mailed to property owners identified from said property tax listings of Buncombe County; (3) on or before April 23, 2001, no letters to the property owners were returned to his office; and (4) on April 24, 2001, letters were sent to the solid waste providers identified as being active in the affected area, with said letters including the Resolutions of Intent adopted by the City Council on March 13, 2001."

City Clerk Burleson filed a certification of notification as follows: "(1) on April 2, 2001, a statement of impact was delivered to the Clerk of the Buncombe County Board of Commissions; and (2) a published notification in the Asheville Citizen-Times on April 17, 2001, and April 27, 2001, included a notice of property owner's rights, a map, and a description of the areas being considered for annexation. On March 26, 2001, a letter was received from the Enka-Candler Fire & Rescue Department Inc.; on March 29, 2001, a letter was received from the Skyland Fire Department; on April 18, 2001, a letter was received from the Reynolds Volunteer Fire Department Inc.; and on April 26, 2001, a letter was received from the Haw Creek Fire & Rescue, all requesting to receive a good faith offer from the City of Asheville for fire protection services."

340

The maps of the proposed annexations, the Annexation Services Plan and the property owners list have been displayed in the Office of the City Clerk for public inspection beginning March 30, 2001.

Mr. Benson explained that purpose of this hearing is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the area, and all residents of the City the opportunity to be heard. The effective date of annexation will be June 30, 2002.

The Upper Sondley area includes 20.2 acres, subdivided into 16 properties, there area 16 dwelling units with an estimated population of 18 persons. This area fills a gap between the existing corporate limits and the boundary of the Blue Ridge Parkway property.

Mr. Benson then summarized the plan as follows: The Upper Sondley area qualifies for annexation in that at least 60% of the lots are developed, and 60% of the acreage of properties that are either vacant or in residential use are subdivided into lots of 3 acres or less. Police protection is to be extended on effective date of annexation with no increase in personnel or equipment. Fire protection is to be contracted from the Haw Creek Rural Fire Department (.10/9/6) and supplemented by the City to bring service up to City standards. Solid waste collection is to be extended on the effective date of annexation with no increase in personnel, or equipment. New customers would receive the automated collection service. Street maintenance services are planned for entire length Upper Sondley Drive, which is .41 mile. These services include cleaning, repair and snow removal and will be extend on the effective date of annexation. Water distribution in the Upper Sondley Area currently meets City standards. Sewer collection in the Upper Sondley Area currently meets City standards. City Financial Impact - Annual Expenses = $4,790; Annual Revenues = $28,199; and Capital Expenditures = $3,630.

Mayor Sitnick closed the public hearing at 6:12 p.m.

Mayor Sitnick said that the ordinance to extend the corporate limits into this area will be considered by City Council on June 12, 2001.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE BEST INNS AREA

Mayor Sitnick opened the public hearing at 6:13 p.m.

Mr. Paul Benson, Urban Planner II, said that this public hearing was advertised on April 17 and 27, 2001. He said that he has filed a certification of notification with the City Clerk, as follows: "(1) Buncombe County tax listings were obtained from the Buncombe County tax office on March 13, 2001; (2) on April 2, 2001, one letter, including a notice of property owner's rights, a map and description were mailed to the property owner identified from said property tax listings of Buncombe County; (3) on or before April 23, 2001, the letter to the property owner was not to his office; and (4) on April 24, 2001, letters were sent to the solid waste providers identified as being active in the affected area, with said letters including the Resolutions of Intent adopted by the City Council on March 13, 2001."

City Clerk Burleson filed a certification of notification as follows: "(1) on April 2, 2001, a statement of impact was delivered to the Clerk of the Buncombe County Board of Commissions; and (2) a published notification in the Asheville Citizen-Times on April 17, 2001, and April 27, 2001, included a notice of property owner's rights, a map, and a description of the areas being considered for annexation. On March 26, 2001, a letter was received from the Enka-Candler Fire & Rescue Department Inc.; on March 29, 2001, a letter was received from the Skyland Fire Department; on April 18, 2001, a letter was received from the Reynolds Volunteer Fire

Department Inc.; and on April 26, 2001, a letter was received from the Haw Creek Fire & Rescue, all requesting to receive a good faith offer from the City of Asheville for fire protection services." The maps of the proposed annexations, the Annexation Services Plan and the property owners list have been displayed in the Office of the City Clerk for public inspection beginning March 30, 2001.

Mr. Benson explained that purpose of this hearing is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the area, and all residents of the City the opportunity to be heard. The effective date of annexation will be June 30, 2002.

The Best Inns area includes 4.3 acres, subdivided into one commercial property. Annexation of this area extends the corporate limits to the fourth and final quadrant of the Tunnel Road/I-40 access road, at Exit 55.

Mr. Benson then summarized the plan as follows: The Best Inns area qualifies for annexation in that it is 100% developed. Police protection is to be extended on effective date of annexation with no increase in personnel or equipment. Fire protection is to be contracted from Reynolds Rural Fire Department (.10/9/6) and supplemented by the City to bring service up to City standards. Solid waste collection is to be extended on the effective date of annexation with no increase in personnel, or equipment. New customers would receive the automated collection service. Street maintenance services are not planned for the Best Inns Area. Water distribution in the Best Inns area currently meets City standards. Sewer collection in the Best Inns area currently meets City standards. City Financial Impact - Annual Expenses = $3,586; Annual Revenues = $19,839; and Capital Expenditures = $490.

Mr. Kevin Rollins questioned what the Best Inns will be getting from being annexed. Mr. Benson said that they would received professional police protection with a higher ratio of officers to population and also professional fire protection as opposed to a rural volunteer fire department. That could be a tangible savings from the fire insurance standpoint.

Planning & Director Scott Shuford also pointed out that properties on the fringe of our City that are developed at urban density should be brought into our City according to State law. In effect, the advantages of this property, and many of the other properties being considered for annexation today, are not tangible in terms of what they might be as a result of being annexed, but they do get the benefit of being proximate to the City of Asheville and have had that benefit for many years prior to the City initiating this program.

Mayor Sitnick closed the public hearing at 6:20 p.m.

Mayor Sitnick said that the ordinance to extend the corporate limits into this area will be considered by City Council on June 12, 2001.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE OLD DOMINION FREIGHT AREA

Mayor Sitnick opened the public hearing at 6:20 p.m.

Mr. Paul Benson, Urban Planner II, said that this public hearing was advertised on April 17 and 27, 2001. He said that he has filed a certification of notification with the City Clerk, as follows: "(1) Buncombe County tax listings were obtained from the Buncombe County tax office on March 13, 2001; (2) on April 2, 2001, one letter, including a notice of property owner's rights, a map and description were mailed to the property owner identified from said property tax listings of Buncombe County; (3) on or before April 23, 2001, the letter to the property owner was not to his office; and (4) on April 24, 2001, letters were sent to the solid waste providers identified as being active in the affected area, with said letters including the Resolutions of Intent adopted by the City Council on March 13, 2001."

City Clerk Burleson filed a certification of notification as follows: "(1) on April 2, 2001, a statement of impact was delivered to the Clerk of the Buncombe County Board of Commissions; and (2) a published notification in the Asheville Citizen-Times on April 17, 2001, and April 27, 2001, included a notice of property owner's rights, a map, and a description of the areas being considered for annexation. On March 26, 2001, a letter was received from the Enka-Candler Fire & Rescue Department Inc.; on March 29, 2001, a letter was received from the Skyland Fire Department; on April 18, 2001, a letter was received from the Reynolds Volunteer Fire Department Inc.; and on April 26, 2001, a letter was received from the Haw Creek Fire & Rescue, all requesting to receive a good faith offer from the City of Asheville for fire protection services." The maps of the proposed annexations, the Annexation Services Plan and the property owners list have been displayed in the Office of the City Clerk for public inspection beginning March 30, 2001.

Mr. Benson explained that purpose of this hearing is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the area, and all residents of the City the opportunity to be heard. The effective date of annexation will be June 30, 2002.

The Old Dominion area includes 15.5 acres, subdivided into one commercial property. Annexation of this area extends the corporate limits to only property accessed by the Sweeten Creek Industrial Park Drive that is currently not in the City.

Mr. Benson then summarized the plan as follows: The Old Dominion area qualifies for annexation in that it is 100% developed. Police protection is to be extended on effective date of annexation with no increase in personnel or equipment. Fire protection is to be contracted from Reynolds Rural Fire Department (.10/9/6) and supplemented by the City to bring service up to City standards. Solid waste collection is to be extended on the effective date of annexation with no increase in personnel, or equipment. New customers would receive the automated collection service. Street maintenance services are not planned for the Old Dominion Area. Water distribution in the Old Dominion area currently meets City standards. Sewer collection in the Old Dominion area currently meets City standards. City Financial Impact - Annual Expenses = $1,826; Annual Revenues = $11,189; and Capital Expenditures = $1,053.

Mr. Steve Bruce, representative of Old Dominion Freight Line, said that although no one likes to see their taxes go up, but Asheville has been good to them and they want to be good corporate citizens.

Mayor Sitnick closed the public hearing at 6:26 p.m.

Mayor Sitnick said that the ordinance to extend the corporate limits into this area will be considered by City Council on June 12, 2001.

F. PUBLIC HEARING TO CONSIDER THE ANNEXATION IN THE ARDEN AREA

Mayor Sitnick opened the public hearing at 6:26 p.m.

Mr. Paul Benson, Urban Planner II, said that this public hearing was advertised on April 17 and 27, 2001. He said that he has filed a certification of notification with the City Clerk, as follows: "(1) Buncombe County tax listings were obtained from the Buncombe County tax office on March 13, 2001; (2) on April 2, 2001, 114 letters, including a notice of property owner's rights, a map and description were mailed to property owners identified from said property tax listings of Buncombe County; (3) on or before April 23, 2001, one letter to the property owners was returned to his office; (4) on April 12, 2001, the returned letter was re-mailed by certified mail to either a new address provided by the Post Office on the returned envelope or to the same address; and (5) on April 24, 2001, letters were sent to the solid waste providers identified as being active in the affected area, with said letters including the Resolutions of Intent adopted by the City Council on March 13, 2001."

City Clerk Burleson filed a certification of notification as follows: "(1) on April 2, 2001, a statement of impact was delivered to the Clerk of the Buncombe County Board of Commissions; and (2) a published notification in the Asheville Citizen-Times on April 17, 2001, and April 27, 2001, included a notice of property owner's rights, a map, and a description of the areas being considered for annexation. On March 26, 2001, a letter was received from the Enka-Candler Fire & Rescue Department Inc.; on March 29, 2001, a letter was received from the Skyland Fire Department; on April 18, 2001, a letter was received from the Reynolds Volunteer Fire Department Inc.; and on April 26, 2001, a letter was received from the Haw Creek Fire & Rescue, all requesting to receive a good faith offer from the City of Asheville for fire protection services." The maps of the proposed annexations, the Annexation Services Plan and the property owners list have been displayed in the Office of the City Clerk for public inspection beginning March 30, 2001.

Mr. Benson explained that purpose of this hearing is for the City to explain the plan for extending City services to the proposed annexation area, and to give all persons resident or owning property within the area, and all residents of the City the opportunity to be heard. The effective date of annexation will be June 30, 2002.

The Arden area includes 128 acres, subdivided into 114 properties; there are 73 dwelling units with an estimated population of 145 persons. This area would extend the corporate limits into the rapidly growing South Asheville area, and link 4 existing satellite areas to the primary corporate limits.

Mr. Benson then summarized the plan as follows: The Arden area qualifies for annexation in that at least 60% of the lots are developed, and 60% of the acreage of properties that are either vacant or in residential use are subdivided into lots of 3 acres or less. Police protection is to be extended on effective date of annexation with no increase in personnel or equipment. Fire protection is to be contracted from the Skyland Rural Fire Department (.075/5) and supplemented by the City to bring service up to City standards. Solid waste collection is to be extended on the effective date of annexation with no increase in personnel, or equipment. New customers would receive the automated collection service. Street maintenance services are planned for Linden Street, Peach Tree Street, Sycamore Drive, Blake Drive, Royal Pines Drive, Cedar Lane and Sycamore Terrace, (1.6 miles). In addition, property owners located on private roads may petition for City maintenance provided that adequate public right-of-way is provided. Water distribution in the Arden Area currently meets City standards. Sewer collection in the Arden Area currently meets City standards. City Financial impact - Annual Expenses = $15,017; Annual Revenues = $147,577; and Capital Expenditures = $29,811.

Mayor Sitnick wanted to be sure that the City is working on creating a small farm designation within the extraterritorial jurisdiction and annexation areas so that the City doesn't put those people out of business. Mr. Benson said that he was not aware of any agricultural operations in any of these annexation areas. In addition, Buncombe County has not coded any of these properties as agricultural use.

City Attorney Oast pointed out to Council that in addition to the urbanization requirements, there is also a contiguity requirement with respect to areas that we annex. This area, even though it is adjacent to a pending annexation does qualify on the basis of the existing City limits.

Mr. Pat Cary, area property owner, spoke in opposition to the annexation and felt that the urban density requirement has not been met.

Mr. Kevin Rollins, speaking on behalf of the Libertarian Party of Buncombe County, hoped City Council does not tax residents out of their land. He felt that annexation is a violation of democracy and it should be put on a ballot so people can vote on whether people want to be annexed or not.

Mr. Fred English spoke in opposition of annexation.

Mayor Sitnick closed the public hearing at 6:38 p.m.

Mayor Sitnick said that the ordinance to extend the corporate limits into this area will be considered by City Council on June 12, 2001.

G. ORDINANCE NO. 2810 - ORDINANCE DIRECTING THAT THE DWELLING LOCATED ON WYATT STREET BE DEMOLISHED

Mayor Sitnick opened the public hearing at 6:39 p.m.

Mr. Jeff Baker, Housing Code Coordinator, said that this is consideration of an ordinance directing that the dwelling located on Wyatt Street be demolished and all debris removed from the property.

The dwelling located on Wyatt Street (PIN No. 9657.09-05-9999) is a shell of a building with a roof, but no walls, and no windows and doors. The real property owners, Mr. and Mrs. James R. White Sr., have not responded to ongoing requests by the Housing Division to repair or demolish the building.

The Housing Code Coordinator sent a letter, Consent of Demolition, and a Complaint and Notice of Hearing to the property owners on the January 25, 2001. The property owners have failed to demolish the dwelling or to respond to any document. A formal housing hearing was held and a "Findings of Fact and Order" was entered and served on the property owners. To date no action has been taken by the owners and the dwelling continues to be uninhabitable and a hazard to the community residents.

Section 4-217(c)(3) of the City's Housing Code, as authorized by N. C. General Statutes sec. 160A-443(5), authorizes City Council to direct by ordinance that the dwelling be demolished.

The following is an overview of some general information regarding this property:

- Fair market value of dwelling is $2,900 (as listed on the Buncombe County Tax Records)
- Estimated cost to repair and bring into Code compliance is $20,000-$40,000
- The affordable housing agencies were notified.

The Building Safety Director recommends adoption of the resolution setting a public hearing ordering that the property located on Wyatt Street be demolished.

Upon inquiry of Councilman Peterson, Mr. Baker said that the structure will probably be demolished in 30 days, however, the owner will still have the opportunity to bring the dwelling up to Code until the actual demolition.

When Mayor Sitnick asked how much it would cost in demolition and disposal fees, Mr. Baker said it would be approximately $4,000 and that amount will be applied as a lien to the land.

Mayor Sitnick closed the public hearing at 6:44 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2810. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 149

H. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT ON SHILOH ROAD

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 6:47 p.m.

Urban Planner Stacy Merten submitted into the record City Exhibits 1 & 2 (Affidavits of Publication), City Exhibit 3 (Certification of Mailing of Notice to Property Owners), City Exhibit 4 (Staff Report dated April 24, 2001), City Exhibit 5 (Letter dated May 2, 2001, from George Morosani); and City Exhibit 6 (Staff Report dated May 22, 2001). This public hearing was advertised on April 27 and May 4, 2001, and then re-advertised with the Parcel Identification Number on May 11 and 18, 2001.

She said that this is the consideration of issuance of a conditional use permit (CUP) for a parking lot to be located on property zoned RS-8 Residential Single Family High Density District on Shiloh Road.

With regard to some confusion about the address for this property, City staff did some follow-up research and found that Mr. Morosani had previously been notified that he should be using 55 Shiloh Road for his business located on the south side of Shiloh Road. Apparently he had not made this change and he made his application with the City.

Using a map (City Exhibit 7), she explained that the proposed project is actually located on the north side of Shiloh Road and that went through the Technical Review Committee (TRC) process. Mr. Morosani has since added another lot to be considered for the parking lot. There is an unopened right-of-way between the two lots.

Mr. George Morosani has submitted development plans to construct a 32-space parking lot on approximately .6 acres in an RS-8 Residential Single-Family High Density District, with the business itself being located across the street. The proposed development would be an ancillary use to the development on the south side of Shiloh and would be constructed in two phases (City Exhibit 8). The existing development contains a mix of uses including a heating and air conditioning retail and service business, a pharmacy and associated offices. The applicant wishes to expand the development, but cannot do so without the additional parking. Phase I (17 spaces) was previously reviewed by the TRC, but Phase II (15 spaces) was not.

The site is currently vacant and is surrounded by single-family dwellings (City Exhibit 9). The proposed parking area would be surrounded by a wooden fence and heavily landscaped. A sidewalk is proposed to be constructed along the street.

All of the TRC conditions for this project have been met. A Transportation Impact Analysis was not required for this project.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must make the following findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]:

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed development is a parking lot that will be constructed with methods and materials that will not pose a danger to the public. Landscaping and lighting will be done in manner sensitive to the surrounding uses and to mitigate any possible negative impacts such as glare, noise, dust or fumes.

2) That the proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region.

   The existing development is out of scale and character with the surrounding community, and as such does not benefit or enhance the community. An expansion of the use, although necessary for the use itself to operate effectively, will provide little public benefit.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed parking lot expansion will expand a commercial use into a residential area in the middle of the block with a high potential to injure the value of the adjoining properties.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   The proposed development is a parking lot within the fabric of the neighborhood with landscaping and fencing. Once mature, the landscaping will hide the view of the parking lot from the street. The wooden fencing will not be out of character with the surrounding neighborhood.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan and other official plans adopted by the City.

   The Asheville City 2010 Plan indicates residential use for this area, but the UDO allows for ancillary parking in residential zones under certain conditions.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed development is located in an existing developed area. The project received approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering Department and Public Works Department. The TRC recommended certain conditions, which have been met. Sidewalks will be provided.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The City's traffic engineer has reviewed this project and determined that no undue traffic will be generated from this site.

The purpose of the ancillary parking CUP process is to allow a limited amount of intrusion into residential areas under appropriate conditions. Although the landscaping and fencing will serve to mitigate the impacts of this proposed development, staff feels that the intrusion of development in the middle of the block will destroy the fabric of the neighborhood and because of the proximity to Hendersonville Road, possibly serve as a catalyst for additional commercial development into the neighborhood.

Based on information available to the Planning & Development Department in advance of the public hearing, staff recommends denial of the ancillary parking conditional use permit. If Council takes action to approve the CUP, staff would like to add the following conditions: (1) PIN numbers for both parcels must be shown on the site plan; (2) The surrounding zoning should be corrected on the landscape plan; (3) The parking calculations must be corrected on the site plans; (4) The unopened section of Cherry Street should be closed and additional landscaping installed in this area; and (5) The Final Plans, showing Phase II, should be reviewed by the Technical Review Committee.

Councilman Hay said it was his understanding that the primary goal of ancillary parking was to allow more of a smooth transition between commercial and residential when they were right next to each other. Ms. Merten responded that the UDO does state that it can be immediately adjacent to or across the street.

Vice-Mayor Cloninger wondered if there was any potential for shared parking between the two commercial businesses on the south side of Shiloh Road.

Councilman Peterson asked that with 32 additional parking spots, is it anticipated that there will be more traffic on Shiloh Road. Ms. Merten said that they intend to expand the business so there would be a little more traffic, but not enough to trigger a traffic impact analysis.

City Attorney Oast said that if any Council member has any special knowledge, other than having visited the site and being familiar with the site, that Council feels might affect their decision, it needs to be disclosed.

Councilman Peterson disclosed that he has spoken with a couple of the neighbors who are in the audience, in particular Norma Baynes, and everyone else he has spoken with at the community association is in the audience as well.

Mr. George Morosani, applicant, passed out Applicant Exhibit 1 and briefed Council on his projects to date noting that he has invested in the City of Asheville for years. He said that he bought this subject property about 2 years ago. About one year ago he looked at the property across the street and asked the City if he could rezone the property to a commercial designation. At that time he had secured all the permission, except for one person's property, to convert it to commercial. That person said he would not grant permission, but he would not deny him. Former City Planner Carl Ownbey advised his attorney, Mr. David Matney, that he could not see

City staff recommending rezoning the property, but to wait until the UDO was amended for ancillary uses. Mr. Ownbey said he thought that would work. Mr. Morosani waited until last October and started applying for this CUP. Phase I (17 spaces) is to serve the existing building. Phase II (15 spaces) is for Phase 2 of the building which a 17 000 square foot building across the street. He said that Phase II is included in this CUP because he has been advised by the Planning Department that you can only ask for this request once. Mr. Morosani said that everything has been approved except there is a subjective feeling by Planning staff that the intrusion of this development into the middle of the block would destroy the fabric of the neighborhood. He showed how this property is not in the middle of the block. Using Applicant Exhibit 1, he showed how much of the area is commercial and how close the property is to Hendersonville Road. He stressed that he wants to build this parking lot for public safety purposes and to keep trucks and vehicles off Shiloh Road. He urged City Council to approve his request.

Mr. David Matney, attorney for the applicant, said that Phase I was for the existing building to get around the problem of trucks blocking the street and turning around. Phase II is for the expansion, but needs to be considered at this same time because that's what the ordinance reads. He said that Mr. Morosani reconsidered his initial request to rezone, after having received signatures from people up and down the street, at the suggestion of Planning staff. He explained how the parking lot does match the scale of the neighborhood. He stressed the parking lot will benefit the neighbors by keeping the trucks off the road. He felt that the neighborhood will be improved and this is not an intrusion of more commercial development. He did not see how having a nice landscaped parking lot could injure the neighborhood. He said that this development meets all the standards and urged Council to approve the CUP.

Mr. Fred English felt that City Council should deny this request.

Ms. Norma Baynes, representing the Shiloh Community Association, presented Neighborhood Exhibit 1 which reads "The Shiloh Community Association and the residents of the Shiloh are requesting that the property at 56 Shiloh Road or the property that will be used as a parking lot be denied for these reasons. The property is located between two residences. The residents of Shiloh would not like for the property to be rezoned commercial, as stated in our letter written to you and the City Council on December 14, 2000. We would like for the lot to remain residential. A parking lot will increase traffic causing safety problems for people walking on the road and residents getting in and out of their driveways. With increased commercial property in the Shiloh community, residential property is being eliminated. We would not like for commercial business to interfere with our historical building on Shiloh Road, A.M.E. Zion Church. The Shiloh Community Association would like to thank you for your support."

Ms. Debra Rumpf, resident at 68 Shiloh Road, presented Neighborhood Exhibit 2, said there is already a lot of noise on Shiloh Road. She said any development on the property will cause her property to flood during heavy rain. She noted that Mr. Morosani has had this property for several years and it has not been maintained.

Ms. Joan Shade, resident at 80 Shiloh Road, presented Neighborhood Exhibit 3, spoke against the development of a parking lot in their residential neighborhood. The lot across the street which Mr. Morosani owns is not maintained at all. She said the reason it is cleared off now is because a new sewer line has been installed and they cleared out a lot of the rubbish.

Mr. Walter Plaue felt that if businessmen follow the standards and laws required by the City, then they should be allowed to proceed with their development.

Mr. Matney stated that Mr. Morosani is not seeking to rezone the property, but just trying to abide by the rules the City set. He noted it is business on one side of the road and having this parking lot will help the truck traffic. The truck traffic is there because of the commercial businesses and this lot will not affect the number of vehicles that go up and down the road. It will affect how long a truck stays in the road and that is why they feel it's important to develop a parking lot. If the lot is constructed, the trucks will be stopping off the road and if it's denied, the trucks will be stopping on the road and blocking traffic.

Ms. Baynes agreed that one side of Shiloh Road is commercial, however, Mr. Morosani wants to build the parking lot on the other side, which is residential.

Mayor Sitnick closed the public hearing at 7:50 p.m.

Councilman Peterson felt that testimony and evidence presented has not been sufficient for him to establish that each of the seven standards have been met. He felt the property value of adjacent owners would be injured with the parking lot located on the residential side of the street.

Upon inquiry of Councilwoman Field, Mr. Shuford said that a lot of information has been presented at this hearing, however, he did not see a reason to change their recommendation.

Councilman Hay said that Mr. Morosani is a responsible developer and has done some terrific projects in the City. Based upon his personal experience, Mr Morosani does abide by the rules. So, if he thinks he's playing by the rules in this situation, the City may be mis-communicating the rules from time to time. It was his understanding when Council adopted the UDO with the ancillary uses provision, that it would be an opportunity for some flexibility in cases where no one would develop a lot for residential use because it was right next to commercial and it would be a good place for a transition that would allow some useful use, with contained rules. That is not what is going on here. There is commercial use across the street that would be enhanced by using this lot and he feels that is not why City Council developed the ancillary use provision. If that area is going to be used for parking, it should go through the rezoning process and looked at it from those points of view. He would have to vote against the CUP in that he did not feel that standard no. 2 was met.

Vice-Mayor Cloninger also respected Mr. Morosani and the great job that he has done with redevelopment throughout the City. He agreed with Councilman Hay in that this was not the type of project that Council had in mind when the ancillary use provisions were adopted by Council. He hoped City Council will go back and revisit the ordinance with regard to this.

Councilman Worley felt the problems is not with the ordinance, but a problem in communicating what the effect and possibilities are of attempting to use this ordinance. He felt it was clearly a discretionary ordinance on the part of City Council. He didn't find there was sufficient evidence presented to show that the development of this lot as a parking lot will not substantially injure the value of adjoining properties or that it really fits in with the harmony and scale of the neighborhood.

Councilman Peterson asked Mr. Shuford was aware of anything he knew of that could cause the two lots to be unsuitable for residential uses. Mr. Shuford said they are a little difficult to use for residential purposes because they are across the road from commercial, but certainly there are viable residents in the area that have been here and testified that they are okay with that situation. He did indicate that residential use is certainly a strong possibility for that property at some point, especially with the City's efforts to provide infill residential development where we can.

Mr. Shuford apologized to Mr. Morosani if he misunderstood anything that he or his staff said with regard to this process. The Planning Department's job is to assist the applicant to bring the best possible product before City Council, even if staff ultimately recommends denial. They are a customer of the City and we need to help them put their best foot forward as they go through the process. If that has been construed to be a directive in anyway of staff recommendation in favor of it, then he apologized. He felt this particular process was certainly less in either rezoning or conditional use rezoning in intensity. In recognizing the situation with regard to the location of the property, staff felt it was best to bring it forward with that type of development technique, opposed to the other two, in order to give the applicant the best possible chance of having something to meet the standards of approval.

Mayor Sitnick had a problem with the provision of ancillary uses because she did not like the intrusion of commercial use into neighborhoods. She said that she would vote against the CUP based on standards 2, 3, 4 and 5.

Councilwoman Bellamy moved to deny the conditional use permit for an ancillary use (parking lot) in a residential district on Shiloh Road, This motion was seconded by Councilman Peterson and carried unanimously.

Councilwoman Bellamy said it was clear to her, based on the evidence presented at the public hearing, that the requested CUP would not meet all the seven standards required. She did feel it was a commercial encroachment into the neighborhood, as it is clearly residential. Her biggest issue is that City Council does take each issue separately and base their decision on the information presented. Each ancillary CUP process is different. This Council is dedicated in being honest and fair to residents of all neighborhoods and communities. We do not look at race, social economics or area of the City.

City Attorney Oast said that he would bring back an ordinance denying the conditional use permit for City Council consideration at their next formal meeting on June 12, 2001.

At 8:05 p.m., Mayor Sitnick announced a short break.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2811 - BUDGET AMENDMENT APPROPRIATING $75,000 TO THE PUBLIC WORKS DEPARTMENT FOR TIP FEES FROM FEBRUARY 2001 THROUGH JUNE 30, 2001

B. ORDINANCE NO. 2812 - BUDGET AMENDMENT TO APPROPRIATE $39,500 FOR A CONTRACT AMENDMENT WITH WOOLPERT LLP TO DEVELOP A SITE OPERATION PLAN FOR BENEFICIAL FILL OPERATIONS ON AZALEA ROAD

Public Works Director Mark Combs said that the City's White Fawn Reservoir was closed to beneficial fill dumping on February 2, 2001. To facilitate Water Maintenance and Streets Division's needs regarding a close, accessible and long term beneficial fill site, staff has been gathering specific information for the further potential development of the property, as directed by Council.

On April 3, 2001, City Council approved resolutions to purchase 155 acres of property on Azalea Road for long term development as a park, sports fields and potential beneficial fill site.

Potential short term beneficial fill options such as materials recycling and small, isolated sites would certainly aid in primary site longevity; however such options do not mitigate the need for a central, city owned and operated site which will serve the city's beneficial fill needs for the next 15 or more years. Also, the siting and development of small satellite operations pose significant liability and operations challenges to the City.

Concurrent with the recent purchase of the property, staff has initiated the following actions:

1. On January 31st Council directed staff to prepare a proposal regarding potential development of the property;
2. On February 2nd the White Fawn Reservoir was closed. Beneficial fill material is currently being placed in the Buncombe County Landfill in Alexander. In addition to tip fees, the 17 mile (one-way) trip has reduced operational efficiency by an estimated 30-50% due to travel time.
3. As of May 15, 2001, (12 weeks) the City has paid $90,907.84 to Buncombe County, which is an average of $7,576 per week, or $30,304 per month. Annual cost projections remain tenuous due to seasonal construction variances and emergencies; however, based on past experience, Water staff estimates tip fees at $500,000 per year and Dept. of Public Works staff estimates $175,000.
4. Staff developed a scope of services for an operation plan contract with the engineering firm of Woolpert, LLP, who will work with their sub-consultant, Froehling and Robertson, Inc. to prepare a plan which will incorporate the following:

   → Contour map;
   → Soil and Erosion Control Plan;
   → Plan for stabilization of existing slopes;
   → Plan for protection of existing river banks if necessary;
   → Design of upgrade to existing road if necessary;
   → Identify soil borrow source;
   → Work procedures for operation of site coordinated with Park plan;
   → Site grading plan (for grading permit application);
   → Prepare documents necessary for all permits as required; and
   → Flexibility (for slope and grade design) consistent with the final Parks & Recreation Master Plan (1st public meeting May 24th).

   Estimated Operation plan cost: $39,500 (4 to 6 weeks to complete plan)

5. On April 10th staff met with Dan LaMontagne, NC DENR, at the Azalea site regarding an allegation from a citizen that 'toxic wastes' were polluting the Swannanoa River. Subsequently, Mr. LaMontagne's has gathered site samples and should receive test results in mid to late June. Based on the consultant's original site examination, staff is confident that the site is not toxic to the surrounding waters and property.

6. On April 23rd staff met with and provided specific site information to Patrick Lance and Alex Perry (WNC Nature Center) regarding their concern of potential impacts of a beneficial fill site up stream from the Center.

Based on staff's further research and investigation as directed by Council, we recommend the following:

a. Appropriate $75,000 to the Public Works Department for tip fees from February through June 30th (Water Department staff estimates FY 00-01 tip fees of $110,000);
b. Appropriate $39,500 for a contract amendment with Woolpert LLP to develop a site operation plan; and
c. Direct staff to return to Council with a draft operation plan for Council review and approval with appropriate public input, as determined by City Council.

Contingent on Council's approval to proceed with a site plan, staff will report back to Council regarding specific construction and operations dates as plans are completed, as directed.

Councilwoman Bellamy asked why the City doesn't wait until the results of the DENR study comes back in June before the site operation plan is started. Mr. Combs responded that there are no permitting requirements except by the City of Asheville (soil and erosion control plan), and the feasibility study has already been completed with the recommendation to proceed. If there are any results that are marginal or concerns by the DENR study, then there would be many things the City would consider in terms what would be done to make that site operational for a beneficial fill site. The results of the study would not have an impact on the operations plan whatsoever. Again, the City had a feasibility study performed and the firm said that based on their investigation that that site is a viable beneficial fill site. Any allegation that there is toxic waste or any kinds of those issues with that site, is just an allegation and we don't expect to find anything negative from the DENR study.

City Manager said this is a parallel process. We still need to have a use plan for the beneficial site.

Councilwoman Bellamy said if the report is positive, that's fine. But, if it's negative, we would be paying an additional $39,500, plus staff time, before Council really decides if the site will be developed for a beneficial fill. She felt we should wait until the DENR study is received in June before spending any more money, because spending this money for a site plan looks like City Council has already made up their minds.

Mayor Sitnick said the operational site plan is just the first step. She stressed the City will have a lot of public input and opportunities for discussion.

Vice-Mayor Cloninger said it was his understanding it could be several months before City Council makes a final decision on the uses on the property.

City Attorney Oast also said that as part of our investigation of the site, Mr. Pat Price performed an environment assessment. Along those lines, Mr. Combs explained that Woolpert incorporated Mr. Price's environmental impact study into their findings and recommendations in their feasibility study.

Mr. Combs noted that the amount today that the City has paid to Buncombe County for tipping fees (both Water Resources Department and Public Works Department) is approximately $106,000.

Councilman Peterson said that City Council received a letter from John Blaisdell from the NC Division of Pollution Prevention and Environmental Assistance which gives some details about alternatives regarding disposal of construction and demolition debris. Also he received a letter from Deborah McKenna where she had contacted APAC in Enka Candler and that they were willing to take asphalt for free, given the current price of oil. Ms. McKenna's letter also asks if the City has considered using a separation machinery in order to reduce the amount that has to be taken to the landfill. He asked Mr. Combs if he has explored these options. Mr. Combs responded that he has been directed by City Council at their May 15, 2001, worksession to come back with more specific information in terms of time motion studies and different evaluations regarding the various options mentioned.

Councilman Hay expects the Mr. Combs will be giving City Council a report on options to the Azalea Road site as we move forward. Mr. Combs responded that Council asked him to report back historically the sites that they looked at in terms of what is a long-term home base. He said they will also provide information on what City staff would think is a viable site.

Vice-Mayor Cloninger said that it seems to him that part of that review would also include looking at issues like this that might result in a reduction of what we would put in a landfill, wherever that landfill is located. Mr. Combs said that staff's original logic was to site a home base, a long-term area, that they could call a beneficial fill site home – that they could develop in terms of grinding their wood waste, managing their leaf compost and use it potentially to begin to separate and recycle our materials.

Councilman Peterson said that in some ways spending $39,500 is potentially wasteful to pay for an operational site plan if the research is revealed that the asphalt can be recycled, material separated, etc. He felt Council should look at the alternatives before spending money to move ahead with the Azalea Road site.

Councilman Worley felt if we don't proceed along a parallel track and then find we really have no alternative but to develop our own home site, then we will have wasted that much more time. In addition, we are spending money every day hauling to the Buncombe County landfill.

Mayor Sitnick was real concerned with the cost of the tipping fees. No matter what the City does, they are going to have to find a solution to our demolition materials. She will not be comfortable in making any decision on what that site will be used for until after ample public comment.

A brief discussion was held about how much inert material there is and who could recycle the asphalt.

Mr. Combs said that staff's logic has been to site this area in order to establish a home base. Then staff will perform time motion studies, look at productivity, look at distances, and then be able to make the home base optimal for as many years as we can. The will also look at other compliments concurrent with this.

City Manager Westbrook said that staff is in the middle of doing studies now and they will bring those back to City Council at a later time. However, he feels that based on Mr. Combs' experience on being a landfill operator in the past that we are going to need a site in addition to any other things that we come up with as part of the study. He thinks it would be in the City's best interest to start the study also and run on a parallel track.

Mayor Sitnick responded to Mr. Fred English's question regarding why City staff didn't anticipate the filling up of White Fawn Reservoir earlier.

Mr. Adam Baylus suggested the City crown the landfill instead of taking the material to the Buncombe County landfill.

Mr. Walter Plaue questioned how the City has been paying the tipping fees if we are just now requesting a budget amendment and the fees started in February, 2001.

Ms. Denise Goodson suggested the City work with the County to recycle materials that go into the landfill.

Mr. Mike Moody, representing the Beverly Hills Homeowners Association, presented City Council with a prepared statement. He said the White Fawn Reservoir landfill has been closed since February 2001 and it must have been evident that all materials would then have to be sent elsewhere. This should have triggered an earlier request for funds along with an interim plan, which did not include the Azalea Road site. With the closure of the White Fawn landfill, it seems prudent to have considered recycling options with firms outside the City limits. When work areas are closer to these firms than the county landfill, recycling should be economically feasible. He quoted out of the Unified Development Ordinance sec. 15-50 (a) that "it shall be the policy of the City of Asheville to require recycling to the fullest extent possible of recyclable materials...." He said that with this unexpected request of funds it seems prudent to review the City's comprehensive plan in an "advertised public meeting."

Councilwoman Field said that the City of Asheville and Buncombe County have reduced their waste by 40% as directed by N. C. Gen. Stat. sec. 130A-309.09.

After 20 minutes of debate for a book-keeping entry, Councilwoman Field called the question. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Worley moved to adopt Ordinance No. 2811. This motion was seconded by Councilwoman Field and carried on a 6-1 vote, with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 19 - PAGE 151

Councilman Peterson asked various questions, some being, but are not limited to: are negotiations still occurring with the Blue Ridge Parkway regarding the bridge and if it is a public road or private property; if a new bridge needs to be built, is the site still financially a feasible project; what will happen if the Parkway closes the bridge; can the bridge be upgraded; is there a contingency plan if the bridge can't be re-opened; what is the cost and timeframe to stabilize the mound; and how much would it cost to move the power lines to fully utilize the power lines on top of the mound.

Councilman Peterson stated that it did not make financial sense to do a detailed plan if we're not going to use the Azalea Road site for a beneficial fill site. He felt the decision should be made to go to that site or not, before we spend $39,500 for the operations site plan. Vice-Mayor Cloninger responded that City Council has not given their approval for this site, however, he felt the more information about the site, the better, in terms of trying to make an educated decision.

Mr. Combs stressed that this is an unregulated activity and City Council has chosen to make this process so open to the public that they are willing to do these kinds of studies for an unregulated activity.

Ms. Rebecca Campbell presented City Council with information regarding recycling opportunities that would minimize the need for new or existing dumps for construction debris within the City of Asheville or Buncombe County.

Mr. Ned Guttman, representing Redwood Forest, urged City Council to wait for the DENR study analysis which may say that the water is clean and the mound is stable. He felt this is a fact-gathering effort that needs to be done before any decision is made with regard to the site. He said that the perception by the neighborhood is that Mr. Combs is saying there has been a decision made by City staff but City Council has not decided what the use of that site would be, including the mound. Mr. Guttman said that including labor, etc., the $30,000 for fixing the bridge will increase. He said that if the power lines are not moved, essentially half of the mound will not be usable and that would cut the life-time from 14 years to 7-9 years. He urged Council not to approve the $39,500 for the operational site plan, but better spend that money on obtaining the facts of what is in the mound.

Mr. Combs explained that the study by DENR are water and soil samples, not a full assessment of the site as to it's viability for beneficial fill.

When Mr. Peter Dawes said that he could use 500 tons of millings, Mr. Combs explained that there are plenty of places his staff can find to dump, but they don't do that for liability reasons.

Ms. Susan O'Neil felt that residents have been assured all along that nothing will happen on this site without ample time for public comment, but further studies are being made to consider this as a landfill site. Neighbors have done research that cost the City nothing and that research should be considered.

Ms. Karen Cragnolin, Director of RiverLink, said that the State of N. C. has looked at the Swannanoa River and said this is an endangered river and has been put on a list of one of the most sediment impaired rivers in the state. As a result of that, they have appropriated money through the Environmental Protection Agency to begin a remediation program to begin to stop pollution at the source which is runoff from development. She felt City Council needed to think about the river and the impacts on the river when discussing this site. She said that RiverLink has been involved in the planning of this site from the beginning but she has a feeling that it seems that it's steam-rolling at this point. If the City had two or three sites that they were looking at proposing to do a $39,500 study on, she would feel better. She said it appears that it's been narrowed down to one site at this point.

Mayor Sitnick said City Council is not making any hasty decisions on this issues. As anxious as we are to make a decision on this, she would like to wait until the DENR study has been received in mid to late June and if it comes back clean, she will feel more comfortable. Between now and then, Council can look into some of the comments and materials that were submitted.

Councilman Worley said that Council needs to get to the point where a decision can be made. There are still a lot of questions and Council needs to have all the facts in front of them, including the operational site plan. We are spending money every day to take our materials to the landfill. He would like to find a way to recycle the material and find a way to avoid the tipping fees at the landfill. Everyday we delay in moving forward on parallel tracks to get all the information we need, costs all taxpayers money.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Worley moved to adopt Ordinance No. 2812. This motion was seconded by Vice-Mayor Cloninger.

Councilman Peterson felt Council should wait for the DENR study. He reiterated again the issues on why City Council should wait to spend the $39,500 for the study.

Councilwoman Bellamy asked that this issue be delayed until they receive the information staff will be bringing to Council regarding the other sites investigated.

The motion made by Councilman Worley and seconded by Vice-Mayor Cloninger carried on a 4-3 vote, with Vice-Mayor Cloninger, Councilwoman Field, Councilman Hay and Councilman Worley voting "yes" and Mayor Sitnick, Councilwoman Bellamy and Councilman Peterson voting "no".

It was the consensus of City Council that if the DENR study comes in with negative results, that we ask Woolpert to stop their study and not pay the full fee.

ORDINANCE BOOK NO. 19 – PAGE 153

V. NEW BUSINESS:

A. NATIONAL BASKETBALL DEVELOPMENTAL LEAGUE CONTRACT

Councilman Hay said that he, Councilman Worley and some City staff have been talking with people from the National Basketball Development League (NBDL) intensively over the last couple of weeks about the possibility of bringing a team to Asheville to pay basketball, as opposed to the major project which they proposed earlier in the year. Over two closed sessions, they advised City Council what the key ingredients were and at the last closed session, they sketched out for Council what they thought was the direction that the negotiations were headed and asked that if City Council felt positive about that, to put it on the agenda for today. One thing City Council wanted done at that point was for staff to take the proposal and work on it at their level to see what they could do to work from the talking stage to a point of having a contract that they could present and recommend to City Council. In part of that review, Council was expecting from them that they would do a thorough thinking-through of the financial end as well as some of the other things. That has been on-going. Last night the City Manager advised him that they could not have a contract ready that he could recommend for consideration by City Council at today's meeting. The people at NBDL said they could wait. The decision was made last night that Council would not vote on that proposal today. The City Manager and staff will continue to work with the NBDL to see if a contract can be prepared that they can recommend to City Council, perhaps as early as next week. He would still like to give people a chance to comment tonight on the contract because the contract is still being negotiated and the more Council hears, the more they learn and the better able they are to negotiate a contract that reflects what Asheville wants that contract to be.

Mayor Sitnick stressed that City Council has not seen the contract and nor does Council know any of the details of the contract at this time.

Councilman Worley said that one of the things that has happened in the last week is the identification by staff of a number of issues that City Council didn't deal with in the preliminary discussions with the NBDL. One of the premises that we've gone into these negotiations with, and it's helped develop some of the issues, is the fact that we don't want to lose the Smoke and we do want to be fair to the Smoke. We've told NBDL this from the very beginning in our negotiations. We value the Smoke and we want to keep the Smoke at the Civic Center.

After Councilman Peterson said that he received a copy of a draft agreement dated 5/18/01, Councilman Worley advised him that the draft agreement has changed drastically and that draft agreement reflects nothing but to get the terms under discussion.

It was the consensus of City Council that once there is an agreement that the City Manager can recommend to City Council, a copy of that agreement will be available to the public so people can review it and comment on it.

The following people spoke in support of keeping Asheville Smoke at the Civic Center for several reasons, some being, but are not limited to: there are already some constraints and limitations for Smoke already; if the NBDL comes to Asheville, it will make it difficult financially and operationally for Asheville Smoke to exist next year with a tenant taking up 28 dates, prime weekend dates, practice time, limited ice availability, competing with the entertainment dollar within the general public and competing with the advertising dollars:

Mr. Dan Wilhelm, Manager of Asheville Smoke
Ms. Michelle Green, Angles on Ice
Mr. Michael Green
Mr. Beumer

Ms. Lynn Leslie
Mr. Jonathan Allen, professional ice skating coach representing Angles on Ice
Ms. LaVerne Laney, member of the Asheville Civic Center
Mr. Wayne Hoglen
Mr. Marc Yops
Mr. Carl Mumpower, Chair of the Asheville Civic Center
Ms. Kate Leslie
Ms. Clare Beumer, Angles on Ice
Ms. Samatha Kertz, Angels on Ice
Ms. Margaret Beumer
Mr. Pat Bingham, Coach of Asheville Smoke
Mr. Bob Swan, member of the Civic Center Commission
Mr. Bob Bennett
President of the Smoke Booster Club
Ms. Donna Seymour
Mr. Andrew Beall
Ms. Cheryl Holder
Ms. Serenity Allen, Coach for Asheville Figure Skating Club

It was reported again that once there is an agreement that the City Manager can recommend to City Council, a copy of that agreement will be available to the public so people can review it and comment on it, prior to formal action by City Council.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 4-17, 2001: Carmen Y. Cabrera (Fire), Glenn Nye (Streets), Ginger Holt (Water) and Sandra P. Robinson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The following Notice of Charge of Discrimination was received by the City on May 21, 2001: Doris Richardson filed charge. The nature of the proceeding is race discrimination charge against the City of Asheville. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 12:04 a.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – May 29, 2001 – 2:30 p.m.
Asheville Civic Center

Special Meeting

Asheville City Council Members Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson. Councilman Charles R. Worley was out of the country.

Buncombe County Commissioners Present: Chairman Nathan Ramsey, Presiding; Vice-Chair David Gantt; Commissioner Patsy Keever; Commissioner Bill Stanley; Commissioner David Young; County Attorney Joe Connolly; County Manager Wanda Greene; and County Clerk Kathy Hughes.

At 2:30 p.m., the City Council and the County Commissioners took a brief tour of the Asheville Civic Center.

Mayor Sitnick and Chairman Ramsey each called their respective meetings to order at 3:17 p.m. and said the meeting would focus on the issue of the Asheville Civic Center.

Civic Center David Pisha explained the six important factors to the Civic Center's success: Civic Center staff, event diversity, comparisons to other facilities, family show activity, capital improvements and public participation.

He explained that the Civic Center staff consists of four full-time administrative staff, five full-time maintenance personnel and hundreds of part-time event staff.

With regard to event diversity, there have been over 200 event days annually for the past four years. During that time, the Civic Center has hosted Bob Dylan, Elton John, the New York City Opera, the Miami City Ballet, and a wide variety of sporting events. Over 85% of the major events at the Civic Center have used the facility before.

He did a comparison to other facilities. Savannah, Georgia - $1.3 million deficit if rental car tax was not allocated to budget – that tax brings over $1 million per year. Macon Georgia - $1 million deficit last year. Buildings 1/3 smaller than Asheville Civic Center experience similar deficits. He said the Asheville Civic Center cash deficit last year was $675,000.

Mr. Pisha then reviewed statistics regarding the family show activity.

Capital improvements are vital to reducing the deficit at the Civic Center. For example, the bleacher project. Before investment, it took 10 men 10 man hours to set-up or remove bleachers from the arena. It now takes 4 men 3 hours to complete. This is an average savings of nearly $1,000 each time the job is done for an annual savings of $15,000 - $20,000.

Mr. Pisha then reviewed statistics regarding the public participation in performing arts, concerts and sports. He said the public participation totals for 4 years is $1.4 million visitors.

Mr. Pisha then reviewed some interesting facts: Western North Carolinians voted the Thomas Wolfe Auditorium the Best Concert Venue in Western North Carolina, SFX sold out two events in the Civic Center this year (one of these concerts sold out all 2,400 tickets in just 15 minutes and all but 200 of these tickets were sold over the internet), and the Chamber of Commerce statistics indicate that Western North Carolina grew by nearly 100,000 people in the last decade. If this trend continues over the next 10 years, there will be over 600,000 people living in this market.

Ms. Lynn Leslie
Mr. Jonathan Allen, professional ice skating coach representing Angles on Ice
Ms. LaVerne Laney, member of the Asheville Civic Center
Mr. Wayne Hoglen
Mr. Marc Yops
Mr. Carl Mumpower, Chair of the Asheville Civic Center
Ms. Kate Leslie
Ms. Clare Beumer, Angles on Ice
Ms. Samatha Kertz, Angels on Ice
Ms. Margaret Beumer
Mr. Pat Bingham, Coach of Asheville Smoke
Mr. Bob Swan, member of the Civic Center Commission
Mr. Bob Bennett
President of the Smoke Booster Club
Ms. Donna Seymour
Mr. Andrew Beall
Ms. Cheryl Holder
Ms. Serenity Allen, Coach for Asheville Figure Skating Club

It was reported again that once there is an agreement that the City Manager can recommend to City Council, a copy of that agreement will be available to the public so people can review it and comment on it, prior to formal action by City Council.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 4-17, 2001: Carmen Y. Cabrera (Fire), Glenn Nye (Streets), Ginger Holt (Water) and Sandra P. Robinson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The following Notice of Charge of Discrimination was received by the City on May 21, 2001: Doris Richardson filed charge. The nature of the proceeding is race discrimination charge against the City of Asheville. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 12:04 a.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Challenges include (1) how do we continue to be successful as the Civic Center ages and more capital improvements are needed; and (2) how do we capture a bigger portion of our market?

Solutions include a new/renovated facility which would create two types of new revenue streams. The first is created from the enhancement of existing services. The second is from areas not possible today, given the functional capabilities of the building. Experts report that we need 40% more points of sale in our food and beverage operation to service our existing number of seats – this alone would boost revenues $150,000 - $200,000. Also, naming rights, luxury suites, etc., are examples of revenue not possible in the current building. That one program could bring in an additional $400,000.

The direct economic impact is seen by (1) Southern Conference Tournament: 20,000 – 25,000 visited Asheville = $13 million; and (2) N. C. League of Municipalities: 2,000 in attendance = $1.2 million.

The formula for success is (1) over 200 event days per year; (2) events ranging from wedding receptions to concerts, from dance recitals to hockey, from the symphony to high school graduations; (3) in the last two months, 61,000 have used the facility; and (4) in April 2001, revenues were in excess of $200,000.

Councilman Hay, Chair of the Future of the Civic Center Task Force, brought City Council and the Commissioners up-to-date on the history of what has taken place to date with regard to the Civic Center architectural study. Councilman Hay used excerpts from the Heery International Civic Center Feasibility Study to outline the different ideas, which he stressed were presented as not possible solutions, only dialogue creators: (1) Renovate Auditorium, and Arena and Eliminate Exhibition Space; (2) Renovate Arena, New Performing Arts Center; (3) Renovate Auditorium, Demolish Arena; (4) Renovate Arena, Auditorium and Exhibit Hall; (5) Convert Arena and Auditorium into new Convention Center; and (6) Renovate Arena.

Vice-Chair Gantt, member on the Future of the Civic Center Task Force, said that Asheville was unique in that it has the Arena, Convention Center, Performing Arts Center and Exhibition Hall all in one place. He did think we're on the right track and was glad that all options are being explored.

Mayor Sitnick noted that 80% of the people who use the Civic Center are from outside the City and there has been a necessity for years to subsidize the operations. It's her understanding that facilities that have been built outside of a downtown area are failing and explained how nice it is to have someone attend an event at the Civic Center and perhaps dinner before the event and then dessert after the event in a downtown restaurant. She praised the Task Force in working to determine what is the best course of action to take in order to provide our constituents what they deserve and what they want.

Upon inquiry of Commissioner Keever, Mr. Pisha explained what would be required to try to bring the Southern Conference back to Asheville.

Upon inquiry of Chairman Ramsey, Councilman Hay said that the report from Heery International is due back near the end of June and then it will take some time to take those recommendations and turn them into a plan.

Councilwoman Field felt that if you split the facilities, then you will double the operating costs – two sets of staff to run the facilities. She felt it makes sense to do everything in one place and that we should try and recycle and reuse the existing facility.

360

There was a brief discussion of funding options to renovate the Civic Center. It was the consensus of City Council and the County Commissioners that the only option no one will consider is paying for it out of property taxes.

At 4:20 p.m., Commissioner Stanley moved to adjourn the meeting. This motion was seconded by Vice-Chair Gantt and carried unanimously.

At 4:20 p.m. Vice-Mayor Cloninger moved to adjourn the meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – June 5, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger (left meeting at 4:52 p.m.); Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Charles R. Worley

Mayor Sitnick congratulated Councilwoman Bellamy and members of the Asheville Fire Department on winning First Place (for the second year in a row) in the Mayor's Cup Raft Race.

CONSENT:

Councilwoman Bellamy requested the four items dealing with possession of alcoholic beverages and/or unfortified wine at festivals be voted on separately at the next formal meeting.

Mayor Sitnick requested the establishment of the Clean Air Community Trust be voted on separately at the next formal meeting.

Possession of Alcoholic Beverages and/or Unfortified Wine at the Bele Chere Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Bele Chere Festival on July 27-28, 2001.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the downtown area. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Possession of Alcoholic Beverages and/or Unfortified Wine at the Goombay Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Goombay Festival on August 24-26, 2001.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The 2001 Goombay Festival has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past. This event is co-sponsored by the Asheville Parks and Recreation Department.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Possession of Alcoholic Beverages and/or Unfortified Wine at the Brewgrass Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5th Annual Brewgrass Festival on September 15, 2001.

For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist The 5th Annual Brewgrass Festival has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Possession of Alcoholic Beverages and/or Unfortified Wine at the Greek Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Greek Festival on September 28-30, 2001.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City County Plaza, September 28-30, 2001. The 2001 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Advertise for Upset Bids on 125 Iris Drive

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a vacant lot at 25 Iris Drive.

A bid from Brian K. Perry, in the amount of $12,200, has been received for the purchase of a vacant lot at 125 Iris Drive. The bid is not less than the tax value of $12,200.

The property is a single family residential RS 8 zoned lot on Iris Drive comprising approximately 0.28 acre of land. The property has a rectangular shape and is fairly level elevated about 3' - 4' above street level. It has approximately 100 front feet on Iris Drive. There is no current or contemplated use for the property by the City. Mr. Perry plans to build a single family residence on the site for his own home.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

Contract for Regional Hazardous Materials Response

Summary: The consideration of a resolution authorizing the City Manager to renew an agreement with the N. C. Dept. of Public Safety and Crime Control for provision of regional hazardous materials emergency response.

North Carolina is divided into six geographical regions for the purpose of hazardous material emergency response. The North Carolina Department of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response.

The region six area covers from Cleveland County west to the Tennessee Border. Twenty-two counties comprise the response region. The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

During the seven years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City council authorize the City Manager to renew the Regional Hazardous Materials Contract with the North Carolina Department of Public Safety and Crime Control for Region 6.

Contract for Confined Space Emergency Response

Summary: The consideration of a resolution authorizing the City Manager to renew a contract with Rockwell Automation Dodge to provide technical rescue - confined space rescue services to the Rockwell Facility.

Rockwell Automation Dodge, located at 70 Reems Creek Road, Weaverville, North Carolina, is a manufacturing facility whose operation necessitates entry of their staff into confined spaces. State and Federal OSHA requirements necessitate that the facility provide for the emergency rescue of persons who may become trapped within confined spaces at their facility.

The City of Asheville is authorized to provide these type services pursuant to North Carolina General Statute sec. 160A-293. The City Of Asheville is capable of providing certain standby and rescue response services in connection with the use and maintenance of these confined spaces.

In consideration of the services rendered and available, Rockwell Automation Dodge agrees to pay the City of Asheville $5,000.00 annually. Rockwell Automation Dodge provides funding that fully supports the operational costs of the services.

During the time that we have provided technical rescue services to Rockwell (since Fiscal Year 1999-2000), the City has not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City Council authorize the City Manager to renew the Technical Rescue – Confined Space Rescue agreement with Rockwell Automation Dodge.

Amendment to Water 35 Fund

Summary: This is the consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect the transfer of grant funding for Critical Needs Phase II to the 29 Fund (Water Bond Capital Improvements Fund), to decrease future funding for N. C. Dept. of Transportation (NCDOT) projects that are being funded in the 29 Fund, and to reflect a transfer to capital from the Fiscal Year 2001-02 Water Fund Budget.

By Resolution 82-25 dated October 5, 1982, the Authority authorized and budgeted for various capital projects to be funded by Investment Earnings, Contributions From Other Funds, and Appropriated Fund Balance in the 35 Fund. By Resolution 92-17 dated May 19, 1992, the Authority authorized and budgeted for various capital projects to be funded by City Water Bond Proceeds in the 29 Fund.

Transfer Grant Funding For Critical Needs Phase II - On August 15, 2000, the Authority approved an amendment to Capital Project Ordinance 82-25 (35 Fund – Water Major Capital Improvements Fund) to reflect funding from the $2 Million High Unit Cost Grant received from the State for Critical Needs Phase II. On December 19, 2000, the Authority also approved a $1 million increase in the 29 Fund (Water Bond Capital Projects Fund) for Critical Needs Phase II to be funded with a portion of $13.3 million 2001 Revenue Bond Issue. The Asheville City Council also approved both of these amendments.

Staff is recommending transferring the grant funds of $2 million from the 35 Fund to the 29 Fund, so that the total funding for the Critical Needs Phase II projects in the amount of $3 million can be managed in one fund. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

Reduction of Future Funding for NCDOT Projects - Six of the eight future NCDOT projects which were to be funded with Future Contributions from Other Funds, are being funded in the 29 Fund with a portion of the $13.3 million 2001 Revenue Bond Issue. These projects total $2,805,299 and include the Biltmore Viaduct, I-40 at US 25A, NC 151 Phase I, US 74 Phase I and II, and NC 191 Brevard Road. Staff is recommending reducing the 35 Fund by $2,805,299, since these projects will now be funded in the 29 Fund. The NC 151 Phase II and US 25-A will be funded with Future Contributions From Other Funds in the amount of $1,879,370. This future funding is expected to come from a Revenue Bond Issue in late 2002. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

2001/2002 Transfer to Capital - The Authority traditionally budgets funds each year for capital improvements that will be financed through operating revenues on a pay-as-you-go basis. In Fiscal Year 2001-02, it has been estimated that there will be $785,038 available for capital improvements. At a meeting on April 10, 2001, the Budget Committee approved the following high priority projects be funded with the Fiscal Year 2001-02 contribution to capital:

Master Plan Projects (Water Line Oversizing)	$100,000
Critical Needs Projects (Water Distribution FY 01/02)	$685,038
Total	$785,038

The recommended appropriations to the Master Plan Improvements projects are for oversizing and reimbursement agreements with developers so that water lines are built to sizing recommended by the Master Plan. There is additional funding of $191,117 already budgeted in this budget line item. This transfer will result in total funding for oversizing of $291,117. The Critical Needs Improvements includes water line improvement projects totaling $685,038 defined as follows:

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5th Annual Brewgrass Festival on September 15, 2001.

For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. The 5th Annual Brewgrass Festival has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Possession of Alcoholic Beverages and/or Unfortified Wine at the Greek Festival

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Greek Festival on September 28-30, 2001.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City County Plaza, September 28-30, 2001. The 2001 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Advertise for Upset Bids on 125 Iris Drive

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a vacant lot at 25 Iris Drive.

A bid from Brian K. Perry, in the amount of $12,200, has been received for the purchase of a vacant lot at 125 Iris Drive. The bid is not less than the tax value of $12,200.

The property is a single family residential RS 8 zoned lot on Iris Drive comprising approximately 0.28 acre of land. The property has a rectangular shape and is fairly level elevated about 3' - 4' above street level. It has approximately 100 front feet on Iris Drive. There is no current or contemplated use for the property by the City. Mr. Perry plans to build a single family residence on the site for his own home.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

Contract for Regional Hazardous Materials Response

Summary: The consideration of a resolution authorizing the City Manager to renew an agreement with the N. C. Dept. of Public Safety and Crime Control for provision of regional hazardous materials emergency response.

North Carolina is divided into six geographical regions for the purpose of hazardous material emergency response. The North Carolina Department of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response.

The region six area covers from Cleveland County west to the Tennessee Border. Twenty-two counties comprise the response region. The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

During the seven years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City council authorize the City Manager to renew the Regional Hazardous Materials Contract with the North Carolina Department of Public Safety and Crime Control for Region 6.

Contract for Confined Space Emergency Response

Summary: The consideration of a resolution authorizing the City Manager to renew a contract with Rockwell Automation Dodge to provide technical rescue - confined space rescue services to the Rockwell Facility.

Rockwell Automation Dodge, located at 70 Reems Creek Road, Weaverville, North Carolina, is a manufacturing facility whose operation necessitates entry of their staff into confined spaces. State and Federal OSHA requirements necessitate that the facility provide for the emergency rescue of persons who may become trapped within confined spaces at their facility.

The City of Asheville is authorized to provide these type services pursuant to North Carolina General Statute sec. 160A-293. The City Of Asheville is capable of providing certain standby and rescue response services in connection with the use and maintenance of these confined spaces.

In consideration of the services rendered and available, Rockwell Automation Dodge agrees to pay the City of Asheville $5,000.00 annually. Rockwell Automation Dodge provides funding that fully supports the operational costs of the services.

During the time that we have provided technical rescue services to Rockwell (since Fiscal Year 1999-2000), the City has not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City Council authorize the City Manager to renew the Technical Rescue – Confined Space Rescue agreement with Rockwell Automation Dodge.

Amendment to Water 35 Fund

Summary: This is the consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect the transfer of grant funding for Critical Needs Phase II to the 29 Fund (Water Bond Capital Improvements Fund), to decrease future funding for N. C. Dept. of Transportation (NCDOT) projects that are being funded in the 29 Fund, and to reflect a transfer to capital from the Fiscal Year 2001-02 Water Fund Budget.

By Resolution 82-25 dated October 5, 1982, the Authority authorized and budgeted for various capital projects to be funded by Investment Earnings, Contributions From Other Funds, and Appropriated Fund Balance in the 35 Fund. By Resolution 92-17 dated May 19, 1992, the Authority authorized and budgeted for various capital projects to be funded by City Water Bond Proceeds in the 29 Fund.

Transfer Grant Funding For Critical Needs Phase II - On August 15, 2000, the Authority approved an amendment to Capital Project Ordinance 82-25 (35 Fund – Water Major Capital Improvements Fund) to reflect funding from the $2 Million High Unit Cost Grant received from the State for Critical Needs Phase II. On December 19, 2000, the Authority also approved a $1 million increase in the 29 Fund (Water Bond Capital Projects Fund) for Critical Needs Phase II to be funded with a portion of $13.3 million 2001 Revenue Bond Issue. The Asheville City Council also approved both of these amendments.

Staff is recommending transferring the grant funds of $2 million from the 35 Fund to the 29 Fund, so that the total funding for the Critical Needs Phase II projects in the amount of $3 million can be managed in one fund. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

Reduction of Future Funding for NCDOT Projects - Six of the eight future NCDOT projects which were to be funded with Future Contributions from Other Funds, are being funded in the 29 Fund with a portion of the $13.3 million 2001 Revenue Bond Issue. These projects total $2,805,299 and include the Biltmore Viaduct, I-40 at US 25A, NC 151 Phase I, US 74 Phase I and II, and NC 191 Brevard Road. Staff is recommending reducing the 35 Fund by $2,805,299, since these projects will now be funded in the 29 Fund. The NC 151 Phase II and US 25-A will be funded with Future Contributions From Other Funds in the amount of $1,879,370. This future funding is expected to come from a Revenue Bond Issue in late 2002. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

2001/2002 Transfer to Capital - The Authority traditionally budgets funds each year for capital improvements that will be financed through operating revenues on a pay-as-you-go basis. In Fiscal Year 2001-02, it has been estimated that there will be $785,038 available for capital improvements. At a meeting on April 10, 2001, the Budget Committee approved the following high priority projects be funded with the Fiscal Year 2001-02 contribution to capital:

Master Plan Projects (Water Line Oversizing)	$100,000
Critical Needs Projects (Water Distribution FY 01/02)	$685,038
Total	$785,038

The recommended appropriations to the Master Plan Improvements projects are for oversizing and reimbursement agreements with developers so that water lines are built to sizing recommended by the Master Plan. There is additional funding of $191,117 already budgeted in this budget line item. This transfer will result in total funding for oversizing of $291,117. The Critical Needs Improvements includes water line improvement projects totaling $685,038 defined as follows:

Grove Park Area Improvements	$500,000
North Fork/Right Fork Rd and Walkertown Rd	39,000
Eloise Street	39,000
King Street	71,038
Cub St/Trade St/Rector St (50% cost share)	36,000
	$685,038

The Grove Park Area Improvements will create a new intermediate pressure zone (HGL=2700) between the North Fork Water Treatment Plan to West Asheville Reservoir pressure zone and the Patton Mountain pressure zone. Currently there is a long and narrow area along the west slope of the Patton Mountain/Beaucatcher Mountain range from the Grovewood Park subdivision to near the Beaucatcher Cut and from the Grove Park Inn to Sunset Drive and Old Toll Road which is subject to low pressures anytime a major transmission line between Haw Creek and Beaucatcher Mountain is reduced for maintenance. The new pressure zone will add needed reliability to this described area.

The North Fork Road and Eloise Street projects are sections of the water system that need to be upgraded to 6" and 8" lines to avoid low pressure problems and during peak times. The King Street project will replace an old galvanized water main, which causes frequent maintenance and repair.

The Cub Street/Trade Street/Rector Street project will replace old water lines with new lines sized for adequate fire protection. This project is being moved up on the priority list to coincide with other infrastructure and housing improvements by Mountain Housing Opportunities (MHO) and will be funded 50% by Community Development Block Grant funds allocated to MHO.

Staff is recommending the approval of an amendment to the 35 Fund to reflect the transfer of $785,038 from the Fiscal Year 2001-02 Water Fund Budget for the project recommendations identified above. This transfer will become effective July 1, 2001.

The Regional Water Authority approved the amending of Capital Project Ordinance 82-25 (35 Fund) at their May 22, 2001, meeting.

Staff recommends approval of the a budget amendment to the 35 Fund to reflect the changes identified above.

Amendment to Water 29 Fund

Summary: The consideration of a budget amendment (29 Fund - Water Bond Capital Improvements Fund) to reflect the transfer of $2 million in N. C. Dept. of Environment & Natural Resources Grant Funds from the 35 Fund (Water Major Capital Improvements Fund).

By Resolution 92-17 dated May 19, 1992, the Regional Water Authority (Authority) authorized and budgeted for various capital projects to be funded by City Water Bond Proceeds in the 29 Fund. By Resolution 82-25 dated October 5, 1982, the Authority authorized and budgeted for various capital projects to be funded by Investment Earnings, Contributions From Other Funds and Appropriated Fund Balance in the 35 Fund.

On August 15, 2000, the Authority approved an amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect funding from the $2 Million High Unit Cost Grant received from the State for Critical Needs Phase II. On December 19, 2000, the Authority approved a $1 million increase in the 29 Fund (Water Bond Capital Projects Fund) for Critical Needs Phase II to be funded with a portion of $13.3 million 2001 Revenue Bond Issue. Both of these budget amendments were also approved by City Council. Staff is recommending transferring the grant funds of $2 million from the 35 Fund to the 29 Fund, so that the total funding for the Critical Needs Phase II projects in the amount of $3 million can be managed in one fund. Staff recommends increasing revenues for State Grant DEH-087 in the amount of $2 million and increasing the appropriations for Critical Needs Improvements from $1 million to $3 million.

The Regional Water Authority approved the amending Capital Project Ordinance 92-17 (29 Fund) at their May 22, 2001, meeting.

Staff recommends approval of a budget amendment to the 29 Fund to reflect the changes identified above.

Revisions to Standard Specifications & Details Manual

Summary: The consideration of a resolution amending the Asheville Standard Specifications and Details Manual to include fire flow and fire hydrant requirements for buildings.

On May 15, 2001, Mayor Sitnick sent a letter to the State Fire Marshal's office, on behalf of City Council, requesting that they remove fire protection water supply requirements from the Asheville amendments to the North Carolina Building Code – Volume V – Fire Prevention. The letter also stated that the City planned to place fire protection water supply requirements in the Asheville Standards and Specifications Manual. The State Building Code Council will be holding its semi-annual meeting from June 11 through June 13, 2001. It is anticipated that they will act on this request at this meeting.

Staff will be requesting additional changes to the Asheville Standards and Specifications Manual in July of this year.

City staff recommends that City Council adopt the addition to the Asheville Standard Specifications and Details Manual to include fire flow and fire hydrant requirements for buildings.

Donation to Mounted Patrol

Summary: The consideration of a resolution authorizing the City Manager to accept on behalf of the City a donation from The Susanne Marcus Collins Foundation, Inc., and to adopt a budget ordinance amendment in the amount of $7,500 to add the donation to the police operating budget.

The Susanne Marcus Collins Foundation, Inc., has donated $7,500 to support the Asheville Police Department's Mounted Patrol . The funds are intended to purchase one Bay American Quarter Horse, which will enable the Police Department provide better police services to the citizens of downtown Asheville.

City staff recommends City Council adopt a (1) resolution authorizing the City Manager to accept the donation; and (2) budget amendment, in the amount of $7,500, to appropriate funds in the police operating budget.

Establishment of Clean Air Community Trust

Summary: The consideration of a resolution authorizing establishment of a clean air community trust.

Last year, the City and Buncombe County agreed to establish a clean air community trust for the purpose of seeking and administering grants and undertaking other programs in furtherance of local air quality.

Since then, we have been working with the County's attorneys and members of the air quality agency to develop a trust agreement and by-laws for this purpose. Our progress has been affected by the pendency of a lawsuit regarding the distribution of funds collected by the air quality agency. However, the trust documents specify that the funding for the trust is to be from money from private sources or that is not restricted by law.

To this end, the Buncombe County Medical Society and Alliance Endowment has made a significant contribution to the County for purposes of the initial funding for the trust, and other members of the community have expressed their desire to help get it started.

Currently under review are the by-laws for the trust. A recommended draft of that document should be available by your June 5 worksession.

The Buncombe County Commissioners are planning to act on June 5 to authorize establishment of the trust, and may appoint the County's three initial trustees. Following adoption of the resolution authorizing the trust and approving the by-laws, Council should act to appoint its initial two trustees.

If Council wishes to establish the Clean Air Community Trust, adoption of the resolution is recommended.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

AIRPORT MASTER PLAN UPDATE

Airport Director Mike Armour updated City Council on the Airport's Master Plan. He reviewed the short-term, intermediate and long-term development projects, along with costs associated with the projects.

BENCHMARK – COMMUNITY PROGRESS REPORT

Mr. Bob Burgin presented City Council with their third set of benchmarks "Your Community Progress Report." He said our community and its leaders have come to rely on this set of objective measurements that track our achievement and bring light to our shortcomings.

He explained the VISION's achievements this year include: (1) aggressive leadership to assure we will have an education system that is number one for MSAs our size – our efforts to increase graduation rates resulted in a diverse, community-owned Education Coalition between school systems, 30 community organizations, and colleges that has developed strategies for all students to succeed and graduate on time; (2) county-wide community dialogues among diverse groups of citizens on the future of our transportation system – a consensus-building strategy that will inform the Dept. of Transportation's financial priorities for our area; and (3) building partnerships and spotlighting opportunities to assure a viable future – outcomes like creating an extension policy for our sewer system, reinstating bus service along US 70 to Black Mountain, building strategies to retain and recruit local 18 to 34 year olds, and renewing Woodfin's agreement with Asheville Water Authority .

Soon the VISION will implement another long-term leadership initiative to spotlight our economic goals. Our goals in health, quality of life, housing, infrastructure, and government hinge on our economic benchmarks. We plan to use our success in focusing the whole community on our educational vision as a template to engage every partner and the voice of citizens.

VISION needs City Council's commitment in three ways. First, they asked for Council's continued financial commitment for Fiscal Year 2000-01 to maintain their broad base of community support. Second, they asked for Council" input as they provide diverse, citizen-driven leadership to make our VISION a reality. Last, they asked Council to review the Community Progress Report and institute the VISION goals into local planning.

Councilwoman Field said that she has undertaken the task of putting City Council's Code of Ethics in written form.

On behalf of City Council, Mayor Sitnick thanked Asheville-Buncombe VISION Inc. for their work.

PRESENTATION OF THE REGIONAL WATER AUTHORITY BUDGET

Mr. Jack Tate, Chairman of the Regional Water Authority of Asheville, Buncombe and Henderson, presented City Council with the request for approval of the Fiscal year 2001-02 Water Fund Budget in the amount of $21,917,801.

He said that this budget is based on an overall 3.1% rate increase across the board for residential and non-residential customers as recommended and approved by the Regional Water Authority on May 22, 2001. This rate increase will provide for adequate debt service coverage and essential operations and maintenance programs. It will also provide for contributions to the capital improvements fund to meet the Authority's long-term capital improvements needs. This budget also assumes growth in billing revenues that vary according to projected demand patterns for each customer class. The average growth rate for all customer classes is estimated to be approximately 1.275% in Fiscal Year 2001-02.

Revenues
Utility Charges - To maintain financial integrity, given the loss of two large industrial customers and the decrease in consumption of other industrial customers, the Authority implemented an 8% rate increase in Fiscal year 1999-2000 and a 4% rate increase in Fiscal Year 2000-01. In Fiscal Year 2001-02, the Regional Water Authority is recommending a 3.1% rate increase. This rate increase along with projected growth in billing revenues will provide adequate funding to meet the Authority's long-term capital improvements plan. A significant portion of the water system includes aged infrastructure with aged pipe and pipe joint technology. This has resulted in a higher than average unaccounted water rate. In this and future budgets, the Regional Water Authority is committed to providing adequate funding for capital improvements to replace aged infrastructure and reduce the unaccounted water rate.

The budget estimate for Fiscal Year 2001-02 is based on a revenue estimate of $21,917,801. Assumptions used in the revenue projections include an average growth rate in demand of approximately 1.275% and a 3.1% increase in water rates.

Estimated Utility Charges Fiscal Year 2000-01	$19,218,355
Growth	$245,210
	$19,463,565
3.1% Rate Increase	$603,371
Estimated Utility Charges Fiscal Year 2001-02	$20,066,936

Plus Other Revenue (e.g. tap fees)	$1,850,865
Total Projected Revenue for Fiscal Year 2000-01	$21,917,801

Other Revenue - Investment earnings revenues reflect earnings on cash fund balances and are estimated to be $415,020 and Other Operating Revenue is estimated to be $1,435,845.

Expenses

Operating Expenses

Staff is recommending a 6.9% increase in operating expenses for FY 2001/2002 over the projected operating expenses for FY 2000/2001. Approximately 3.3% of this increase is due to the cost of using the Buncombe County Landfill for disposal of excavated soil, concrete, and asphalt from construction/repair sites. Without this obligation, the increase in operating expenses would only be 3.6%.

Reengineering

Four new programs will be created or expanded to improve water service to our customers and to ensure that the water system is maintained in good operating condition. These program include the following: (1) adding leak detection surveys to the duties performed by the mapping crew in order to reduce unaccounted for water lost through leaks; (2) expanding the water system mapping improvements program; (3) expanding the meter change-out and testing program and establishing a goal of not allowing any meter older than 12 years to remain in the system without passing a calibration test; (4) and creating a cross-connection control inventory and maintenance program. The leak detection, mapping, and cross-connection control programs will be staffed with current employees. Their job duties will be expanded and some shifting of responsibilities will be required throughout the Water Maintenance Division. The estimated savings of using existing staff to perform these duties versus hiring new employees is approximately $80,000 in salaries and benefits. The meter change-out and testing program will require hiring a two-person crew at an estimated cost of $56,000 in salaries and benefits. It will also require the purchase of new meters estimated to cost an additional $150,000.

Salaries and Benefits

Salary and Fringe Benefit expenses are estimated to increase by 4% as approved in the City of Asheville's Pay Plan. The number of positions authorized in the Fiscal Year 2000-01 Budget was 105. Staff is requesting a total of 107 positions in Fiscal Year 2001-02. This is the first request for an increase in the number of authorized positions in over six years, which demonstrates our commitment to continuously strive for greater efficiency.

Capital Projects Fund (Transfer to Capital)

On May 22, 2001, the Regional Water Authority adopted a goal to maintain an 80-year replacement schedule for water system assets, which will require total annual funding for capital projects of approximately $4.4 million. A 3.1% rate increase for the next five years will provide adequate revenue financed capital to help meet this goal. The Authority's current five-year capital plan for Fiscal Year 2002-06, based on a 3.1% rate increase annually, includes the following expenditures on replacing aged infrastructure based on the following assumptions:

State Grants	$2.0 Million	(Phase II Grant for Critical Needs)
Bond Funds	2.1 Million	
NCDOT Projects	5.4 Million	
Revenue Financed	7.6 Million	(Includes $1 million in matching funds for Phase II Grant)
Construction Crew	2.8 Million	
State Grants	2.0 Million	(Phase III Grant for Critical Needs)
Total	21.9 Million	

Average of $4.38 Million per year

370

This is slightly below the Authority's goal of $4.4 million annually, but it will be adequate until staff's replacement schedule can be further refined and reviewed by the Authority's financial consultant. On July 1, 2001, a transfer to capital of $785,038 will be made to fund $100,000 for Master Plan Projects (water line oversizing) and $685,038 for the highest priority projects on the list of Critical Needs Projects. A second transfer to capital of approximately $400,000 will take place in late Fiscal Year 2001-02 to fund additional Critical Needs Projects. If the Authority is required to provide funding for unanticipated emergency needs or experiences a revenue shortfall, this contribution to capital will be reduced.

Debt Service
Debt service is for 1992 General Obligation Bonds, 1996 Revenue Bonds and Loan, and a new $13.3 million revenue bond issue in February 2001. This bond issue will fund capital needs including Bee Tree Spillway, NCDOT projects, master plan projects, Mills River Water Treatment Plant uprating, and future use of Bee Tree water supply.

Capital Equipment
Staff is recommending replacing 2 air compressors, a backhoe, two dump trucks, and ten vehicles at a total cost of $477,000. The purchase of vehicles has been limited for over four years and many have far exceeded their useful life (the majority are over 9 years old). A comprehensive evaluation of capital equipment replacement is reflected in the current 5-year replacement plan, which is more uniform and sustainable for future planning.

Long Term Planning
The Regional Water Authority bases their recommendation for Fiscal Year 2001-02 on their financial consultant's long-term (5-year) financial plan and staff's recommendation for an 80-year replacement schedule of water system assets. This plan calls for minimum annual rate increases of approximately 3.1% over the next five years in order to maintain financial sufficiency, meet future debt service, and fund capital improvements.

He said that the Regional Water Authority is recommending that the City Council approve the proposed Fiscal Year 2001-02 Water Fund Budget, which includes a 3.1% rate increase and totals $21,917,801. Mr. Tate felt this is a responsible rate increase.

Mr. Tate answered various questions from City Council, some including, but are not limited to: what is the history of the water rate increases, is there a study being performed on rates for industrial customers vs. residential uses, and will the mapping program started on a few years ago be used in conjunction with the new program.

Mayor Sitnick wanted to see the water rate structure issue dealt with quickly, fairly and equitably to everyone involved.

It was the consensus of City Council to have City staff work with Mr. Tate and other representatives of the Regional Water Authority, along with representatives of Buncombe County to see if the difference between a 2.5% rate increase recommended by the City Manager and the 3.1% rate increase recommended by the Regional Water Authority can be reconciled.

At 4:52 p.m., Vice-Mayor Cloninger left the meeting.

Mayor Sitnick announced a five minute break.

UDO AMENDMENT REVIEWS

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled on June 26, 2001. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Establishing Standards for Non-Residential Access onto Residential Streets

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to limit access by non-residential uses onto residential streets.

The Planning and Zoning Commission has recommended adoption of an amendment to the UDO limiting access by non-residential access onto residential streets. Access onto residential streets by non-residential uses located on corner and through lots can impact the residential character of the residential streets. Currently, the City Council often reserves a strip of residentially zoned property along the residential street frontage to limit access onto the residential street by non-residential uses. This results in a cumbersome zoning pattern and restricts the use of the residentially zoned property for buffering and other appropriate uses. The proposed standards would not apply to non-residential uses permitted in residential zones, such as churches, schools, and libraries, or to non-residential uses located in non-residential or mixed use zoning districts that have their only access onto residential streets. Non-residential uses located on corner lots, through lots, and other lots with frontage on more than one street would be required to have their access from the street that is abutted by similar uses. Access onto residential streets by non-residential uses located on corner lots would be permitted if certain conditions are met and the City's Traffic Engineer approves the proposed access. As proposed, the standards would preserve the residential character of streets that function primarily to provide access to residences. The proposed ordinance amendment identifies clear standards for access, making it easier for staff, developers, and citizens to understand and adhere to them.

The Planning and Zoning Commission voted unanimously to recommend approval of the wording amendment limiting access by non-residential uses onto residential streets. The Planning and Development staff recommends approval of the wording amendment.

Upon inquiry of Councilwoman Field, Mr. Green said that the Traffic Engineer with work with site professionals on a case by case basis when access onto a commercial highway may not be reasonable.

Revisions to Soil and Erosion Control Ordinance

Assistant City Engineer John Echeverri said that this is the consideration of amendment to the Unified Development Ordinance (UDO) regarding Soil/Erosion and Sedimentation Control.

The N. C. Dept. of Environmental & Natural Resources issued revisions to The Sedimentation Pollution Control Act dating October 1999 and July 2000 to the City of Asheville. The UDO sections for Erosion Control will be affected by those changes.

Changes are made in accordance with the Sedimentation Pollution Control Act (Title 15A Chapter 4) revisions from October 1999 and July 2000. Summary of the major changes are as follows:

- When deemed necessary by the approving authority Pre-Construction conference may be required. (Sec. 7-12-2)
- The time for establishment of a permanent ground cover will shorten to 15 working days or 90 calendar days, whichever is shorter. (Sec. 7-12-2)
- Maximum Civil Penalty for violating the Act increases from $500.00 to $5000.00 per day. (Sec. 7-18-2)

- The Act clarifies that a person may be assessed a one-time civil penalty of up to $5000.00 for the day the violation is first detected. (Sec. 7-12-2)
- A copy of the Erosion Control Plan for any land disturbing activity that involves the utilization of ditches for the purpose of de-watering or lowering the water table must be forwarded to the director of the division of water quality. (Sec. 7-12-2)
- Project sites that meet the Hillside area development Sec. 7-12-4 of this chapter, shall submit documentation prepared by a registered professional showing drainage configuration as well as bank stabilization when land-disturbing activity between 5,000 and 10,000 square feet is undertaken. (Sec. 7-12-2)
- Changed several minor typographical errors and clarifications. (Sec. 7-5-13; & 7-12-2)
- Name of the Erosion Control Committee will be changed to the Development Review Committee so that the duties could be broadened. (Sec. 7-12-2)

The Engineering Department request that City Council adopt the ordinance of changes for the UDO Sections 7-5-13, 7-12-2, and 7-18-2 regarding soil/erosion and sedimentation control.

Upon inquiry of Councilwoman Field, Mr. Echeverri said that he would investigate the provision regarding the time for establishment of a permanent ground cover and have it clarified for City Council before the public hearing.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearings on June 26, 2001.

LICENSE AGREEMENT WITH TRITON PCS FOR CONCEALED WIRELESS COMMUNICATION TOWER AT 300 MERRIMON AVENUE

Field Services Coordinator Ed Vess said that this is the consideration of a Resolution authorizing the City Manager to execute a License Agreement with Triton PCS Property Company, LLC (Triton) for a concealed wireless communication facility at 300 Merrimon Avenue.

The building at 300 Merrimon Avenue is the historic Fire Station #4 and is currently known as the Harley Shuford Arson Task Force Building. The property is listed in the National Register of Historic Places and is one of the oldest fire training towers in the United States. The training tower is in need of structural reinforcement and rehabilitation.

In conjunction with the proposed License Agreement Triton will carry out the rehabilitation of the training tower in accordance with plans approved by City staff and the State Historic Preservation Office. The cost of the rehabilitation, estimated at *$60,000*, will be paid by Triton. Triton will install a 15' flag pole on top of the training tower which will house their concealed wireless communication facility along with a 9' x 13' equipment shed on the ground at the rear of the building. The term of the License Agreement will be 5 years with one period 4.5 year renewal period. Triton will pay a License Fee of $14,400 the first year with a 4% annual increase each year thereafter.

Planning Department staff recommends adoption of the Resolution.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ADVERTISE FOR UPSET BIDS FOR PORTION OF 36 GROVE STREET

Finance Director Bill Schaefer said that this is the consideration of a resolution directing the City Clerk to advertise an offer to purchase for upset bids for a portion of 36 Grove Street.

36 Grove Street is located on the east side of Grove Street in downtown Asheville and zoned Central Business District. The 1.05 acres lot is improved with a building currently being used as the Senior Opportunity Center and a parking lot. The bid from BOC Enterprises, in the amount of $111,000, is for the parking lot portion of the property which comprises 0.57 acre and includes the stipulation for the City to retain a non-exclusive parking easement on the property in order to continue to provide parking to the Senior Opportunity Center. The site proposed to be purchased with the parking easement encumbrance was appraised by Mark Morris at a fair market value of $111,000.

The proposal from BOC Enterprises is made in order to facilitate the expansion and renovation of the building at 48 Grove Street. The total project cost for 48 Grove Street is expected to exceed $3,000,000. The sale of the property will result in an increase to the tax base and improvement of the Grove Street area.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Finance Department and Parks and Recreation Department staff recommend adoption of the resolution.

Discussion surrounded wanting to make sure there was adequate parking for the Senior Opportunity Center.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

SALE AND/OR TRADE OF CITY PROPERTY FOR THE JAIL DETENTION CENTER

City Manager Jim Westbrook said that pursuant to City Council's direction, he has completed negotiations with the County for the sale and/or trade of City property for use as a jail detention center.

Based on direction for City Council, he has been negotiating with Buncombe County for the use of City-owned property directly behind the current jail site for a proposed jail detention center. Since there were other properties in the area that the City desired to acquire from the County, he proposed a combination sale and trade of properties which would allow the County to purchase the property the City owns and the City to acquire two properties that we need from the County.

The details of the negotiations are summarized below.

1. The City will sell to the County property located behind your current jail for two pieces of property which the County owns as follows:

The appraised price of the City-owned parking lot (Marjorie, Davidson, Valley Streets) PIN No. 9649.19-50-4467	$750,000
Less property owned by Buncombe County (Marjorie and Eagle Streets) PIN No. 9649.19-50-2118	-364,000

Less property owned by Buncombe County (Valley, Marjorie & Davidson Sts.) -243,500
PIN Nos. 9649.19-50-4350, 5310, 5325, 5326
Cash Due City $142,500

2. Since both the County and the City are using the property described in Item 1 above as parking lots, the agreement will include cross-easements to allow for the City and County to continue to park as we do currently. When either the City or the County starts a construction project on the lots, then the parking for City and County employees will revert to align with the ownership of the property.

3. The current lease between the City and the County for the property located between Marjorie and Eagle Streets (PIN No. 9649.19-50-2118), which the City will purchase with this new agreement, will terminate with no further obligation by either party.

4. The property which the City will sell to the County (PIN No. 9649.19-50-4467) located behind the current jail will be used exclusively for jail and/or jail related facilities during a 12 year period beginning with the date the property is sold to the County.

5. The property which the City will sell to the County (PIN No. 9649.19-50-4467) located behind the current jail will be used for jail and/or jail related facilities, governmental offices, or governmental uses after the initial 12 year period.

6. For a period of 12 years from the date of conveyance, the height of any building constructed on the lot behind the current jail (PIN No. 9649.19-50-4467) may be no higher than the top of the balustrade on the second floor of the City Building. This restriction is in addition to the City's zoning regulations. After the expiration of the 12 year period, the City's zoning regulations would continue to apply.

7. The City and the County will continue to work together for a Master Plan of the governmental complex area located in the downtown so that in the future such expansions by the City and/or County can be better planned with regard to traffic, supporting and ancillary facilities.

In a telephone conversation, Assistant County Manager Jon Creighton indicated the above seven points would be acceptable to the County and that he would ask the Commissioners to take action at their June 5, 2001, meeting. Of particular note is the agreement between the City and the County to Master Plan the governmental complex area located in downtown so that future governmental building expansions can be preplanned to the maximum extent possible. It also allows the City to acquire two pieces of County property that may be needed in the future for additional parking, and to help make up the loss of parking spaces when construction begins on the property sold to the County.

City staff recommends Council approve the sale of the City-owned parking lot (PIN No. 9649.19-50-4467) for $750,000 to Buncombe County; the purchase of Buncombe County property (PIN Nos. 9649.19-50-4467; 9649.19-50-4350; 9649.19-50-5310; 9649.19-50-5325, and 9649.19-50-5326) by the City; to further instruct the City Manager to allow for the cross-easements as described in Number 2 above through written agreement with the County; to provide for the termination of any agreements or understanding with regard to the property owned by the County between Marjorie and Eagle Streets (PIN No. 9649.19-50-2118) as described in Number 3 above; and such language as would be necessary to cause the City and the County to work toward a Master Plan for the governmental complex as described in Number 7 above. The City Attorney is instructed to prepare the deeds in such a manner that the property sold to the County (PIN No. 9649.19-50-4467) is to be used exclusively for jail and/or jail related facilities for the first 12)years as described in Number 4 above, and the use of the property by the County for jail and/or jail related facilities, governmental offices, or governmental uses after the initial 12 year period as described in Number 5 above, and the height of the initial building for the first 12 years of the agreement as described in Number 6 above.

Councilwoman Bellamy hoped that Buncombe County will involve Pastor Grant from the Mt. Zion Missionary Baptist Church in their discussions of design and that the City involves the Church when discussions begin about the parking deck.

City Attorney Oast said that the title work on these properties are not completed yet and the City will need to make sure that they can obtain good title on the parcels.

Mr. Jason Cline, representing Community of Compassion, spoke against the City selling and exchanging property with Buncombe County for the jail detention facility.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CANCELLATION OF JULY 3, 2001, WORKSESSION

It was the consensus of City Council to cancel the July 3, 2001, City Council worksession.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS

City Council instructed the City Clerk to arrange for various interviews on several boards and commissions.

CLOSED SESSION

At 6:07 p.m., Councilwoman Field moved to go into closed session and adjourn to Room 209 of the City Hall Building (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Kathlyn Marie Stein, Michael Hootstein, Buncombe County Schools, Michael and Rose Dixon and City of Asheville – G. S. 143-318.11 (a) (3). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 8:42 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Field and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 8:42 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – June 12, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and Deputy City Clerk Phyllis Corns

Absent: None

INVOCATION

Mayor Sitnick gave the invocation.

I. PROCLAMATIONS:

A. BUNCOMBE COUNTY MEDICAL SOCIETY AND ALLIANCE ENDOWMENT DONATION

Dr. Emory Williams and Dr. Wayne Montgomery presented City Council with a check to the Clean Air Community Trust from the Buncombe County Medical Society and Alliance Endowment in the amount of $5,000 to demonstrate their commitment for the health of our community.

On behalf of City Council, Mayor Sitnick thanked Drs. Williams and Montgomery for the wonderful donation.

B. RESOLUTION NO. 01-75 – RESOLUTION CONCERNING STATE REIMBURSEMENTS, REVENUE OPTIONS AND LOCAL FISCAL CRISIS

Councilman Worley read the resolution urging the Governor and General Assembly to take immediate action to relieve local governments of the impossible situation in which they have been placed during the current fiscal year and Fiscal Year 2002 and to ensure, in the short term, the provision of basic services to the State's eight million residents. Said resolution requests that for long-term fiscal resources of program stability, the General Assembly is urged to authorize replacement revenue which meets the following prerequisites: replaces reimbursements on a hold-harmless basis to all local governments, does not require voter approval to realize the replacement revenues, does not require annual appropriations or other actions by the N. C. General Assembly, produces adequate revenues to offset any revenue losses caused by State action and sufficient revenue growth to keep pace with inflation and other changing factors or needs, has a distribution formula that is reasonable and fair, gives local governments sufficient discretion as to uses of the proceeds; and avoids further pressure on the local ad valorem property tax.

Councilman Worley moved for the adoption of Resolution No. 01-75. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 364

II. CONSENT:

Councilwoman Field asked that Consent Agenda Item "M" be removed from the Consent Agenda for discussion.

Councilwoman Bellamy asked that Consent Agenda Items "D" and "K" be removed from the Consent Agenda for individual votes due to a conflict of interest.

Councilwoman Bellamy asked that Consent Agenda Items "Q", "R", "S" and "T" be removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 22, 2001, THE JOINT CITY/COUNTY MEETING HELD ON MAY 29, 2001, AND THE WORKSESSION HELD ON JUNE 5, 2001

B. MOTION SETTING A PUBLIC HEARING ON JUNE 26, 2001, TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH STANDARDS FOR NON-RESIDENTIAL ACCESS ONTO RESIDENTIAL STREETS

C. MOTION SETTING A PUBLIC HEARING ON JUNE 26, 2001, TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE SOIL AND EROSION CONTROL ORDINANCE

D. MOTION SETTING A PUBLIC HEARING ON JUNE 26, 2001, TO CONSIDER AMENDING A PREVIOUSLY GRANTED CONDITIONAL USE PERMIT FOR THE CLINGMAN AVENUE CONDOMINIUMS

This item was removed from the Consent Agenda due to a conflict of interest by Councilwoman Bellamy.

E. RESOLUTION NO. 01-76 - RESOLUTION AUTHORIZING THE SALE OF DISPOSAL PARCEL 157 ON JORDAN STREET IN THE EAST END/VALLEY STREET COMMUNITY TO WILLIAM BOYLE IN THE AMOUNT OF 2,400

Summary: The consideration of a resolution authorizing the Mayor to convey Disposal Parcel 157 on Jordan Street in the East End/Valley Street Community Improvement Area to William Boyle in the amount of $2,400.

On May 22, 2001, the City Council directed the City Clerk to advertise for upset bids on Disposal Parcel 157. The advertisement ran in the Asheville Citizen-Times on May 25, 2001, as provided in N. C. Gen. Stat. sec. 160A-269.. No response was received. Therefore, the offer to purchase from William Boyle in the amount of $2,400. was not upset and the sale to William Boyle should be approved.

Approval of the resolution will authorize the sale of the property to William Boyle for the amount of $2,400.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 365

F. RESOLUTION NO. 01-77 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH TRITON PCS PROPERTY COMPANY FOR A CONCEALED WIRELESS COMMUNICATION FACILITY AT 300 MERRIMON AVENUE

Summary: The consideration of a Resolution authorizing the City Manager to execute a License Agreement with Triton PCS Property Company, LLC (Triton) for a concealed wireless communication facility at 300 Merrimon Avenue.

The building at 300 Merrimon Avenue is the historic Fire Station #4 and is currently known as the Harley Shuford Arson Task Force Building. The property is listed in the National Register of Historic Places and is one of the oldest fire training towers in the United States. The training tower is in need of structural reinforcement and rehabilitation.

In conjunction with the proposed License Agreement Triton will carry out the rehabilitation of the training tower in accordance with plans approved by City staff and the State Historic Preservation Office. The cost of the rehabilitation, estimated at *$60,000*, will be paid by Triton. Triton will install a 15' flag pole on top of the training tower which will house their concealed wireless communication facility along with a 9' x 13' equipment shed on the ground at the rear of the building. The term of the License Agreement will be 5 years with one period 4.5 year renewal period. Triton will pay a License Fee of $14,400 the first year with a 4% annual increase each year thereafter.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 366

G. RESOLUTION NO. 01-78 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR A VACANT LOT AT 125 IRIS DRIVE

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for a vacant lot at 125 Iris Drive.

A bid from Brian K. Perry, in the amount of $12,200, has been received for the purchase of a vacant lot at 125 Iris Drive. The bid is not less than the tax value of $12,200.

The property is a single family residential RS 8 zoned lot on Iris Drive comprising approximately 0.28 acre of land. The property has a rectangular shape and is fairly level elevated about 3' - 4' above street level. It has approximately 100 front feet on Iris Drive. There is no current or contemplated use for the property by the City. Mr. Perry plans to build a single family residence on the site for his own home.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 367

H. RESOLUTION NO. 01-79 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR A PORTION OF 36 GROVE STREET

Summary: The consideration of a resolution directing the City Clerk to advertise an offer to purchase for upset bids for a portion of 36 Grove Street.

36 Grove Street is located on the east side of Grove Street in downtown Asheville and zoned Central Business District. The 1.05 acres lot is improved with a building currently being used as the Senior Opportunity Center and a parking lot. The bid from BOC Enterprises, in the amount of $111,000, is for the parking lot portion of the property which comprises 0.57 acre and includes the stipulation for the City to retain a non-exclusive parking easement on the property in order to continue to provide parking to the Senior Opportunity Center. The site proposed to be purchased with the parking easement encumbrance was appraised by Mark Morris at a fair market value of $111,000.

The proposal from BOC Enterprises is made in order to facilitate the expansion and renovation of the building at 48 Grove Street. The total project cost for 48 Grove Street is expected to exceed $3,000,000. The sale of the property will result in an increase to the tax base and improvement of the Grove Street area.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Finance Department and Parks and Recreation Department staff recommend adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 368

I. RESOLUTION NO. 01-80 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE N. C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR REGIONAL HAZARDOUS MATERIALS RESPONSE

Summary: The consideration of a resolution authorizing the City Manager to renew an agreement with the N. C. Dept. of Public Safety and Crime Control for provision of regional hazardous materials emergency response.

North Carolina is divided into six geographical regions for the purpose of hazardous material emergency response. The North Carolina Department of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response.

The region six area covers from Cleveland County west to the Tennessee Border. Twenty-two counties comprise the response region. The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

During the seven years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City council authorize the City Manager to renew the Regional Hazardous Materials Contract with the North Carolina Department of Public Safety and Crime Control for Region 6.

RESOLUTION BOOK NO. 26 – PAGE 369

J. RESOLUTION NO. 01-81 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ROCKWELL AUTOMATION DODGE FOR CONFINED SPACE RESCUE SERVICES

Summary: The consideration of a resolution authorizing the City Manager to renew a contract with Rockwell Automation Dodge to provide technical rescue - confined space rescue services to the Rockwell Facility.

Rockwell Automation Dodge, located at 70 Reems Creek Road, Weaverville, North Carolina, is a manufacturing facility whose operation necessitates entry of their staff into confined spaces. State and Federal OSHA requirements necessitate that the facility provide for the emergency rescue of persons who may become trapped within confined spaces at their facility.

The City of Asheville is authorized to provide these type services pursuant to North Carolina General Statute sec. 160A-293. The City Of Asheville is capable of providing certain standby and rescue response services in connection with the use and maintenance of these confined spaces.

In consideration of the services rendered and available, Rockwell Automation Dodge agrees to pay the City of Asheville $5,000.00 annually. Rockwell Automation Dodge provides funding that fully supports the operational costs of the services.

During the time that we have provided technical rescue services to Rockwell (since Fiscal Year 1999-2000), the City has not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Mission Statement.

City staff recommends City Council authorize the City Manager to renew the Technical Rescue – Confined Space Rescue agreement with Rockwell Automation Dodge.

RESOLUTION BOOK NO. 26 – PAGE 370

K. BUDGET AMENDMENT TO THE 35 FUND – WATER MAJOR CAPITAL IMPROVEMENTS FUND

This item was removed from the Consent Agenda due to a conflict of interest by Councilwoman Bellamy.

L. ORDINANCE NO. 2813 - BUDGET AMENDMENT TO THE 29 FUND – WATER BOND CAPITAL IMPROVEMENTS FUND

Summary: The consideration of a budget amendment (29 Fund - Water Bond Capital Improvements Fund) to reflect the transfer of $2 million in N. C. Dept. of Environment & Natural Resources Grant Funds from the 35 Fund (Water Major Capital Improvements Fund).

By Resolution 92-17 dated May 19, 1992, the Regional Water Authority (Authority) authorized and budgeted for various capital projects to be funded by City Water Bond Proceeds in the 29 Fund. By Resolution 82-25 dated October 5, 1982, the Authority authorized and budgeted for various capital projects to be funded by Investment Earnings, Contributions From Other Funds and Appropriated Fund Balance in the 35 Fund.

On August 15, 2000, the Authority approved an amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect funding from the $2 Million High Unit Cost Grant received from the State for Critical Needs Phase II. On December 19, 2000, the Authority approved a $1 million increase in the 29 Fund (Water Bond Capital Projects Fund) for Critical Needs Phase II to be funded with a portion of $13.3 million 2001 Revenue Bond Issue Both of these budget amendments were also approved by City Council. Staff is recommending transferring the grant funds of $2 million from the 35 Fund to the 29 Fund, so that the total funding for the Critical Needs Phase II projects in the amount of $3 million can be managed in one fund. Staff recommends increasing revenues for State Grant DEH-087 in the amount of $2 million and increasing the appropriations for Critical Needs Improvements from $1 million to $3 million.

The Regional Water Authority approved the amending Capital Project Ordinance 92-17 (29 Fund) at their May 22, 2001, meeting.

Staff recommends approval of a budget amendment to the 29 Fund to reflect the changes identified above.

ORDINANCE BOOK NO. 19 – PAGE 155

M. RESOLUTION AMENDING THE ASHEVILLE STANDARD SPECIFICATIONS & DETAILS MANUAL TO INCLUDE FIRE FLOW AND FIRE HYDRANT REQUIREMENTS FOR BUILDINGS

This item was removed from the Consent Agenda for further discussion.

N. RESOLUTION NO. 01-82 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A DONATION FROM THE SUSANNE MARCUS COLLINS FOUNDATION TO SUPPORT THE POLICE DEPARTMENT'S MOUNTED PATROL

Summary: The consideration of a resolution authorizing the City Manager to accept on behalf of the City a donation from The Susanne Marcus Collins Foundation, Inc , and to adopt a budget ordinance amendment in the amount of $7,500 to add the donation to the police operating budget.

The Susanne Marcus Collins Foundation, Inc., has donated $7,500 to support the Asheville Police Department's Mounted Patrol . The funds are intended to purchase one Bay American Quarter Horse, which will enable the Police Department provide better police services to the citizens of downtown Asheville.

City staff recommends City Council adopt a (1) resolution authorizing the City Manager to accept the donation; and (2) budget amendment, in the amount of $7,500, to appropriate funds in the police operating budget.

RESOLUTION BOOK NO. 26 – PAGE 371

O. ORDINANCE NO. 2814 - BUDGET AMENDMENT FROM THE SUSANNE MARCUS COLLINS FOUNDATION TO SUPPORT THE POLICE DEPARTMENT'S MOUNTED PATROL

RESOLUTION BOOK NO. 26 – PAGE 372

Q. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 BELE CHERE FESTIVAL ON JULY 27-28, 2001

This item was removed from the Consent Agenda for an individual vote.

R. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 GOOMBAY FESTIVAL ON AUGUST 24-26, 2001

This item was removed from the Consent Agenda for an individual vote.

S. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 5TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 15, 2001

This item was removed from the Consent Agenda for an individual vote.

T. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 GREEK FESTIVAL ON SEPTEMBER 28-30, 2001

This item was removed from the Consent Agenda for an individual vote.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

MOTION SETTING A PUBLIC HEARING ON JUNE 26, 2001, TO CONSIDER AMENDING A PREVIOUSLY GRANTED CONDITIONAL USE PERMIT FOR THE CLINGMAN AVENUE CONDOMINIUMS

Councilman Hay moved to excuse Councilwoman Bellamy from voting in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Councilman Worley moved to set a public hearing on June 26, 2001, to consider amending a previously granted conditional use permit for the Clingman Avenue Condominiums. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE NO. 2815 - BUDGET AMENDMENT TO THE 35 FUND – WATER MAJOR CAPITAL IMPROVEMENTS FUND

Councilman Hay moved to excuse Councilwoman Bellamy from voting in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: This is the consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect the transfer of grant funding for Critical Needs Phase II to the 29 Fund (Water Bond Capital Improvements Fund), to decrease future funding for N. C. Dept. of Transportation (NCDOT) projects that are being funded in the 29 Fund, and to reflect a transfer to capital from the Fiscal Year 2001-02 Water Fund Budget.

By Resolution 82-25 dated October 5, 1982, the Authority authorized and budgeted for various capital projects to be funded by Investment Earnings, Contributions From Other Funds, and Appropriated Fund Balance in the 35 Fund. By Resolution 92-17 dated May 19, 1992, the Authority authorized and budgeted for various capital projects to be funded by City Water Bond Proceeds in the 29 Fund.

Transfer Grant Funding For Critical Needs Phase II - On August 15, 2000, the Authority approved an amendment to Capital Project Ordinance 82-25 (35 Fund – Water Major Capital Improvements Fund) to reflect funding from the $2 Million High Unit Cost Grant received from the State for Critical Needs Phase II. On December 19, 2000, the Authority also approved a $1 million increase in the 29 Fund (Water Bond Capital Projects Fund) for Critical Needs Phase II to be funded with a portion of $13.3 million 2001 Revenue Bond Issue. The Asheville City Council also approved both of these amendments.

Staff is recommending transferring the grant funds of $2 million from the 35 Fund to the 29 Fund, so that the total funding for the Critical Needs Phase II projects in the amount of $3 million can be managed in one fund. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

Reduction of Future Funding for NCDOT Projects - Six of the eight future NCDOT projects which were to be funded with Future Contributions from Other Funds, are being funded in the 29 Fund with a portion of the $13.3 million 2001 Revenue Bond Issue. These projects total $2,805,299 and include the Biltmore Viaduct, I-40 at US 25A, NC 151 Phase I, US 74 Phase I and II, and NC 191 Brevard Road. Staff is recommending reducing the 35 Fund by $2,805,299, since these projects will now be funded in the 29 Fund. The NC 151 Phase II and US 25-A will be funded with Future Contributions From Other Funds in the amount of $1,879,370. This future funding is expected to come from a Revenue Bond Issue in late 2002. This change to the 35 Fund will become effective upon the date of adoption of this budget amendment.

The Regional Water Authority approved the amending of Capital Project Ordinance 82-25 (35 Fund) at their May 22, 2001, meeting.

Staff recommends approval of the a budget amendment to the 35 Fund to reflect the changes identified above.

Councilman Worley moved for the adoption of Ordinance No. 2815. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 159

RESOLUTION NO. 01-84 - RESOLUTION AMENDING THE ASHEVILLE STANDARD SPECIFICATIONS & DETAILS MANUAL TO INCLUDE FIRE FLOW AND FIRE HYDRANT REQUIREMENTS FOR BUILDINGS

Summary: The consideration of a resolution amending the Asheville Standard Specifications and Details Manual to include fire flow and fire hydrant requirements for buildings.

On May 15, 2001, Mayor Sitnick sent a letter to the State Fire Marshal's office, on behalf of City Council, requesting that they remove fire protection water supply requirements from the Asheville amendments to the North Carolina Building Code – Volume V – Fire Prevention. The letter also stated that the City planned to place fire protection water supply requirements in the Asheville Standards and Specifications Manual. The State Building Code Council will be holding its semi-annual meeting from June 11 through June 13, 2001. It is anticipated that they will act on this request at this meeting.

Staff will be requesting additional changes to the Asheville Standards and Specifications Manual in July of this year.

City staff recommends that City Council adopt the addition to the Asheville Standard Specifications and Details Manual to include fire flow and fire hydrant requirements for buildings.

Councilwoman Field said that the Table 10.1 regarding the minimum required fire flow and flow duration for buildings is different from that the committee and community group agreed upon. She felt it just may be a typographical error. She supported adoption of the resolution and asked that City staff review the Table for accuracy.

Councilwoman Field moved to adopt Resolution No. 01-84, subject to Table 10.1 being reviewed for accuracy. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 373

RESOLUTION NO. 01-85 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 BELE CHERE FESTIVAL ON JULY 27-28, 2001

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Bele Chere Festival on July 27-28, 2001.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the downtown area. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-85. This motion was seconded by Councilwoman Field and carried on a 5-2 vote, with Mayor Sitnick and Councilwoman Bellamy voting "no".

RESOLUTION BOOK NO. 26 – PAGE 374

RESOLUTION NO. 01-86 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 GOOMBAY FESTIVAL ON AUGUST 24-26, 2001

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Goombay Festival on August 24-26, 2001.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The 2001 Goombay Festival has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past. This event is co-sponsored by the Asheville Parks and Recreation Department.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-86. This motion was seconded by Councilwoman Field and carried on a 5-2 vote, with Mayor Sitnick and Councilwoman Bellamy voting "no".

RESOLUTION BOOK NO. 26 – PAGE 378

RESOLUTION NO. 01-87 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 5TH ANNUAL BREWGRASS FESTIVAL ON SEPTEMBER 15, 2001

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5th Annual Brewgrass Festival on September 15, 2001.

For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. The 5th Annual Brewgrass Festival has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-87. This motion was seconded by Councilwoman Field and carried on a 5-2 vote, with Mayor Sitnick and Councilwoman Bellamy voting "no".

RESOLUTION NO. 01-88 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2001 GREEK FESTIVAL ON SEPTEMBER 28-30, 2001

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2001 Greek Festival on September 28-30, 2001.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City County Plaza, September 28-30, 2001. The 2001 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of this request as stated in the resolution.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-88. This motion was seconded by Councilwoman Field and carried on a 5-2 vote, with Mayor Sitnick and Councilwoman Bellamy voting "no".

RESOLUTION BOOK NO. 26 – PAGE 383

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO THE FISCAL YEAR 2001-02 ANNUAL OPERATING BUDGET

Mayor Sitnick opened the public hearing at 5:25 p.m.

Budget Director Ben Durant said that the Fiscal 2001/2002 Annual Operating Budget and Capital Improvements Program was presented to City Council on May 10, 2001. On May 15, 2001, City Council held a worksession. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the public hearing was published on June 1 and June 8, 2001. Adoption of the budget ordinance is scheduled for June 26, 2000, at the City Council meeting.

The Fiscal Year 2001/2002 Annual Operating Budget is balanced with an ad valorem tax rate of $.56 per $100 of assessed value. All essential City services are maintained.

A copy of the budget is available for public inspection in the City Clerk's office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the ad valorem tax rate, which can not be changed once adopted.

Mr. Durant said that City Council has received their requested additional information on the Fiscal Year 2000-2001 current street project list by geographic region, Civic Center employee demographics, Criminal Justice Information System costs, Water Resources Fund Balance, water rate increase history, water customer statistics and explanation of Parks and Recreation fee increases.

It was the consensus of City Council to make consensus decisions regarding the outside agency funding requests and the fees and charges at the next worksession on June 19, 2001.

Mr. Adam Baylus questioned how certain can we be that we will be the City will get their reimbursement from the State and can we work the budget so we are planning now not to have those funds. In addition, he questioned the $100,000 for a feasibility study regarding the Asheville Riverside Project, which this particular funding was not addressed at the April 24, 2001, meeting when this project was endorsed by City Council.

City Manager Westbrook responded that he did not believe the City would get reimbursed the funds for the current year and administratively the budget has been reduced to account for that. The Governor has proposed that, in the upcoming budget, cities and counties get the reimbursements. In addition, there is a lot discussion about alternate funding sources for cities through other means of raising revenue. The N. C. League of Municipalities recommends that cities plan for those revenues, or the equivalent of those, in the budget. If we do not get those funds, then we do have contingency plans, and we would ask City Council to amend the budget at that time.

Mr. Mickey MaHaffey, representing Peacemakers, believed that given the crisis in our community with water and air that there needs to be serious consideration given to the budget. He asked City Council to consider the following: far more attention to water system needs; the 5% that goes to the city as payment in lieu of taxes and the 2.5% that goes to the County should stay in the Water Fund; continue to work on the needed relief from the non-betterment costs; more work on the water agreement; need to make the Regional Water Authority a "true" Water Authority; because we are falling short in the area of addressing air pollution, we need to examine our fleet of vehicles and buy smaller vehicles; Transit Authority is receiving less money but we need to make the bus system a top priority and expand the transit system; examine the way we do policing in Asheville – need more foot patrol and bicycle patrol; need to consider holding the public safety departments (Police and Fire) down as much as possible so money can be spent in other areas; need to look at how much we are investing in payroll and consider holding raises down this and next year; and keep in mind that Asheville is becoming an increasing tourist economy and the people that keep the tourist economy going are very low wage owners in a stagnant market and most none have health care coverage.

Ms. Catherine Shane was disappointed that air quality is not a top priority in the Fiscal Year 2001-02 budget. She noted that the transit system is severely lacking. She encouraged Asheville to not create more of a population on the French Broad River without addressing the fact that it is a very polluted river. She seems like we are encouraging tourists to come here to drive and shop and not to come for our natural beauty.

Ms. Susan O'Neil felt that the most secure workers in our economy are government employees who get regular raises.

Ms. Beth Trigg was concerned about the priorities reflected in the budget because she didn't feel they are the priorities of the community. She felt Council should address the huge gap reflected in the budget between the top management positions and the people at the bottom. More money should be spent on public transportation and accommodating pedestrians and bicycles within the community. She urged City Council to enclose the bus shelter before winter. She was also concerned about the gap between funding for Economic Development and funding for Community Development programs.

Ms. Susan Andrew asked Council to increase the traffic calming budget from $100,000 to $200,000. She asked City Council to re-consider funding the request from the Coalition of Asheville Neighborhoods. She asked the City make it a standard that we only give public funds to groups that work for the whole community, not just for their members like the Chamber of Commerce.

388

Mr. Jack Tate, Chairman of the Regional Water Authority of Asheville, Buncombe and Henderson, said that for the last ten years, the water rates have increased at an average of 3.175%.

Mr. Lewis Daniels, Chairman of the Budget Committee of the Regional Water Authority of Asheville, Buncombe and Henderson, hoped that the Water Authority has the opportunity to address any issues in terms of what the Water Authority is recommending (3.1% increase) vs. what the City staff is recommending (2.5% increase) for the budget.

City Manager Westbrook said that pursuant to City Council's instruction, they are still trying to arrange a meeting with Buncombe County representatives, Regional Water Authority representatives and City staff with regard to working on a compromise to the Water Authority's recommended increase vs. City staff's recommended increase in the Water Fund Budget.

At the Mayor's request, Mr. Durant reviewed the water rate increase history, a financial feasibility evaluation, the Fiscal Year 2001-02 recommended Water Budget comparison, budget reduction options, and estimated tipping fee costs. He said that the tipping fee budget can be adjusted, based on actual history, and accommodate all of the Water Resource Department's needs, including the capital replacement schedule, at a 2.5% rate increase.

Mr. Daniels responded to the information presented regarding the financial feasibility evaluation and the budget comparison on department wide expenses and attorney fees. He said if the difference can be achieved from the tipping fees in a legitimate manner, then he felt the Water Authority would be delighted to go with the City staff's recommendation of a 2.5% increase. He stressed, however, that it was important to maintain the capital replacement.

Upon inquiry of Mayor Sitnick, Mr. Daniels said that the attorneys for the Water Authority have not had a rate increase in several years, but their rate increase this year is substantial.

Mr. Tate said they are certainly willing to look at the tipping fees, but he wants to make it clear that the initial figure was a responsible figure. If they end up spending more than that, then he would be concerned where that money would come from. They have made a policy decision for the commitment to the 80 year replacement.

Mayor Sitnick suggested that a meeting be set up with the Water Authority, City Council and the City's Director of Public Works so the Authority can inform Council on where the water is being lost and our Director of Public Works can report on ways to reduce our waste by recycling, compaction, re-use, etc.

Ms. Laurel Eide explained why the Coalition of Asheville Neighborhood funding for a paid staff member should be granted by City Council.

Mayor Sitnick closed the public hearing at 7:00 p.m.

Mayor Sitnick said that City Council will be discussing the outside agency funding requests and fees and charges at their June 19, 2001, worksession and considering adoption of the Fiscal Year 2001-02 Annual Operating Budget on June 26, 2001.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2816 - ORDINANCE DENYING THE CONDITIONAL USE PERMIT FOR THE ANCILLARY USE (PARKING LOT) IN A RESIDENTIAL DISTRICT ON SHILOH ROAD

City Attorney Oast on May 22, 2001, following a public hearing, Council voted to deny the application for the conditional use permit on Shiloh Road, and directed staff to prepare an order with appropriate findings.

The order is in draft form and may be modified by Council prior to voting on it.

Once the order issuing the Conditional Use Permit is in satisfactory form, Council should vote to adopt it.

City Attorney Oast corrected the following typographical errors: (1) in Finding No. 3 in the classification should read CB II Community Business classification; (2) in Finding No. 4, the sentence should read "A recreation center is located to the east on Shiloh Road;" and (3) in Finding No. 6, the sentence should read "If developed as proposed … landscaping would meet or exceed the requirements of the City Code."

Mayor Sitnick said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2816, with the changes outlined above by City Attorney Oast. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 161

At 7:05 p.m., Mayor Sitnick announced a short break.

B. ORDINANCE NO. 2817 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE LOWES AREA

Mayor Sitnick said that the public hearing on this matter was held on May 22, 2001.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Lowes area.

On March 13, 2001, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Lowes, Upper Sondley, Best Inns, Old Dominion Freight and the Arden area. The Annexation Services Plan for all of these areas was approved on March 27, 2001, and a public information meeting was held on May 3, 2001. Public hearings on each of annexations were held by City Council on May 22, 2001. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2002.

Staff recommends adoption of annexation ordinance for the Lowes area, with an effective date of June 30, 2002.

Mayor Sitnick said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Worley moved for the adoption of Ordinance No. 2817. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 165

C. ORDINANCE NO. 2818 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE UPPER SONDLEY AREA

Mayor Sitnick said that the public hearing on this matter was held on May 22, 2001.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Upper Sondley area.

On March 13, 2001, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Lowes, Upper Sondley, Best Inns, Old Dominion Freight and the Arden area. The Annexation Services Plan for all of these areas was approved on March 27, 2001, and a public information meeting was held on May 3, 2001. Public hearings on each of annexations were held by City Council on May 22, 2001. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Benson said that a metes and bounds description and a map are attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2002.

Staff recommends adoption of annexation ordinance for the Upper Sondley area, with an effective date of June 30, 2002.

Mayor Sitnick said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Field moved for the adoption of Ordinance No. 2818. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 169

D. ORDINANCE NO. 2819 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE BEST INNS LOCATED ON TUNNEL ROAD

Mayor Sitnick said that the public hearing on this matter was held on May 22, 2001.

Urban Planner Paul Benson said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Best Inns on Tunnel Road.

On March 13, 2001, City Council adopted Resolutions of Intent beginning the annexation process for the following five areas: Lowes, Upper Sondley, Best Inns, Old Dominion Freight and the Arden area. The Annexation Services Plan for all of these areas was approved on March 27, 2001, and a public information meeting was held on May 3, 2001. Staff recommends adoption of annexation ordinance for the Arden area, with an effective date of June 30, 2002.

Mayor Sitnick said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Worley moved for the adoption of Ordinance No. 2821. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 181

V. NEW BUSINESS:

A. CONTRACT WITH THE NATIONAL BASKETBALL DEVELOPMENT LEAGUE

Councilman Hay said that the City is scheduled to get the final report regarding the Civic Center Architectural Study from Heery International on Tuesday, June 26, 2001. City Council is scheduled for the presentation at 3:00 p.m. on Tuesday, June 26, 2001, in the Council Chamber in the City Hall Building.

City Manager Westbrook said that staff, with Councilmen Hay and Worley, has been working with the National Basketball Development League (NBDL) on the possibility of bringing a professional basketball team to the City. After this presentation, staff will recommend City Council hold a public hearing on this issue on Tuesday, June 19, 2001, beginning at 5:00 p.m. in the Council Chamber in the City Hall Building.

City Attorney Oast said the potential agreement has some elements of a lease and some elements involve economic development. If the lease is longer than one year but less than 10 years, there must be 10 days notice of Council's intent to authorize the lease. For most types of economic development, there is a 10 day notice of Council's intent to authorize the agreement and a public hearing must be held. Because of some timing situations, City staff is giving the presentation today and asking for the public hearing and final action at the June 19, 2001, worksession. These items have been advertised for action on June 19. After this presentation, City staff will ask Council on whether or not to proceed with the public hearing and consideration of the lease and economic development license agreement.

Finance Director Bill Schaefer explained in detail the financial and other ancillary financial benefits of the NBDL. He used the representative attendance of 2,500 to outline the revenues in the first year of $243,804.00 and the expenses in the first year of $209,403.50, showing a gain of $34,400.50. He then outlined the estimated gain in year two of $521.00 and in year three $4,249.00. After the initial third year period, in years 4-10 there is no longer any provision for an attendance bonus, the capital expenses have been amortized, and the entertainment fee is no longer applicable. Therefore, in year 4, the anticipated gain is $141,423.00 and that growing through the out years to $167,008.81 in the 10th year. He then reviewed in detail the staffing projections for the NBDL. Next Mr. Schaefer reviewed the ice to basketball change-over and the ice to home show change-over removal or set-up. He then reviewed just the NBDL gain/loss based on three year's attendance.

Upon inquiry of Councilman Peterson, Mr. Schaefer explained the figures with both hockey and basketball in the Civic Center. If hockey remains, using an attendance figure of 1,795, there will be additional change-over costs of approximately $80,000, an additional Assistant Director in the amount of $45,000, and additional maintenance labor in the amount of $20,000. In the first year the City loses approximately $58,000. In years 2 and 3, the City loses approximately $95,000, and the subsequent seven year is a loss of approximately $9-13,000 per year.

Civic Center Director David Pisha addressed the scheduling as it relates to both hockey and basketball. They have gone to considerable lengths to make sure that each team has been treated as fairly as possible. He also talked about public skating and youth hockey scheduling.

City Manager Westbrook summarized the benefits: long-term financial gain (after 1 year); if hockey leaves the Civic Center, a major tenant like NBDL would be less expensive to operate and less disruptive to trade shows; with the NBDL, there is potential to bring SFX back in the future, Southern Conference and UNC-Asheville; greater potential for renovation of facility; greater potential for naming rights, luxury boxes, personal seat licenses, etc., which will generate additional future income for the Civic Center; NBDL represents a stable income ($5,000 rent/game); financial and marketing strength of NBA; and ancillary economic and other benefits. He also outlined the following issues and concerns: short-term financial loss (1 year – cost of minor renovations); tremendous arena floor turnover in order to provide small, separate segments of time as needed to schedule both hockey and basketball in the same facility; minor impact on public skating and youth hockey; one additional staff to be added which would not be required by either sport separately; there are fewer dark days, therefore less time for other attractions at the Civic Center during the hockey and NBDL seasons such as concerts, wrestling, etc.; and unilateral right to renew after three years for an additional seven years.

At the request of Councilman Peterson, Mr. Pisha said he would develop an additional scheduling calendar of only NBDL (without hockey) showing the days that would be available for public skating and youth hockey. He would also provide figures regarding changeovers with regard to that.

Mr. Rob Levine, Senior Vice-President, New League Development with the National Basketball Association (NBA), said the NBDL is 100% owned by the NBA. He gave some brief statistics of the NBDL and the players. He explained why they chose Asheville. He then addressed the misconceptions with regard to the SFX and the NBDL negatively impacting hockey. He said the City has used very conservative assumptions but they believe the numbers are higher. He said they will be investing over $1 Million locally and a good percentage of that will be on local advertising and promotion. He said they share with the Asheville Smoke the commitment to growing a vital sports marketplace.

Councilman Hay moved to set a public hearing on the proposed agreement with the National Basketball Development League for 5:00 p.m. on Tuesday, June 19, 2001, in the

Council Chamber located on the 2nd Floor in the City Hall Building. This motion was seconded by Councilman Worley and carried unanimously.

B. RESOLUTION NO. 01-89 - RESOLUTION AUTHORIZING ESTABLISHMENT OF A CLEAN AIR COMMUNITY TRUST

City Attorney Oast said that this is the consideration of a resolution authorizing establishment of a clean air community trust.

Last year, the City and Buncombe County agreed to establish a clean air community trust for the purpose of seeking and administering grants and undertaking other programs in furtherance of local air quality.

Since then, the City has been working with the County's attorneys and members of the air quality agency to develop a trust agreement and by-laws for this purpose. Our progress has been affected by the pendency of a lawsuit regarding the distribution of funds collected by the air quality agency. However, the trust documents specify that the funding for the trust is to be from money from private sources or that is not restricted by law.

To this end, the Buncombe County Medical Society and Alliance Endowment has made a significant contribution to the Trust for purposes of the initial funding for the trust, and other members of the community have expressed their desire to help get it started.

Currently under review are the by-laws for the trust.

The Buncombe County Commissioners are planning to act at their meeting today to authorize establishment of the trust, and may appoint the County's three initial trustees. Following adoption of the resolution authorizing the trust and approving the by-laws, Council should act to appoint its initial two trustees.

If Council wishes to establish the Clean Air Community Trust, adoption of the resolution is recommended.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 01-89. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 385

C. RESOLUTION NO. 01-90 - RESOLUTION AUTHORIZING SALE, EXCHANGE, AND JOINT USE OF GOVERNMENTAL PROPERTY NEAR CITY BUILDING

City Manager Jim Westbrook said that pursuant to City Council's direction, he has completed negotiations with the County for the sale and/or trade of City property for use as a jail detention center.

Based on direction for City Council, he has been negotiating with Buncombe County for the use of City-owned property directly behind the current jail site for a proposed jail detention center. Since there were other properties in the area that the City desired to acquire from the

County, he proposed a combination sale and trade of properties which would allow the County to purchase the property the City owns and the City to acquire two properties that we need from the County.

The details of the negotiations are summarized below.

1. The City will sell to the County property located behind your current jail for two pieces of property which the County owns as follows:

The appraised price of the City-owned parking lot (Marjorie, Davidson, Valley Streets) PIN 9649.19-50-4467	$750,000
Less property owned by Buncombe County (Marjorie and Eagle Streets) PIN 9649.19-50-2118	-364,000
Less property owned by Buncombe County (Valley, Marjorie & Davidson Sts.) PIN Nos. 9649.19-50-4350, 5310, 5325, 5326	-243,500
Cash Due City	$142,500

2. Since both the County and the City are using the property described in Item 1 above as parking lots, the agreement will include cross-easements to allow for the City and County to continue to park as we do currently. When either the City or the County starts a construction project on the lots, then the parking for City and County employees will revert to align with the ownership of the property.

3. The current lease between the City and the County for the property located between Marjorie and Eagle Streets (PIN 9649.19-50-2118), which the City will purchase with this new agreement, will terminate with no further obligation by either party.

4. The property which the City will sell to the County (PIN 9649.19-50-4467) located behind the current jail will be used exclusively for jail and/or jail related facilities during a 12 year period beginning with the date the property is sold to the County.

5. The property which the City will sell to the County (PIN 9649.19-50-4467) located behind the current jail will be used for jail and/or jail related facilities, governmental offices, or governmental uses after the initial 12 year period.

6. For a period of 12 years from the date of conveyance, the height of any building constructed on the lot behind the current jail (PIN 9649.19-50-4467) may be no higher than the top of the balustrade on the second floor of the City Building. This restriction is in addition to the City's zoning regulations. After the expiration of the 12 year period, the City's zoning regulations would continue to apply.

7. The City and the County will continue to work together for a Master Plan of the governmental complex area located in the downtown so that in the future such expansions by the City and/or County can be better planned with regard to traffic, supporting and ancillary facilities.

Of particular note is the agreement between the City and the County to Master Plan the governmental complex area located in downtown so that future governmental building expansions can be preplanned to the maximum extent possible. It also allows the City to acquire two pieces of County property that may be needed in the future for additional parking, and to help make up the loss of parking spaces when construction begins on the property sold to the County.

City staff recommends Council approve the sale of the City-owned parking lot (PIN 9649.19-50-4467) for $750,000 to Buncombe County; the purchase of Buncombe County property (PIN Nos. 9649.19-50-4467; 9649.19-50-4350; 9649.19-50-5310; 9649.19-50-5325, and 9649.19-50-5326) by the City; to further instruct the City Manager to allow for the cross-easements as described in Number 2 above through written agreement with the County; to provide for the termination of any agreements or understanding with regard to the property owned by the County between Marjorie and Eagle Streets (PIN 9649.19-50-2118) as described in Number 3 above; and such language as would be necessary to cause the City and the County to work toward a Master Plan for the governmental complex as described in Number 7 above. The City Attorney is instructed to prepare the deeds in such a manner that the property sold to the County (PIN 9649.19-50-4467) is to be used exclusively for jail and/or jail related facilities for the first twelve (12) years as described in Number 4 above, and the use of the property by the County for jail and/or jail related facilities, governmental offices, or governmental uses after the initial twelve (12) year period as described in Number 5 above, and the height of the initial building for the first twelve (12) years of the agreement as described in Number 6 above.

Councilwoman Bellamy hoped that Buncombe County will involve Pastor Grant from the Mt. Zion Missionary Baptist Church in their discussions of design and that the City involves the Church when discussions begin about the parking deck.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-90. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 25 – PAGE 386

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of May 18-24, 2001: Yvette Lee Adams (Police), Beverly Hinton (Parks & Recreation), Dennis Horton (Water), Oswaldo Ordonez (Street), BellSouth (Water), Hampton Inn (Water) and Sarah Burdine (Parks & Recreation).

The following claims were received during the period of May 25-June 7, 2001: James W. Dally (Parks & Recreation), Ferguson Enterprises (Finance), Feed-Seed Supply (Fire), Michelle Swanson (Water) and Kay Crozer (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English felt what when the NBDL comes to Asheville, they will start making demands. He felt they the City should not enter into an agreement with the NBDL.

B. COMMENTS BY MICKEY MAHAFFEY

Mr. Mickey MaHaffey asked some questions regarding transit services.

C. COMMENTS BY PETER DAWES

Mr. Peter Dawes thanked City Council for their courtesy to the media. He said that a lot of people say they are concerned about air quality, but people rarely attend the WNC Regional Air Quality Agency meetings.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 10:10 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – June 19, 2001 - 3:00 p.m.

Worksession

Present:	Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Setting Public Hearing to Demolish 191 Sulphur Springs Road

Summary: The consideration of a resolution setting a public hearing on July 10, 2001, for the adoption of an ordinance directing that the dwelling located at 191 Sulphur Springs Road be demolished and all debris removed from the property.

Budget Amendment regarding Pritchard Park

Summary: The consideration of a budget amendment, in the amount of $4,000, for donations from the French Broad River Garden Club and the Asheville Downtown Association for Pritchard Park.

The City of Asheville staff met with several members of the French Broad River Garden Club about their interest in supporting the renovation of Pritchard Park. The Garden Club is able to make a donation in the amount of $3,000 for the beautification of the park space.

At a later date, the City of Asheville will place a plaque paid for by the French Broad River Garden Club in an area of the park to acknowledge their contribution.

City staff was also approached by the Asheville Downtown Association who expressed interest in the project and committed $1,000 towards the renovation.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for the Pritchard Park.

Contract Agreements with Volunteer Fire Departments

Summary: The consideration of a resolution authorizing the City Manager to enter into agreements with the Haw Creek Volunteer Fire Department, the Riceville Volunteer Fire Department, the West Buncombe Volunteer Fire Department and the Enka-Candler Volunteer Fire Departments for fire protection services for annexed areas.

With the annexations effective July 1, 2001, for the City of Asheville, there are four areas that the City is required to contract with volunteer fire departments for service under North Carolina General Statutes. The same standard fire protection contract applies to all four of the affected volunteer fire departments.

The four areas that are effective July 1, 2001, and their associated volunteer fire departments are as follows:

01A	Piney Mountain Road area	Haw Creek VFD
01B	Riceville Road area	Riceville VFD
01E	New Leicester Highway area	West Buncombe VFD
01F	Wedgefield Drive area	Enka-Candler VFD

Contracts have been provided to and accepted by the above listed volunteer fire departments. The contracts are consistent with requirements set forth in N.C. Gen. Stat. sec. 160A-49.1. The Statute require a five-year contractual period. The contract documents have been written to allow for year-to-year continuance after the mandatory period, if both parties are agreeable to continue the contract.

City staff recommends City Council authorize the City Manager to contract with the necessary agencies for fire protection services as required by N. C. Gen. Statutes for annexed areas.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PACK SQUARE RENAISSANCE UPDATE

Ms. Carol King, Chair of the Board of Trustees for the Pack Square Conservancy Inc., updated City Council on the Pack Square Renaissance Project.

Of behalf of City Council, Mayor Sitnick thanked Ms. King and the efforts of the entire Board on this very important project.

HISTORIC DESIGNATION OF SILVERMAN COMPANY SIGN

Historic Resources Director Maggie O'Connor said that this is the consideration of a resolution designating the Silverman Company steel rooftop sign at 48 Swannanoa River Road historically significant and/or a landmark sign.

The owner of the Silverman Company steel rooftop sign located at 48 Swannanoa Road requests landmark sign designation of the 6 feet x 64 feet (384 square feet) steel roof top Silverman Company sign. The sign erected in 1924 has been maintained over the years. Sec. 7-13-2(c) of the Unified Development Ordinance (UDO) "Signs Exempt from Regulation," provides in paragraph 12 that landmark or historically significant signs are exempt from regulation, and that signs may be designated historically significant and/or landmark signs by the city council provided the signs satisfy one or more of the following criteria:

A. The sign is significant to the history of the City of Asheville, including but not limited to, the character of the city as a tourist attraction or cultural center.

B. The sign is unique, notably aesthetic or creative so as to make a significant contribution as a work of art.

C. The sign merits recognition as an important example of technology, craftsmanship, materials or design of the period in which it was constructed and may no longer be economically feasible to produce or manufacture the sign today.

Pursuant to UDO sec. 7-3-4(a)(2), the Historic Resources Commission (HRC) may recommend to the City Council that certain objects be designated as historic or landmark. Though not specifically mentioned, this function includes signs. At its February 9, 2000, meeting, the Historic Resources Commission of Asheville and Buncombe County (HRC) reviewed a request for landmark sign designation for the Silverman Company sign. By a unanimous vote the motion to recommend that designation passed. The HRC found the Silverman Company steel rooftop sign meets Criteria A; Criteria B because it denotes a local business; and Criteria C because a steel company made the sign out of steel for their business and, it is the only one of its kind that the Silverman Company designed and built.

This is an unusual case in that the Silverman sign, despite its historic characteristics, appears to be a relatively standard roof-top sign. Staff recognizes that approval of this request may result in similar requests for similar type signs that do not have the same level of historicity as the Silverman sign. By recommending approval, the HRC has taken a broad view with regard to the intent of the ordinance. If Council prefers that the ordinance be more tightly construed so that signs like the Silverman sign and Dreamland Flea Market sign are not considered eligible for such designation, staff would appreciate a discussion on the intent of the ordinance in order to provide appropriate direction to HRC and to modify our code requirements and guidelines as needed.

The HRC recommends approval of the request to designate the Silverman Company steel rooftop sign at 48 Swannanoa River Road historically significant and/or a landmark sign. If Council wishes to designate the Silverman Company steel rooftop sign as a landmark or historic sign, adoption of a resolution is required. If Council wishes to deny the request, a motion to that effect may be made, but is not required, or Council may vote down the resolution. If council denies the request, staff asks that you assist us in clarifying the intent of the ordinance that allows for the designation of historically significant/landmark signs.

At the request of Council members, Ms. O'Connor said that she would provide additional information to Council regarding if the company would still be allowed a free-standing sign, what size signage would be allowed if a free-standing sign were allowed, and how old the building is that the sign is located on.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

MOTION SETTING A PUBLIC HEARING TO CONSIDER AN APPLICATION TO HUD FOR A CDBG SECTION 108 GUARANTEED LOAN AND ECONOMIC DEVELOPMENT INITIATIVE GRANT FOR THE REHABILITATION OF BUILDINGS IN SOUTH PACK SQUARE

Ms. Charlotte Caplan, Community Development Director, said that a motion is necessary in order to set a public hearing on June 26, 2001, to consider an application to the U.S. Dept. of Housing and Urban Development (HUD) for a Community Development Block Grant (CDBG) Section 108 Guaranteed Loan of $800,000 and an Economic Development Initiative (EDI) Grant of $340,000 for the rehabilitation of buildings in South Pack Square.

Councilman Worley moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

At the request of Councilwoman Bellamy, Councilman Worley moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

Councilwoman Field moved to set a public hearing for June 26, 2001, to consider an application to HUD for a CDBG Section 108 Guaranteed Loan and Economic Development Initiative Grant for the rehabilitation of buildings in South Pack Square. This motion was seconded by Councilman Worley and carried unanimously.

DISCUSSION OF OUTSIDE AGENCIES AND FEES AND CHARGES

It was the consensus of City Council to discuss each outside agency funding request separately as follows:

Asheville-Buncombe Community Relations Council

Approved in 2000-01 - $63,000
Requested in 2001-02 - $63,000
Committee Recommended - $40,000. (After May 15, 2001, City Council Worksession, Committee Recommended - $63,000)

After discussion, it was the consensus of City Council to appropriate $63,000 to the Asheville-Buncombe Community Relations Council.

Asheville Area Arts Council

Approved in 2000-01 - $30,000
Requested in 2001-02 - $50,000
Committee Recommended - $30,000

After discussion, it was the consensus of City Council to appropriate $30,000 to the Asheville Area Arts Council.

Asheville-Buncombe VISION Inc.

Approved in 2000-01 - $15,000
Requested in 2001-02 - $15,000
Committee Recommended - $15,000

After discussion, it was the consensus of City Council to appropriate $15,000 to the Asheville Buncombe VISION Inc.

Visitor's Center
(Part of a 5-year Capital Campaign)

Approved in 2000-01 - $100,000
Requested in 2001-02 - $100,000
Committee Recommended - $100,000

After discussion, it was the consensus of City Council to appropriate $100,000 to the Visitor's Center. Mayor Sitnick and Councilman Peterson recommended no funding.

Buncombe County Economic Development Commission
(Annual payment for Board participation)

Approved in 2000-01 - $50,000
Requested in 2001-02 - $50,000
Committee Recommended - $50,000

After discussion, it was the consensus of City Council to appropriate $50,000 to the Economic Development Commission.

Asheville Sister Cities Inc.

Approved in 2000-01 - $2,000
Requested in 2001-02 - $2,000
Committee Recommended - $2,000

After discussion, it was the consensus of City Council to appropriate $2,000 to the Asheville Sister Cities Inc.

High County Art & Craft Guild

Requested in 2000-01 – Zero
Requested in 2002-02 - $10,000
Committee Recommended – Zero

After discussion, it was the consensus of City Council to not appropriate any funds to the High Country Art & Craft Guild. Mayor Sitnick and Councilwoman Field would like to find some funding.

In order to show support the High Country Art & Craft Guild, it was the consensus of City Council to review the possibility of either writing off or reducing what Guild owes to the Civic Center at a later date.

Life on Life's Terms Inc.

Approved in 2000-01 - $5,000
Requested in 2001-02 - $18,000
Committee Recommended - $5,000

After discussion about Life on Life's Terms Inc. being fiscally responsible and financially sound, it was the consensus of City Council to appropriate $5,000 to Life on Life's Terms Inc. with the stipulation that the City not release payment until Life on Life's Terms Inc. demonstrates their on-going financial stability.

Mountain Center for Substance Abuse Prevention

Approved in 2000-01 - $30,000
Requested in 2001-02 - $30,000
Committee Recommended - $20,000

After discussion, it was the consensus of City Council to appropriate $20,000 to the Mountain Center for Substance Abuse Prevention.

One Youth At A Time, Inc.

Approved in 2000-01 - $10,000
Requested in 2001-02 - $20,000
Committee Recommended - $10,000

After discussion, it was the consensus of City Council to appropriate $10,000 to One Youth At A Time Inc.

Project STEAM

Approved in 2000-01 - $5,000
Requested in 2001-02 - $5,000
Committee Recommended - $5,000

After discussion, it was the consensus of City Council to appropriate $5,000 to Project STEAM.

RiverLink Inc.

Approved in 2000-01 - $18,000
Requested in 2001-02 - $25,000
Committee Recommended - $18,000

After discussion, it was the consensus of City Council to appropriate $18,000 to RiverLink Inc.

The Health Adventure

Approved in 2000-01 - $5,000
Requested in 2001-02 - $20,000
Committee Recommended - $5,000

After discussion, it was the consensus of City Council to appropriate $5,000 to The Health Adventure.

Coalition of Asheville Neighborhoods

Requested in 2000-01 – Zero
Requested in 2001-02 - $30,000
Committee Recommended – Zero

After discussion, it was the consensus of City Council to not appropriate any funds to the Coalition of Asheville Neighborhoods (CAN). Councilman Peterson recommended funding CAN. Mayor Sitnick thought that in the future if they receive other funds, that the City should consider some funding for them.

Neighborhood Housing Services

Requested in 2000-01 – Zero
Requested in 2001-02 - $15,000
Committee Recommended – Zero

After discussion, it was the consensus of City Council to not appropriate any funds to Neighborhood Housing Services.

Kids Voting

Requested in 2000-01 – Zero
Requested in 2001-02 - $2,500
Committee Recommended – Zero (At the May 15, 2001, City Council worksession, the Committee Recommended $1,000)

After discussion, it was the consensus of City Council to appropriate $1,000 to Kids Voting.

YWCA

Requested in 2000-01 – $15,000
Requested in 2001-02 - $18,500
Committee Recommended – $10,000

After discussion, it was the consensus of City Council to appropriate $10,000 to the YWCA.

Fees and charges were discussed, but most particularly the following issues: (1) making sure that an application fee is not doubled if construction work is permitted prior to receiving the issuance of a permit, (2) adult softball fees, (3) summer playground fees, (4) Civic Center ice change-over fees, (5) skateboard park fees, and (6) fee in lieu of constructing sidewalks. City Council then gave direction to Budget Director Ben Durant on the fees and charges.

It was the consensus of City Council to charge certain ice change-over fees with exemptions for events that have been held at the Civic Center prior to the inception of hockey. New events (since the inception of hockey) will be charged certain ice change-over fees if their gross revenues are less than $35,000. Councilman Peterson did not agree.

NEXT COMMUNITY MEETING LOCATION

It was the consensus of City Council to held their next community meeting on Tuesday, July 31, 2001, beginning at 7:00 p.m. at the West Asheville Community Center located at 970 Haywood Road, Asheville, N.C.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CLOSED SESSION

At 4:43 p.m., Councilman Hay moved to go into closed session in Room 209 of the City Hall Building for the following reasons: (1) to prevent disclosure of information that is privileged or confidential pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that renders the information to be discussed confidential is N. C. Gen. Stat. sec. 160A-168, the Personnel Privacy Act – G. S. 143-381.11 (a) (1); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Betty Donoho, County of Buncombe, Western North Carolina Air Pollution Control Agency and City of Asheville – G. S. 143-381.11 (a) (3). This motion was seconded by Councilwoman Field and carried unanimously.

At 4:58 p.m., Vice-Mayor Cloninger moved to come out of closed session and continue with the City Council public hearing in the Council Chamber, located on the 2nd Floor in the City Hall Building. This motion was seconded by Councilman Worley and carried unanimously.

PUBLIC HEARING TO CONSIDER AUTHORIZING ARENA LICENSE AGREEMENT AND LEASE WITH THE NATIONAL BASKETBALL DEVELOPMENT LEAGUE

RESOLUTION NO. 01-91 - RESOLUTION AUTHORIZING ARENA LICENSE AND LEASE WITH THE NATIONAL BASKETBALL DEVELOPMENT LEAGUE

Mayor Sitnick reminded City Council that Rule 9 of the Rules of Procedure for City Council provides that "The Mayor shall have the following powers: ... (d) to call a brief recess at any time." The Mayor asked that Council members who need to leave a Council meeting that is in progress so inform her by either passing her a note or by moving for a brief recess pursuant to Council Rule 19 (c). Pursuant to N. C. Gen. Stat. sec. 160A-75, a council member who has withdrawn from the council chamber without being excused by a majority vote is recorded as an affirmative vote on any matters that come before council during his or her unexcused absence from the chamber.

Mayor Sitnick opened the public hearing at 5:00 p.m.

City Clerk Burleson noted that the public hearing was legally advertised on Saturday, June 9, 2001.

The following individuals spoke in opposition of the City bringing the National Basketball Development League (NBDL) to the Asheville Civic Center for various reasons, some being, but are not limited to: impact of basketball and hockey may have a negative effect on the Civic Center; questioned the feasibility of accommodating both hockey and basketball because of the limitations of the building; schedule regarding hockey is still a concern with limited weekend date, practice availability and whether it's going to be operationally feasible and financially feasible to make ice available for the hockey team to practice; scaled back youth and adult hockey league schedules; figure skaters will have limited ice time available to them; City is willing to spend $170,000 on capital improvements to the Civic Center that will only benefit the NBDL and not all Civic Center users; the addition of basketball will have a negative impact on the Civic Center and will create a larger deficit for taxpayers; estimate of $2,500 per game is inflated; basketball in this country is on a downward swing, while ice hockey and other ice related sports is on an upward swing; potential 10-year contract has unilateral terms for cancellation; the cost/benefit analysis estimates utilizing single source data is extremely difficult to validate; it's unrealistic to anticipate that the Asheville Smoke will survive as a second primary tenant competing for a limited pool of discretionary sports entertainment dollars; concern with attendance projections; it is unreasonable to assume that, in the event the Civic Center is renovated, extensive systemic renovations required can be accomplished in an affordable fashion outside of the NBDL scheduled season; concern that a near term renovation/replacement of the Civic Center is not possible due to planning, financing, and community support issues; concern that the economic projections for the NBDL/Civic Center are not supported by the contract; concern of the Civic Center's ability to support this activity in the consistent and supportive manner the NBDL and Asheville Smoke deserve; the Smoke fan base will not support the NBDL in anyway; without a similar agreement at the same time for the Asheville Smoke, the Smoke could be at the mercy of the NBDL and the NBA; and there is no public support for basketball:

Mr. Dan Wilhelm, Asheville Smoke hockey team but representing himself
Mr. Tom Leslie
Ms. Gwen Lee
Dr. Carl Mumpower, Chairman of the Civic Center Commission (read a report dated June 19, 2001 and submitted a report dated June 11, 2001)
Mr. Phil Seymour
Mr. Rick Sweet
Ms. Christy Quinn, downtown business owner
Mr. O. Rice, employee of the hockey league
Mr. Dennis Justice, representing Save Our Smoke

When Councilman Hay asked if Dr. Mumpower's report is a formal recommendation from the entire Civic Center Commission, Dr. Mumpower stated that City Council did not ask the

Commission to make a formal vote on this contract. Their assumption has been that City Council was interested in anything the Commission could do to educate them and this is their good faith effort to do that. He said that all the Commission members received a copy of the final contract and was given an opportunity to offer comments to him. He is echoing their comments to Council now.

Discussion then surrounded whether City Council actually asked the Commission for their formal recommendation. City Council contends that the Commission was asked – Dr. Mumpower contends the Commission was not asked. Mayor Sitnick suggested the ordinance establishing the Civic Center Commission be amended so that for each issue that comes before the City Council regarding the Civic Center that City Council sends a formal written request to the Commission for their opinion and recommendation. Vice-Mayor Cloninger said that there may be ideas generated by staff that they would want to take to the Civic Center Commission first before they present it to City Council.

Mr. Dan Breneman, local business owner, spoke in support of bringing basketball to Asheville. He has seen what sports can do to a City and the influence of sports will do nothing but enhance the opportunities for hockey and other opportunities to bring people to Asheville. He hoped Council does everything they can to keep hockey and hopes Council finds a way to share the facility with other sports as well.

Mayor Sitnick closed the public hearing at 6:19 p.m.

Mayor Sitnick said that members of Council have been furnished with a copy of the resolution and it will not be read.

Councilman Hay moved for the adoption of Resolution No. 01-91, authorizing arena license agreement and lease with National Basketball Development League. This motion was seconded by Councilman Worley.

Councilman Worley emphasized that in all of Council's discussions they have emphasized that they wanted to keep the Smoke and be fair to the Smoke. It's clear the Smoke has a strong and loyal fan base and they have made their concerns known to Council. Council has tried to address those concerns as they have come to their attention. Council is also concerned about the figure skating and other recreational use of the ice and they have tried to make certain that will still be accommodated. There has been a lot of discussion about the financial impact and Council does not want to put a burden on the City taxpayers. The NBDL has projected attendance of 3,500 per game and Council is highly skeptical about that figure. Council has based their financial analysis on 2,500 per game and even looked at the feasibility if it is less than 2,500 per game. When you look at hockey and basketball operating in the Civic Center arena together and you look at the expense incurred in the change over from the ice to a basketball floor and back, when you look at the revenues that would be received based on current experience and projected attendance, when you look at the expenses the City will incur, including all of that extra labor for the ice, it is still a financial benefit to the City to do the NBDL deal. At an average attendance of 2,500 per game in the first year there is a gain of almost $56,000, in the second year and the third year that gain is reduced and then it gets up over $100,000 for the rest of the term. That is a combination of hockey and basketball combined. Hockey and basketball also contribute substantially to the parking enterprise fund and the figures used are based on actual experience. When he talks about a gain, he is talking about the combined effect of the Civic Center enterprise fund and the parking enterprise fund. Based on that, he feels this is a good deal for the City – it provides us an extra entertainment venue for those people who are not Smoke fans and do want to see basketball, and yet it protects the venue for those people who are Smoke fans. He said that even if the Civic Center is not renovated in three years and the NBDL leaves, this is still financially positive for the City.

Councilwoman Field said she has been looking for more activity at the Civic Center. She felt the more activity at the Civic Center, the better it is for downtown and the whole community and the opportunity to renovate the Civic Center is much higher.

Councilman Peterson said there has been a lot of financial projections but it's all speculative. He felt the City would lose money in first three years given all the expenses and potential losses. He said we don't know what's going to happen to the Civic Center and it's speculative that the City is going to be able to renovate it within two years. He felt we will be in pretty much the same position in two years and if basketball is here, they are likely to leave. With so many unknowns out there, the City should be fiscally cautious and this deal seems to be too risky. In the long run it may work out for the City, but he thinks we will not get substantial progress within the next two year on the Civic Center. He was also concerned about the negative impact on the hockey team. The NBA has been good about trying to be flexible to accommodate the hockey team, but he thinks it will have a negative impact. He was also concerned about the loss of ice time for public skating in addition to the lost revenue. He felt the City needs to be a little more fiscally cautious and we need to be further along on the efforts to fix the arena. This is just not the best timing since we really haven't developed public consensus or support for either renovations or building something new.

Councilman Hay said throughout this entire process, he has learned how much interest there is in public skating and figure skating. One beneficial outcome of this process is that City Council now realizes that Asheville does need a year round ice skating facility. He suggested Council revisit that part of the Parks Master Plan and see how that might be worked in. From the beginning of negotiations, the NBDL was told the City has two essential criteria: (1) we cannot negotiate any contract that will under any circumstances cost the City money; and (2) we cannot do anything that will run the Smoke out of town. On that basis they moved forward and the negotiations went well throughout because we had something to sell. A lot of what we've heard is the fear of the unknown. But what we need to do in any opportunity is to assess the risk, and very carefully make sure we think ahead to look at everything from every angle. But too many unknowns is not what keeps people from moving on and seizing a special opportunity. Eliminating the unknowns, assessing the risk, and then seizing the opportunity is what you do in a city that grows. He thinks the benefits that the NBDL will bring is something to remember. This will be a new entertainment event at the Civic Center, it will make money for the City, and there are several economic development benefits. He also thinks that the Smoke will benefit from it as well. He hoped that in the future the City would be able to provide the facility for the SFX Arena Ventures/NBDL basketball and 30 entertainment events by SFX.

Vice-Mayor Cloninger said that Councilmen Hay and Worley articulated his views on this issue but he did want to thank them for the countless hours they have worked on this issue.

Mayor Sitnick stated that we do need things in this area for our young people to do. People are now coming forward that agree that we need additional recreational opportunities for our young people and we are trying to find a way, with land and resources, to create that opportunity. She said it may start with an ice rink, but the proposal has been to look at the possibility of a multi-venue sports recreational family oriented complex, that has an ice rink, a roller rink, a bowling alley, a ballroom, a climbing wall, a tot land, an in-line outdoor track, and maybe some tennis courts and basketball courts. She has asked staff to look at what it involves, what it might cost, how it can be done, and has been talking to several people in the community. She hopes that we will be able to put some plan of that nature into the future for our parks and recreational budgets. She wouldn't feel very good about not allowing the NBDL to come to Asheville with this incredible revised contract and take a chance on our Civic Center and our community. She knows that we have a good thing in the Asheville Smoke and we have a lot of fans who love hockey. She is mostly concerned about the fact that Smoke's survival is based on what they are able to generate enthusiasm-wise in the community. She doesn't think the

Smoke's survival has anything to do with the NBDL if it joins the Civic Center to produce events there. She thinks the attendance numbers projected by the NBDL are unrealistic, but she feels that if we don't take a chance on this, then we will never know.

The motion made by Councilman Hay and seconded by Councilman Worley carried on a 6-1 vote, with Councilman Peterson voting "no".

Councilwoman Bellamy acknowledged that Asheville Smoke has stayed at the Civic Center when others have pulled out. Council did not discount the passion of Smoke fans during their deliberations. She felt that Asheville needs to take this chance because it's a different venue for people in our City. This is an opportunity for people to take part in something they haven't been able to in the past. She thinks it will work. We had to take a chance on hockey coming to Asheville and that has worked well. She has listened to both sides of the story and has taken into consideration Asheville Smoke. She said Council is doing what is in the best interest of the City of Asheville for all citizens. She felt this is a great opportunity for the NBDL to come to Asheville.

RESOLUTION BOOK NO. 26 – PAGE 389

CLOSED SESSION

At 6:56 p.m., Councilman Hay moved to continue their closed session discussions in Room 209 of the City Hall Building for the following reasons: (1) to prevent disclosure of information that is privileged or confidential pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that renders the information to be discussed confidential is N. C. Gen. Stat. sec. 160A-168, the Personnel Privacy Act – G. S. 143-381.11 (a) (1); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Betty Donoho, County of Buncombe, Western North Carolina Air Pollution Control Agency and City of Asheville – G. S. 143-381.11 (a) (3). This motion was seconded by Councilman Worley and carried unanimously.

At 8:10 p.m., Councilwoman Bellamy moved to come out of closed session This motion was seconded by Councilwoman Field and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 8:10 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – June 26, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF CITY OF ASHEVILLE EMPLOYEES IN PUBLIC SERVICE RECOGNITION PROGRAM

Mayor Sitnick read a proclamation recognizing several City of Asheville employees who participated in the Public Service Recognition Program. Employees recognized included Cathy Ball, Richard Bass, Jeff Trantham, Quentin Miller, Gladys McDaniel, John Kutscher, Keith Whittington, Gary Stamey, Tim Haynes, Mark Case, Joe Chennault, Harry Taylor and Tom Eggers. Mayor Sitnick noted that Gladys McDaniel, Jeff Trantham and Quentin Miller won awards for their respective category and Quentin Miller won the overall award for 2001.

II. CONSENT:

Vice-Mayor Cloninger asked to remove Consent Agenda "C" from the Consent Agenda, due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 12, 2001, AND THE WORKSESSION HELD ON JUNE 19, 2001

B. RESOLUTION NO. 01-92 - RESOLUTION AUTHORIZING THE SALE OF A VACANT LOT AT 125 IRIS DRIVE TO BRIAN K. PERRY

Summary: The consideration of a resolution authorizing the Mayor to convey 125 Iris Drive to Brian K. Perry in the amount of $12,200.

On June 12, 2001, the City Council directed the City Clerk to advertise for upset bids on 125 Iris Drive. The advertisement ran in the Asheville Citizen-Times on June 15, 2001, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Brian K. Perry in the amount of $12,200 was not upset and the sale to Brian K. Perry should be approved.

Approval of the resolution will authorize the sale of the property to Brian K. Perry for the amount of $12,200.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 391

410

C. RESOLUTION AUTHORIZING THE SALE OF A PORTION OF 36 GROVE STREET TO BOC ENTERPRISES

This item was removed from the Consent Agenda due to a conflict of interest by Vice-Mayor Cloninger.

D. RESOLUTION NO. 01-93 - RESOLUTION SETTING A PUBLIC HEARING ON JULY 10, 2001, TO CONSIDER THE DEMOLITION OF 191 SULPHUR SPRINGS ROAD

RESOLUTION BOOK NO. 26 – PAGE 392

E. RESOLUTION NO. 01-94 - RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE FOR A COMMUNITY MEETING ON TUESDAY, JULY 31, 2001, BEGINNING AT 7:00 P.M. IN THE WEST ASHEVILLE COMMUNITY CENTER LOCATED AT 970 HAYWOOD ROAD, ASHEVILLE, NORTH CAROLINA

RESOLUTION BOOK NO. 26 – PAGE 394

F. ORDINANCE NO. 2822 - BUDGET AMENDMENT FOR PRITCHARD PARK

Summary: The consideration of a budget amendment, in the amount of $4,000, for donations from the French Broad River Garden Club and the Asheville Downtown Association for Pritchard Park.

The City of Asheville staff met with several members of the French Broad River Garden Club about their interest in supporting the renovation of Pritchard Park. The Garden Club is able to make a donation in the amount of $3,000 for the beautification of the park space.

At a later date, the City of Asheville will place a plaque paid for by the French Broad River Garden Club in an area of the park to acknowledge their contribution.

City staff was also approached by the Asheville Downtown Association who expressed interest in the project and committed $1,000 towards the renovation.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for the Pritchard Park.

ORDINANCE BOOK NO. 19 – PAGE 185

G. MOTION SETTING A PUBLIC HEARING ON JULY 10, 2001, TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR AN ANCILLARY USE (PARKING LOT AND GRAVEL ACCESS DRIVE) IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT FOR THE HOT SPOT AT 103 NEW LEICESTER HIGHWAY

H. MOTION SETTING A PUBLIC HEARING ON JULY 10, 2001, TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A DUPLEX ON PROPERTY ZONED RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT AT 15 BROWNDALE ROAD IN THE OTEEN AREA

I. RESOLUTION NO. 01-95 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE HAW CREEK VOLUNTEER FIRE DEPARTMENT, THE RICEVILLE VOLUNTEER FIRE DEPARTMENT, THE WEST BUNCOMBE VOLUNTEER FIRE DEPARTMENT AND THE ENKA-CANDLER VOLUNTEER FIRE DEPARTMENT FOR FIRE PROTECTION SERVICES FOR ANNEXED AREAS

Summary: The consideration of a resolution authorizing the City Manager to enter into agreements with the Haw Creek Volunteer Fire Department, the Riceville Volunteer Fire Department, the West Buncombe Volunteer Fire Department and the Enka-Candler Volunteer Fire Departments for fire protection services for annexed areas.

With the annexations effective July 1, 2001, for the City of Asheville, there are four areas that the City is required to contract with volunteer fire departments for service under North Carolina General Statutes. The same standard fire protection contract applies to all four of the affected volunteer fire departments.

The four areas that are effective July 1, 2001, and their associated volunteer fire departments are as follows:

01A	Piney Mountain Road area	Haw Creek VFD
01B	Riceville Road area	Riceville VFD
01E	New Leicester Highway area	West Buncombe VFD
01F	Wedgefield Drive area	Enka-Candler VFD

Contracts have been provided to and accepted by the above listed volunteer fire departments. The contracts are consistent with requirements set forth in N.C. Gen. Stat. sec. 160A-49.1. The Statute require a five-year contractual period. The contract documents have been written to allow for year-to-year continuance after the mandatory period, if both parties are agreeable to continue the contract.

City staff recommends City Council authorize the City Manager to contract with the necessary agencies for fire protection services as required by N. C. Gen. Statutes for annexed areas.

RESOLUTION BOOK NO. 26 – PAGE 395

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA DUE TO CONFLICT OF INTEREST

RESOLUTION NO. 01-96 - RESOLUTION AUTHORIZING THE SALE OF A PORTION OF 36 GROVE STREET TO BOC ENTERPRISES

Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Summary: The consideration of a resolution authorizing the Mayor to convey a portion of 36 Grove Street to BOC Enterprises in the amount of $111,000.

On June 12, 2001, the City Council directed the City Clerk to advertise for upset bids on 36 Grove Street. The advertisement ran in the Asheville Citizen-Times on June 14, 2001, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from BOC Enterprises in the amount of $111,000 was not upset and the sale to BOC Enterprises should be approved.

Approval of the resolution will authorize the sale of the property to BOC Enterprises for the amount of $111,000.

Finance Department and Parks & Recreation staff recommends adoption of the resolution.

Councilman Hay moved for the adoption of Resolution No. 01-96. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 296

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE SOIL AND EROSION CONTROL ORDINANCE

At the request of City staff, Councilman Worley moved to postpone this public hearing indefinitely. This motion was seconded by Councilwoman Field and carried unanimously. City Attorney Oast stated that when this matter is brought before City Council in the future, it will be re-advertised.

B. PUBLIC HEARING RELATIVE TO AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH STANDARDS FOR NON-RESIDENTIAL ACCESS ONTO RESIDENTIAL STREETS

ORDINANCE NO. 2823 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH STANDARDS FOR NON-RESIDENTIAL ACCESS ONTO RESIDENTIAL STREETS

Mayor Sitnick opened the public hearing at 5:21 p.m.

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to limit access by non-residential uses onto residential streets.

The Planning and Zoning Commission has recommended adoption of an amendment to the UDO limiting access by non-residential access onto residential streets. Access onto residential streets by non-residential uses located on corner and through lots can impact the residential character of the residential streets. Currently, the City Council often reserves a strip of residentially zoned property along the residential street frontage to limit access onto the residential street by non-residential uses. This results in a cumbersome zoning pattern and restricts the use of the residentially zoned property for buffering and other appropriate uses. The proposed standards would not apply to non-residential uses permitted in residential zones, such as churches, schools, and libraries, or to non-residential uses located in non-residential or mixed use zoning districts that have their only access onto residential streets. Non-residential uses located on corner lots, through lots, and other lots with frontage on more than one street would be required to have their access from the street that is abutted by similar uses. Access onto residential streets by non-residential uses located on corner lots would be permitted if certain conditions are met and the City's Traffic Engineer approves the proposed access. As proposed, the standards would preserve the residential character of streets that function primarily to provide access to residences. The proposed ordinance amendment identifies clear standards for access, making it easier for staff, developers, and citizens to understand and adhere to them.

The Planning and Zoning Commission voted unanimously to recommend approval of the wording amendment limiting access by non-residential uses onto residential streets. The Planning and Development staff recommends approval of the wording amendment.

Mr. Green responded to a question from Councilman Hay regarding the definition of a residential street. He said that City staff will develop a definition and bring it back for City Council consideration in the near future.

Mayor Sitnick closed the public hearing at 5:32 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Hay moved for the adoption of Ordinance No. 2823. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 187

C. PUBLIC HEARING TO CONSIDER AMENDING A PREVIOUSLY GRANTED CONDITIONAL USE PERMIT FOR THE CLINGMAN AVENUE CONDOMINIUMS

ORDINANCE NO. 2824 - ORDINANCE AMENDING A PREVIOUSLY GRANTED CONDITIONAL USE PERMIT FOR THE CLINGMAN AVENUE CONDOMINIUMS

At the request of Councilwoman Bellamy, Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the consideration of amending a previously granted conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:35 p.m.

Ms. Stacy Merten, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 6/12/01) and City Exhibit 4 (Staff Report dated 6/26/01). This public hearing was advertised on June 15 and 22, 2001.

Ms. Merten said that this is the consideration of a motion to amend the conditional use permit to allow offices as part of the previously approved Conditional Use Zoning request for the Clingman Avenue Condominiums (Merritt Park).

The property is located at the intersection of Merritt Street and Clingman Avenue (City Exhibit 5) and was rezoned Central Business District – Conditional Use Zoning district. The original conditional use permit was to allow the construction of a three story condominium complex with 16 units and a community room.

Mountain Housing Opportunities has requested an amendment to the conditional use permit for the Clingman Avenue Condominiums, now referred to as Merritt Park, to increase the mix of uses and allow the former community space to be utilized for 3,200 sq. feet of office space. The design of the office space will incorporate a large conference room that will still be available for use by the community. The total number of units in the project will remain unchanged at 16.

There have also been some minor changes to the building façade (City Exhibit 6) that were approved by the Planning & Development Director per the original conditional use permit.

Findings

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The City of Asheville Technical Review Committee reviewed the proposed use and found no health or safety concerns. The Project is required to meet the technical standards set forth in the UDO, the Asheville Standards and Specifications Manual, the North Carolina Building Code, and other applicable laws and standards which protect the public health and safety.

2) That the Project is reasonably necessary for the health and general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region.

3) That the Project will not substantially injure the value of the adjoining or abutting property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density and character of the area or neighborhood in which it is located.

   The proposed use will create an appropriate transition from the commercial, urban land use pattern above to the historic, single family development below. And will be of similar scale and building materials as the surrounding development.

5) That the proposed use or development of the land will generally conform with the Comprehensive Plan and other official plans adopted by the City.

   The Asheville City Plan 2010 and the West End Clingman Small Area plan indicate residential uses for this area.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The project was reviewed for compliance with technical standards by the City of Asheville Technical Review Committee, which includes representatives of the Water Resources

Department, the Fire Department, MSD, the Engineering Department, and the Public Works Department.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The City's traffic engineer has determined that the adjacent roads have more than adequate capacity to carry the traffic expected to be generated from this site.

Based on information available to the Planning & Development Department in advance of the public hearing, staff recommends approval of the amendment to the conditional use permit to allow office use as part of the development.

Councilwoman Field and Councilmen Hay, Peterson and Worley disclosed that they did talk to someone from Mountain Housing Opportunities about this issue (they were unaware that this amendment would be a quasi-judicial hearing), however, their discussions will not influence their decisions in any way.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities, spoke about how this will benefit the neighborhood and how the neighborhood association has endorsed this request.

There being no request from the applicant for rebuttal, Mayor Sitnick closed the public hearing at 5:45 p.m.

After discussion about the possibility of expanding the uses for the development, City Attorney Oast reviewed the legal notice and recommended to Council to confine their motion to only permit office use as part of the development.

Councilwoman Field moved to adopt Ordinance No. 2824 to amend the conditional use permit to allow office use as part of the development; and, to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 189

D. PUBLIC HEARING TO CONSIDER AN APPLICATION TO THE U.S. DEPT. OF HOUSING AND URBAN DEVELOPMENT FOR A COMMUNITY DEVELOPMENT BLOCK GRANT SECTION 108 GUARANTEED LOAN AND AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE REHABILITATION OF BUILDINGS IN SOUTH PACK SQUARE

RESOLUTION NO. 01-97 - RESOLUTION AUTHORIZING SUBMISSION TO THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT OF APPLICATIONS FOR A SECTION 108 GUARANTEED LOAN AND AN ECONOMIC DEVELOPMENT INITIATIVE GRANT

At the request of Councilwoman Bellamy, Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick opened the public hearing at 5:50 p.m.

Ms. Charlotte Caplan, Community Development Director, said that this is a public hearing on the consideration of an application to the U.S. Dept. of Housing and Urban Development

(HUD) for a Community Development Block Grant (CDBG) Section 108 Guaranteed Loan of $800,000 and an Economic Development Initiative (EDI) Grant of $340,000 for the rehabilitation of buildings in South Pack Square. This public hearing was advertised on June 21, 2001.

Eagle/Market Streets Development Corporation (EMSDC) has requested that the City apply to HUD for a total of $1,140,000 in linked grant and loan funding to assist in a $2.4 million project that will acquire and rehabilitate three substandard buildings in the South Pack Square area and construct a fourth on a vacant site between the existing buildings. The completed buildings will be leased as a mixture of retail, office, affordable housing, and market rate housing units.

Location

The buildings are:

25 South Market Street (PIN # 9648-06-49-6888) – also known as the Del Cardo Building;
19 Eagle Street (PIN # 9648-06-49-6834) – the row of stores on the south side of Eagle Street;
3 Wilson Alley (PIN # 9648-06-49-5793) – a small building, formerly used as a crack house.

The land for the infill construction is part of the 19 Eagle Street parcel, but fronts on S. Market Street.

EMSDC has already acquired 25 South Market Street and 3 Wilson Alley, using CDBG funds, and is in negotiation with the owner of 19 Eagle Street.

Financial Plan

Total project cost is estimated at $2,428,500. The proposed sources of funding are:

Section 108 Guaranteed Loan	$800,000
Economic Development Initiative grant	$340,000
CDBG	$530,000 (already approved)
Equity contributions	$758,500
TOTAL	$2,428,500

To receive the Section 108 loan guarantee, the City must pledge its future CDBG entitlement grants as security, backed up by a first mortgage on the real estate. The EDI program is a competitive grant program designed by HUD to provide additional support for projects receiving Section 108 loan funding.

Staff has reviewed the financial plans, put together by EMSDC with assistance from the National Development Corporation, and believe that this is a viable project. Together with some private sector initiatives already under way, it will bring an entire block back into productive economic activity and should transform the area.

A public hearing is required before the Section 108 application can be submitted.

Staff recommends, after the public hearing, approving the resolution which authorizes the Mayor to submit applications for an $800,000 Section 108 Guaranteed Loan and a $340,000 EDI grant.

Ms. Caplan then explained how the Section 108 Guarantee Loan program is administered.

Mayor Sitnick urged citizens to write to their state legislators to encourage them not to diminish the opportunity provided by Historic Preservation Tax Credits.

Mayor Sitnick closed the public hearing at 6:06 p.m.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Field moved for the adoption of Resolution No. 01-97. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 397

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 2825 - ORDINANCE ADOPTING THE FISCAL YEAR 2001-02 ANNUAL OPERATING BUDGET

Mayor Sitnick said that a public hearing was held on the Fiscal Year 2001-02 Annual Operating Budget on June 12, 2001.

Budget Director Ben Durant said that this report presents the Fiscal Year 2001/2002 Annual Operating Budget for City Council's consideration before adoption.

The Fiscal 2001/2002 Annual Operating Budget was presented to City Council on May 10, 2001. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the budget along with a notice of the public hearing was published on June 1 and June 8, 2000. The City Council conducted a public hearing on the budget on June 12, 2001.

The Fiscal Year 2001/2002 Annual Operating Budget is balanced with a tax rate of $0.56 per $100 of assessed valuation, which reflects no increase over the current property tax rate. All essential City programs and services are maintained.

The budget as currently presented to City Council includes a net budget of $88,739,599 and a General Fund appropriation of $64,263,688. Key items for Council's review are summarized and discussed below:

- Outside Agency funding is presented in accordance with the Outside Agency Committee recommendations to allow most agencies that currently receive City funding to receive the same appropriation for FY 2001/2002 as originally appropriated in FY 2000/2001. Funding for the A-B Community Relations Council is maintained at $63,000 and a new, one time appropriation of $1,000 is provided for the Kids Voting program.

- Civic Center fees have been revised to reflect the charging of arena changeover fees during hockey season to trade show tenants whose events generate less than $35,000 in ticket sales. Arena change-over fees will be waived for events generating $35,000 or more in ticket sales or for tenants who held events at the Civic Center prior to the inception of the hockey program.

- Additional appropriations to the Civic Center Operating Fund in the amount of $637,897 have been added to the FY 2001/2002 Annual Operating Budget presented to Council to support the National Basketball Developmental League (NBDL). This appropriation is balanced with additional Civic Center operating revenues of $490,550 and an increased transfer from the General Fund of $147,347.

- The increased General Fund transfer to the Civic Center Operating Fund of $147,347 is funded with an offsetting reduction to the Manager's contingency account, which has been reduced from $300,000 to $152,653. As a result of the reduction to the contingency account, no increase to the General Fund Budget was needed to fund the additional transfer to the Civic Center Operating Fund.

- The budget as currently presented to City Council includes a merit package which allows for an average increase in employee pay of four percent. Beginning July 1, 2001, employee performance appraisals will be conducted according to normal schedules, however, merit pay increases that may result will be delayed until the North Carolina General Assembly makes a final decision regarding local government reimbursements payments. If the General Assembly discontinues reimbursement payments during FY 2001/2002 and provides no additional replacement revenues, the City may need to reduce the funding available for merit pay increases. If reimbursement revenues are restored, or sufficient replacement revenues are provided, employees will receive full merit awards, retroactive to their original eligibility date.

Staff requests that Council review the FY 2001/2002 Annual Operating Budget and make necessary recommendations or adjustments followed by adoption of the budget ordinance.

Upon inquiry of Vice-Mayor Cloninger, City Manager Westbrook explained that due to the uncertainty of the state reimbursements, all merit and cost of living increases will be temporarily held until we hear about the reimbursement money from the State. This will only affect employees who have anniversary dates during approximately the first six weeks of the new fiscal year (or until the State budget is passed). In the unlikely event that the State withholds the full $2.2 million reimbursement, it could potentially mean a reduction in services for citizens and layoffs for employees. However, by temporarily holding merit and cost of living pay for approximately 6 weeks until the General Assembly passes a budget, he has preserved the option of reducing merit pay rather than laying off employees in this worst case scenario. He did not feel the State will discontinue the funding; however, this is a decision of the General Assembly and he would rather have the option to preserve jobs at this critical point. Again, the City expects to hear something from the State by the end of August. As soon as we are informed that we will be receiving all or a portion of the reimbursements, merit and cost of living increases that have been held in abeyance will be processed retroactive back to the employees' anniversary date.

Upon inquiry of Councilwoman Bellamy, Mr. Westbrook explained what other contingency plans there were in the event the City does not receive the state reimbursement.

There was a brief discussion on the details of the Civic Center operating budget as it related to the NBDL, and also the compromise with the Regional Water Authority's budget (which Authority agreed to a 2.5% increase).

Upon inquiry of Mayor Sitnick regarding her concern of the Criminal Justice Information Services (CJIS) monies, Finance Director Bill Schaefer gave City Council a brief update on where that program stands at the present time.

Upon inquiry of Mayor Sitnick, Transit Services Director Bruce Black said that the Transit Center enclosure should be completed by mid-November but stressed he would do everything he could to have the enclosure completed by the cold months.

Mayor Sitnick stressed how seriously City Council takes their responsibility on how they spend the City taxpayer's money. Even though she would have preferred putting more money in traffic calming, transportation services, and an across the board minimal reduction to outside agencies, she did feel this is a fat-free and waste-free budget.

Councilman Peterson also said that there are minor items in the budget he did not agree with, but all of Council has been allowed to voice their concerns. He also agreed that this has been a tight budget year.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2825. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 190

At 6:55 p.m., Mayor Sitnick announced a 15 minute recess.

V. NEW BUSINESS:

A. RESOLUTION NO. 01-98 - RESOLUTION DESIGNATING THE SILVERMAN COMPANY STEEL ROOFTOP SIGN AT 48 SWANNANOA RIVER ROAD AS A LANDMARK SIGN

Historic Resources Director Maggie O'Connor said that this is the consideration of a resolution designating the Silverman Company steel rooftop sign at 48 Swannanoa River Road historically significant and/or a landmark sign.

The owner of the Silverman Company steel rooftop sign located at 48 Swannanoa Road requests landmark sign designation of the 6 feet x 64 feet (384 square feet) steel roof top Silverman Company sign. The sign erected in 1924 has been maintained over the years. Sec. 7-13-2(c) of the Unified Development Ordinance (UDO) "Signs Exempt from Regulation," provides in paragraph 12 that landmark or historically significant signs are exempt from regulation, and that signs may be designated historically significant and/or landmark signs by the city council provided the signs satisfy one or more of the following criteria:

A. The sign is significant to the history of the City of Asheville, including but not limited to, the character of the city as a tourist attraction or cultural center.

B. The sign is unique, notably aesthetic or creative so as to make a significant contribution as a work of art.

C. The sign merits recognition as an important example of technology, craftsmanship, materials or design of the period in which it was constructed and may no longer be economically feasible to produce or manufacture the sign today.

Pursuant to UDO sec. 7-3-4(a)(2), the Historic Resources Commission (HRC) may recommend to the City Council that certain objects be designated as historic or landmark. Though not specifically mentioned, this function includes signs. At its February 9, 2000, meeting, the Historic Resources Commission of Asheville and Buncombe County (HRC) reviewed a request for landmark sign designation for the Silverman Company sign. By a unanimous vote the motion to recommend that designation passed. The HRC found the Silverman Company steel rooftop sign meets Criteria A; Criteria B because it denotes a local business; and Criteria C because a steel company made the sign out of steel for their business and, it is the only one of its kind that the Silverman Company designed and built.

This is an unusual case in that the Silverman sign, despite its historic characteristics, appears to be a relatively standard roof-top sign. Staff recognizes that approval of this request may result in similar requests for similar type signs that do not have the same level of historicity as the Silverman sign. By recommending approval, the HRC has taken a broad view with regard to the intent of the ordinance. If Council prefers that the ordinance be more tightly construed so that signs like the Silverman sign and Dreamland Flea Market sign are not considered eligible for such designation, staff would appreciate a discussion on the intent of the ordinance in order to provide appropriate direction to HRC and to modify our code requirements and guidelines as needed.

The HRC recommends approval of the request to designate the Silverman Company steel rooftop sign at 48 Swannanoa River Road historically significant and/or a landmark sign. If Council wishes to designate the Silverman Company steel rooftop sign as a landmark or historic sign, adoption of a resolution is required. If Council wishes to deny the request, a motion to that effect may be made, but is not required, or Council may vote down the resolution. If council denies the request, staff asks that you assist us in clarifying the intent of the ordinance that allows for the designation of historically significant/landmark signs.

Ms. O'Connor reported back to Council the information they requested at the June 19, 2001, worksession.

Vice-Mayor Cloninger stated that he could not see how this sign is significant to Asheville. He felt the sign was not responsive to the "B" criteria of the ordinance. He feels this may be an attempt to circumvent the sign ordinance.

Upon inquiry of Councilwoman Field, Ms. O'Connor said that if the sign is not designated as a landmark or historic sign, they must remove the sign as it does not meet the sign ordinance.

Councilman Peterson felt that taking into the context of what kinds of businesses that were in the area at the time the building was built, he felt the sign did quality as a landmark sign.

Mayor Sitnick was concerned about setting a precedence if Council approves this sign.

Even though Councilman Worley felt that the sign appears to be the original sign and the Silverman Company is part of the history of the City of Asheville, he too, was concerned about setting a precedence for these type signs.

Mr. Kevin Rollins and Ms. Hazel Fobes each spoke in favor of designating the sign as a historic sign.

Councilman Hay suggested that we invite the HRC members to a worksession to get their assistance in clarifying the intent of the ordinance allowing for the designation of historically significant/landmark signs.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 01-98. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Vice-Mayor Cloninger voting "no".

RESOLUTION BOOK NO. 26 – PAGE 398

B. RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Mayor Sitnick explained that she and Councilman Hay, liaison to the Civic Center Commission, will be meeting with Civic Center Commission Chair Carl Mumpower and she asked that City Council consider posting appointments to the Commission until after that meeting. Therefore, Councilman Worley moved to postpone taking action on the Civic Center Commission appointments. This motion was seconded by Councilwoman Bellamy and carried unanimously.

City Attorney Oast noted that even though the appointments expire on June 30, 2001, all Commission members are appointed to serve until their successor has been appointed.

C. RESOLUTION NO. 01-99 - RESOLUTION REAPPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Cloninger said that the term of Gene Bell, as a member on the Civil Service Board, expired on May 21, 2001.

On June 5, 2001, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Bell as a member of the Civil Service Board to serve an additional two year term, term to expire on May 21, 2003, or until his successor has been appointed.

Councilwoman Bellamy moved to reappoint Gene Bell as a member to the Civil Service Board, term to expire May 21, 2003, or until his successor has been appointed. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 403

D. RESOLUTION NO. 01-100 - RESOLUTION APPOINTING MEMBERS TO THE CLEAN AIR COMMUNITY TRUST BOARD

Vice-Mayor Cloninger said that on June 6, 2000, Resolution No. 00-88 was adopted which established the Clean Air Community Trust Board. City Council must name two trustees to the Trust Board.

On June 12, 2001, City Council interviewed Ms. Tracy Kreider, Ms. Kimberly Kirstein, Ms. Molly Rose and Mr. Ned Guttman. Mr. Mike Lewis and Mr. Keith Thomson are also candidates for consideration.

Tracy Kreider received 4 votes, Kimberly Kirstein received 1 vote, Molly Rose received 0 votes, Ned Guttman received 0 votes, Mike Lewis received 3 votes and Keith Thomson received 6 votes. Therefore, Tracy Kreider and Keith Thomson were appointed to each serve a two year term, terms to expire June 1, 2003, or until their successors have been appointed.

RESOLUTION BOOK NO. 26 – PAGE 404

E. RESOLUTION NO. 01-101 - RESOLUTION APPOINTING MEMBERS TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Vice-Mayor Cloninger said that Ashly Maag has resigned from the Educational Access Channel Commission leaving an unexpired term. In addition, the terms of Michelle Price, Patti Cutspec, Gerry Kovach, Greg Dillingham and Rusty Holmes expired on June 1, 2001.

On June 5, 2001, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Patti Cutspec (City School representative), Gerry Kovach (County School representative), Greg Dillingham (UNC-Asheville representative), Rusty Holmes (A-B Technical

422

Community College representative) and Michelle Price (at large representative), to each serve a four-term respectively, terms to expire June 1, 2005, or until their successors are appointed.

On June 12, 2001, City Council interviewed Adam Baylus and Kimberly Kirstein for the unexpired term of Ms. Maag. Wally Bowen is also a candidate for consideration.

Adam Baylus received 6 votes, Kimberly Kirstein received 1 vote, and Wally Bowen received 0 votes. Therefore, Adam Baylus was appointed to serve the unexpired term of Ms. Maag, term to expire June 1, 2003, or until his successor has been appointed.

Councilman Worley moved to reappoint Patti Cutspec (City School representative), Gerry Kovach (County School representative), Greg Dillingham (UNC-Asheville representative), Rusty Holmes (A-B Technical Community College representative), and Michelle Price (at large representative) to each serve a four-term respectively, terms to expire June 1, 2005, or until their successors are appointed. This motion was seconded by Councilwoman and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 405

F. RESOLUTION NO. 01-102 - RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Vice-Mayor Cloninger said that Bruce Mulkey and Crystal Pace have resigned from the Greenway Commission.

On June 5, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to (1) appoint Linda Giltz to serve the unexpired term of Mr. Mulkey, term to expire December 31, 2002; and (2) appoint Phyllis Stiles to serve the unexpired term of Ms. Pace, term to expire December 31, 2003.

Councilman Worley moved to appoint Linda Giltz to serve the unexpired term of Mr. Mulkey, term to expire December 31, 2002; and (2) appoint Phyllis Stiles to serve the unexpired term of Ms. Pace, term to expire December 31, 2003. Both respective terms are until their successor have been appointed. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 406

G. RESOLUTION NO. 01-103 - RESOLUTION APPOINTING MEMBERS TO THE HISTORIC RESOURCES COMMISSION

Vice-Mayor Cloninger said that the terms of Allen Roderick, Betty Lawrence and Kevan Frazier expire on July 1, 2001.

On June 12, 2001, City Council interviewed Annamarie Rickman, Marsha Shortell and Peggy Gardner.

Annamarie Rickman received 4 votes, Marsha Shortell received 2 votes, and Peggy Gardner received 1 vote. Therefore, Annamarie Rickman was appointed to serve a three year term, term to expire July 1, 2004, or until her success has been appointed.

Councilwoman Field moved to reappoint Allen Roderick and Kevan Frazier to the Historic Resources Commission to each serve an additional 3 year term respectfully, terms to expire July

1, 2004, or until their successors have been appointed. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 407

H. RESOLUTION NO. 01-104 - RESOLUTION APPOINTING MEMBERS TO THE NOISE ORDINANCE APPEALS BOARD

Vice-Mayor Cloninger said that on June 27, 2000, City Council adopted a revised ordinance regulating noise in the City of Asheville. Said ordinance established a Noise Ordinance Appeals Board.

On June 5, 2001, it was the consensus of City Council to instruct the City Clerk to (1) appoint Susan Andrew as a regular member to serve a two year term; and (2) appoint Scott Fowler as an alternate member to serve a two year term.

Councilman Peterson moved to (1) appoint Susan Andrew as a regular member to serve a two year term, term to begin immediately and expire on July 1, 2003; and (2) appoint Scott Fowler to serve as an alternate member to serve a two year term, term to begin immediately and expire on July 1, 2003. Both respective terms will be until their successors have been appointed. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 408

I. RESOLUTION NO. 01-105 - RESOLUTION APPOINTING A MEMBER TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Cloninger said that due to the recent death of Mr. Lionel Williams, there currently exists a vacancy on the Planning & zoning Commission.

On June 12, 2001, City Council interviewed Ms. Selina Sullivan. Ms. Jane Mathews is also a candidate for consideration.

Selina Sullivan received 7 votes and Jane Mathews received 0 votes. Therefore, Selina Sullivan was appointed to serve the unexpired term of Mr. Williams, term to expire August 14, 2002, or until her successor has been appointed.

RESOLUTION BOOK NO. 26 – PAGE 409

J. RESOLUTION NO. 01-106 - RESOLUTION APPOINTING A MEMBER TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Vice-Mayor Cloninger said that there currently exists a vacancy on the Police Officers and Firefighters Disability Review Board.

On June 5, 2001, the City Clerk was instructed to prepare the proper paperwork to appoint Dr. Alexander Maitland III to fill the unexpired term of Dr. Michael Keleher, term to expire July 19, 2002, or until his successor has been appointed and qualified.

Councilman Worley moved to appoint Dr. Alexander Maitland III to fill the unexpired term of Dr. Michael Keleher, term to expire July 19, 2002, or until his successor has been appointed. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 410

K. RESOLUTION APPOINTING MEMBERS TO THE TAXICAB ADVISORY BOARD

Vice-Mayor Cloninger said that Ordinance No. 2773 adopted on November 28, 2000, established the Taxicab Advisory Board. Said Board shall consist of five members.

On June 12, 2001, City Council interviewed Mr. Richard Mann.

Since the Taxicab Advisory Board is to be made up of five members, the City Clerk was directed to advertise for vacancies in the next quarterly appointment process. City Clerk Burleson was also directed to contact Mr. Mann and advise him of the circumstances of this Board and this in no way reflects his excellent interview with City Council.

L. RESOLUTION NO. 01-107 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF DIRECTORS OF VICTORIA OF ASHEVILLE INC.

Vice-Mayor Cloninger said that S. Douglas Spell has resigned as a member of the Board of Directors of Victoria of Asheville Inc., thus leaving an unexpired term.

On June 5, 2001, the City Clerk was instructed to prepare the proper paperwork to appoint Mr. Jeff Richardson, Assistant City Manager, as a member of the Board of Directors of Victoria of Asheville Inc. to fill the unexpired term of Mr. Spell, term to expire November 29, 2003, or until his successor has been appointed.

Councilman Worley moved to appoint Jeff Richardson, Assistant City Manager, to fill the unexpired term of Mr. Spell, term to expire November 29, 2003, or until his successor has been appointed. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 411

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of June 8-21, 2001: Hal Blakely (Water), William Hensley (Sanitation), Lisa Young (Finance), Christine Gordner (Police), Deanna L. Sluder (Police), Jessy Lynn Smith (Streets), John Laughter (Water), John Laughter (Water), Frank Griffin (Water), David Jones (Water) and BellSouth (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City has filed a Complaint on June 14, 2001, as follows: City v. Anderson & Son Construction Co., Inc. This is a complaint for recovery of damages to water main located at 2 Buckstone Place. This lawsuit will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

CLOSED SESSION

At 7:55 p.m. Councilwoman Bellamy moved to go into closed session for the following reasons (1) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease – G. S. 143-318.11 (a) (5); and (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Henderson County, Cane Creek Water and Sewer District, Asheville-Buncombe-Henderson Water Authority, Buncombe County, and City of Asheville – G.S. 143-318.11 (a) (3). This motion was seconded by Councilman Worley and carried unanimously.

At 9:27 p.m., Councilman Hay moved to come out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9:27 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – July 10, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Hay gave the invocation.

ADDITIONS TO AGENDA

Mayor Sitnick requested that the following two items be added under "Other Business": (1) air quality; and (2) I-26 widening project in Henderson County.

I. PROCLAMATIONS:

A. RECOGNITION OF COL. ROBERT MORGAN

Mayor Sitnick read a proclamation recognizing Col. Robert Morgan for his many years of fine service to our country and to our community.

B. PROCLAMATION PROCLAIMING JULY, 2001, AS "RECREATION AND PARKS MONTH"

Councilman Worley read the proclamation proclaiming July, 2001, as "Recreation and Parks Month" in the City of Asheville. He presented the proclamation to Mr. Tom House, member of the Recreation Board, who thanked City Council for their support.

C. PROCLAMATION PROCLAIMING JULY 9-15, 2001, AS "CHILDREN IN CAR SAFETY WEEK"

Mayor Sitnick read the proclamation proclaiming July 9-15, 2001, as "Children in Car Safety Week " in the City of Asheville. She presented the proclamation to Ms. Julie Kepple, who briefed City Council on some activities taking place during the week.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 26, 2001

B. ORDINANCE NO. 2826 - BUDGET AMENDMENT TO APPROPRIATE A GRANT FROM THE N.C. PARKS AND RECREATION TRUST FUND FOR THE BURTON STREET COMMUNITY CENTER PLAYGROUND

Summary: The consideration of a budget amendment, in the amount of $50,000, for an appropriation from the North Carolina Parks and Recreation Trust Fund.

The City of Asheville applied for grant funds in January 2001 to the North Carolina Parks and Recreation Trust Fund. The grant was recently awarded in the amount of $50,000 and designated to pay for the cost associated with renovating the playground and general park improvements at the Burton Street Community Center.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for the Burton Street Community Center playground.

ORDINANCE BOOK NO. 19 – PAGE 202

C. **MOTION SETTING A PUBLIC HEARING ON JULY 24, 2001, TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTIES ON OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE**

D. **MOTION SETTING A PUBLIC HEARING ON JULY 24, 2001, TO REZONE PROPERTY AT 35 AND 47 ACTON CIRCLE AND 7 ACTON WOODS ROAD FROM NEIGHBORHOOD BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT**

E. **MOTION SETTING A PUBLIC HEARING ON JULY 24, 2001, TO CONSIDER A REQUEST TO APPROVE A MODIFICATION FROM THE SUBDIVISION STANDARDS REQUIRING THAT ALL RESIDENTIAL LOTS ABUT A PUBLICLY MAINTAINED STREET IN BINTER SUBDIVISION LOCATED AT 296 DEAVERVIEW ROAD**

F. **RESOLUTION NO. 01-108 - RESOLUTION AUTHORIZING EXECUTION OF "LANDLORD'S CONSENT" IN CONNECTION WITH THE REFINANCING BY FRENCH BROAD GOLF CENTER OF CERTAIN PROPERTY LEASED FROM THE CITY**

Summary: The consideration of a resolution authorizing City Manager to execute consent for refinancing by tenant in city-owned property.

The City owns the land on which the Asheville Regional Airport is located. The Airport Authority leases this land from the City. Some of the land subject to the lease is located south of N.C. Highway 280, but is a "clear zone," and is not actually improved with Airport facilities. Some of this property is also used by the French Broad Golf Center for its clubhouse access road.

The owners/operators of FBGC have pledged their lease from the City as security for a private loan that they are now seeking to re-finance. The lender bank is requiring the FBGC owners to obtain the City's consent as landlord to this refinancing, and to provide the bank with certain notices under the lease.

This is a standard practice in capital lease financing, which is becoming an increasingly prevalent way of doing business. There are some details to be negotiated in the language of the document, but executing this "Landlord's Consent" will not impair the City's ownership interest, and the resolution makes the City's execution subject to the City Attorney's approval.

If Council wishes to consent to the refinancing of FBGC's loan and the transfer of the lease to another lender as security, approval of the resolution is recommended.

RESOLUTION BOOK NO. 26 – PAGE 412

G. RESOLUTION NO. 01-109 - RESOLUTION AUTHORIZING THE CITY MANGER TO ENTER INTO A LICENSE AGREEMENT WITH TRITON PCS PROPERTY COMPANY LLC FOR A CONCEALED WIRELESS COMMUNICATION FACILITY AT 300 MERRIMON AVENUE

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Triton PCS Property Company, LLC (Triton) for a concealed wireless communication facility at 300 Merrimon Avenue.

The Notice of Intent to enter into a License Agreement with Triton PCS Property Company was published on Wednesday, June 27, 2001, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested,

The proposed License Agreement provides for Triton to rehabilitate the training tower in accordance with plans approved by City staff and the State Historic Preservation Office at an estimated cost of $60,000. Triton will install a 15' flag pole on top of the training tower which will house their concealed wireless communication facility along with a 9' x 13' equipment shed on the ground at the rear of the building. The term of the License Agreement will be 5 years with one 4.5 year renewal period. Triton will pay a License Fee of $14,400 the first year with a 4% annual increase each year thereafter.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 413

H. RESOLUTION NO. 01-110 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO ENTER INTO A RENEWAL OF A LEASE/LICENSE AGREEMENT WITH MOTIENT COMMUNICATIONS INC. FOR ITS ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding renewal of a License Agreement with Motient Communications, Inc., for an antenna at 36 Reservoir Road.

The property at 36 Reservoir Road is the site of the former White Fawn Reservoir. In recent years the site was used as a beneficial fill site for the City of Asheville. Currently, three telecommunication towers are located on the property and the City of Asheville leases antenna space on two of the towers and ground space for related equipment to a total of eight tenants. One tower is not in use. The property is the proposed future site of the "Sister Cities Park."

Motient Communication, Inc. has operated an antenna and related equipment at the site since October, 1995. The antenna is located on the tower known as the "BellSouth Tower" which is immediately west of the proposed Sister Cities Park. The proposed License Agreement will enable Motient to continue operating an antenna at that site; however, there is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Motient will pay a License Fee of $5,400 the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee Motient will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 414

I. RESOLUTION NO. 01-111 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDMENT TO THE MUNICIPAL RECORDS RETENTION AND DISPOSITION SCHEDULE ADOPTED BY THE N.C. DEPARTMENT OF CULTURAL RESOURCES

Summary: The consideration of a resolution authorizing the Mayor to sign an amendment to the 1997 Municipal Records Retention & Disposition Schedule.

On September 23, 1997, by Resolution No. 97-158, the City approved the Municipal Records Retention and Disposition Schedule issued August 15, 1997, by the N. C. Department of Cultural Resources, Division of Archives and History.

The N. C. Department of Cultural Resources has now amended said Schedule. The first amendment to Standard 3 (Budget and Fiscal Records) covers the Escheat and Unclaimed Property File by amending the retention period for this file. The second amendment to Standard 15 (Police Department Records) clarifies the minimum retention period for items in the Communications Records File.

It is in the best interest of the City of Asheville to promote municipal records management as provided by the N. C. Department of Cultural Resources, Division of Archives and History by adopting these amendments.

Staff recommends City Council authorize the Mayor to execute an amendment dated June 15, 2001, to the Municipal Records Retention and Disposition Schedule.

RESOLUTION BOOK NO. 26 – PAGE 415

J. RESOLUTION NO. 01-112 - RESOLUTION AUTHORIZING THE CITY TO JOIN IN AN EASEMENT TO THE N.C. DEPT. OF TRANSPORTATION PERMITTING USE OF PROPERTY AT THE INTERSECTION OF BREVARD ROAD AND SHELBURNE ROAD FOR RIGHT-OF-WAY PURPOSES

Summary: The consideration of a resolution authorizing City Manager to execute an easement to NCDOT.

The City previously owned the property at the intersection of Brevard Road, Shelburne Road, and I-240, now occupied by the National Guard Armory. This property was deeded to the State of North Carolina in August of 1960. The deed contains restrictions that essentially require the property to be used in perpetuity "for military purposes."

In connection with the recent improvements to Brevard Road, the State DOT redesigned the Shelburne Road / Brevard Road intersection in the area of the National Guard Armory, essentially cutting away and stabilizing the dirt bank on the northern side of the road. In order to accommodate this, the State (for the National Guard) wishes to execute an easement to DOT.

The State has requested that the City acknowledge that the use of the National Guard property in connection with the intersection redesign does not violate the applicable restrictions in the deed, and to join in the easement.

Because the subject property continues to be used for a National Guard Armory, and the use of a small portion of it for the intersection redesign neither interferes with nor is inconsistent with that use, it does not appear to violate the 1960 deed restriction to military uses.

If Council agrees that the use restrictions on the property are not violated by the encroachment, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 26 – PAGE 416

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Worley moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE DEMOLITION OF 191 SULPHUR SPRINGS ROAD

City Manager Westbrook said that within the last few days, 191 Sulphur Springs Road was demolished by the owner. Therefore, the public hearing will not be necessary.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR AN ANCILLARY USE (PARKING LOT AND GRAVEL ACCESS DRIVE) IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT FOR THE HOT SPOT LOCATED AT 103 NEW LEICESTER HIGHWAY

ORDINANCE NO. 2827 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR AN ANCILLARY USE (PARKING LOT AND GRAVEL ACCESS DRIVE) IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT FOR THE HOT SPOT LOCATED AT 103 NEW LEICESTER HIGHWAY

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use permit process. This process is the consideration of granting a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:23 p.m.

All of City Council, except for Councilman Peterson, disclosed that they either drove by or visited the site in question.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), and City Exhibit 3 (Staff Report). This public hearing was advertised on June 29 and July 6, 2001.

Mr. Green said that this is the consideration of a motion to issue a Conditional Use Permit for an ancillary use (parking lot and gravel access drive) in an RM-16 Residential Multi-Family High Density District for property located at 103 New Leicester Highway (City Exhibit 3 – Location Map).

The applicant is requesting a Conditional Use Permit (CUP) to permit the planting of a landscape buffer and construction of a gravel access drive on residentially zoned property (City Exhibit 5 – Site Plan). The landscape buffer will screen the recently remodeled Hot Spot gas station/convenience store from the adjacent residential uses; the gravel access drive will provide access to mechanical equipment located at the rear of the store. The subject property contains 0.25 acres. The commercially zoned lot upon which the Hot Spot is located is not large enough to accommodate the remodeled gas station/convenience store, the required landscaping and buffering, and the gravel access drive. The residentially zoned lot behind the commercial use, which is owned by the applicant, offers a good location for the landscape buffer. The property is vacant with several existing trees located on it. The existing trees will be incorporated into the required buffer. A gravel access drive has been constructed to provide for access by service personnel to the mechanical equipment located behind the store. The gravel access drive extends approximately 15 feet into the residential zoning district. A landscape buffer ranging in width from 10 to 30 feet buffers the gravel drive from adjacent residential properties.

The Technical Review Committee (TRC) reviewed this project and took action to approve with conditions. All conditions identified by TRC have been met. This project meets all the technical standards for ancillary commercial uses in a residential district. Staff review of this application determined that all of the technical standards of the ordinance have been met. No Traffic Impact Analysis was required for this project. The site plan submitted and the conditions identified by City staff assure that the impacts of the proposed project on the surrounding uses are mitigated.

Conditional Use Findings: The findings that must be made by City Council in the issuance of a CUP for the project are listed below with staff analysis for each standard.

1. The proposed use or development of the land will not materially endanger the public health and safety. The planting of the landscape buffer will protect adjacent residential uses from the noise and light generated by the commercial use. The gravel access drive will enable service personnel to access the mechanical equipment for maintenance purposes.
2. The proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region. The landscape buffer will enhance the quality of life of those living in the adjacent residential properties by minimizing the impacts of noise and light.
3. The proposed use or development of the land will not substantially injure the value of adjoining or abutting property. The establishment of a landscape buffer on this property will not injure the value of adjoining properties. Many of the existing trees will be preserved and additional trees will be planted. The gravel access drive will be located adjacent to the commercial structure and will be screened from view.
4. The proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. The development of the residentially zoned property will be minimal. The only development proposed for this property will be limited to a narrow gravel access drive approximately 15 ft in length.
5. The proposed use or development of the land will generally conform with the comprehensive plan and other official plans adopted by the City. The Asheville City plan 2010 appears to show this area as commercial.

6. The proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. All services are available at this location, as confirmed during the review of the proposed development by the TRC.
7. The proposed use will not cause undue traffic congestion or create a traffic hazard. The landscape buffer and gravel access drive will not create a traffic hazard. The commercial use on this property is a gas station /convenience store that has been extensively remodeled. Plans for the renovation were reviewed and approved by the City's Traffic Engineer. Due to the low volume of traffic that will be generated by the use, no Traffic Impact Analysis was required.

The proposed project is a landscape buffer that will buffer adjacent residential properties from the gas station/convenience store and a gravel drive that will provide access to the mechanical equipment located at the rear of the store. The approval of this ancillary use in this residential district holds the line on commercial intrusion into the residential zone. Under the ancillary use standards, no further expansion is possible. The residential zoning of this parcel reserves the parcel for residential use at some point in the future.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council issue the Conditional Use Permit for an ancillary use (landscape buffer and gravel access drive) to be located at 103 New Leicester Highway with the condition that lights located at the rear of the store shall be located so as not to shine onto adjacent residential properties. These lights shall be full cut-off types and directed away from the residential properties.

Mr. Wilton Jordon, applicant, spoke in support of his request.

There being no request from the applicant for rebuttal, Mayor Sitnick closed the public hearing at 5:38 p.m.

Councilman Worley moved to adopt Ordinance No. 2827 to approve the conditional use permit with the condition that lights located at the rear of the store shall be located so as not to shine onto adjacent residential properties and that these lights shall be full cut-off types and directed away from the residential properties; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 204

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A DUPLEX ON PROPERTY ZONED RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT LOCATED AT 15 BROWNDALE ROAD IN THE OTEEN AREA

ORDINANCE NO. 2828 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A DUPLEX ON PROPERTY ZONED RS-8 RESIDENTIAL SINGLE FAMILY HIGH DENSITY DISTRICT LOCATED AT 15 BROWNDALE ROAD IN THE OTEEN AREA

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use permit process. This process is the consideration of granting a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

Councilmen Peterson and Worley disclosed that they visited the site.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:40 p.m.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 6/26/01) and City Exhibit 4 (Staff Report dated 7/10/01). This public hearing was advertised on June 29 and July 6, 2001.

Mr. Green said that this is the consideration of a motion to issue a conditional use permit for a duplex on property zoned RS-8 located at 15 Browndale Road in the Oteen area (City Exhibit 5 – Location Map).

Pamela Cunningham has submitted an application to construct a 1660 sq. ft. duplex in a single-family residential zoning district on a .17 acre parcel.

The proposed site plan and building elevation drawings meet the requirements of the Unified Development Ordinance (UDO). The proposed duplex will be constructed with a single front entrance, with the parking located to the rear of the building (City Exhibit 6 – Building Elevation) (City Exhibit 7 – Site Plan).

The applicant submitted revised plans that address the conditions of the Technical Review Committee (TRC) approval. A Transportation Impact Analysis was not required for this project.

Findings:

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The City of Asheville TRC reviewed the proposed project and found no health or safety concerns. The Project is required to meet the technical standards set forth in the UDO, the Asheville Standards and Specifications Manual, the North Carolina Building Code, and other applicable laws and standards which protect the public health and safety.

2) That the Project is reasonably necessary for the health and general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region.

   The proposed duplex will provide an opportunity infill housing in an established neighborhood.

3) That the Project will not substantially injure the value of the adjoining or abutting property.

   The proposed duplex will be of a scale and design in keeping with the other homes in the neighborhood (see comment regarding Condition 4 below).

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density and character of the area or neighborhood in which it is located.

The proposed use will be constructed so that there is only a single entrance visible from the street. The size and orientation of the building is similar to other single family development in the area. The parking will be located to the rear and screened with appropriate landscaping.

5) That the proposed use or development of the land will generally conform with the Comprehensive Plan and other official plans adopted by the City.

The Asheville City Plan 2010 indicates residential uses for this area.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The project was reviewed for compliance with technical standards by the City of Asheville TRC, which includes representatives of the Water Resources Department, the Fire Department, MSD, the Engineering Department, and the Public Works Department.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The City's Traffic Engineer has determined that the adjacent roads have more than adequate capacity to carry the traffic expected to be generated from this site.

Based on information available to the Planning & Development Department in advance of the public hearing, staff recommends approval of the conditional use permit to allow construction of a duplex in an RS-8 zoning district.

Mr. Green said that one issue City staff would like to added to the conditional use permit, if granted by City Council, is that the driveway must meet the setback and width requirements as established in the City's Standard Specifications and Details Manual.

Upon inquiry of Councilman Peterson, Mr. Green said that a single family house would have to meet the same setback requirements. He said the only difference here with the conditional use is that the house does have to have a single front entrance and the lot has to be a bit larger than if it were to be a single family home.

Ms. Pamela Cunningham, applicant, said that the purpose of the duplex is for investment property. She said the property will be aesthetically pleasing and would enhance the surrounding properties.

Mr. Randy Pitts felt that the applicant knew the property was zoned for single-family residences and they should not be allowed to build a duplex on the property. He said that this is a community of elderly people and they would welcome a single family unit on that lot which will contribute to the character of the community.

Ms. Debra Pitts, resident at 16 Browndale Road, said that the area is zoned for single family units and there is only one duplex on their street which was built in the 1940's (and that lot is three times the size of this proposed lot). She said the proposed lot is very small and the community would welcome a single-family unit, however, a duplex is not in keeping with the character of the community. She said the street is on the water critical needs list and there are currently run-off problems in the area. She urged City Council not to grant the conditional use permit.

Mr. Linda Hawthorne, owner of 13 Browndale Road, spoke in opposition to the duplex stating that she did not want a duplex next to her property and that the lot was too small. She passed out some pictures of neighborhood houses (Neighborhood Exhibit 1). She said that there are some large trees on this lot that will be cut down. She suggested a survey be performed to make sure the trees are actually on the applicant's property.

Mr. Green said that Council can place a condition on the conditional use permit that a survey with the trees located be provided to the Planning Department for review prior to the issuance of the conditional use permit for the project.

Ms. Cunningham said that there are some trees that seem to follow the property line and if they are close enough to be at all against or on the property line, then they will fall within the five foot buffer that will be landscaped.

Councilwoman Bellamy explained the difference between a modular home and a manufactured home, stressing modular homes must meet all N. C. building standards.

Upon inquiry of Councilwoman Field, Mr. Green explained how in-fill housing applies to the City's Smart Growth Policy.

There being no request from the applicant for rebuttal, Mayor Sitnick closed the public hearing at 6:12 p.m.

Mayor Sitnick expressed a little concern that Condition No. 4 may not have been met. However, if the permit is approved, she asked that a condition be attached to the permit that a survey be conducted to make sure that any trees that are on the property line can be saved.

Councilwoman Field moved to adopt Ordinance No. 2828 to approve the conditional use permit with the following conditions: (1) The driveway must meet the setback and width requirements as established in the City's Standard Specifications and Details Manual; and (2) a survey, with the location of the trees, be provided to the Planning Department for review prior to the issuance of the conditional use permit or before any tree is removed or before construction begins; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 208

IV. UNFINISHED BUSINESS:

A. REPORT FROM THE TASK FORCE ON THE FUTURE OF THE CIVIC CENTER

Councilman Hay, Chair of the Future of the Civic Center Task Force, acknowledged the following Task Force members: Councilman Worley, Tommy Sellers, Mike Kryzanek, Jan Davis, Laverne Laney, Mark Rosenstein, David Gantt and Tom Byers. He also acknowledged the advisory members who were as instrumental in this process as the Task Force members: Steve Steinert, Alfred White, Kelly Miller, Herb Smith, Alan Levy, Dan Wilhelm, Councilwoman Field and Steve Hagaman.

Councilman Hay then made the following report: Over the course of the past year the Task Force and its advisory members studied the three elements of the Civic Center: conventions, arena activities, and the performing arts. We considered a study commissioned by the TDA regarding the convention center, reports from visits to performing arts centers throughout the southeast, and made a through review of possible arena locations. In the late fall, consensus was reached that a first class performing arts center should be sited at the present location, and identified three arena locations (the existing site, UNC-Asheville, and City-County Plaza). It became clear to the Task Force that no further progress could be made without expert advice on the suitability of the existing complex for renovation, and it sought City Council authorization to commission an architectural and engineering study. Heery International was selected to perform the work, and the study was ongoing throughout the Spring of 2001. The architects met with the Task Force on several occasions, commissioned engineering and acoustical studies of its own, and made reports throughout the process.

On June 26, 2001, Heery made it's final presentation, which was shared with City Council on the same day. In summary, the report was as follows:

- The study began with a thorough review of the existing Center, which revealed that the buildings are in sound condition and suitable for renovation, but badly in need of upgrading and improvement. In addition, the existing Center, though sound if improved, presents significant programming issues if we want to continue to offer a wide range of events. The cost of the minimum improvements necessary to simply keep the Center operational with no modernization was set a $10 million.

- The existing arena is suitable for renovation, and a facility which meets the expectations of potential tenants as well as offering the amenities necessary for the maintenance of successful events can be constructed within the existing building at a cost (exclusive of site expenses) of $25 million. A new, similar arena meeting the same specifications on a different location would cost $40 million (also exclusive of site expenses). The study recommends renovation of the existing arena.

- The Thomas Wolfe Auditorium, although structurally sound, cannot be up-fitted to make it a first-class performing arts center, due to the limitations it presents in accommodating stage and acoustical improvements. The study recommends that the Auditorium not be renovated as a performing arts center, but that a new facility for that purpose be constructed on the east side of the Center.

- The study goes further to recommend that the Auditorium be renovated to create a 25,000 square foot fall (shown in the report as the "Great Hall") which would preserve its historical significance and also provide new opportunities for conventions, banquets, exhibits, and trade shows, as well as serving as a connection to events at the other venues. The cost of this portion was set at $6 million.

The Task Force met on July 2, 2001, to review the report, and by unanimous vote of those present, resolved to recommend to City Council that the Heery study be adopted as the plan for the Civic Center. In their opinion, the Heery plan addresses Civic Center concerns in the following ways:

- Renovation, rather than relocation, of the arena is significantly less expensive while providing the opportunity for a fully-functional facility. The study is very careful to state that the costs presented do not include site preparation, but are meant to compare the actual expenses of constructing the buildings. The Task Force believes that the use of the existing Civic Center would cost less for site preparation than at a new location, and would permit construction without the addition of ancillary features, such as new parking. Renovation offers the opportunity for a fully functional facility with 8,000 seats for concerts and sports tournaments, 4,500 to 5,000 prime seats for hockey and basketball, and stage facilities for shows and concerts which we presently can't host. In addition, the plan anticipates the construction of modern amenities, such as restaurants, luxury suites, and merchandise displays, making the events more attractive and financially viable.

- The arena plan utilizes retractable seating to preserve the exhibit space on the arena floor, and provides a connection to the Thomas Wolfe Auditorium for an enhanced venue for trade shows and conventions.

- The anticipated eastern orientation will allow for redirection of traffic from the redesigned Merrimon Avenue interchange with I-240, and stimulate investment on Lexington Avenue.

- The new performing arts center will give the community an improved facility for existing performances, and attract new entertainment events. By providing excellent facilities, it can be the centerpiece for further development of downtown as an arts and entertainment district.

- The renovation of the Thomas Wolfe Auditorium will not only preserve the historic significance of the building but also give it new life as a community resource worthy of banquets, community events, graduations, and exhibits (as "new space," we expect that its uses cannot be fully foreseen, which is part of its appeal). In addition, it will complement the activities in the arena and the performing arts center, and provide enhanced space for events like the Southern Highlands Craft Show, which we believe are an essential part of the City's downtown vitality.

- The plan anticipates the creation of flexible space, with meeting rooms and other amenities which are necessary for attraction and retention of conventions and conferences. The Hunter Interest Report of several years ago identified the need for a new 25,000 square foot ballroom, which is accomplished by the renovation of the Thomas Wolfe Auditorium.

The Task Force has been mindful of several issues throughout the process which they feel must be emphasized as City Council considers adopting the plan:

- Parking and Access. The Task Force believes that the planned parking deck on Battery Hill and the N. C. Dept. of Transportation re-design of the Merrimon Avenue interchange, both of which are to be completed in the very near future, will address parking and access concerns. The plan anticipates these improvements in order to take full advantage of these opportunities. It is important, however, that the Civic Center plan is taken into account as designs are provided for these projects. City Council should affirmatively state its intentions so that all efforts will complement one another.

- Funding: A funding plan cannot be established until we have adopted a clear vision of what we seek to build. The funding sources should be a mix of local government, state authorized tax revenue, commercial investment, and private contributions. We cannot expect those who will be asked to make difficult funding decisions to act without being clear about where the money will go. It is our responsibility to develop a vision for what will best serve our community. Adoption by City Council will represent a significant step in securing the financial support necessary to make the plan a reality.

This report represents several years work by the Task Force and its advisory members, and has required a considerable investment of the City's time and resources. Although we have endured more than one period of frustration and disappointment, we have always known that the effort was important. Our Civic Center is a fundamental part of our community life, and expression of who we are. We believe that the Heery Report embodies that goal and it is with pride that we recommend its adoption.

Specifically, the Task Force recommends (1) that City Council adopt the Heery Report as the City's Conceptual Plan for the Asheville Civic Center; and (2) that the Task Force be directed to identify steps necessary to implement the Plan, and report to the City with its recommended next actions.

Councilman Worley emphasized that $25 Million for a renovated arena vs. $40 Million for a new arena are exclusive of site costs. It is very reasonable to believe that the site costs at the existing site would be minimal because utilities are already there, the grading has already been done, etc. Those site costs would likely be very substantial at another site. In addition, parking for example, can actually by itself run into millions of dollars.

Councilwoman Field asked that the report be revised to correct the mislabeling of "Broadway" instead of "Lexington".

Mr. Mickey Mahaffee felt that this is a wonderful plan if we had money from the private sector. He opposed any taxes being raised for this purpose. If the City puts a lot of money into this venture, there will be many other things important neglected.

Mr. Steve Steinert, President of the Asheville Area Arts Council, spoke about how enthusiastic the arts community is with this project. He said that discussions are underway for a public/private relationship to fund the facility.

Councilwoman Field pointed out that there are funding opportunities that we haven't even been considered. She said that the City needs to put together the right team to bring ideas to the forefront.

Ms. Sharon Martin was concerned about the funding for the project. She wondered how the Tourism Development Authority plans on supporting this so that the citizens of Asheville, who may or may not take part in this Civic Center directly, will avoid having to subsidize this through our tax dollars.

Mr. Dennis Justice, representing Save our Smoke, expressed concern over the seating capacity, the costs for renovation and the location.

Mr. Fred English, resident in Haw Creek, suggested the City build a new arena somewhere else, put a penny tax on everything and pay for it.

Mr. David Hantz spoke in support of the performing arts center.

Mr. Chad Nesbitt questioned how the City is going to raise money for this renovation.

Dr. Joe Dunn, representing Citizens for Change, expressed concern about the access to the Civic Center, the seating capacity, and security in the parking deck at night. He felt the Civic Center should not be located downtown and the entire issue should be put on the ballot in the fall and let the citizens decide. He also felt the City should give the Thomas Wolfe Auditorium to the arts community and let them renovate it themselves.

Councilwoman Field explained why the Civic Center should be renovated at its present location stressing that what matters is that we keep a strong central core for the growth of our community.

Dr. Carl Mumpower, Chairman of the Civic Center Commission, spoke in support of the conceptual plan noting that people may criticize the current Civic Center, but it has touch a lot of lives and has a rich history and this is a reasonable effort to set the stage for a rich future.

A brief discussion surrounded whether City Council should vote at this meeting to accept the Conceptual Plan or whether to postpone action in order to give the public time to review the report. As a result, Vice-Mayor Cloninger moved to consider adoption of the Heery International

Report as the City's Conceptual Plan for the Asheville Civic Center at the July 17, 2001, worksession. This motion was seconded by Mayor Sitnick and carried unanimously.

V. NEW BUSINESS:

A. RESOLUTION NO 01-113 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Cloninger said that the terms of Carl Mumpower, Joyce Dorr, Paul Hornyak and Laverne Laney, as members on the Civic Center Commission, expire on June 30, 2001.

Dr. Mumpower, Mr. Hornyak and Ms. Laney are eligible for reappointment and all have expressed interest in reappointment.

On June 12, 2001, City Council interviewed Mr. James Grant and Mr. Dan Breneman.

Councilman Hay moved to reappoint Carl Mumpower, Paul Hornyak and Laverne Laney to each serve an additional 3 year term respectfully, terms to expire June 30, 2004, or until their successor have been appointed. This motion was seconded by Councilman Worley and carried unanimously.

James Grant received 2 votes and Dan Breneman received 5 votes. Therefore, Dan Breneman was appointed to the Civic Center Commission to serve a three year term, term to expire June 30, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 26 – PAGE 417

VI. OTHER BUSINESS:

A. RESOLUTION NO. 01-114 – RESOLUTION SUPPORTING SENATE BILL 1078 AND HOUSE BILL 1015 ENTITLED AN ACT TO IMPROVE AIR QUALITY IN THE STATE BY REQUIRING REDUCTIONS IN THE EMISSIONS OF CERTAIN POLLUTANTS FROM CERTAIN FACILITIES THAT BURN COAL TO GENERATE ELECTRICITY

Mayor Sitnick explained the importance of air quality in Western North Carolina. She passed out to City Council Senate Bill 1078 entitled "An Act to Improve Air Quality in the State by Requiring Reductions in the Emissions of Certain Pollutants from Certain Facilities that Burn Coal to Generate Electricity." She asked City Council to consider adoption of a resolution supporting Senate Bill 1078 and House Bill 1015.

Mayor Sitnick read a resolution stating that legislation to reduce air pollution from North Carolina's 14 coal-fired power plans by 70% has been introduced by local legislators Senator Steve Metcalf (SB 1078) and Representative Martin Nesbitt (HB 1015). The Act introduced will reduce nitrogen oxide, sulfur dioxide and mercury pollution emissions from the coal-fired power plants during the next decade and will direct the state to take the necessary steps to address out-of-state sources of air pollution that are damaging North Carolina's public health and environment. The coal-fired plants built before 1975 were exempted from current air quality standards under the federal Clean Air Act and are the largest source of air pollution in North Carolina. The City Council is of the opinion that passage of the proposed legislation would be in the best interest of the citizens and residents of Buncombe County and would help protect public health, preserve our environment and improve our economy. The City Council does hereby support the passage of House Bill 1015 and Senate Bill 1078 and the immediate implementation of said legislation.

Councilman Worley moved to adopt Resolution No. 01-114 as read by Mayor Sitnick and that said resolution be sent to the N. C. League of Municipalities for dissemination to North Carolina cities, the local legislative delegation, Governor Mike Easley, Speaker of the House James Black, President Pro Tempore of the Senate Marc Basnight, Chair of the House Public Utilities Committee Ronald Smith, and Chair of the House Committee on Environmental and Natural Resources Pryor Gibson.. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 418

B. RESOLUTION NO. 01-114 – RESOLUTION REQUESTING THE N. C. DEPT. OF TRANSPORTATION AND THE FEDERAL HIGHWAY COMMISSION HOLD A PUBLIC HEARING ON PROJECT I-4400 (I-26 WIDENING) IN THE CITY OF ASHEVILLE

Mayor Sitnick passed out to Council several pieces of information regarding the N. C. Dept. of Transportation's Project I-4400 which would widen I-26 from four to six lanes from Hendersonville in Henderson County to the Asheville Regional Airport in Buncombe County, and would be a pilot design/build project to begin in the autumn of 2001 and completed prior to 2004 at a cost of $74,400,000. While only a half-mile section of this project is in Buncombe County, there are concerns and questions about the widening as it is presently designed and planned, and a public hearing is being requested in Buncombe County. The Metropolitan Planning Organization has requested a public hearing, however, there has been no response to this request. She asked City Council consider adopting a resolution requesting the N. C. Dept. of Transportation (NC DOT) and the Federal Highway Commission hold a public hearing on this project in the City of Asheville, which is the geographic and population center of Buncombe County.

Ms. Betty Lawrence explained how this project is on the fast track and the importance of public participation in transportation planning. Council asking for a public hearing in Asheville on this project could give more time for them to work collaboratively with the NC DOT.

Vice-Mayor Cloninger moved to request the NC DOT and Federal Highway Administration to hold a public hearing on Project I-4400 in the City of Asheville. Said resolution should (1) reference the vote taken by the City of Hendersonville in which they have expressed concerns, some of which relate to how the project will serve both of our cities; (2) ask that the public hearing not be held on a Tuesday and/or the hearing be held after 5:00 p.m.; and (3) note that City Council is opposed to NC DOT proceeding with the project before a public hearing is held in Buncombe County. This motion was seconded by Councilwoman Bellamy and carried unanimously.

C. CLAIMS

The following claims were received by the City of Asheville during the period of June 22-July 5, 2001: Larissa Clegg (Streets), Wayne Earley (Sanitation), Natasha Allen (Streets), Coquitta Fleming (Parks & Recreation), BellSouth (Water) and Ted Warner (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

D. LAWSUIT

The City filed a Complaint on June 27, 2001, against Buncombe County. It was a complaint for a declaratory judgment invalidating Buncombe County Resolution No. 01-05-11;

and for a preliminary and permanent injunction prohibiting the County from interfering with the City's exercise of its extraterritorial jurisdiction. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Chad Nesbitt

Mr. Chad Nesbitt felt it was inappropriate for City Council to consider only building a civic center in the City limits and not in Buncombe County.

Comments by Mickey Mahaffee

Mr. Mickey Mahaffee, representing Peacemakers, reported that the City is doing a good job in keeping litter up off the streets in downtown and suggested that businesses take more care with where they put their trash. He did note that there is a severe shortage of trash cans in the downtown area. With regard to the Civic Center conceptual plan, he didn't have a problem with it, however, because of the severity of other situations in our City, he didn't feel the Civic Center should take priority. He felt City Council should put as much effort and energy into our water system as they do to the Civic Center. He asked City Council to remove the payment in lieu of taxes from the water system.

Comments by Fred English

Mr. Fred English felt City Council should put the Civic Center renovation vs. rebuild on the ballot in November for the citizens to decide.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 8:40 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

442

Tuesday – July 17, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Renewal of License Agreement with Motient Communications Inc. for Antenna at 36 Reservoir Road

Summary: The consideration of a resolution authorizing the City Manager to enter into a License Agreement with Motient Communications, Inc., for an antenna at 36 Reservoir Road.

The Notice of Intent to enter into a License Agreement with Motient Communications Inc. was published on Friday, July 13, 2001, in the Asheville Citizen-times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

The property at 36 Reservoir Road is the site of the former White Fawn Reservoir. In recent years the site was used as a beneficial fill site for the City of Asheville. Currently, three telecommunication towers are located on the property and the City of Asheville leases antenna space on two of the towers and ground space for related equipment to a total of eight tenants. One tower is not in use. The property is the proposed future site of the "Sister Cities Park."

Motient Communications, Inc. has operated an antenna and related equipment at the site since October, 1995. The antenna is located on the tower known as the "BellSouth Tower" which is immediately west of the proposed Sister Cities Park. The proposed License Agreement will enable Motient to continue operating an antenna at that site; however, there is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Motient will pay a License Fee of $5,400 the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee Motient will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the resolution authorizing the City Manager to execute the License Agreement with Motient Communications Inc.

Budget Amendment for Pritchard Park Donation

Summary: The consideration of a budget amendment, in the amount of $3,000, for a donation from the Dogwood Fund of the Community Foundation of Western North Carolina.

The City of Asheville staff had several conversations with representatives of the Dogwood Fund of the Community Foundation of Western North Carolina about their interest in supporting the renovation of Pritchard Park. The fund is able to make a donation in the amount of $3,000 towards the purchase of pedestrian lighting and tables in the park space.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for the Pritchard Park.

Upon inquiry of Councilwoman Bellamy, City Manager Westbrook said that he would provide a report to Council regarding the cost of Pritchard Park and the breakdown of donations vs. City money.

Minority Business Commission Appointments

Summary: The consideration of a resolution confirming the appointment of three members and the reappointment of six members to the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The composition of the Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Mr. Iba Taye has been named by Eagle/Market Streets Development Corporation to represent them on the Minority Business Commission. Mr. Taye has been nominated to replace Stephanie Coleman who resigned on December 14, 2000. Mr. Taye's term will expire August, 2004.

Ms. Lisa Slechter has been named by the National Association of Women in Construction to represent them on the Minority Business Commission. Ms. Slechter has been nominated to replace Lynn Staton whose term will expire August, 2001. Ms. Slechter's term will expire August, 2004.

Mr. Alejandro 'Al' Cortés, owner of AC Interpreting Service, has been named by the Minority Business Commission to replace Ms. Gráinne Brophy, former owner of Altura Environmental, Inc., who resigned on December 29, 2000, as a minority business owner representative. Mr. Cortés will complete the unexpired term of Ms. Brophy through August, 2002.

The following MB Commission members whose term expires August, 2001, have requested reappointment:

Ms. Jacquelyn Schauer	American Institute of Architects
Ms. Vonna Cloninger	Council of Independent Business Owners
Ms. Debra Weaver	Minority Business Alliance
Ms. Carol Hensley	Asheville Area Chamber of Commerce
Mr. Wendell Howard	Associated General Contractors of America
Ms. Valerie Dennis	Minority Business Owner (Val's Frame Shop)

City staff recommends City Council adopt the resolution confirming the appointments members of the Minority Business Commission.

Clerk to Advertise for Upset Bids on Property at 5 - 7-1/2 Biltmore Avenue and Parking Lot on South Lexington Avenue

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase 5 - 7 1/2 Biltmore Avenue and the parking lot on South Lexington Avenue.

The property at 5 - 7 1/2 Biltmore Avenue is located about 75 feet south of Pack Square. It is improved with two store front buildings dating from the 1920s. The land area comprises 8,030 square feet and the total combined building area is approximately 5,535 square feet. The lot located on the east side of South Lexington Avenue, about 75 feet south of the intersection with Patton Avenue, is contiguous with the Biltmore Avenue lot and is improved with marked and metered parking spaces on an asphalt surface. Both lots are rectangular in shape and mostly flat with street level access. The combined appraised value of the property is $461,000.

Robert Camille Jr., Peter Y. Alberice and Robert M. Todd have submitted a proposal to purchase the property in the amount of $461,000. The bid from Camille, Alberice and Todd includes the proposal to renovate 5 Biltmore Avenue as well as to construct a new mixed use building containing parking, retail, offices and residential units on South Lexington Avenue. The new building would contain approximately 40,000 square feet and an estimated value after completion of about $6.8 million.

Approval of the resolution will establish the appraised value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Request to Withdraw Bid to Purchase Property at 125 Iris Drive and Refund of Bid Deposit

Summary: The consideration of a resolution authorizing the release of the bidder and return of the bid deposit, less advertising expenses, in connection with an offer to purchase 125 Iris Drive.

Brian K. Perry was the successful bidder on the vacant lot at 125 Iris Drive in the amount of $12,200. Mr. Perry submitted a bid deposit with his bid in the amount of $610. After City Council approved the sale to Mr. Perry, he was notified by his employer, Square D Company, that he would be included in a permanent workforce reduction. As a result of this change in his financial capacity, Mr. Perry is unable to complete the purchase of the property and has requested that the City release him from his bid on 125 Iris Drive and return his bid deposit. Staff recommends return of the bid deposit, less the cost of advertising. Mr. Perry has indicated his acceptance of staff's recommendation. The cost of advertising for upset bids amounted to $98.28. The amount of bid deposit recommended to be returned to Mr. Perry is $511.72.

Approval of the resolution will authorize the release of Mr. Perry from the bid and return of his bid deposit less advertising cost.

Planning staff recommends adoption of the resolution.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

BUNCOMBE COUNTY ECONOMIC DEVELOPMENT COMMISSION INFORMATION TECHNOLOGY UPDATE

Mr. Dave Porter, Vice-President of Economic Development at the Chamber of Commerce, and Mr. Daniel Prevost, Chairman of the Asheville Area Information Technology Council, updated City Council on the use of funds for Fiscal Year 2000-01 which involved the information technology marketing plan and the office market analysis. They explained that the Commission (1) established the Asheville Area Information Technology Council (over 70 members); (2) completed the Information Technology Marketing Plan; (3) had their first success of eWorker Technologies which relocated their corporate headquarters to Asheville; (4) outlined their publicity; and (5) explained how they partnered with the local real estate community and AdvantageWest to develop a sophisticated office market report which will enhance their ability to market the area to high technology firms.

Mr. Porter explained that the Economic Development Commission will allocate the City's entire $50,000 for the implementation stage of the Information Technology Marketing Plan. Developing a website will be the first priority followed by direct mail and/or special advertisements to drive people/targeted companies to the website.

Mr. Porter responded to inquiries from Council, some being, but are not limited to: what the Commission is doing in particular to capture companies who are closing in California because of the current energy crisis and impending water crisis; is the Commission doing anything regarding bringing educational resources to WNC; how well connected are we with band width; and the need to be cautious with the bio-tech industry.

Councilman Hay, City appointee to the Buncombe County Economic Development Commission, spoke in support of the work of the Commission.

On behalf of City Council, Mayor Sitnick thanked Mr. Porter and Mr. Prevost, along with the entire Economic Development Commission for their work.

LEASE AGREEMENT WITH DISCOVERY MOUNTAIN CORPORATION LTD.

Civic Center Director David Pisha said that this is the consideration of authorizing the City Manager to enter into a three year contract with Discovery Mountain Corporation, Ltd., (herein DMC) for indoor football games at the Civic Center.

The Civic Center has considered the interest shown by DMC in placing a minor league football team in the facility. There are advantages to the City in pursuing this opportunity. These advantages along with highlights of the contract are as follows:

Premises: The areas of use will include the arena, concourse around the arena, locker rooms A, B, C and D, meeting rooms and Banquet Hall on game days. The team, DMC, may practice in the arena for up to one hour on the field. They will not be supplied air conditioning during practice. No office space will be provided for the team or administration offices. If office space within the Center becomes available, they have the option to sign a second lease for it.

Rent: Rent is $6,500.00 per game. They intend to play eight (8) home games during a regular season. They have agreed to pay the entire rental amount due, $52,500.00, by September 1 of each year prior to the start of the season. The season would start in April of the following calendar year.

Staffing: The City has agreed to supply event staffing out of rental proceeds. This staff includes an event coordinator, ticket takers, ushers, door guards, police and emergency medical

446

personnel. Stagehands are excluded from the above definition of staffing. If they are used, there will be an additional charge. If the usage of such personnel exceeds $2,000.00 for any game, DMC will pay the excess over this cutoff. It is not anticipated that staffing costs will exceed the cutoff.

No staffing will be provided by the City to present the game itself. This staffing will be the responsibility of DMC. This type of staff includes scorekeepers, referees, football officials, cheerleaders and personnel necessary to secure their locker rooms on game days. No security will be provided for any season ticket holder lounge nor will medical personnel be provided to the teams. This staffing will also be the responsibility of DMC.

Equipment: The City has agreed to provide limited equipment. This includes spotlights, use of the forklift, tables and electrical service. If the charges for provided equipment exceed $750.00 as stated in the Center's fee document, DMC will pay the amount in excess of that cutoff. It is not anticipated that usage will exceed the cutoff.

Other Expenses: DMC will still be responsible to pay any TicketMaster charges, credit card fees, taxes or surcharges in addition to the rental payment shown above. Any staffing costs to install or remove temporary advertising will be at their cost as well.

Term: The term is for three years. It begins July 1, 2001, and ends with the last home game of the 2004 season or September 1, 2004, whichever comes first.

Storage: The City has agreed to provide the team with 250 square feet of storage space during their season.

PA System & Scoreboard: The City has agreed to make the existing PA and scoreboard available to the team. The City is responsible for maintaining the equipment. DMC is responsible for any equipment conversion of the scoreboard for use for their games. The City has agreed to pay the labor for any such installation.

Arena Advertising: DMC has the right to sell temporary advertising during their season. If their season overlaps with hockey, hockey advertising will have priority until the hockey season is completed.

Ticket Sales: All ticket sales must be handled under the existing TicketMaster contract the City currently uses.

Concession Sales: The City keeps 100% of all such sales.

Merchandise Sales: The team keeps 100% of all such sales up to an agreed upon cutoff. DMC will pay the City 10% of any net sales beyond $500,000 per year.

Locker Room: The team will share locker room space with other tenants in the building. No improvements were requested by them or anticipated by the City.

Termination by City: The City may terminate the contract for good cause.

Other Facts/Advantages:

- Indoor football uses a "dasher" system just like hockey. Since the City already owns this equipment, no extraordinary start-up costs are necessary.
- DMC will provide, at it's own cost, the playing surface needed for their event.

- Labor costs to re-install or remove this playing surface should be minor. It can be handled in several hours.

- DMC will provide, at it's own cost, covers to protect arena lighting from any possible damage that may occur at the games.

- Staffing and other expenses are projected to be reasonable in relation to rental income.

- Indoor football games are conducted from April through July. This is a time of low event activity at the Civic Center. Furthermore the games would not conflict with the other two sports tenants in the building, nor would the games reduce the opportunity to book other events into the arena.

Mr. Pisha then reviewed with Council the following indoor football pro forma for three attendance scenarios (all figures being based on eight home games): 2,500 - $73,000; 3,000 - $79,400; and 3,500 - $85,600.

City staff recommends that City Council approve the lease and direct the City Manager to sign the contract.

Mr. Pisha responded to a question from Councilwoman Bellamy regarding the Assistant Director position being shared with the NBDL and hockey and why those figures were not included in the pro forma.

Upon inquiry of Mayor Sitnick, Mr. Cedric Scott said that DMC has no relationship to XFL. He said that they have 18 teams across the County and are moving toward 24 next season.

When Councilwoman Bellamy asked about local participation, Mr. John Barisa said that they plan to involve hometown talent.

Councilwoman Bellamy said that what makes this so appealing is that the owners are local and they are doing business with people in our community.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

RESOLUTION NO. 01-116 - RESOLUTION ADOPTING HEERY INTERNATIONAL INC.'S ARCHITECTURAL FEASIBILITY STUDY AS THE CITY'S CONCEPTUAL PLAN FOR THE ASHEVILLE CIVIC CENTER

Councilman Hay, Chair of the Future of the Civic Center Task Force, reviewed with Council the Task Force's report given in detail at the July 10, 2001, formal meeting of City Council. A motion was made, seconded and carried unanimously on July 10 to take formal action on the Heery Report at this worksession.

Councilman Worley emphasized that if the Report is approved, that it is not a commitment to spend the money. It is, in fact, a plan to take out to the public to try to find the resources of build it. Adoption will direct the Task Force to identify steps necessary to implement the Plan and report back to City Council with its recommended next actions.

Councilwoman Bellamy spoke in support of the concept, however, her concerns surrounded if it can be built and can that amount of money be raised.

The following individual spoke in support of adoption of the Heery Report, all pledging their time, energy and support to raise necessary funds:

Mr. Robert Hart Baker, Music Director of the Asheville Symphony Orchestra
Mr. David Craig Starkey, Founder and General Director of the Asheville Lyric Opera
Ms. Linda Alford, President of Asheville Bravo Concerts Board of Directors
Mr. Peter Carver, Executive Director of the Asheville Community Theatre
Mr. Alan Levy, resident and merchant of Asheville
Mr. Joseph Egger, Conductor/Music Director of the Symphony for United Nations in New York and Florida
Ms. Jan Millen, Executive Director of Asheville Bravo Concerts
Mr. Steve Steinert, President of Asheville Arts Council
Mr. Dan Henry, Technical Director of Diana Wortham Theatre
Dr. R. Carl Mumpower, Chair of Civic Center Commission

The following individuals spoke in opposition to Council adopting the Heery Report for several reasons, some being, but are not limited to: the plan doesn't have financial backing or support of all City residents; UNC-Asheville would have been a better location for a new arena; and City Council seems in too much of a rush to adopt the plan; and seating capacity for hockey games is not adequate:

Mr. Jerry Rice, Buncombe County resident
Dr. Joe Dunn
Mr. Dennis Justice, representing Asheville Smoke Booster Club

Councilman Peterson asked about how the renovation would coincide with the indoor football schedule. Councilman Hay said that when the Heery Report was being prepared, the indoor football proposal was not before City Council. However, he said that the City basically asked Heery if they felt the renovations could be performed without interfering with the sports teams schedules, and they felt it could.

Upon inquiry of Councilman Peterson about naming rights for a new arena vs. a renovated arena, Councilman Worley said that there was no discussion about that. He said this is more of a re-build within an existing shell rather than a renovation.

Vice-Mayor Cloninger spoke in support of this concept in that it will be one of the most challenging projects our community has ever had. He felt the only way is to get different groups together, i.e., business, arts, tourism, sports community, etc. in order to work together to get the support that is needed. Since the City will not use property taxes to fund this, they will be looking at other sources. City Council will look locally in the community from private sources and hope to go to the legislature to get some help there as well. But before we go to the legislature, we need to build that support locally in order to convince our legislators that this is a project Asheville wants and then they will have the confidence to help us with what we need.

Mayor Sitnick noted that Asheville is an arts destination and this kind of facility will help promote that image. She explained how the civic cultural centers and arts are part of economic development. She said from a quality of life point of view, you can't beat having a cultural civic arts center. She said that since 80% of the people who use the Civic Center are from outside the City of Asheville, we need to explore all the sources of funding this facility, e.g., naming rights, private funding, state funding, some local government funding by way of a local option sales tax, and most importantly some of the room tax ear-marked for this project.

Councilman Worley said that the present Civic Center has been a fine facility over the years, but has lost its functionality. He realized that we have a challenge to come up with the funding but if we don't have a vision, we will never reach that challenge.

Councilwoman Bellamy said that in order for this concept to be accepted by the full community, City Council needs to have a unified front. Her concern over how we are going to pay for this is real, however, the concept is good and she will vote in favor of the plan. She agreed with the rest of Council that property taxes will not be used on this project.

Councilman Peterson believed that a better approach for the arena is to build something new either at that location or at another location, possibly in cooperation with UNC-Asheville near the campus. He said that even with the renovations there are a lot of problems, e.g., site lines from the balcony. He felt the performing arts center is a good long-term goal, but the immediate need is the arena and that is what the City should be focusing on. He wished there had been more information about constructing something different.

Councilman Hay moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilman Worley and carried unanimously.

Councilman Worley and Councilman Hay both moved to adopt the Heery International Inc. Architectural Feasibility Study as the City's Conceptual Plan for the Asheville Civic Center and direct the Task Force to identify steps necessary to implement the Plan and report to the City with its recommended next actions. This motion was seconded by Vice-Mayor Cloninger and carried on a 6-1 vote, with Councilman Peterson voting "no".

RESOLUTION BOOK NO. 26 – PAGE 420

At 5:20 p.m., Mayor Sitnick announced a ten minute recess.

SALE OF LAND AND AWARD OF GRANT FOR DEVELOPMENT OF EAST END PLACE SUBDIVISION

Community Development Director Charlotte Caplan said that this is the consideration of the sale of land and award of subsidies for development of East End Place Subdivision.

On September 12, 2000, the City Council authorized a request for proposals (RFP) for development of a six-unit subdivision off Martin Luther King. Jr. Drive, called East End Place Subdivision. After amending the original site design from seven units to six, the RFP was advertised on April 24, 2001. Proposals had to include the developer's bid for purchase of the land and details of the design and cost of the homes. The City offered a Community Development Block Grant (CDBG) subsidy of $78,000 towards infrastructure costs and $42,000 in secondary financing for the homebuyers.

Responses were received from Asheville Area Habitat for Humanity, Inc. and Ron Moser Homes, Inc. A panel comprising the neighborhood association president, an architect, and staff evaluated the proposals using criteria set out in the RFP. The panel recommended the proposal from Habitat.

The Housing and Community Development Committee has reviewed and supported the panel's recommendation.

Staff recommends approval of the resolution authorizing the sale of the property to Asheville Area Habitat for Humanity, Inc. for $77,000 and award of the CDBG subsidies.

450

Councilwoman Field and Councilman Hay, both members on the Housing & Community Development Committee, explained that the Committee is going to review the process of how non-profits and for-profits can both be involved in creating affordable housing.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

OTHER BUSINESS

Upon a request by Mayor Sitnick to adopt a resolution that requests a consolidated environmental assessment of the N. C. Dept. of Transportation Project I-4400, it was the consensus of City Council to instruct the City Manager to arrange for a worksession to update City Council on the N.C. Dept. of Transportation I-26 widening project.

Mayor Sitnick asked City Council members for ways in which the City can honor the memory of Ben Slosman.

CLOSED SESSION

At 5:55 p.m., Councilman Hay moved to go into closed session for the following reasons (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4); (2) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. Williams, Paul E. Fruits, B. Joy MacFadyen Bulluck, Buncombe County, and City of Asheville - G.S. 143-318.11(a)(3); (3) to consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee - G.S. 143-318.11(a)(3); and (4) to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act - G.S. 143-318.11(a)(2). This motion was seconded by Councilman Worley and carried unanimously.

At 6:32 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 6:32 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – July 24, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor M. Charles Cloninger and Councilman Edward C. Hay Jr.

INVOCATION

Councilman Peterson gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING AUGUST 14, 2001, AS THE "WILLIAM F. WOLCOTT JR. SCHOLARSHIP FUND DAY"

Mayor Sitnick read the proclamation proclaiming Tuesday, August 14, 2001, as "William F. Wolcott Jr. Scholarship Fund Day." She presented the proclamation to Mrs. Mary Ellen Wolcott and her son Billy and her daughter Debbie, who thanked City Council for their support. She also recognized Mr. John Miall, Mr. Ken Michalove and Mr. Tom Byers.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 10, 2001, AND THE WORKSESSION HELD ON JULY 17, 2001

B. RESOLUTION NO. 01-117 - RESOLUTION APPOINTING MEMBERS TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of three members and the reappointment of six members to the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan.

The composition of the Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Mr. Iba Taye has been named by Eagle/Market Streets Development Corporation to represent them on the Minority Business Commission. Mr. Taye has been nominated to replace Stephanie Coleman who resigned on December 14, 2000. Mr. Taye's term will expire August, 2004.

Ms. Lisa Slechter has been named by the National Association of Women in Construction to represent them on the Minority Business Commission. Ms. Slechter has been nominated to replace Lynn Staton whose term will expire August, 2001. Ms. Slechter's term will expire August, 2004.

Mr. Alejandro 'Al' Cortés, owner of AC Interpreting Service, has been named by the Minority Business Commission to replace Ms. Gráinne Brophy, former owner of Altura

Environmental, Inc., who resigned on December 29, 2000, as a minority business owner representative. Mr. Cortés will complete the unexpired term of Ms. Brophy through August, 2002.

The following MB Commission members whose term expires August, 2001, have requested reappointment:

Ms. Jacquelyn Schauer	American Institute of Architects
Ms. Vonna Cloninger	Council of Independent Business Owners
Ms. Debra Weaver	Minority Business Alliance
Ms. Carol Hensley	Asheville Area Chamber of Commerce
Mr. Wendell Howard	Associated General Contractors of America
Ms. Valerie Dennis	Minority Business Owner (Val's Frame Shop)

City staff recommends City Council adopt the resolution confirming the appointments members of the Minority Business Commission.

RESOLUTION BOOK NO. 26 – PAGE 421

C. RESOLUTION NO. 01-118 - RESOLUTION AUTHORIZING A TELECOMMUNICATION LEASE RENEWAL WITH MOTIENT COMMUNICATIONS INC. FOR AN ANTENNA AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to enter into a License Agreement with Motient Communications, Inc., for an antenna at 36 Reservoir Road.

The Notice of Intent to enter into a License Agreement with Motient Communications Inc. was published on Friday, July 13, 2001, in the Asheville Citizen-times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

The property at 36 Reservoir Road is the site of the former White Fawn Reservoir. In recent years the site was used as a beneficial fill site for the City of Asheville. Currently, three telecommunication towers are located on the property and the City of Asheville leases antenna space on two of the towers and ground space for related equipment to a total of eight tenants. One tower is not in use. The property is the proposed future site of the "Sister Cities Park."

Motient Communications, Inc. has operated an antenna and related equipment at the site since October, 1995. The antenna is located on the tower known as the "BellSouth Tower" which is immediately west of the proposed Sister Cities Park. The proposed License Agreement will enable Motient to continue operating an antenna at that site; however, there is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Motient will pay a License Fee of $5,400 the first term with a 10.5% increase at each renewal thereafter. In addition to the License Fee Motient will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the resolution authorizing the City Manager to execute the License Agreement with Motient Communications Inc.

RESOLUTION BOOK NO. 26 – PAGE 423

D. ORDINANCE NO. 2829 - BUDGET AMENDMENT FOR A DONATION FROM THE DOGWOOD FUND OF THE COMMUNITY FOUNDATION OF WNC FOR PRITCHARD PARK

Summary: The consideration of a budget amendment, in the amount of $3,000, for a donation from the Dogwood Fund of the Community Foundation of Western North Carolina.

The City of Asheville staff had several conversations with representatives of the Dogwood Fund of the Community Foundation of Western North Carolina about their interest in supporting the renovation of Pritchard Park. The fund is able to make a donation in the amount of $3,000 towards the purchase of pedestrian lighting and tables in the park space.

The Parks and Recreation Department recommends City Council approve the budget amendment to increase the budget for the Pritchard Park.

ORDINANCE BOOK NO. 19 - PAGE 212

E. RESOLUTION NO. 01-119 - RESOLUTION ESTABLISHING MINIMUM PRICE AND DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS FOR PROPERTY AT 5 – 7-1/2 BILTMORE AVENUE AND THE PARKING LOT ON SOUTH LEXINGTON AVENUE

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase 5 - 7 1/2 Biltmore Avenue and the parking lot on South Lexington Avenue.

The property at 5 - 7 1/2 Biltmore Avenue is located about 75 feet south of Pack Square. It is improved with two store front buildings dating from the 1920s. The land area comprises 8,030 square feet and the total combined building area is approximately 5,535 square feet. The lot located on the east side of South Lexington Avenue, about 75 feet south of the intersection with Patton Avenue, is contiguous with the Biltmore Avenue lot and is improved with marked and metered parking spaces on an asphalt surface. Both lots are rectangular in shape and mostly flat with street level access. The combined appraised value of the property is $461,000.

Robert Camille Jr., Peter Y. Alberice and Robert M. Todd have submitted a proposal to purchase the property in the amount of $461,000. The bid from Camille, Alberice and Todd includes the proposal to renovate 5 Biltmore Avenue as well as to construct a new mixed use building containing parking, retail, offices and residential units on South Lexington Avenue. The new building would contain approximately 40,000 square feet and an estimated value after completion of about $6.8 million.

Approval of the resolution will establish the appraised value as the minimum price and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 424

F. RESOLUTION NO. 01-120 - RESOLUTION AUTHORIZING THE RELEASE OF BIDDER AND RETURN OF BID DEPOSIT REGARDING AN OFFER TO PURCHASE 125 IRIS DRIVE

Summary: The consideration of a resolution authorizing the release of the bidder and return of the bid deposit, less advertising expenses, in connection with an offer to purchase 125 Iris Drive.

Brian K. Perry was the successful bidder on the vacant lot at 125 Iris Drive in the amount of $12,200. Mr. Perry submitted a bid deposit with his bid in the amount of $610. After City Council approved the sale to Mr. Perry, he was notified by his employer, Square D Company, that he would be included in a permanent workforce reduction. As a result of this change in his financial capacity, Mr. Perry is unable to complete the purchase of the property and has requested that the City release him from his bid on 125 Iris Drive and return his bid deposit. Staff recommends return of the bid deposit, less the cost of advertising. Mr. Perry has indicated his acceptance of staff's recommendation. The cost of advertising for upset bids amounted to $98.28. The amount of bid deposit recommended to be returned to Mr. Perry is $511.72.

Approval of the resolution will authorize the release of Mr. Perry from the bid and return of his bid deposit less advertising cost.

Planning staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 425

G. RESOLUTION NO. 01-121 - RESOLUTION AUTHORIZING THE SALE OF LAND AND AWARD OF GRANT FOR DEVELOPMENT OF EAST END PLACE SUBDIVISION

Summary: The consideration of the sale of land and award of subsidies for development of East End Place Subdivision.

On September 12, 2000, the City Council authorized a request for proposals (RFP) for development of a six-unit subdivision off Martin Luther King. Jr. Drive, called East End Place Subdivision. After amending the original site design from seven units to six, the RFP was advertised on April 24, 2001. Proposals had to include the developer's bid for purchase of the land and details of the design and cost of the homes. The City offered a Community Development Block Grant (CDBG) subsidy of $78,000 towards infrastructure costs and $42,000 in secondary financing for the homebuyers.

Responses were received from Asheville Area Habitat for Humanity, Inc. and Ron Moser Homes, Inc. A panel comprising the neighborhood association president, an architect, and staff evaluated the proposals using criteria set out in the RFP. The panel recommended the proposal from Habitat.

The Housing and Community Development Committee has reviewed and supported the panel's recommendation.

Staff recommends approval of the resolution authorizing the sale of the property to Asheville Area Habitat for Humanity, Inc. for $77,000 and award of the CDBG subsidies.

RESOLUTION BOOK NO. 26 – PAGE 426

H. **MOTION SETTING A PUBLIC HEARING ON AUGUST 14, 2001, TO INITIALLY ZONE THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS BILTMORE PARK AREA(SOUTH OF BLUE RIDGE PARKWAY, WEST OF OVERLOOK ROAD, LONG SHOALS ROAD WEST TO CLAYTON ROAD)**

I. **MOTION SETTING A PUBLIC HEARING ON AUGUST 14, 2001, TO INITIALLY ZONE THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS FAIRVIEW ROAD/US 74 (SOUTH AND EAST OF I-40 IN THE FAIRVIEW ROAD/US 74 CORRIDOR)**

J. **MOTION SETTING A PUBLIC HEARING ON AUGUST 14, 2001, TO INITIALLY ZONE THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA (SOUTH AND WEST OF THE CITY FROM SOUTH OF I-40 TO WEST OF 1-26, INCLUDING ALL OF SARDIS ROAD)**

K. **MOTION SETTING A PUBLIC HEARING ON AUGUST 14, 2001, TO INITIALLY ZONE THE ANNEXED AREA LOCATED NORTH OF U.S. HIGHWAY 70 BETWEEN RICEVILLE ROAD AND LOWER GRASSY BRANCH ROAD (KNOWN AS AREA 2001-B)**

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Worley moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. **PUBLIC HEARING RELATIVE TO CONSIDER CONDITIONAL USE REZONING FOR PROPERTIES ON OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE**

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:10 p.m.

City Attorney Oast said that because there are two Council members absent, for any ordinance to be passed on its first reading will require a unanimous vote. If the vote is not unanimous, the ordinance will require a second reading at the next formal meeting.

Mayor Sitnick and Councilmen Peterson and Worley disclosed that they had all visited the site.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 7/10/01) and City Exhibit 4 (Staff Report dated 7/24/01). This public hearing was advertised on July 13 and 20, 2001.

Mr. Green said that this is the consideration of rezoning properties on Oak Hill Drive from RM-16 Residential Multi-Family High Density District to Highway Business District, and issuance of a conditional use permit (conditional use zoning) for a vehicle repair/service facility and interior storage.

Mr. William Baldwin, applicant, is requesting the conditional use rezoning of property located on Oak Hill Road, off Leicester Highway, from RM-16 to Highway Business/Conditional Use and the issuance of a Conditional Use Permit (CUP) to allow the use of the property for a vehicle repair/service facility and interior storage. The property is located behind the commercial development along Leicester Highway and is separated topographically from the residential development located on Oak Hill Drive (City Exhibit 4 – Location Map). The subject property contains 3.87acres. Access to the property is from Oak Hill Drive, which is primarily a residential street. Although some uses permitted in the Highway Business District could have adverse impacts on the adjacent residential property, the restrictions placed on the use and site design of the property through the conditional use permit will assure that the impacts of the proposed use on surrounding properties are minimized. The requested use is a 10,000 square foot building that will house a vehicle repair/service facility and interior storage. The site plan calls for significant buffering of the use from adjacent residential properties, using existing vegetation and new plantings (City Exhibit 4 – Site Plan). The proposed building is set back from adjacent residential uses in order to minimize the visual and noise impacts of the proposed use. Lighting of the site will be kept to a minimum to prevent adverse impacts on the adjacent residences. The site plan and proposed use have been reviewed by the City's Traffic Engineer, who determined that no Traffic Impact Analysis would be required due to the small amount of traffic that would be generated by the use. As shown on the site plan and with the conditions recommended by the staff, the proposed use of the site will serve as a good transition between the commercial uses fronting on Leicester Highway and the residential uses on Oak Hill Drive.

The property for which the rezoning is requested was zoned Commercial Service prior to the adoption of new zoning that was done as part of the adoption of the Unified Development Ordinance (UDO). The owner undertook significant grading and related site preparation when the property was zoned for commercial development. The grading and site work has resulted in the site being physically separated from the adjacent residential properties. Staff feels that the proposed use is an appropriate use of the property and that the proposed design, with conditions recommended by staff, will minimize impacts on surrounding residential uses. The Technical Review Committee (TRC), who took action to approve it with conditions, reviewed this project for compliance with the technical requirements of the UDO. The following conditions are those identified by the TRC that have not been met:

- Provide a revised site plan that shows the following:
    - Location and screening of dumpster, if one is proposed
    - Extend landscaping strip and buffer strip along railroad right-of-way
    - Note location of exterior lighting
    - Indicate location of protective barriers for landscaping that will be preserved
    - Indicate location, size, and species of existing plant material if using for landscape credit
    - Provide calculations for determining the number of parking spaces

- The driveway must be paved for a distance of 10' from its intersection with Oak Hill Drive
- The encroachment of the vehicular use area onto the railroad right-of-way must be approved by Norfolk-Southern Railway
- No trees can be placed in the existing sewer easement.

The site plan submitted and the conditions identified by City staff assure that the impacts of the proposed project on the surrounding uses are mitigated.

The findings that must be made by City Council in the issuance of a CUP for the project are listed below with staff analysis for each standard.

1. The proposed use or development of the land will not materially endanger the public health and safety. The proposed development has been reviewed by the TRC to ensure that neither the use nor the design will endanger the public health and safety.
2. The proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region. The proposed vehicle repair/service facility will provide a place for residents of the surrounding area to take their vehicles for repair and service.
3. The proposed use or development of the land will not substantially injure the value of adjoining or abutting property. A vehicle repair/service facility at this location, designed as proposed and meeting the conditions recommended by staff and the Planning and Zoning Commission, will not adversely injure the value of adjoining or abutting property.
4. The proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. The proposed 10,000 square foot building is in harmony with the commercial structures located along Leicester Highway. Buffering and screening of the proposed building will ensure its compatibility with adjacent residential uses. The parking/vehicular use area will be graveled to maintain harmony with the surrounding neighborhood.
5. The proposed use or development of the land will generally conform with the comprehensive plan and other official plans adopted by the City. The Asheville City Plan 2010 appears to indicate low density residential for this area. The conditions in the area have changed significantly since the adoption of the 2010 Plan in 1987, as evidenced by the prior zoning of Commercial Service for this property. The changing conditions warrant the requested rezoning of the property.
6. The proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. All services are available at this location, as confirmed during the review of the proposed development by the TRC.
7. The proposed use will not cause undue traffic congestion or create a traffic hazard. The site plan for the proposed development has been reviewed by the City's Traffic Engineer, who has determined that the use will not cause undue traffic congestion or create a traffic hazard.

In summary, the proposed project is a 10,000 square foot building that will house a vehicle repair/service use with some interior storage. The 3.87-acre site has been graded so as to separate it topographically from adjacent residential uses. Extensive buffering using existing vegetation supplemented by new planting is proposed to screen the use from adjacent residential uses. As proposed, the use of the property will provide a good transition from the commercial uses along Leicester Highway to the residential uses on Oak Hill Drive. Conditions recommended for the approval of the CUP for this project will ensure that the impacts on surrounding property owners are mitigated.

The Asheville Planning and Zoning Commission reviewed the requested conditional use rezoning and the site plan for the proposed use at their June 21, 2001, meeting. No one spoke in opposition to the requested rezoning or the proposed use during the public hearing held by the Planning and Zoning Commission. After reviewing the request and the site plans, the Planning and Zoning Commission voted unanimously to recommend approval of the conditional use rezoning, subject to the conditions identified by staff. In response to concerns regarding future building expansion, impacts of lights, and hours of operation, the Commission recommended that conditions be added to address these issues.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the Conditional Use Permit with the following conditions:

1. Provide a revised site plan that shows the following:
   - Location and screening of dumpster, if one is proposed
   - Extend landscaping strip and buffer strip along railroad right-of-way
   - Note location of exterior lighting
   - Indicate location of protective barriers for landscaping that will be preserved
   - Indicate location, size, and species of existing plant material if using for landscape credit
   - Provide calculations for determining the number of parking spaces
   - The driveway must be paved for a distance of 10' from its intersection with Oak Hill Drive
2. The encroachment of the vehicular use area onto the railroad right-of-way must be approved by Norfolk-Southern Railway
3. No trees can be placed in the existing sewer easement.
4. Exterior lighting shall be cut-off type and directed away from residential uses.
5. Any enlargement of the building shall not encroach into the buffer areas as identified on the approved site plan.
6. Hours of normal business operation shall be from 6 a.m. to 7 p.m.

When Councilwoman Field asked why the Planning & Zoning Commission recommended extending the buffer along the railroad right-of-way, Mr. Green explained that with regard to buffering, a railroad right-of-way is treated like a street.

Councilwoman Bellamy asked if one entrance from the street was acceptable. Mr. Green responded that the City's Traffic Engineer advised that the one driveway as being adequate.

Councilwoman Bellamy was concerned that there is not a lot of RM-16 land in the City and wondered if the Planning staff tried to persuade the applicant to build multi-family housing instead. Mr. Green said that Mr. Baldwin's initial application was received in September or October of 2000. Planning staff has been working with him since then to persuade him to develop the property for some type of residential use. Mr. Baldwin has owned the property for approximately 15 years and it was zoned for a more intense use prior to adoption of the UDO. Mr. Baldwin stated that he is not interested in considering other options to develop the property. Mr. Green did state though, that the Planning staff routinely tries to discourage applicants from rezoning residential property.

Councilman Peterson was concerned about the several residential homes in the immediate area of the driveway. He felt a diesel repair shop, with tractor trailers going in between the residential area, will naturally have greater noise, possibly smoke from diesel engines and people who work later into the night on engines. This is sort of an industrial entrance in between residential areas. Mr. Green said that this concern was expressed at the Planning & Zoning Commission meeting but the applicant argued that his business would have far less traffic impacts than would an apartment development.

Councilman Peterson said that the site plan looks as though the applicant has tried to put the business as far back from Oak Hill Road as possible. He asked that if the repair show prospered, what would prevent them from expanding into the front part of the property. Mr. Green said that the project must be built according to the site plan which is approved as part of the conditional use permit issuance. If there is a violation of that site plan, it would be considered a violation of the zoning ordinance and would be treated accordingly.

Mr. Green then responded to Councilman Peterson about how wide the buffer is and where the existing sewer easement lies on the property.

Upon inquiry of Councilman Peterson, City Attorney Oast said that the Conditional Use Permit Order drafted will be limited to only allowing a vehicle repair/service facility and interior storage on the property.

Councilman Worley questioned if the repairs would be limited to only the tractors and not the entire tractor-trailer. Mr. Green said that the applicant said that he might expand his business to include some repair to trailers, However, City Council could place a condition on the issuance of the conditional use permit that the repair be limited to the tractors, which would eliminate the pulling of the trailers in there.

Mayor Sitnick stated several concerns as follows: the radius of the turn from Oak Hill Drive to the applicant's driveway; the storage of the units; if the trucks are running when they being repaired, then a noise and pollution factors need to be considered; hours of operations; and buffer density.

Councilwoman Field was concerned about the high cost of land in the city, especially along major thoroughfares, like Leicester Highway, in that a small businessman cannot afford to be in the areas that we have zoned commercial and highway. Has staff looked at any nodes of development or any second tier development. Mr. Green said that Planning staff has investigated nodes and tiers, but then run into the problem of trading residential property for commercial property. Our real problem is that within the city limits we are running out of land and development is maxing out. City staff is working with our smart growth principles, changes in our ordinance, and development in our new Comprehensive Plan to promote infill development and building up instead of out.

When Councilwoman Field asked if staff has received any comments from abutting property owners, Mr. Green said there were some neighboring property owners at the first Planning & Zoning Commission public hearing. At that meeting, the request was tabled and the applicant was told to re-think his project and meet with neighboring property owners. Six months later, the applicant came back with the same project, and to date they have not heard from any neighboring property owners. He did note, however, that the property owners were notified recently about this public hearing.

Councilwoman Field said that she believes in mixed use and she believes that any use can be appropriately designed and buffered from any other use. She hoped that there was some way within the City's smart growth policies to allow for this balance, so that we don't push this kind of business outside the city.

Because Councilwoman Field is very concerned about affordable housing, she would like to take a real hard look at the 2025 Comprehensive Plan to make sure that we do provide for an appropriate amount of multi-family in all districts.

Upon inquiry of Councilwoman Bellamy, Mr. Green said that because this property does not have any other street frontage, the recent ordinance amendment would permit them to have the driveway access onto a residential street. They would have a wider entrance requirement to accommodate the types of vehicles that would be using this facility and to ensure there is an ability to turn safely in and out of the driveway.

Councilwoman Bellamy said that Pioneer Welding in the West End/Clingman Avenue neighborhood area is an example of something that looks good on paper, but when you put it in practice, it doesn't always work. She explained that the sidewalks and streets are just not wide enough to accommodate the vehicles going in and out of that business.

When Councilman Peterson asked how far back is the development from Oak Hill Drive, Councilwoman Field responded that it looks to be approximately 425-450 feet.

Upon inquiry of Mayor Sitnick, Mr. Green said that the City has not heard anything from Norfolk Southern about the encroachment of the vehicular use area onto the railroad right-of-way. Mr. Green said that the City's typical policy is to require some type of agreement or acknowledgement from the Railway that the approve their easement being used for the purposes on the site plan.

Councilman Peterson said that if Mr. Baldwin was present he could respond to some of his concerns. In addition, he suggested Mr. Baldwin contact his neighboring property owners and ask them if they would be willing to attend the public hearing to give City Council their thoughts about this project. Therefore, he asked if City Council would be willing to continue the public hearing until their next formal meeting.

City Attorney Oast said that if City Council closes the public hearing, it is subject to be re-opened if the matter is continued. This would not require re-advertisement.

In response to a question from Mayor Sitnick, Mr. Green said that if City Council issues the conditional use zoning to highway business now, is it possible that the property owner could come and request a change of use in the future if the decision-making bodies at that time chose to grant that change.

Councilwoman Field pointed out that this property was purchased before the UDO and it was originally zoned commercial service. It seems that the property owner purchased the land with the idea that they were going to use it for a vehicle service garage and they held onto for this long in order to build on the site. But between the time he purchased the property and now, the City changed the zoning.

City Attorney Oast said that as far as participation by the two absent members of City Council, he felt that what the law requires is that they acquaint themselves with the information presented. They can do that by reading the staff report, reading the minutes of the Council meeting and/or reviewing the video tape. He said that those members will need to be asked if they have acquainted themselves with this matter when the public hearing is continued.

Councilman Peterson moved to continue this public hearing until August 14, 2001, without further advertisement. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick instructed the City Attorney to inform Vice-Mayor Cloninger and Councilman Hay what they have to do in order to participate in the continued public hearing. In addition, she asked Mr. Green to invite Mr. Baldwin to be present at the meeting to address Council's concerns.

B. PUBLIC HEARING TO REZONE PROPERTY AT 35 AND 47 ACTON CIRCLE AND 7 ACTON WOODS ROAD FROM NEIGHBORHOOD BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 2830 - ORDINANCE TO REZONE PROPERTY AT 35 AND 47 ACTON CIRCLE AND 7 ACTON WOODS ROAD FROM NEIGHBORHOOD BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Sitnick opened the public hearing at 6:05 p.m.

Chief Planner Gerald Green said that this is consideration of an ordinance to rezone property at 35 and 47 Acton Circle and 7 Acton Woods Road from Neighborhood Business District to Community Business II District. This public hearing was advertised on July 13 and 20, 2001.

The City has received a petition requesting the rezoning of property located at 35 and 47 Acton Circle and 7 Acton Woods Road (PIN Nos. 9617.11-66-2579, 2629, and 2812) from Neighborhood Business District to Community Business II District. The 2.09-acre tract is located off Smoky Park Highway at the intersection of Acton Circle and Acton Woods Road. It is bounded on the south and the east by Highway Business zoning. A Home Depot building supply store is located to north of the site and a Bi-Lo shopping center is under construction on adjacent property to the southwest of the site. These developments have resulted in a change in the character of the area. The requested CB II zoning would provide a good transition from the Highway Business zoning to the residential zoning to the northwest and west of the site. Development standards for the CB II zoning district would assure that any development of the site would be compatible with the surrounding area. The CB II development standards permit structures of a size that the site could be developed in a uniform fashion with a single design approach. Uses permitted in the CB II zoning district are intended to serve adjacent neighborhoods.

Staff has received no comments in opposition to the requested rezoning.

The Planning and Zoning Commission voted 6-0 to recommend approval of the rezoning of the property located at 35 and 47 Acton Circle and 7 Acton Woods Road from Neighborhood Business District to Community Business II District. The Planning and Development staff recommends approval of the requested rezoning.

Mayor Sitnick closed the public hearing at 6:12 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2830. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Councilman Peterson said that he was not happy to be losing more residential stock, but since Acton Circle has changed from a residential street to a very busy commercial street, it's not fair for these homeowners to live on such a thoroughfare, if they would prefer something else.

ORDINANCE BOOK NO. 19 – PAGE 214

462

C. PUBLIC HEARING TO CONSIDER A REQUEST TO APPROVE A MODIFICATION FROM THE SUBDIVISION STANDARDS REQUIRING THAT ALL RESIDENTIAL LOTS ABUT A PUBLICLY MAINTAINED STREET IN BINTER SUBDIVISION LOCATED AT 296 DEAVERVIEW ROAD

Mayor Sitnick opened the public hearing at 6:13 p.m.

Chief Planner Gerald Green said that this is the consideration of a request to grant a modification to the subdivision regulations to permit the creation of two residential lots that do not abut a publicly maintained street in Binter Subdivision. This public hearing was advertised on July 13 and 20, 2001.

The City has received a request from Stephen Bitner to permit the creation of two residential lots that do not abut a publicly maintained street. All new residential lots are required by the City's subdivision regulations to abut a publicly maintained street unless a modification is granted by City Council. The property for which the modification is requested is located between Deaverview Road and Huffman Road. A publicly maintained street does not abut the property; access is provided via deeded rights-of-way Two homes are located on the property and no additional construction is proposed. The property owner wishes to subdivide the existing lot into two separate lots so that each home has its own lot. Access to the homes is currently provided via a 15' wide right-of-way from Deaverview Road (accesses one of the homes) and a 10' wide right-of-way from Huffman Road (accesses the other home). The status of access to the property and the homes would not change as a result of the requested modification. Granting of the modification would permit the sale of one or both homes to separate owners. The modification request was reviewed by the Technical review Committee, which recommended approval of the request. No concerns regarding the proposed subdivision and requested modification have been received from any City department.

Staff has received no comments in opposition to the requested modification.

The Planning and Zoning Commission voted 6-0 to recommend approval of the request for a modification of the subdivision regulations to permit the creation of two residential lots that do not abut a publicly maintained street. The Planning and Development staff recommends approval of the requested modification.

Councilwoman Bellamy said that this is a good example of infill lots.

Mayor Sitnick closed the public hearing at 6:17 p.m.

Councilwoman Bellamy moved to approve a modification from the subdivision standards requiring that all residential lots abut a publicly maintained street in Binter Subdivision located at 296 Deaverview Road. This motion was seconded by Councilwoman Field and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 01-122 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH DISCOVERY MOUNTAIN CORPORATION LTD FOR INDOOR FOOTBALL

Civic Center David Pisha said that this is the consideration of authorizing the City Manager to enter into a three year contract with Discovery Mountain Corporation, Ltd., (herein DMC) for indoor football games at the Civic Center.

The Civic Center has considered the interest shown by DMC in placing a minor league football team in the facility. There are advantages to the City in pursuing this opportunity. These advantages along with highlights of the contract are as follows:

Premises: The areas of use will include the arena, concourse around the arena, locker rooms A, B, C and D, meeting rooms and Banquet Hall on game days. The team, DMC, may practice in the arena for up to one hour on the field. They will not be supplied air conditioning during practice. No office space will be provided for the team or administration offices. If office space within the Center becomes available, they have the option to sign a second lease for it.

Rent: Rent is $6,500.00 per game. They intend to play eight (8) home games during a regular season. They have agreed to pay the entire rental amount due, $52,500.00, by September 1 of each year prior to the start of the season. The season would start in April of the following calendar year.

Staffing: The City has agreed to supply event staffing out of rental proceeds. This staff includes an event coordinator, ticket takers, ushers, door guards, police and emergency medical personnel. Stagehands are excluded from the above definition of staffing. If they are used, there will be an additional charge. If the usage of such personnel exceeds $2,000.00 for any game, DMC will pay the excess over this cutoff. It is not anticipated that staffing costs will exceed the cutoff.

No staffing will be provided by the City to present the game itself. This staffing will be the responsibility of DMC. This type of staff includes scorekeepers, referees, football officials, cheerleaders and personnel necessary to secure their locker rooms on game days No security will be provided for any season ticket holder lounge nor will medical personnel be provided to the teams. This staffing will also be the responsibility of DMC.

Equipment: The City has agreed to provide limited equipment. This includes spotlights, use of the forklift, tables and electrical service. If the charges for provided equipment exceed $750.00 as stated in the Center's fee document, DMC will pay the amount in excess of that cutoff. It is not anticipated that usage will exceed the cutoff.

Other Expenses: DMC will still be responsible to pay any TicketMaster charges, credit card fees, taxes or surcharges in addition to the rental payment shown above. Any staffing costs to install or remove temporary advertising will be at their cost as well.

Term: The term is for three years. It begins July 1, 2001, and ends with the last home game of the 2004 season or September 1, 2004, whichever comes first.

Storage: The City has agreed to provide the team with 250 square feet of storage space during their season.

PA System & Scoreboard: The City has agreed to make the existing PA and scoreboard available to the team. The City is responsible for maintaining the equipment. DMC is responsible for any equipment conversion of the scoreboard for use for their games. The City has agreed to pay the labor for any such installation.

Arena Advertising: DMC has the right to sell temporary advertising during their season. If their season overlaps with hockey, hockey advertising will have priority until the hockey season is completed.

Ticket Sales: All ticket sales must be handled under the existing TicketMaster contract the City currently uses.

Concession Sales: The City keeps 100% of all such sales.

Merchandise Sales: The team keeps 100% of all such sales up to an agreed upon cutoff. DMC will pay the City 10% of any net sales beyond $500,000 per year.

Locker Room: The team will share locker room space with other tenants in the building. No improvements were requested by them or anticipated by the City.

Termination by City: The City may terminate the contract for good cause.

Other Facts/Advantages:

- Indoor football uses a "dasher" system just like hockey. Since the City already owns this equipment, no extraordinary start-up costs are necessary.
- DMC will provide, at it's own cost, the playing surface needed for their event.
- Labor costs to re-install or remove this playing surface should be minor. It can be handled in several hours.
- DMC will provide, at it's own cost, covers to protect arena lighting from any possible damage that may occur at the games.
- Staffing and other expenses are projected to be reasonable in relation to rental income.
- Indoor football games are conducted from April through July. This is a time of low event activity at the Civic Center. Furthermore the games would not conflict with the other two sports tenants in the building, nor would the games reduce the opportunity to book other events into the arena.

City staff recommends that City Council approve the lease and direct the City Manager to sign the contract.

Mr. Pisha then reviewed with Council the following indoor football pro forma for three attendance scenarios (all figures being based on eight home games): 2,500 - $73,000; 3,000 - $79,400; and 3,500 - $85,600.

Upon inquiry of Councilman Peterson, Mr. Pisha said the dashers will stay in place during indoor football and trade shows have been able to work around them.

Councilwoman Field noted that in the pro forma there is no mention of any benefit to the City for parking or the 2% ticket fee. Mr. Pisha said that what he has presented here is just a simple financial statement highlighting items in the contract.

Councilwoman Bellamy asked if we would get any revenue from arena advertising? Mr. Pisha said DMC hold's the temporary advertising, just as hockey and basketball teams.

Councilwoman Bellamy noted that the budget only shows the revenues from concession stands and from ticket sales and does not take into any parking revenue, possible facilities fee and a 2% ticket fee, which will also be added to the hockey and basketball tickets. She thanked the local investors for considering the Civic Center for this venture.

Councilman Worley said that roughly calculating at 2,500 attendees, we are looking at an additional $50,000 in revenue to the City. Even though the parking revenues go straight to the Parking Fund and not to the Civic Center Fund, they all ultimately go to the City's bottom line.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 01-122. This motion was seconded by Councilman Peterson and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 427

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of July 6-19, 2001: Jessica Folston (Parks & Recreation), Dan Bradshaw (Parks & Recreation), Rae Stoll (Water), Wanda Winslow (Sanitation), Sybil Jones (Water) and Ronnie Whitmire (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City was served with the following Complaint on July 10, 2001, filed by James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. William, Paul E. Fruits and B. Youce MacFadyen Bulluck. The nature of proceeding is a complaint for a declaratory judgment, preliminary and permanent injunction relative to the City exercising its extraterritorial jurisdiction. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

CLOSED SESSION

At 6:31 p.m., Councilwoman Bellamy moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, involving the following parties: Henderson County, Buncombe County, City of Asheville, and Regional Water Authority - G.S. 143-318.11(a)(3). This motion was seconded by Councilman Worley and carried unanimously.

At 7:55 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Councilwoman Bellamy and carried unanimously.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 7:55 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – July 31, 2001
West Asheville Community Center
970 Haywood Road

7:00 p.m. - Community Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; Assistant City Attorney Martha McGlohon; City Manager James L. Westbrook Jr.; and Deputy City Clerk Phyllis Corns

The following topics were raised by residents and addressed by City Council and City staff: animal control ordinance not being enforced; more resources needed at West Asheville Resource Center; is Sonny's Towing Service in compliance; make sure redevelopment in West Asheville reflects the diversity of West Asheville; drag racing and cruising on Patton Avenue; need for shuttle bus every hour to downtown and back to West Asheville Friday and Saturday nights to Midnight for the youth; support of façade loan program, underground utilities and streetscaping; request for trash containers at street corners in neighborhoods; suggestion that businesses adopt a City-placed neighborhood trash container and then reward neighborhoods every quarter on who collected the most trash; and if there are plans to move West Asheville Resource Center and Fire Station from Haywood Road.

Mayor Sitnick adjourned the meeting at 8:15 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – August 7, 2001 - 3:00 p.m.

Worksession

Present:	Vice-Mayor M. Charles Cloninger, Presiding; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Mayor Leni Sitnick

CONSENT:

Contract for Maple Springs Road Sanitary Sewer System Improvements

Summary: The consideration of a resolution awarding the contract for Maple Springs Road Sanitary Sewer System Improvements to T & K Utilities, Inc., in the amount of $132,760.00.

This project will provide sanitary sewer service to several parcels on Maple Springs Road, which were inadvertently overlooked for service at the time of the 1983 annexation. It is called the Maple Springs Road Sanitary Sewer System Improvements and consists of the installation of approximately 1,713 linear feet of eight-inch (8") diameter sanitary sewer line and 350 linear feet of four-inch (4") diameter sanitary sewer service line and related appurtenances.

The Engineering Department received and publicly opened eight (8) bids on Thursday, July 19, 2001, at 2:00 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, T & K Utilities, Inc., was found to be the lowest responsible bidder with a total bid of $132,760.00. The Engineer's estimate for this project was $163,430.00.

Funding for this project is included in the Fiscal Year 2000/2001 Capital Improvement Program and will be financed through the two-thirds bonds, previously issued by the City.

T & K Utilities Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 90 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Staff recommends that City Council accept a resolution awarding the bid for Maple Springs Road Sanitary Sewer System Improvements to T & K Utilities, Inc., and authorize the City Manager to execute all necessary agreements and contracts.

Sand Hill Road Sidewalk Replacement Contract

Summary: The consideration of a resolution authorizing the City to enter into a contract with Candler Concrete Works Inc. to install sidewalks along Sand Hill Road.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along Sand Hill Road in accordance with N.C. Gen. Stat. sec. 143-131. Informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Candler Concrete Works Inc	0	Yes	Yes	$93,843.75
Mobley Construction Co.	100	Yes	Yes	Disqualified
M&M Construction	100	Yes	Yes	No Bid Booked Up
Calloway Contracting	0	Yes	Yes	Received No Bid
J & R Concrete	0	Yes	Yes	Disqualified
Precision Contracting Inc.	100	Yes	Yes	Received No Bid
Carolina Cornerstone Construction	100	Yes	Yes	Received No Bid

Funding for this project is allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Candler Concrete Works Inc.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEW

Removal of Requirement for City Council to Set Public Hearings

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled on August 28, 2001. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to delete the requirement for City Council to set date for public hearings.

The proposed ordinance amendment would delete the requirement for City Council to set the date for public hearings for review of development proposals, including Level 3 site plan projects, Planned Unit Developments, and conditional uses. Under the current ordinance, City Council must take action at a formal Council meeting to approve (set) the date for a public hearing after that date has been scheduled by the City Clerk. The requirement for Council to officially set the date for the public hearing prolongs the review process by at least two (2) weeks. A public hearing before City Council would still be required under the proposed wording amendment, but the Council would not have to take official action to approve the date scheduled for the public hearing. The change in procedure proposed by the ordinance amendment would result in a more efficient process for all involved – the applicants, the City Council, the City staff, and the general public. The proposed ordinance amendment would help streamline the development review process by removing an unnecessary step. No individual or organization involved in the development review process will be adversely impacted by the simplification of the development review process proposed in the draft ordinance amendment. Staff will keep you informed of these projects and requests by providing you with a memorandum detailing the project or request and providing location and development intensity specifics at least two weeks prior to your consideration of the case.

At their July 11, 2001, meeting, the Asheville Planning and Zoning Commission voted 7-0 to recommend approval of the wording amendment eliminating the requirement that City Council formally set the public hearing date for review of certain development projects. The Planning and Development staff recommends approval of the wording amendment.

City Attorney Oast noted that an amendment to City Council Rules of Procedure will also be required with connection with the change and he will have that prepared for City Council as well.

Upon inquiry of Councilman Worley, Mr. Shuford said that he would look into the feasibility of amending the ordinance further to state who will set the public hearings.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on August 28, 2001.

PACK SQUARE CONSERVANCY AGREEMENT

At the request of Vice-Mayor Cloninger, Councilman Worley moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest and to designate Councilman Hay to preside over this item. This motion was seconded by Councilwoman Field and carried unanimously.

Planning and Development Director Scott Shuford said that this is consideration of a resolution authorizing the City to enter into an agreement between the City of Asheville and the Pack Square Conservancy with respect to the design, construction and maintenance of the Pack Square Renaissance Project.

The Pack Square Conservancy is seeking an agreement with the City in order to facilitate the redevelopment and sustained maintenance of the public areas of Pack Square, which includes the City-County Plaza area. The agreement defines roles to be played by both the City and the Conservancy and addresses such issues as funding, design, construction and maintenance.

Following a meeting between the Pack Square Conservancy Chair and City staff, the Conservancy prepared an original draft agreement. The current draft reflects changes requested by City staff.

The Pack Square Conservancy is also seeking this agreement with Buncombe County.

City staff recommends that the City enter into this agreement with the Pack Square Conservancy.

Upon inquiry of Councilman Hay, Ms. Carol King, Chair of the Pack Square Conservancy, explained the current make-up of the 501 (c) (3) board.

Mr. Shuford responded to various questions from Council regarding the term of the contract, what happens if the City want to make an improvement that is not part of the design, and what is the City's financial liability (limited to only what the City accepts as part of the design).

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BROADWAY/REED CREEK GREENWAY MASTER PLAN

Mr. Alan Glines, Urban Planner, said that this is the consideration of a resolution approving the Broadway/Reed Creek Greenway Master Plan.

Mr. Matt Kern, member of the Greenway Commission, said that in Fiscal Year 2000/01, City Council approved the development of a master plan for the Broadway/Reed Creek corridor as one of the 1¢ projects for Parks and Recreation. A total of $75,000 was appropriated for this project. The Greenway Commission, along with City staff, decided that the master plan could be developed internally using the Greenway Commission as the lead organization for developing a public process to solicit input. City staff would then take information gathered through the public process and develop a master plan. The savings would result in allowing for funds to be used for actual construction of the corridor. In December of 2000, the Greenway Commission held a public forum which resulted in 75 – 100 people attending. From this meeting, a task force was developed that included approximately 20 individuals who worked with the Commission and staff to further refine the information received from the public forum at a meeting held in March of 2001. During the spring, staff developed a master plan which was shared with the task force on July 25, 2001. Using the savings from this process, plus an additional $75,000 appropriated from the Fiscal Year 2001/02 1¢ projects, construction can begin on the Broadway/Reed Creek Greenway as early as this winter. He said that the short-term goal is the actual trails. Long term goals include herb gardens, water fountains, historical markers, etc. Those were will added as funds become available in the future.

Mr. Glines then explained the details of the Master Plan, noting that the gravel trail will begin at "5 points" and tie into the system on W. T. Weaver Boulevard.

The Greenway Commission and City staff is recommending City Council approval of the Broadway/Reed Creek Master Plan.

Mr. Glines then responded to several questions/comments from Council, some being, but are not limited to: will the City be using in-house expertise, there will be some integration of art along the trail, and are there parking areas to support the greenway.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

OTHER MATTERS

Reimbursements to Local Governments

At the request of Vice-Mayor Cloninger, it was the consensus of City Council to place on the next formal meeting a resolution requesting General Assembly support for local government revenues.

Waterline on Fanning Fields Road in Henderson County

Councilman Worley explained that Henderson County requested installation of a regional waterline. The cost of construction has been agreed upon, however, no agreement has been reached on accounting for the cost of administering and maintaining that line. The City has refused to proceed because of failure to agree on all aspects of the line, failure to adopt policies and procedures, and because of recognized need to renegotiate the Regional Water Agreement. The Water Authority is ready to go ahead and contract with Henderson County to oversee construction of the waterline if the City does not do so.

Henderson County must adopt policies and procedures substantially conforming to the Water Authority's policies and procedures, fees, etc which must be adopted by the Water Authority before the first customer is served by a regional water line. This is in process and will probably be completed by the Water Authority's next regular meeting.

Construction of capital improvements must be in accordance with the Water Authority's Master Plan. The Regional Water Agreement requires that regional water lines be added to the Master Plan. This is in process. The Water Authority adopted a resolution on August 7, 2001, amending the Master Plan to include the line requested by Henderson County. Buncombe County and the City of Asheville need to approve that amendment.

Councilman Worley suggested the following motion: That the City Council, without prejudice to its position that the Regional Water Agreement procedures with respect to a regional water line have been strictly complied with and without prejudice to the methods and procedures with respect to future requests for regional water lines, agrees (1) to account for, on a temporary basis, the costs, expenses and administration of the regional water line currently requested by Henderson County on a temporary basis and to work with the Chair of the Budget Committee of the Water Authority and with Henderson County to arrive at a mutually agreeable method for such temporary accounting in a cost effective manner; (2) to authorize the City Manager to proceed with the management of the construction of the waterline in the same manner and with the same responsibilities as performed in the construction of other waterlines for the Water Authority; and (3) to agree with the classification of the waterline so constructed as a regional water line as that term is used in the Regional Water Agreement upon the approval of the Henderson County policies and procedures by the Water Authority and upon approval by Asheville City Council and the Buncombe County Commissioners of the amendment to the Water Authority's Master Plan as requested by the Water Authority.

Councilman Worley suggested the following motion regarding the Master Plan amendment: That the City Council, without prejudice to its position that the Regional Water Agreement procedures with respect to a regional water line have been strictly complied with and without prejudice to the methods and procedures with respect to future requests for regional water lines, does hereby approve the amendment to the Master Plan of the Water Authority as approved by the Water Authority on August 7, 2001.

Councilman Worley explained that the Water Authority has postponed their meeting held earlier in the day until tomorrow (August 8, 2001) in order to give City Council the opportunity to agree on a compromise and direct City staff to build the waterline.

Discussion surrounded the concerns of City staff and the requested rush approval by the City Council at this meeting.

Councilman Hay, along with Vice-Mayor Cloninger, Councilman Peterson and Councilwoman Bellamy, all noted that Mayor Sitnick is very interested in this matter she is out-of-town this week. They requested that the formal vote on this matter be delayed one week until the formal meeting on August 14, 2001, in order for the Mayor to participate in discussions, for City Council to have an opportunity to review the issues involved and to get a staff report with recommendations.

Councilman Worley explained that the Water Authority was clear that they will take action tomorrow to contract with Henderson County to build the 36 feet of 12-inch waterline and the one-inch line to connect it to the property. American Freightways plans to open on September 1, 2001.

Vice-Mayor Cloninger was uncomfortable in taking action on this complicated issue immediately and asked that any action be postponed until the August 14 meeting.

Councilwoman Field felt the City should proceed with the installation of this line and provide water to the customer. Then we move forward and resolve the water agreement.

Upon inquiry of Councilman Hay, Interim Water Resources Director David Hanks said that his staff could install the waterline in approximately 7 days.

Mr. Jack Tate, Chair of the Regional Water Authority, explained the number of roadblocks that has been placed in the way of providing water service to American Freightways. He urged City Council to take action at this meeting because the Water Authority will consider in their morning meeting to go forward with the contract with Henderson County to provide their customer with the water service they have been waiting month for. Mr. Tate did state that he would relay Council's request to the Water Authority for a week delay on any action.

All of Council expressed interest in wanting to get past this issue and start renegotiation of the water agreement.

By a show of hands, Councilman Worley and Councilwoman Field felt they were comfortable enough to proceed with taking formal action at this meeting. Vice-Mayor Cloninger, Councilmen Hay and Peterson and Councilwoman Bellamy preferred to wait a week for the reasons stated above.

Councilman Worley encouraged as many Council members as possible to attend the Water Authority's morning meeting in order to clearly communicated to the Water Authority that City Council desires to get past the American Freightways waterline issue and their willingness to work with the Water Authority to this end.

Closed Session

At 4:46 p.m., Councilwoman Field moved to go into closed session in order to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 5:05 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Councilwoman Field and carried unanimously.

Water Authority Meeting

There was a brief discussion of who could attend the Water Authority meeting at 8:00 a.m. on August 8, 2001, and what to say. Councilman Worley indicated that he was planning to attend and Councilman Hay said that he would try to attend as well. City Council wanted it clearly communicated to the Water Authority that City Council desired to get past the American Freightways issue and would work with the Water Authority to this end.

ADJOURNMENT:

Vice-Mayor Cloninger adjourned the meeting at 5:10 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – August 14, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson (arrived in meeting at 5:20 p.m.); and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Worley gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

Vice-Mayor Cloninger asked that Consent Agenda Item D be removed from the Consent agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 24, 2001; THE COMMUNITY MEETING HELD ON JULY 31, 2001, AND THE WORKSESSION HELD ON AUGUST 7, 2001

B. RESOLUTION NO. 01-123 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH T & K UTILITIES INC. FOR THE PROJECT KNOWN AS MAPLE SPRINGS ROAD SANITARY SEWER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution awarding the contract for Maple Springs Road Sanitary Sewer System Improvements to T & K Utilities, Inc., in the amount of $132,760.00.

This project will provide sanitary sewer service to several parcels on Maple Springs Road, which were inadvertently overlooked for service at the time of the 1983 annexation. It is called the Maple Springs Road Sanitary Sewer System Improvements and consists of the installation of approximately 1,713 linear feet of eight-inch (8") diameter sanitary sewer line and 350 linear feet of four-inch (4") diameter sanitary sewer service line and related appurtenances.

The Engineering Department received and publicly opened eight (8) bids on Thursday, July 19, 2001, at 2:00 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, T & K Utilities, Inc., was found to be the lowest responsible bidder with a total bid of $132,760.00. The Engineer's estimate for this project was $163,430.00.

Funding for this project is included in the Fiscal Year 2000/2001 Capital Improvement Program and will be financed through the two-thirds bonds, previously issued by the City.

T & K Utilities Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 90 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Staff recommends that City Council accept a resolution awarding the bid for Maple Springs Road Sanitary Sewer System Improvements to T & K Utilities, Inc., and authorize the City Manager to execute all necessary agreements and contracts.

RESOLUTION BOOK NO. 26 – PAGE 428

C. RESOLUTION NO. 01-124 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CANDLER CONCRETE WORKS INC. TO INSTALL SIDEWALKS ALONG SAND HILL ROAD

Summary: The consideration of a resolution authorizing the City to enter into a contract with Candler Concrete Works Inc. to install sidewalks along Sand Hill Road.

The City is in need of a contractor to provide sidewalk installation services for sidewalks along Sand Hill Road in accordance with N.C. Gen. Stat. sec. 143-131. Informal bids for sidewalk installation services were solicited and three responses were received. The bidders are listed below:

Company	Bid
Candler Concrete Works Inc.	$93,843.75
Mobley Construction Company	Disqualified
M&M Construction	No Bid Booked Up
Calloway Contracting	Received No Bid
J&R Concrete	Disqualified
Precision Contracting Inc.	Received No Bid
Carolina Cornerstone Construction	Received No Bid

Funding for this project is allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into contract with Candler Concrete Works Inc.

RESOLUTION BOOK NO. 26 – PAGE 433

D. RESOLUTION AUTHORIZING THE EXECUTION OF AN AGREEMENT WITH THE PACK SQUARE CONSERVANCY FOR THE DESIGN, CONSTRUCTION AND MAINTENANCE OF THE PACK SQUARE RENAISSANCE PROJECT

This item was removed from the Consent Agenda due to a conflict of interest by Vice-Mayor Cloninger.

E. RESOLUTION NO. 01-125 - RESOLUTION ADOPTING THE BROADWAY/ REED CREEK GREENWAY MASTER PLAN

Summary: The consideration of a resolution approving the Broadway/Reed Creek Greenway Master Plan.

In Fiscal Year 2000/01, City Council approved the development of a master plan for the Broadway/Reed Creek corridor as one of the 1¢ projects for Parks and Recreation. A total of $75,000 was appropriated for this project. The Greenway Commission, along with City staff, decided that the master plan could be developed internally using the Greenway Commission as the lead organization for developing a public process to solicit input. City staff would then take information gathered through the public process and develop a master plan. The savings would result in allowing for funds to be used for actual construction of the corridor. In December of 2000, the Greenway Commission held a public forum which resulted in 75 – 100 people attending. From this meeting, a task force was developed that included approximately 20 individuals who worked with the Commission and staff to further refine the information received from the public forum at a meeting held in March of 2001. During the spring, staff developed a master plan which was shared with the task force on July 25, 2001. Using the savings from this process, plus an additional $75,000 appropriated from the Fiscal Year 2001/02 1¢ projects, construction can begin on the Broadway/Reed Creek Greenway as early as this winter.

The Greenway Commission and City staff is recommending City Council approval of the Broadway/Reed Creek Master Plan.

RESOLUTION BOOK NO. 26 – PAGE 434

F. MOTION SETTING A PUBLIC HEARING ON AUGUST 28, 2001, TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE REQUIREMENT FOR CITY COUNCIL TO SET DATE FOR PUBLIC HEARINGS

G. MOTION SETTING A PUBLIC HEARING ON AUGUST 28, 2001, TO REZONE 350 SHORT MICHIGAN AVENUE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

H. MOTION SETTING A PUBLIC HEARING ON AUGUST 28, 2001, TO REZONE 100-120 COXE AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

I. RESOLUTION NO. 01-126 - RESOLUTION AUTHORIZING THE SALE OF 5 – 7-1/2 BILTMORE AVENUE AND PARKING LOT ON SOUTH LEXINGTON AVENUE

Summary: The consideration of a resolution authorizing the conveyance of 5 – 7-1/2 Biltmore Avenue and the parking lot on South Lexington Avenue to Robert Camille Jr., Peter Y. Alberice and Robert M. Todd in the amount of $461,000.

On July 24, 2001, the City Council directed the City Clerk to advertise for upset bids on 5 - 7 1/2 Biltmore Avenue (PIN 9649.18-40-2028) and the parking lot on South Lexington Avenue (PIN 9649.18-40-1018). The advertisement ran in the Asheville Citizen-Times on August 3, 2001, as provided in N. C. Gen. Stat. sec. 160A-269.. No response was received. Therefore, the offer to purchase from Robert Camille, Jr., Peter Y. Alberice and Robert M. Todd in the amount of $461,000 was not upset and the sale should be approved.

Approval of the resolution will authorize the sale of the property to Robert Camille, Jr., Peter Y. Alberice and Robert M. Todd for the amount of $461,000.00.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 435

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Hay moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 01-127 - RESOLUTION AUTHORIZING THE EXECUTION OF AN AGREEMENT WITH THE PACK SQUARE CONSERVANCY FOR THE DESIGN, CONSTRUCTION AND MAINTENANCE OF THE PACK SQUARE RENAISSANCE PROJECT

At the request of Vice-Mayor Cloninger, Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: The consideration of a resolution authorizing the City to enter into an agreement between the City of Asheville and the Pack Square Conservancy with respect to the design, construction and maintenance of the Pack Square Renaissance Project.

The Pack Square Conservancy is seeking an agreement with the City in order to facilitate the redevelopment and sustained maintenance of the public areas of Pack Square, which includes the City-County Plaza area. The agreement defines roles to be played by both the City and the Conservancy and addresses such issues as funding, design, construction and maintenance.

Following a meeting between the Pack Square Conservancy Chair and City staff, the Conservancy prepared an original draft agreement. The current draft reflects changes requested by City staff.

The Pack Square Conservancy is also seeking this agreement with Buncombe County.

Staff recommends that the City enter into this agreement with the Pack Square Conservancy.

Councilman Hay moved to adopt Resolution No. 01-127. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 436

III. PUBLIC HEARINGS:

A. PUBLIC HEARING REGARDING AN ECONOMIC DEVELOPMENT GRANT TO PECHINEY PLASTIC PACKAGING INC.

RESOLUTION NO. 01-128 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO AN AGREEMENT WITH PECHINEY PLASTIC PACKAGING INC. FOR AN ECONOMIC DEVELOPMENT INCENTIVE GRANT

Mayor Sitnick opened the public hearing at 5:10 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution approving an economic development incentive grant to a local company proposing an expansion involving purchase of new equipment and creation of new jobs.

Mr. Jeff Denny, representing the Chamber of Commerce, gave a brief history of how Pechiney Plastic Packaging Inc. came to request the economic development incentive grant and asked for City Council's support for this grant.

Mr. Ed Knapp, Plant Manager of Pechiney Plastic Packaging, Inc., explained how his company is a local manufacturing plant located at 3055 Sweeten Creek Road in Asheville. The company is proposing an expansion of their production capacity through the purchase of new equipment representing an investment of $12 million. To support the new capacity, the company is also proposing to create 36 new full time positions. The average hourly wage of the 36 new positions is calculated at $13.47 plus benefits. He said they are looking forward to grow in Asheville and urged City Council for their support.

Economic Development Director Mac Williams explained that based on the stated level of investment of $12 million, the project would qualify for a Level 3 Grant as provided for by the City of Asheville Economic Development Incentives policy. Level 3 grants (when investment levels are $10 million or greater) allow grants of up to 85% of new taxes for up to 5 years.

For this project, the total grant amount would equal $285,600 payable in 5 equal installments of $ 57,120 each beginning in January, 2003. The calculation determining the grant amount is as follows:

CALCULATION OF LEVEL 3 GRANT

NEW INVESTMENT	$ 12,000,000 (div. by $100)
NEW TAX BASE VALUE	$ 120,000 (x $.56/$100)
NEW ANNUAL TAX REVENUE	$ 67,200 (x .85)
ANNUAL GRANT AMOUNT	$ 57,120 (x 5)
TOTAL GRANT AMOUNT	$ 285,600

Payment of the grant funds would not begin until January 1, 2003, after the City has received documentation of actual values and payment in full of property taxes reflecting the increased values.

The grant document, in the form of a performance agreement, has been drafted according to the terms outlined above and has been accepted by representatives of Pechiney Plastic Packaging, Inc. Acceptance and execution of the agreement and provision of the grant, or not, is the subject of this formal public hearing pursuant to N. C. Gen. Stat. sec.158-7.1. The terms of the agreement being considered and the notice of public hearing have been published and made available in accordance with the referenced statute.

City staff recommends Council accept and execute the proposed Performance Agreement and offer the economic development incentive grant to Pechiney Plastic Packaging, Inc. under the terms and conditions set forth in that Agreement.

Councilman Worley explained that these are new taxes that the City is not collecting now and by making this grant, we are not granting away any of the current tax proceeds that we are receiving. Mr. Williams agreed and stated that this is in addition to what is already being received through City taxes.

Mayor Sitnick said that the City has a good incentive policy.

Upon inquiry of Mayor Sitnick, Mr. Williams explained the number of different ways companies find out about incentive policies. He explained that it is a very competitive environment and everyone has some kind of incentive package to offer at some level.

Mayor Sitnick closed the public hearing at 5:24 p.m.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-128. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 437

B. CONTINUATION OF PUBLIC HEARING RELATIVE TO CONSIDER CONDITIONAL USE REZONING FOR PROPERTIES ON OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2831 - ORDINANCE TO REZONE PROPERTIES ON OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2832 - ORDINANCE GRANTING A CONDITIONAL USE REZONING FOR PROPERTIES ON OAK HILL DRIVE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

Mayor Sitnick stated that this public hearing was opened on July 24, 2001, and continued until this date.

Vice-Mayor Cloninger and Councilman Hay, who were absent at the July 24, 2001, meeting, both announced that they had reviewed the minutes and staff report. Councilman Hay disclosed that he had visited the site.

Mr. Gerald Green, Chief Planner, briefly reviewed with Council the requested consideration of rezoning properties on Oak Hill Drive from RM-16 Residential Multi-Family High Density District to Highway Business District, and issuance of a conditional use permit (conditional use zoning) for a vehicle repair/service facility and interior storage.

Mr. William Baldwin, applicant, is requesting the conditional use rezoning of property located on Oak Hill Road, off Leicester Highway, from RM-16 to Highway Business/Conditional Use and the issuance of a Conditional Use Permit (CUP) to allow the use of the property for a vehicle repair/service facility and interior storage. The property is located behind the commercial development along Leicester Highway and is separated topographically from the residential development located on Oak Hill Drive (City Exhibit 5 – Aerial Photo). The subject property contains 3.87acres. Access to the property is from Oak Hill Drive, which is primarily a residential street. Although some uses permitted in the Highway Business District could have adverse impacts on the adjacent residential property, the restrictions placed on the use and site design of the property through the conditional use permit will assure that the impacts of the proposed use on surrounding properties are minimized. The requested use is a 10,000 square foot building that will house a vehicle repair/service facility and interior storage. The site plan calls for significant buffering of the use from adjacent residential properties, using existing vegetation and new plantings. The proposed building is set back from adjacent residential uses in order to minimize the visual and noise impacts of the proposed use. Lighting of the site will be kept to a minimum to prevent adverse impacts on the adjacent residences. The site plan and proposed use have been reviewed by the City's Traffic Engineer, who determined that no Traffic Impact Analysis would be required due to the small amount of traffic that would be generated by the use. As shown on the site plan and with the conditions recommended by the staff, the proposed use of the site will serve as a good transition between the commercial uses fronting on Leicester Highway and the residential uses on Oak Hill Drive.

The property for which the rezoning is requested was zoned Commercial Service prior to the adoption of new zoning that was done as part of the adoption of the Unified Development Ordinance (UDO). The owner undertook significant grading and related site preparation when the property was zoned for commercial development. The grading and site work has resulted in the site being physically separated from the adjacent residential properties. Staff feels that the proposed use is an appropriate use of the property and that the proposed design, with conditions recommended by staff, will minimize impacts on surrounding residential uses. The Technical Review Committee (TRC), who took action to approve it with conditions, reviewed this project for compliance with the technical requirements of the UDO. The following conditions are those identified by the TRC that have not been met:

- Provide a revised site plan that shows the following:
  - Location and screening of dumpster, if one is proposed
  - Extend landscaping strip and buffer strip along railroad right-of-way
  - Note location of exterior lighting
  - Indicate location of protective barriers for landscaping that will be preserved
  - Indicate location, size, and species of existing plant material if using for landscape credit
  - Provide calculations for determining the number of parking spaces
- The driveway must be paved for a distance of 10' from its intersection with Oak Hill Drive
- The encroachment of the vehicular use area onto the railroad right-of-way must be approved by Norfolk-Southern Railway
- No trees can be placed in the existing sewer easement.

After reviewing the request and the site plans, the Planning and Zoning Commission voted unanimously to recommend approval of the conditional use rezoning, subject to the conditions identified by staff. In response to concerns regarding future building expansion, impacts of lights, and hours of operation, the Commission recommended that conditions be added to address these issues.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the Conditional Use Permit with the following conditions:

1. Provide a revised site plan that shows the following:
- Location and screening of dumpster, if one is proposed
- Extend landscaping strip and buffer strip along railroad right-of-way
- Note location of exterior lighting
- Indicate location of protective barriers for landscaping that will be preserved
- Indicate location, size, and species of existing plant material if using for landscape credit
- Provide calculations for determining the number of parking spaces
- The driveway must be paved for a distance of 10' from its intersection with Oak Hill Drive

2. The encroachment of the vehicular use area onto the railroad right-of-way must be approved by Norfolk-Southern Railway
3. No trees can be placed in the existing sewer easement.
4. Exterior lighting shall be cut-off type and directed away from residential uses.
5. Any enlargement of the building shall not encroach into the buffer areas as identified on the approved site plan.
6. Hours of normal business operation shall be from 6 a.m. to 7 p.m.

Mr. Green then addressed several of the concerns expressed by City Council at the July 24 meeting, some being, but are not limited to: impact to adjacent properties, impact of vehicles entering access drive, noise generated by the service and repair operation, number of tractor-trailers that would be entering the proposed business, and hours of operation. Mr. Green said that City staff has not heard any more comments from the adjoining property owners.

Mr. William Baldwin, applicant, explained that his business is open from 8:00 a.m. to 5:00 p.m. but sometimes they have to start early and stay late. With regard to tractor-trailer traffic, he said that 95% of his business is cars and business trucks. He explained that he bought this property 15 years ago when it was zoned highway business with the sole intent of building a garage and he is not interested in developing his property as residential. He said that when the Unified Development Ordinance was adopted in 1997, he was not aware that his property was rezoned to something he could not build his garage on, or he would have fought it then.

There being no request for rebuttal, Mayor Sitnick closed the public hearing at 5:37 p.m.

Councilwoman Field moved to adopt Ordinance No. 2831 to rezone properties on Oak Hill Drive from RM-16 Residential Multi-Family High Density District to Highway Business District/Conditional Use. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 216

Councilwoman Field moved to adopt Ordinance No. 2832 granting the conditional use permit for properties on Oak Hill Drive with the six conditions listed above, with the exception of condition number 6 to be amended as follows: Hours of normal business operation may be from 6 a.m. to 7 p.m.; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 218

C. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS BILTMORE PARK AREA (SOUTH OF BLUE RIDGE PARKWAY, WEST OF OVERLOOK ROAD, LONG SHOALS ROAD WEST TO CLAYTON ROAD)

ORDINANCE NO. 2833 - ORDINANCE ESTABLISHING THE ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS BILTMORE PARK AREA (SOUTH OF BLUE RIDGE PARKWAY, WEST OF OVERLOOK ROAD, LONG SHOALS ROAD WEST TO CLAYTON ROAD)

Mayor Sitnick opened the public hearing at 5:42 p.m.

Planning & Development Director Scott Shuford explained to City Council the purpose of extending this and the other recent extraterritorial jurisdiction (ETJ) extensions: (1) Reservation of land for industrial purposes; (2) Increased multifamily zoning along or near major roadways to create nodes of higher density residential development and to offer incentives for redevelopment of sparsely developed property; (3) Protection of key City gateways; (4) Placement of high intensity regional commercial zoning near interstate access points; (5) Insuring an appropriate mix of residential and nonresidential land uses; and (6) Recognition of the need for flexible development of large landholdings under a master plan approach. He then explained the process used in establishing the initial zones.

Urban Planner Paul Benson said that this is the consideration of an ordinance establishing the initial zoning of the Biltmore Park ETJ area. This public hearing was advertised on August 3 and 10, 2001.

Mr. Benson outlined the subject area and said that the Biltmore Park area, consisting of 1,831 acres and 175 properties, was included within the City of Asheville's extraterritorial planning jurisdiction on May 8, 2001. Using a map, Mr. Benson then explained to City Council each of the proposed zoning districts and why City staff and the Planning & Zoning Commission arrived at those designations.

The staff proposal for the initial zoning of this area considered these purposes as well as the 2010 City Plan, where applicable, existing land use, infrastructure and comments from property owners.

The Planning and Zoning Commission has held two public hearings to consider staff proposals and public comment on the initial zoning of this area. At their July 11, 2001, meeting, the Commission recommended zoning the Biltmore Park ETJ extension area as RS-2 Residential Single-Family Low Density District, RS-8 Residential Single-Family High Density District, Commercial Industrial District, Central Business District and Blue Ridge Parkway Overlay District.

The Planning and Development staff recommends adoption of the ordinance establishing the initial zoning of the Biltmore Park ETJ extension area as RS-2, RS-8, Commercial Industrial District, Central Business District and Blue Ridge Parkway Overlay District.

Upon inquiry of Mayor Sitnick, Mr. Shuford said that staff will be bringing to Council soon a number of amendments to the zoning regulations that they think will better clarify the administrative interpretation with regard to preserving farms.

Mr. Benson answered various questions from Council relating to what currently exists on the proposed zoning districts.

Upon inquiry of Councilman Peterson, Mr. Benson explained the Blue Ridge Parkway Overlay and how that is different from the underlying zoning.

Councilman Peterson said that the areas along Long Shoals Road, that are immediately adjacent to the interstate, are natural hubs for high impact use and thinks there maybe some concern in the future from people who live nearby. However, the zoning does seem to be fairly consistent with our smart growth principles of locating some of those higher impact uses near those major transportation nodes.

Mayor Sitnick closed the public hearing at 5:58 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2833. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 222

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS FAIRVIEW ROAD/US 74 (SOUTH AND EAST OF I-40 IN THE FAIRVIEW ROAD/US 74 CORRIDOR)

ORDINANCE NO. 2834 - ORDINANCE ESTABLISHING THE ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS FAIRVIEW ROAD/US 74 (SOUTH AND EAST OF I-40 IN THE FAIRVIEW ROAD/US 74 CORRIDOR)

Mayor Sitnick opened the public hearing at 6:00 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance establishing the initial zoning of the Fairview Road/US 74 extraterritorial jurisdiction (ETJ) area. This public hearing was advertised on August 3 and 10, 2001.

Mr. Benson outlined the subject area and said that the Fairview Road/US 74 area, consisting of 832 acres and 273 properties, was included within the City of Asheville's extraterritorial planning jurisdiction on May 8, 2001. Using a map, Mr. Benson then explained to City Council each of the proposed zoning districts and why City staff and the Planning & Zoning Commission arrived at those designations.

The staff proposal for the initial zoning of this area considered these purposes as well as the 2010 City Plan, where applicable, existing land use, infrastructure and comments from property owners.

The Planning and Zoning Commission has held two public hearings to consider staff proposals and public comment on the initial zoning of this area. At their July 11, 2001, meeting, the Commission recommended zoning the Fairview Road/US 74 ETJ extension area as RS-2 Residential Single-Family Low Density District, RS-4 Residential Single-Family Medium Density District, RM-8 Residential Multi-Family Medium Density District, RM-16 Residential Multi-Family High Density District, Institutional District, Community Business I District, Manufactured Housing Rental Community Overlay District and Blue Ridge Parkway Overlay District.

The Planning and Development staff recommends adoption of the ordinance establishing the initial zoning of the Fairview Road/US 74 ETJ extension area as RS-2, RS-4, RM-8, RM-16, Institutional District, Community Business I District, Manufactured Housing Rental Community Overlay District and Blue Ridge Parkway Overlay District.

Upon inquiry of Mayor Sitnick, Mr. Benson said that with regard to farms, City staff has a long-standing interpretation that bona fide agricultural uses are exempt from our zoning ordinance and that City staff is looking at an ordinance amendment to formalize that interpretation.

Mr. Benson answered various questions from Council relating to what currently exists on the proposed zoning districts.

Discussion took place with regard to Ms. Bocook's property and her disappointment that a development plan she is working on for potential buyers of the property may conflict with the concerns of the Blue Ridge Parkway for their viewshed area. When Mayor Sitnick asked about vested rights, City Attorney Oast said that a property owner can obtain a vested right with a site specific development proposal. Councilwoman Bellamy said that it was her understanding that Ms Bocook has a vested right given by Buncombe County several years ago. As a result of the discussion, Councilman Hay moved to defer action on PIN No. 966710462592 (PIN No. is as of March of 2001) and continue the public hearing on this portion only until the August 28, 2001, meeting in order for City staff to try to arrive at a compromise for all parties concerned with regard to the view issue and the marketability of the property. This motion was seconded by Councilman Peterson. When Ms. Kitzi Bocook, property owner, said that another lot is affected in the same way, Councilman Hay moved to amend his motion to include PIN No. 966710267774 (PIN Nos. is as of March of 2001) in his motion. Councilman Peterson accepted the amendment and said motion carried unanimously.

Mr. Tom Jones, owner of a small mobile park in the Fairview ETJ area, said that his property was originally zone RS-8 He attended the Planning & Zoning Commission meeting on June 22, 2001, and requested his property be given the Manufactured Housing Rental Community Overlay District, which is the proper classification for a mobile home park. Then on July 11, 2001, he attended another Planning & Zoning Commission meeting, the City had reclassified his property as RM-8, but without the requested mobile home overlay. Now his park is a non-conforming use and is subject to several restrictions. Among those restrictions is a clause that states that if he has a mobile home space vacant for 180 days, the City can prevent him from filling that space and render it unusable. He has no control over vacancies, and it is possible, although unlikely, that one will remain vacant for 180 days or more. He explained that it will be possible for the City, over a period of time, to slowly close down a non-conforming park by taking away spaces one at a time. In response to a letter he wrote to Mr. Shuford asking how many existing mobile home parks were in the existing 3 ETJ areas and how many were given a mobile home park overlay zoning, Mr. Shuford said there were 28 parks being zoned and only three have been given the overlay zoning. That means that 89.3% of existing mobile home parks are non-conforming. He questioned whether there is any other type of property usage that is as closely scrutinized for the zoning as mobile home parks. He felt that a zoning ordinance that rejects 90% of any single classification of property needs to be reviewed. Manufactured housing is the only type of single-family, owner-occupied, non-subsidized housing available for a very large portion of our residents. The majority of City Council has expressed their support for affordable housing, but it seems to him that a 90% rejection of existing mobile home parks sends a very strong message – and that message is that the City of Asheville does not want manufactured housing. Not only is it not wanted, the City retains, through the vacancy mechanism, the ability to eventually remove 90% of that housing. The City is discriminating against a very large group of property owners and residents. If the City is truly in favor of affordable housing for all our citizens, he urged them to look into this problem. He asked Council to zone these properties fairly as they exist today as is has been done with other properties. He noted that Mr. Shuford stated earlier that "properties need to be converted and redeveloped." It seems that existing manufactured home communities are the properties to be converted and redeveloped.

Mr. Shuford explained that the City classified the mobile home park as RM-8 to encourage its conversion to a more dense multi-family project that would be more appropriate in that location than the scattering of units along a roadway. In terms of addressing affordable housing issues, mobile home parks, for the most part, unless they are very well maintained communities that have individual lots and home-ownership, don't increase in value. Where there are very good, viable mobile home parks in the ETJ areas, they have classified them with a mobile home park overlay. Where there are cases like Mr. Jones' where the use is sort of a stand-alone, out of character use given the surrounding uses, they placed them into land use classifications that they think have the potential to result in their ultimate conversion. He said if they want to continue as mobile home parks, they are allowed to do so for perpetuity.

In response to Mr. Jones' concern over the 180 vacant period, Mr. Shuford said that if there is an individual lot with a mobile home on it and the mobile home is removed, it would have to be replaced within 180 days. However, if it's a mobile home park and continuing as a park, it would be able to be replaced as long as the park remained active as a mobile home park. Mr. Jones will be able to replace units in his park as long as he has one single trailer on the lot.

City Attorney Oast said that the Code provides that "any manufactured home used for single-family residential purposes and maintained as a nonconforming use may be enlarged or replaced with a similar manufactured home of the same or larger size .... Any replacement authorized by this subsection only can take place if said replacement occurs within 180 days of the removal of the initial manufactured home." It was his opinion that that provision only applies to single lots that are improved with manufactured homes. If the property is being used for a mobile home park, for instance, you can bring homes in and out of there. If a particular lot stayed vacant for longer than 180 days, as long as the entire property was used as a mobile home park, it would be okay.

At Mr. Jones' request, Mr. Shuford said that a letter will be sent to Mr. Jones outlining the provisions stated at this meeting.

Ms. Bocook said that her family has a planned neighborhood commercial development on a tract (PIN No. 966710361686) and the Community Business I zoning proposed will not be in conformance with their development plan. Chief Planner Gerald Green said that Community Business I does permit restaurants, inns, bed & breakfasts, etc. The only restriction on restaurants in CB I is that they cannot have a drive-through facility. There are certain design standards, like the parking must be located behind or beside the building, minimum front setback so the building is located near the street, etc. He said that Planning staff will be happy to work with Ms. Bocook when she comes through for their project approval.

Mr. Brett Bocook explained that their plan, which they put together over a year ago, has a layout with parking in front of the structure because there is an existing historic structure on the property which prohibits them from locating their parking behind the building. Mr. Green said that the lowest category of commercial zoning that would allow parking in front is Highway Business which City staff and the Planning & Zoning Commission feels is inappropriate for this type of area. There is a conditional use rezoning process which would be an appropriate way to deal with the unique circumstances on this property when the property owners are ready to submit their specific plans. City Attorney Oast also reminded Council that when they zone property, any uses allowed in that zoning designation are allowed.

At 6:56 p.m., Mayor Sitnick said that the public hearing will be continued until August 28, 2001, in order for City Council to consider the zoning of the two deferred lots known as PIN Nos. 966710462592 and 966710267774.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2834, excluding PIN Nos. 966710462592 and 966710267774 which will be considered at the August 28, 2001. This motion was seconded by Councilman Hay and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 225

E. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA (SOUTH AND WEST OF THE CITY FROM SOUTH OF I-40 TO WEST OF 1-26, INCLUDING ALL OF SARDIS ROAD)

ORDINANCE NO. 2835 - ORDINANCE ESTABLISHING THE ZONING OF THE RECENTLY EXTENDED EXTRATERRITORIAL JURISDICTION IN AREA KNOWN AS US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA (SOUTH AND WEST OF THE CITY FROM SOUTH OF I-40 TO WEST OF 1-26, INCLUDING ALL OF SARDIS ROAD)

Mayor Sitnick opened the public hearing at 6:56 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance establishing the initial zoning of the US 19-23/Sardis Road, Sand Hill Road, and Brevard Road extraterritorial jurisdiction (ETJ) area. This public hearing was advertised on August 3 and 10, 2001.

Mr. Benson outlined the subject area and said that the US 19-23/ Sardis Road, Sand Hill Road and Brevard Road area, consisting of 3,207 acres and 1,163 properties, was included within the City of Asheville's extraterritorial planning jurisdiction on May 8, 2001. Using a map, Mr. Benson then explained to City Council each of the proposed zoning districts and why City staff and the Planning & Zoning Commission arrived at those designations.

The staff proposal for the initial zoning of this area considered these purposes as well as the 2010 City Plan, where applicable, existing land use, infrastructure and comments from property owners.

The Planning and Zoning Commission has held two public hearings to consider staff proposals and public comment on the initial zoning of this area. At their July 11, 2001, meeting, the Commission recommended zoning the US 19/23 and Sardis, Sand Hill, and Brevard Roads ETJ extension area as RS-2 Residential Single-Family Low Density District, RS-4 Residential Single-Family Medium Density District, RS-8 Residential Single-Family High Density District, RM-8 Residential Multi-Family Medium Density District, RM-16 Residential Multi-Family High Density District, Office Business District, Community Business II District, Institutional District, Highway Business District, Commercial Industrial District, Industrial District , Manufactured Housing Overlay District, and Manufactured Housing Rental Community Overlay District.

The Planning and Development staff recommends that the 11-acre tract at the intersection of Sand Hill Road and Sardis Road, (part of PIN No. 9617-15-63-8026), be zoned Commercial Business II rather than Commercial Industrial in order to match the proposed Commercial Business II zoning directly across Sand Hill Road. This recommendation will be followed up with an ordinance that will allow research and development, high tech, and light assembly uses in the Community Business II District and higher commercial categories, thereby allowing a limited range of industrial uses to be available in this zoning district for these properties.

The Planning and Development staff recommends adoption of the ordinance establishing the initial zoning of the US 19-23/Sardis Road, Sand Hill Road and Brevard Road ETJ extension area as RS-2, RS-4, RS-8, RM-8, RM-16, Office Business District, Community Business II District, Institutional District, Highway Business District, Commercial Industrial District, Industrial District, Manufactured Housing Overlay District and Manufactured Housing Rental Community Overlay District.

Mr. John Van Dyke explained why he felt his property (PIN No. 962616738425) should be zoned Commercial Industrial rather than the proposed RM-8. He said that at the Planning & Zoning Commission meeting, his property was zoned Commercial Industrial. However, Mr. Wright (an adjoining property owner) requested his lot be zoned RM-8 because he actually lives on that lot. In an effort to be consistent, Planning staff changed the zoning of Mr. Wright's lot, but also changed the zoning of his lot and his neighbor's lot (Mr. Holloway). He felt his neighbor (Mr. Holloway) would also want his property zoned Commercial Industrial as well. After City Council discussion, it was the consensus of City Council to zone PIN No. 962616738425 (Mr. Van Dyke) and PIN No. 962615734160 (Mr. Holloway) to Commercial Industrial.

Mr. Wright explained why he wanted his property to remain zoned RM-8. He also noted that water from Mr. Van Dyke's property has washed away 125 feet of his roadway. Mr. Van

Dyke said that they are working on the problem and City Manager Westbrook said that he would relay that information to Buncombe County.

Ms. Emily B. Raymond asked that her property (PIN No. 962608795421) be zoned Highway Business or Community Business II instead of Industrial for marketability. After discussion, it was the consensus of City Council to zone PIN No. 962608795421 to Community Business II.

Mr. Bill Puckett, owner of Knob Hill Mobile Home Park, explained why his property (PIN No. 962616932393) should be zoned RS-8 with the Manufactured Housing Rental Community Overlay District and not the proposed Commercial Industrial. After discussion and understanding that with the Manufactured Housing Rental Community Overlay Mr. Puckett could expand his mobile home park, it was the consensus of City Council to zone PIN No. 962616932393 Commercial Industrial District with a Manufactured Housing Rental Community Overlay District.

Mr. Bill McDowall, owner of property at 205 Sardis Road, explained why his property (PIN No. 962717103190) should be zoned Community Business II and not Office Business. In addition, the surround properties currently proposed to be zoned Office Business should be zoned Community Business II as well. After discussion of this transition area, it was the consensus of City Council to zone PIN Nos. 962717103190, 962717102423, 962717007224, 962717100036, 962605099932 to Community Business II.

Mr. Don Eisenhauer had no problem with the proposed zoning of his property but asked Council several questions, some being, would he be able to move mobile homes back and forth on his property with his RM-16 designation with the Manufactured Housing Rental Community Overlay District; how long does the rezoning process take; and would he have to comply with all development requirements if a subdivision is built. Even though Mr. Eisenhauer felt that some of his neighbors would probably prefer their zoning changed, City Council felt it would be inappropriate to change their zoning (other than what City staff and the Planning & Zoning Commission recommend) if they have not requested it.

Mr. John Herron felt that City Council should not be allowed to tell property owners what they can do on their property.

Ms. Susan Fletcher questioned the definition of Manufactured Housing Overlay District.

Mayor Sitnick closed the public hearing at 8:10 p.m.

At the request of Councilman Worley, it was the consensus of City Council to defer action on PIN No. 961715638026 in order for City staff to investigate whether BASF has deeded the old Enka Lake Club Building to the Daniel Boone Council of Boy Scouts of America for their service center.

At 8:12 p.m., Mayor Sitnick said that the public hearing will be continued until August 28, 2001, in order for City Council to consider the zoning of the one deferred lot known as PIN No. PIN No. 961715638026.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2835, with the consensus changes outlined above. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 230

F. PUBLIC HEARING TO INITIALLY ZONE THE ANNEXED AREA LOCATED NORTH OF U.S. HIGHWAY 70 BETWEEN RICEVILLE ROAD AND LOWER GRASSY BRANCH ROAD (KNOWN AS AREA 2001-B)

ORDINANCE NO. 2836 - ORDINANCE TO INITIALLY ZONE THE ANNEXED AREA LOCATED NORTH OF U.S. HIGHWAY 70 BETWEEN RICEVILLE ROAD AND LOWER GRASSY BRANCH ROAD (KNOWN AS AREA 2001-B)

Mayor Sitnick opened the public hearing at 8:16 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance zoning the annexed area located north of US Highway 70 between Riceville Road and Lower Grassy Branch Road (known as Area 2001-B). This public hearing was advertised on August 3 and 10, 2001.

The Planning and Zoning Commission, at their July 11, 2001, meeting, reviewed and recommended zoning the recently annexed area (effective June 30, 2001) known as Annexation Area 2001-B as RS-2 Residential Single-Family Low Density District, RM-16 Residential Single-Family High Density District and Blue Ridge Parkway Overlay District. The area to be zoned consists of 117 acres divided into 1 single family property, proposed for RS-2 zoning; the Parkway Vista Townhomes development (31 units), proposed for RM-16 zoning; and the Blue Ridge Parkway property, proposed for RS-2 zoning. In addition, the Blue Ridge Parkway Overlay District is recommended for all property in the area within one-quarter mile of the Parkway centerline.

Mr. Benson reviewed the proposed zoning patterns noting that they reflect existing land use and protects the Blue Ridge Parkway corridor.

The Planning and Development staff recommend that City Council consider an ordinance establishing the initial zoning of this area as RS-2, RM-16 and Blue Ridge Parkway Overlay District.

Mayor Sitnick closed the public hearing at 8:21 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2836. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 239

At 8:20 p.m., Mayor Sitnick announced a 15-minute break.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. MOTION REGARDING WATERLINE ON FANNING FIELDS ROAD IN HENDERSON COUNTY

City Manager Westbrook said that City Council discussed the extension of a waterline in Henderson County at their August 7, 2001, worksession at the request of the Water Authority. The City Council felt it needed time to discuss the issues among themselves, as well as staff. Since that worksession, City Council has been discussing a pro-active way to allow the waterline to go forward, thereby setting aside this particular problem in order that the much larger issue of renegotiating the water agreement could begin. In fact, the City has offered three methods of constructing the waterline but none were accepted by the Authority and/or Henderson County. In working with the Council over the past week, the Council felt the more important issue, the one with the greatest potential benefit for the region, was to renegotiate what has been universally acclaimed as an unworkable agreement. In order to make that happen, the Council feels that the American Freightways waterline should be installed, even though Henderson County has not complied with a number of requirements in the contract. To move the project forward, the Council has worked with staff to develop a motion which would allow for the construction of the line and yet preserve the City's rights under the contract.

Councilman Worley moved that the Asheville City Council, without prejudice to its position as to whether the Regional Water Agreement procedures with respect to a regional waterline have been strictly complied with, and without prejudice as to the methods and procedures with respect to future requests for regional waterlines, agrees: (1) to account for the costs, expenses and administration of the regional waterline currently requested by Henderson County on a temporary basis, pending implementation of permanent procedures; (2) to authorize the City Manager to proceed with the management of the construction of the water line in the same manner and with the same responsibilities as performed in the construction of other water lines for the Water Authority; and (3) to agree with the classification of the water line so constructed as a regional waterline as that term is used in the Regional Water Agreement, upon the approval of the Henderson County Policies and Procedures by the Water Authority.
This motion sets no precedent and applies only to this particular line. The situation presented by this line emphasizes the urgent need to resolve the deficiencies of the current Regional Water Agreement before additional regional water lines are requested. This motion was seconded by Councilwoman Field.

Councilman Worley said that we are currently involved in a lawsuit with Henderson County and with the Water Authority on an issue that is unrelated to this regional waterline, but it certainly sets the stage. We also know that we do have a need to discuss the regional water agreement, that there are some problems with that agreement in terms of the implementation, etc. Our failure to adopt this motion and proceed with the installation of the current regional waterline that has been requested by Henderson County, sets us on a course for confrontation and possibility of litigation and that bodes ill on efforts to discuss the situation. On the other hand, agreeing to this motion and allowing this waterline to go forward with construction, dealing only with this line and setting no precedent for future requests without some productive discussions, sets the stage for productive discussions between the City, Buncombe County, the Water Authority and Henderson County. The efforts to set up that meeting are currently underway and he was sure that all of us hope that those efforts will be fruitful and we will have productive discussions and come out of this with some agreement. He was sure that all of us regret the fact that things are not as neighborly as they should be right now and he would like to see us on a course that hopefully will resolve some of the outstanding issues that have caused a lot of feelings over the last several months. He encouraged support of the motion.

Councilwoman Bellamy asked for the one-week delay for two reasons. One was to give the Mayor the opportunity to participate in the process. The other was to gather more information on the background of the motion presented last week. Since that time, she received a copy of a memo dated July 11 which was from the City Manager offering three options to the Authority for the resolution of this issue. It was made clear to her that staff had been trying to make progress on this issue. It's unfortunate that those options were not taken by the Water Authority and that

490

City Council was put in the position last week to make a decision within 24 hours. We do need to look at the customer. She agreed that the water agreement needs to be re-worked.

Vice-Mayor Cloninger supported the motion in order to get on the track of working with the other parties so an agreement can be reached that benefits everyone.

Councilman Peterson said that he had questions about the implementation. He said the Water Agreement sets out a very detailed scheme of projected costs and net revenues and details on how those are exactly determined. If this line is installed under this Agreement, since we are agreeing to construct it as a regional waterline, are we going to have a system in place to track that revenue or will we be just be creating more confusion with Henderson County about what the revenues are and costs of this line, since we haven't followed the agreement to agree upon them first.

City Manager Westbrook said there are two kinds of costs the City was concerned about on behalf of the Water Authority. The first was direct costs and that has been identified. The question was the indirect costs that the Water Authority might incur. Since City Council wants to go forward with this particular waterline, he will be meeting with the City's Finance Director and try to come up with a way to informally track those costs on this particular section of waterline.

City Manager Westbrook responded to other questions from Councilman Peterson regarding a separate account system for the one regional waterline; how is the costs of staff time in tracking those indirect costs not going to be charged to current Water Authority customers; will the Water Authority be able to provide Henderson County with quarterly statements of accounts receivable and accounts payable regarding the regional waterline; how will we keep track of each customer when they want to start tapping onto this 12-inch regional waterline; and has Henderson County adopted polices that are consistent with Asheville's policies.

Councilman Hay felt City Council needs to get this issue behind them and start to talk about the real issues. We still have some work to do on this, especially the permanent procedures, but it's his expectation that that will be done promptly. We need to make sure, on behalf of the ratepayers, that if we are required to do these things under the Water Agreement that everyone is doing exactly what they are supposed to do, including the Asheville City ratepayer. He was satisfied that this is a way to get this issue behind us, and get this customer supplied with water. Also, we can now begin working on issues under the existing agreement, as well as give everybody an extra incentive in getting to work on revising the Agreement.

Councilwoman Field thanked the Council members who worked on this matter with City staff for coming up with some kind of reasonable solution.

Mayor Sitnick submitted a letter to her dated August 14, 2001, from Hazel W. Fobes, Chair of the Citizens for Safe Drinking Water and Air into the record. Said letter read in part "Citizens for Safe Drinking Water and Air strongly support or Regional Water Authority's recent actions concerning City staff installing and connecting a water line to the American Freightways new terminal, which is planned to pen in early September – if it has water. Further, we support the Water Authority's decision to contract with work with Henderson County at its called meeting on Wednesday, August 15, should you refuse once again to accept the compromise presented to you on August 8th when you asked for a week's delay ...."

Mayor Sitnick thanked "Councilman Worley for developing this initial language and thank him for including my suggestions for the last paragraph. It made the motion a little more focused on the specific issue that we are dealing with. Nobody will agree more with the fact that we need to get this issue behind us. Nobody will agree more that the customer is the person, the organization, the business, that is to be served – whether it's the 60% of the ratepayers who are

Asheville residents or the 40% of the ratepayers who are Buncombe County residents or the additional ratepayers who are, and will be, Henderson County residents and businesses. I voted for this agreement, how many years ago, eight, nine years ago – I was one of the people on City Council who voted for the water agreement based on staff reports at that time. And, it is not the fault of any of the participants in the Water Authority, or the Authority that the presentations that were made by staff at that time to us were incomplete and, shall I say, misleading. But, nobody agrees more that this is a water agreement that needs to be renegotiated for the good and for the fairness of all the participants – for the bodies of government who are struggling to make an agreement work and for the customers who are really to be served in a much better way than this particular agreement is allowing them to be served. And so, I'm right there on the front lines with a desire to renegotiate this agreement. It's been called a monster, it's been called a bear, it's been referred to as impossible to comply with – I mean, just the accounting system that has been brought to our attention on a number of occasions, is reason enough. We shouldn't have to be spending so much money, actually, again, you know I'm in this humorous mood lately. I was just going to, just as a demonstration, bring to the Council meeting tonight a couple of thousand brown paper bags and maybe a few thousand envelopes because it's been referred to that we can keep accounts for these waterlines on the back of an envelope or a brown paper bag. And certainly, nobody really means for staff to have to do that. I will say that apropos of Councilman Bellamy's comments regarding the memo that you saw, that I imagine everyone saw, it is true – there have been a number of attempts to serve this customer. To my knowledge, way back in April, April 17, there was either an agreement by consensus, or a vote on the Water Authority, that a temporary line be put in to serve this customer. That was not agreed to. And there have been a number of things that have been said back and forth that I believe have unfairly maligned the Asheville City staff, and in fact, the City Council regarding various things that have been said and implied in various meetings. I believe that our City Manager has taken a lot of heat unfairly. I believe that his intentions were to see to it that the agreement was complied to fairly by everybody. I think that there have been some very aggressive tactics that were unnecessary and unprofessional that were used in some of these meetings. And again, I'm saying all of this because I think it needs to be put on the table. I think that the Asheville taxpayers and ratepayers need to know that our job was to look after them and we were doing that to the max. Our job was also to make sure that all the customers of the Water Authority were getting what they needed by way of water, including American Freightways and that's why I asked at one of the Water Authority meetings, why that temporary line was not given to American Freightways so that they didn't have to wait until the very last minute, probably with great anxiety to find out whether or not they were going to get their waterline. I will say that I'm very disturbed about some things that have happened. Mr. Westbrook has been excluded from two closed session meetings. He is a full, non-voting member of the Water Authority and by right, he or his designee, have a right to be at every meeting, including executive and closed sessions of the Water Authority. He's been excluded twice and yet the City has been portrayed as the obstructionist in this issue and I again that that has been very unfair. Several weeks ago, and again on August 10, I sent a memo in an attempt to set up a meeting between the City of Asheville, Buncombe County, Henderson County and the Water Authority. So far we have only heard from Buncombe County as to some of the dates that are listed on the bottom to set up that meeting. Again, in the City's attempt to get everybody together – to create some neighborliness, to make sure that we're working for the good of the region, which I believe is what everyone wants, including the Water Authority. And so, I'm going to vote for this motion, especially with the inclusion of the final paragraph in it, in an attempt that, in hopes that, this will bring everyone together – forget about our egos, forget about our turf, and go to work on behalf of the water customers who are paying all these bills. And to make sure that we don't have to suffer with this natural resource anyway, in fear and worry that our customers, residents or business will not have the water that they deserve and they need."

Ms. Nelda Holder, representing the League of Women Voters of Asheville-Buncombe County, said that the Asheville and Henderson County Leagues are continuing to monitor the situation regarding the Water Authority and the agreement that governs it. The asked City

Council to keep in mind the goal of regional cooperation and offered the Leagues' assistance in the future for facilitating citizen information or facilitating inter-governmental communication or cooperation with this matter.

The motion made by Councilman Worley and seconded by Councilwoman Field carried unanimously.

VI. OTHER BUSINESS:

A. RESOLUTION NO. 01-129 - RESOLUTION REQUESTING GENERAL ASSEMBLY SUPPORT FOR LOCAL GOVERNMENT REVENUES

Vice-Mayor Cloninger asked that the City of Asheville adopt a resolution requesting the N. C. General Assembly provide for the continuation of business inventory and intangibles tax reimbursements to local governments, or to provide a more secure revenue source with growth potential as a substitute for the aforementioned reimbursement.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-129. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 438

B. CLAIMS

The following claims were received by the City of Asheville during the period of July 20-26, 2001: Ronald Harbin (Streets), Kent Kelly (Water), Ron Livitan (Water), Blanche Waugh (Water), Adam Penny (Parks & Recreation), Janis Schamidgall (Water), Cynthia Broaddrick (Water) and David Plaha (Water).

The following claims were received by the City during the period of July 27-August 2, 2001: BellSouth (Water), Henson's Inc. (Sanitation), Kelly Sprouse (Streets), Sharon Baird (Parks & Recreation) and Robert Walters (Police).

The following claims were received by the City during the period of August 3-9, 2001: Marie Parks (Water), George Jaynes (Water), Duane Seager (Fire), Natoya Federick (Streets), Sharlene Franklin (Streets) and James Gibson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Public Comment

Councilwoman Bellamy, and the entire Council, stressed that City Council encourages public comment - not only at public hearings, but for all matters that come before City Council.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9:18 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – August 21, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Acceptance of Street Maintenance of Piney Mountain Road and Arnold Road

Summary: The consideration of a resolution accepting Piney Mountain Road and Arnold Road for public maintenance.

As part of the annexation process, staff identifies streets in proposed annexation areas that should be maintained by the City after annexation. As part of the 2001 annexation process, two streets were identified to be maintained by the City following annexation.

The first street identified is Piney Mountain Road. Piney Mountain Road is currently a N. C. Dept. of Transportation (NC DOT) maintained roadway approximately 0.73 miles in length known as State Route 2243. It begins at Chunn's Cove Road and ends at the Piney Mountain Condominium Complex. Only a portion of this road was in the City prior to this annexation. Following annexation, all of the roadway will be in the City limits. Staff is requesting that the City maintain the entire length of Piney Mountain Road.

The second street identified is Arnold Road. Arnold Road is located near the Veterans Administration Hospital off Tunnel Road. The length of the road is approximately 0.37 miles and is currently maintained by the NC DOT as State Route 2000 and 2001. Arnold Road is a dead-end street that begins at Tunnel Road.

Staff recommends that City Council adopt a resolution accepting Piney Mountain Road and Arnold Road for public maintenance.

Upon inquiry of Councilman Peterson, City Engineer Cathy Ball said that the City typically takes over streets as a result of annexations and that the City receives Powell Bill money from the state to maintain roads.

Parking Study Update

Summary: The review of an updated status report used to track the progress of the Parking Study Implementation.

The City's Comprehensive Parking Study was adopted by the City Council in December 1998. The Parking Study Implementation Team was formed and the LX Team Charter was signed in June 1999. The study made about 60 recommendations for potential changes that would improve parking issues within the City. In addition, a few other recommendations have been made by other groups including the Asheville Downtown Association and the Implementation Team itself. A total of 67 recommendations have been incorporated into a single status report spreadsheet. This spreadsheet is used to track the progress on evaluating and implementing the recommendations. Beginning in July 1999, updates are being provided to the City Council twice each year; once in July and once in January.

A few issues have been completed in the past 7 months or are nearing completion. Item A18 in the status report spreadsheet identifies some painting needs in the Civic Center garage. This painting was completed in June 2001. Items C4 and C6 address improvements to the pedestrian environment downtown. The recent completion of Pritchard Park improves walkability in this area of downtown, which is near several parking garages. City crews are currently constructing curb extensions and crosswalks on Broadway and Biltmore, improving the pedestrian environment in this area. Item D4 addresses the optimization of the downtown traffic signals. The consultant's new timing plans are in place in the core of downtown and have been evaluated and adjusted as needed. The final report from the consultant will be received soon. The N. C. Dept. of Transportation (NCDOT) has implemented some signal timing changes in the Haywood Street, Montford Avenue, and Flint Street area. The NCDOT is in the process of implementing signal timing changes at three intersections near Biltmore and Southside.

The revenue control equipment installed in the parking garages in January 2001 is now fully operational. A $1.00 fee is now being collected during all garage exits when the booths are not staffed. Parking Services personnel report that with the new equipment, they are able to easily and accurately determine how many vehicles are in each parking garage. This allows them to maintain nearly 100% occupancy at busy times, making it easier for drivers to find parking and increasing revenue.

The parking fees adopted by Council in June 2000 for Fiscal Year 2000-01 continue to have positive affects on parking availability. One of the primary goals of these changes was to encourage use of the parking garages to maximize their use and provide more availability at on-street parking spaces. The Wall Street parking garage has historically been the most popular and it now reaches capacity on a regular basis. The Rankin Avenue parking garage rarely filled before, but during June and July of this year, it frequently reached capacity during the peak period around lunchtime, resulting in spillover to the Civic Center garage. Business owners and citizens report that drivers are now often able to find a spot on the street near their destination. A brief look at the revenues from the parking garages has indicated increased use as well. With the addition of the $1.00 fee for garage exits when the booths are not manned, revenue at the parking garages has shown a 3% growth from Fiscal Year 1999-2000 to Fiscal Year 2000-2001. This increase occurred despite the fact that the first hour is free and the hourly rate was dropped from $0.60 to $0.50.

The spreadsheet outlines the continuing work being done by employees from several departments to implement many of the remaining recommendations.

Staff recommends that Council review the status report spreadsheet and direct staff to continue implementing the Parking Study.

At the suggestion of Councilwoman Field, it was the consensus of City Council to have the Traffic Engineer make a presentation at the next formal meeting so the citizens can have the benefit of the update as well.

FAA Grant Agreement

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $5,381,370.

Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $5,381,370, consists of the following projects: rehabilitate airfield electrical vault; expand general aviation apron; construct by-pass taxiway, Runway 34; and expand terminal building, Phase I.

Staff recommends adoption of the resolution and authorize the Mayor to execute the grant agreement for Project No. 3-37-0005-25.

Donation of Real Property from Troy E. Muse

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property on Thompson Street from Troy E. Muse for the City of Asheville greenway system.

The City of Asheville is interested in establishing greenways or greenway systems throughout the corporate limits of the City of Asheville. Quality Forward has worked with the owners of real property along the Swannanoa River at Thompson Street to obtain easements for the proposed Swannanoa River Greenway. Troy E. Muse has offered to donate a portion of property he owns (approximately 0.35 acre) between Thompson Street and the Swannanoa River (a portion of PIN 9648.20-81-3179) for the greenway system.

A Phase I Environmental Site Assessment has been completed by T. & E. Technology. The property has been surveyed by W. K. Dickson. The Parks and Recreation staff have reviewed the proposed donation and found that the property is appropriate for the greenway system.

City staff recommends City Council adopt the resolution authorizing the Mayor to accept a donation of real property adjoining the Swannanoa River from Troy E. Muse.

Parking Facilities After-Hours and Weekend Security Patrol Services

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Sentry Alert Security, Inc., for parking facilities after-hours and weekend security patrol services.

With the installation of automated parking deck gate equipment last fiscal year, Council authorized the implementation of a $1.00 fee for parking in the City's decks after-hours and all day on weekends (whenever Parking Services Staff were not manning the decks). The revenues from the $1.00 fee are to be used to provide security enhancements for the decks during those periods. (The after-hours revenues have averaged approximately $10,000.00 per month since their initiation last March.) The first security enhancement implemented was a contracted roving security patrol of the decks, surface lots and surrounding on-street parking area. Sentry Alert Security, Inc., began providing the patrol service in the spring of this year. Their service has been highly satisfactory and a number of favorable comments have been received from the public. The patrols have not only increased the public's sense of security and safety; but, have also aided customers who find themselves trapped in the deck by malfunctioning gate equipment or without funds to pay the $1.00 fee or who find their car has a dead battery or flat tire. If future revenues prove adequate, additional security enhancements, such as monitored security cameras, blue-light emergency phones, etc. will be considered for implementation.

The proposed contract with Sentry Alert Security, Inc., is effective for Fiscal Year 2002 and provides hourly rates for patrol services and a maximum compensation of $60,000.00 for the year. Funding is included in the Parking Services Fund Fiscal Year 2002 Budget for contracted security patrol service.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a contract with Sentry Alert Security, Inc.

Local Law Enforcement Grant

Summary: The consideration of a resolution authorizing the City Manager to accept a federal grant from the U. S. Department of Justice, Local Law Enforcement Block Grant Program and the associated budget amendment.

The City of Asheville is eligible to receive a federal grant through the U. S. Department of Justice, Local Law Enforcement Block Grant Program. The grant is in the amount of $141,904. A local match of $15,767 is required. The source of the local match will be the City General Fund.

Under conditions of the grant, funds are being used to reduce crime and improve public safety.

Staff recommends Council adopt the resolution and budget amendment.

Budget Amendment for French Broad River Corridor Connector

Summary: The consideration of a budget amendment, in the amount of $203,040, for an appropriation from the N. C. Department of Transportation in the Transportation Enhancement Program for the Transportation Equity Act for the 21st Century (TEA21).

The City of Asheville applied for grant funds in June 2000 to the N. C. Department of Transportation. The grant was recently awarded in the amount of $203,040 and designated to pay for the cost associated with constructing walkways and sidewalks connecting the series of parks along the French Broad River on Amboy Road. A 20% match, or $50,760, is required and already funded by the Public Works Department.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $203,040 to create the budget for the French Broad River Corridor Connector.

Budget Amendment regarding Donation for Urban Trail Station 10 Grove's Vision

Summary: The consideration of a budget amendment, in the amount of $6,600, for the Urban Trail's Station 10 Grove's Vision.

The City of Asheville and the Urban Trail Committee develops funding through private donations to support the development of the Trail. Donations in the amount of $6,600 were recently received to complete the construction of Station 10 Grove's Arcade.

The Parks and Recreation Department recommends City Council to approve the budget amendment to increase the budget for the Urban Trail's Station 10 Grove's Vision.

Budget Amendment regarding Donation for Urban Trail's Thematic Markers

Summary: The consideration of a budget amendment, in the amount of $7,251, for the Urban Trail's Thematic Markers.

The City of Asheville and the Urban Trail Committee develops funding through private donations to support the development of the Trail. Donations in the amount of $7,251 are being received to complete the construction of the Urban Trail's Thematic Markers.

The Parks and Recreation Department recommends City Council to approve the budget amendment to increase the budget for the Urban Trail's Thematic Markers.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

PUBLIC ART MASTER PLAN

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution approving the Public Art Master Plan.

In September, 1999, Asheville City Council established a Public Art Board for the City of Asheville. This seven-member board has been working over the past two years to develop a comprehensive planning tool to assist in the acquisition, retention and maintenance of a public art program in Asheville. A sub-committee was formed in 2000 to assist Board members in developing the overall outline for the plan. In addition, funds were secured through the N. C. Arts Council to match City funds to complete the final master plan that is being presented to City Council. This plan addresses a number of ways to implement the public art program, both for permanent and temporary art. The plan outlines the public process for solicitation of artists and artwork for various projects, as well as allowing for methods of deaccessioning art that will be owned by the City of Asheville. The Public Art Master Plan will serve as the foundation for the City of Asheville in regard to a vibrant and exciting Public Art Program for years to come.

Mr. Kenn Kotara, Chair of the Public Art Board, briefly reviewed with Council the Master Plan. He said it is considered a five-year vision for the integration of viable public art in the City. The Plan will be reviewed annually by the Public Art Board. In addition, the Board and designated staff shall conduct a condition survey of the City of Asheville Public Art Collection every three years.

In order to ensure that public artworks reflect the character, aspirations, and attributes of Asheville's residents, the Public Art Board will seek extensive and various community input. Asheville's individual residents and/or neighborhood associations, civic leadership, business and corporate community, special interest groups and community leaders will be extremely important in the public art process. By the time a new work is unveiled, Asheville citizens will have seen the initial designs and had an opportunity to talk with and question the artist and the various committees involved.

Currently, three working committees of the Board are designated to address the role of public art in Asheville: Planning/Permanent, Temporary/Rotating, and Collections/Management. The Planning/Permanent and the Temporary/Rotating committees will recommend specific art projects and determine appropriate installation sites. The Collections/Management committee will assist in the management, acquisition, maintenance, conservation, deaccessioning and interpretation of the works designated as part of the Public Art Collection.

Public Art Projects in Asheville will consists of two types:

Permanent/Long Term Public Art projects will involve artists in the design, construction, and installation of permanent works of art that will either be site specific, integrated, or respective of the sites they inhabit.

Gateway Projects: Artworks will enhance the character and distinction of an area by either marking or defining boundaries and/or entrances into the city, unique/significant districts, individual neighborhoods, and into the mountains.

498

Streetscape Projects: Exceptional design in physical amenities such as street furnishings, seating, trash receptacles, lighting, signage, paving patterns, and plantings creating more aesthetically pleasing and pedestrian friendly features and places.

Neighborhood Projects: Public artworks will locate shared experiences, celebrate community diversity, record community histories, identify unique flavor and authenticity, and create neighborhood distinction.

Parks, Greenways and Community Center Projects: Art that offers tactile experiences, invites interaction and participation, and establishes resting places or focal points, or responds to natural elements or landscape features of the site.

Community-wide Projects: Public Art can promote Asheville's history, present and future, make beautiful places, ease circulation and way finding, celebrate cultural diversity and expression, foster community pride, and most importantly create memorable places and experiences. Memorable places and experiences provide recollection, further city identity, and orient both residents and visitors to a sense of place.

Building Projects: Public art integrated into the initial capital and development project design phasing and where artists will be collaborative members of the building design teams.

Infrastructure Projects: Infrastructure elements, such as storm sewers, water distribution mains and freeway overpasses can be designed so elements such as these become pleasing public symbols of community pride.

Temporary and Rotating Art will accommodate rotating art that involves artists in the creation of works that are non-permanent in intent and application and allow for flexibility and highly creative opportunities to showcase artwork.

Community Art Projects: Public Art Projects created specifically for the purpose of education, community participation and involvement.

Existing Site Projects: Projects, which install works for a defined period of time in existing locations with the basic premise being improving and exciting the appearance of their sites.

Invited Rotating Art: Projects that present new or existing work for short periods of time in locations including both indoor and outdoor areas that are selected based on visibility and their ability to adequately display art.

Artists participating in Asheville's Public Art Process shall be selected either through an open competition, where they are asked to submit evidence of their past work; a limited competition where a limited number of artists shall be invited by the Public Art Board to submit credentials and or proposals for a specific project: an invitational competition where a very small number of artists are invited to submit credentials and/or proposals for a specific project; direct selection where the Public Art Board may elect to make a direct selection in which they contract a specific artist for a particular project; or a mixed process including any combination of the above approaches.

The Public Art Board is responsible for making decisions as to the management, acquisition, maintenance, conservation, deaccessioning, and interpretation of the works designated as part of the Public Art Collection. Acquisition is the inclusion of an artwork in the Public Art Collection of the City of Asheville through commission, purchase, loan, or gift. Acquisition of an artwork implies a permanent, ongoing commitment, unless designated as a loan for a specified length of time. When artworks owned by the City of Asheville are viewed as no longer useful to the purposes of the public and/or the City, deaccessioning is the process of permanently removing an artwork from the collection. Standards applied to deaccessioning are just as stringent as those applied to acquiring works of art.

Asheville's Parks and Recreation Director will be directly responsible for the acquisition, maintenance and recommended funding of public art as part of the annual operating budget to the City Manager. The funding will be based on the one percent (1%) amount appropriated to the general Capital Project Reserve Fund beginning July 1, of each fiscal year. Appropriations from the Public Arts account to fund artwork will be made on a dollar-for-dollar matching basis. Matching non-City funds from private or non-profit organizations must be deposited with the City prior to the commitment of a new art project. Any additional funds secured through grants, foundations or other sources to the Public Art Program shall be held in a dedicated account for the program or project.

The Parks and Recreation Department and the Public Art Board recommend City Council's approval of the Public Art Master Plan.

Councilwoman Field was pleased that this Master Plan recognizes what we have, maintains what we have, and will deal appropriately with new art.

Mayor Sitnick thanked the members of the Public Art Board for their hard work in developing this Plan. She also said that Asheville is quickly being recognizes for it's uniqueness with regard to public art.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

RESOLUTION NO. 01-130 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH RGE ASSOCIATES FOR THE CONSTRUCTION OF A PASSENGER WAITING ROOM AT THE ASHEVILLE TRANSIT CENTER ON COXE AVENUE

Transit Services Director Bruce Black said that this is the consideration of a resolution authorizing the City Manager to enter into an agreement with RGE Associates for the construction of a 40 passenger waiting room at the Asheville Transit Center on Coxe Avenue.

City Council instructed staff to proceed with the design and biding of the forty-passenger waiting room for the Asheville Transit Center. The design was completed and the project bid. Bids were opened August 10, 2001, and the lowest bidder was RGE Associates in the amount of $102,397.50. The project consists of adding a room to the existing ticket building for the purpose of providing transit passengers with shelter from inclement weather and temperatures. The bid is within the financial resources currently available to the Transit Services Department.

The Transit Services Department recommends City Council authorize the City Manger to enter into a contract with RGE Associates for the construction of the forty-passenger waiting room.

Upon inquiry of Mayor Sitnick, Mr. Black said that there is a 91-day contract for construction and the project should be complete between November 15-30, 2001. At the request of Mayor Sitnick to try to get this waiting area constructed before cold weather sets in, Councilman Worley moved to amend the rules and proceed with formal action at this meeting. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved to adopt Resolution No. 01-130. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 439

OTHER BUSINESS

Mayor Sitnick announced that she conducted seven interviews for a vacancy on the Housing Authority and has chose Ms. Carol Goins to fill the unexpired term of Mr. Marshall Logan.

After discussion, it was the consensus of Council to (1) cancel the September 11, 2001, formal meeting; (2) cancel the October 16, 2001, worksession; (3) reschedule the October 9, 2001, formal meeting to October 10, 2001; and (4) reschedule the November 6, 2001, worksession to November 7, 2001.

City Attorney advised City Council that he may bring forward, at the next formal meeting, a request from the owners of the Kress Building regarding the location of a transformer on City-owned property.

It was the consensus of City Council, at the request of Vice-Mayor Cloninger, to add a resolution at the next formal meeting to urge the N. C. Dept. of Environment and Natural Resources to restore the awarded grant funds to the City of Asheville so they may complete the westernmost fuel station for alternatively fueled vehicles.

Upon inquiry of Vice-Mayor Cloninger, Planning & Development Director Scott Shuford advised City Council that his staff is working to amend the telecommunications tower ordinance to require companies to turn off their blinking lights on their cell towers.

Mayor Sitnick asked City Council to consider an anti-litter event. The event held four years ago was successful due to the cooperated effort of Buncombe County, Quality Forward and the Chamber of Commerce. The Public Works Department and the City's Enforcement Division have done an excellent job, along with Carolina Power & Light and BellSouth. She was disappointed that, due to the N. C. Department of Transportation's limitations, the City could not get them to cooperate on a co-partnership to clean up on state roads that come through the City. She suggest the anti-litter event could be seen on the education channel or at a formal meeting, or adoption of a resolution encouraging participating organizations, and new ones, to keep the heat on anti-litter efforts.

Mayor Sitnick reiterated that she has asked City staff to look into the issue of public restrooms downtown.

Mayor Sitnick suggested the Transit Services Director bring City Council information on the possibility of using rubber-wheeled trolleys in the downtown area.

Mayor Sitnick asked City Council to consider the possibility of putting a little more money in the budget for the Film Board in the next fiscal year.

Mayor Sitnick announced that she is will be sending out a letter week to ask the community to consider sponsorship of bus shelters, benches and/or the installation of them. Advertisement of that sponsorship or a plaque can be installed on the shelters or benches.

Mayor Sitnick reminded City Council about the green building roundtable on October 26, 2001.

Mayor Sitnick asked City Council for any issues, accomplishments, projects, etc. that they would like included in her final State of the City Address, which will incorporate items from her entire four year administration.

At 3:58 p.m. Councilman Hay moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session - G.S. 143-318.11(a)(4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Carolina Power & Light Company, Morris Communications, Outdoor Communications, Inc., Maple Cove, Inc., and the City of Asheville - G.S. 143-318.11(a)(3); and (3) To consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee - G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

At 4:31 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 4:31 p.m.

Zoning - Public hearing for CUZ and CUP for property on Yorkshire and Reed Streets for Biltmore Heights Professional Park, 190

Councilman Ellis pointed out that there is a parking lot at the medical complex on Sweeten Creek Road that is entirely pervious. Progress is being made in this area and we need to try to encourage developers to proceed with that type of construction.

Councilman Peterson pointed out that this is an example of the need for the City to expand its extraterritorial jurisdiction (ETJ) because when the Pinnacles were developed, it was in the County and they didn't have to meet City standards. Part of the rationale for expanding the ETJ is that development just outside the City does have an impact within the City.

Mr. John Grear, 15 Elmwood Lane, presented City Council with an engineering report dated March 28, 2002, regarding his property and the proposed development located at the rear of his residence. It was the engineer's opinion that "the development will have adverse effects" to his property and the adjoining property owners. Mr. Grear was concerned that his house (and adjoining houses) will be the collection point of all the water runoff from this project. If Council approves this, he asked that a condition be placed that the construction must meet or exceed all the City's rules and regulations.

Mr. George Ribaud, 7 Elmwood Lane, voiced concern over water runoff and the danger of a fire occurring in the woods where the proposed house will be built.

Mr. Roy Birchfield, President of the Ballantree Homeowners Association, said that a concern they had when they first heard about this project was would the construction be single- or multi-family. They have now been assured that any more development would have to come back through the same process. He urged City Council to make sure that the developer follows these plans.

Mr. Leo Wentzel, property owner, explained that he has met with the City Engineer and he understands the erosion control problem in the area. He said that he intends to do everything he can to prevent erosion from running off his property and will cooperate with the City Engineer.

Mayor Worley closed the public hearing at 6:02 p.m.

When Councilman Mumpower asked about if the Planning staff has reviewed the engineering report Mr. Grear presented, Planning & Development Director Scott Shuford responded that the letter is evident of the possibility of some civil action that could be pursued outside the standards that the City imposes. If the construction is not installed correctly, not only would the property owner be liable to face the enforcement of our ordinances, but also they might suffer civil damages of the neighboring property owners.

Councilman Mumpower moved to approve the modification from the subdivision standards to allow the length of the flagpole portion of a flag lot to exceed the maximum permitted length of 250 feet and to allow a single-family home to be constructed further than 500 feet from a fire hydrant for property on Ballantree Drive with the condition that the developer work with the Engineering Department to ensure compliance with the City's erosion control and stormwater ordinances. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

He then reviewed with Council the specifics of how each area qualifies for annexation:

Leicester Highway – Contains 64 acres, northwest. The area is contiguous and urbanized. It meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Sherwood Heights – Contains 61 acres, north – The area is contiguous and urbanized. It meets two tests – population density and subdivision test, and subdivision test.

Huntington Chase – Contains 63 acres, east - The area is continuous and urbanized. It meets two tests – population density and subdivision test, and subdivision test. This area also contains two non-urbanized areas.

Bell Road – Contains 21 acres, east – The area is contiguous and is urbanized. It meets the subdivision test.

Forest Lake – Contains 53 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Mill Stone – Contains 7 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Kensington-Windsor – Contains 67 acres, south – The area is contiguous and meets the population density test.

Mr. Benson then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require expansion of the Police Department. He explained how each area would be served by an expansion of a particular district. At the current population, the number of sworn positions reflects a police/citizen ratio of one officer per 410 residents. A ratio of one officer per 300-400 residents is typical for North Carolina cities and towns. The police/citizen ratio following annexation is estimated at one officer to 417 residents. Because of the relatively small size of the annexation areas and close proximity to the existing municipal boundaries, no additional capital or operating expenses is anticipated in adding these areas to the existing patrol districts.

Fire protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of the Fire and Rescue Department. The N.C. Gen. Statutes require the City to compensate rural fire departments for lost revenue by either contracting with the rural fire departments for fire protection, (usually the case). City services supplement the rural fire departments under contract to bring fire protection to City standards. The Fire and Rescue Department participates with surrounding fire departments in accordance with mutual aid agreements. The City currently has an insurance rating of 3, on a scale of 1-10, with 1 being the highest level.

Solid waste collection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Sanitation Division. New customers would receive the automated collection service. Compensation would be offered to private solid waste hauler to offset economic loss as required by the statutes. Therefore, there will be costs to the City associated with the purchase of new rollout containers and potential "economic loss" payments to affected contractors.

Councilman Ellis pointed out that there is a parking lot at the medical complex on Sweeten Creek Road that is entirely pervious. Progress is being made in this area and we need to try to encourage developers to proceed with that type of construction.

Councilman Peterson pointed out that this is an example of the need for the City to expand its extraterritorial jurisdiction (ETJ) because when the Pinnacles were developed, it was in the County and they didn't have to meet City standards. Part of the rationale for expanding the ETJ is that development just outside the City does have an impact within the City.

Mr. John Grear, 15 Elmwood Lane, presented City Council with an engineering report dated March 28, 2002, regarding his property and the proposed development located at the rear of his residence. It was the engineer's opinion that "the development will have adverse effects" to his property and the adjoining property owners. Mr. Grear was concerned that his house (and adjoining houses) will be the collection point of all the water runoff from this project. If Council approves this, he asked that a condition be placed that the construction must meet or exceed all the City's rules and regulations.

Mr. George Ribaud, 7 Elmwood Lane, voiced concern over water runoff and the danger of a fire occurring in the woods where the proposed house will be built.

Mr. Roy Birchfield, President of the Ballantree Homeowners Association, said that a concern they had when they first heard about this project was would the construction be single- or multi-family. They have now been assured that any more development would have to come back through the same process. He urged City Council to make sure that the developer follows these plans.

Mr. Leo Wentzel, property owner, explained that he has met with the City Engineer and he understands the erosion control problem in the area. He said that he intends to do everything he can to prevent erosion from running off his property and will cooperate with the City Engineer.

Mayor Worley closed the public hearing at 6:02 p.m.

When Councilman Mumpower asked about if the Planning staff has reviewed the engineering report Mr. Grear presented, Planning & Development Director Scott Shuford responded that the letter is evident of the possibility of some civil action that could be pursued outside the standards that the City imposes. If the construction is not installed correctly, not only would the property owner be liable to face the enforcement of our ordinances, but also they might suffer civil damages of the neighboring property owners.

Councilman Mumpower moved to approve the modification from the subdivision standards to allow the length of the flagpole portion of a flag lot to exceed the maximum permitted length of 250 feet and to allow a single-family home to be constructed further than 500 feet from a fire hydrant for property on Ballantree Drive with the condition that the developer work with the Engineering Department to ensure compliance with the City's erosion control and stormwater ordinances. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING SEVEN AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) LEICESTER HIGHWAY AREA; (2) SHERWOOD HEIGHTS AREA; (3) HUNTINGTON-CHASE AREA; (4) PORTION OF BELL ROAD; (5) FOREST LAKE AREA; (6) MILL STONE AREA; AND (7) KENSINGTON-WINDSOR AREA

Urban Planner Paul Benson said that the Annexation Services Plan is being submitted for Council's approval for the following areas: Leicester Highway area, Sherwood Heights area, Huntington-Chase area; portion of Bell Road, Forest Lake area, Mill Stone area and Kensington-Windsor area.

City Council approval of this document is the second step in the annexation process that began on April 9, 2002, when Council adopted the resolutions of intent to annex these seven areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	April 23, 2002
Public information meeting	June 3, 2002
Public hearings	June 11, 2002
Adoption of annexation ordinances	June 25, 2002
Effective date of annexations	June 30, 2003

The N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

He then reviewed with Council the specifics of how each area qualifies for annexation:

Leicester Highway – Contains 64 acres, northwest. The area is contiguous and urbanized. It meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Sherwood Heights – Contains 61 acres, north – The area is contiguous and urbanized. It meets two tests – population density and subdivision test, and subdivision test.

Huntington Chase – Contains 63 acres, east - The area is continuous and urbanized. It meets two tests – population density and subdivision test, and subdivision test. This area also contains two non-urbanized areas.

Bell Road – Contains 21 acres, east – The area is contiguous and is urbanized. It meets the subdivision test.

Forest Lake – Contains 53 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Mill Stone – Contains 7 acres, south – The area is contiguous and meets all three tests – population density test, the population density and subdivision test, and the subdivision test.

Kensington-Windsor – Contains 67 acres, south – The area is contiguous and meets the population density test.

Mr. Benson then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require expansion of the Police Department. He explained how each area would be served by an expansion of a particular district. At the current population, the number of sworn positions reflects a police/citizen ratio of one officer per 410 residents. A ratio of one officer per 300-400 residents is typical for North Carolina cities and towns. The police/citizen ratio following annexation is estimated at one officer to 417 residents. Because of the relatively small size of the annexation areas and close proximity to the existing municipal boundaries, no additional capital or operating expenses is anticipated in adding these areas to the existing patrol districts.

Fire protection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of the Fire and Rescue Department. The N.C. Gen. Statutes require the City to compensate rural fire departments for lost revenue by either contracting with the rural fire departments for fire protection, (usually the case). City services supplement the rural fire departments under contract to bring fire protection to City standards. The Fire and Rescue Department participates with surrounding fire departments in accordance with mutual aid agreements. The City currently has an insurance rating of 3, on a scale of 1-10, with 1 being the highest level.

Solid waste collection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Sanitation Division. New customers would receive the automated collection service. Compensation would be offered to private solid waste hauler to offset economic loss as required by the statutes. Therefore, there will be costs to the City associated with the purchase of new rollout containers and potential "economic loss" payments to affected contractors.

392

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Street Maintenance Division. Existing personnel and equipment are planned to serve the proposed additions to the City maintenance system; therefore, no specific personnel and equipment additions will be made. Streets are resurfaced on a scheduled rotation established by classification, construction type, use, condition and inspections. The following are private and state maintained streets planned for inclusion on the scheduled rotation: Leicester Highway: Eliada Home Road and Old County Home Road; Sherwood Heights: Robinhood Road, Brookwood Road, and Brookwood Court; Huntington Chase: Huntington Chase Drive; Bell Road: Bell Road; Forest Lake: Forest Lake Drive, Sawmill Road, Meadow Lake Road, Simpson Hollow Road, Kingbird Lane, Glen Woods Court, and Goldfinch Lane; Mill Stone: Mill Stone Drive; and Kensington-Windsor: Windsor Drive, New Castle Court and Saint Charles Court. In order for privately owned streets to be considered by maintenance by the City, there is certain criterion that must be met. Some immediate maintenance issues include trimming of overgrown vegetation adjacent to streets in Sherwood Heights area; and need for some patching in the Forest Lake area.

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed seven annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following four areas require no water line improvements: Sherwood Heights area, Forest Lake area, Mill Stone area and Kensington-Windsor area. The following three areas have water line improvements which are planned for completion by June 30, 2005: Leicester Highway: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 2,600 linear feet of new 6-inch water line, fire hydrants and related appurtenances. Huntington Chase: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 560 linear feet of new 6-inch water line, fire hydrants and related appurtenances. Bell Road: There is a need to upgrade the existing 2-inch water line to bring fire protection coverage to the same level as other parts of the City. The City will install approximately 1,300 linear feet of new 6-inch water line, fire hydrants and related appurtenances.

Sewer collection: The following five areas require no sanitary sewer system improvements: Leicester Highway area, Sherwood Heights area, Bell Road area, Forest Lake area and Kensington-Windsor area. The following two areas have sanitary sewer system improvements which are planned for completion by June 30, 2005: Huntington-Chase: The City will install approximately 560 linear feet of 8-inch sanitary sewer line and related appurtenances to enhance the level of service to this area. Mill Stone area: The City will install approximately 270 linear feet of 8-inch sanitary sewer line and related appurtenances to enhance the level of service to this area.

Administrative and other municipal services: The City provides a full range of services. Basically key professional and department directors specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and reaction and various other municipal activities and functions. The City is active in minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $375,547; Total state utility tax revenue - $51,300; Total local option sales tax - $144,058; Total Powell Bill allocation - $37,393; and Total fees, permits, licenses and charges for services - $47,149. Total revenue - $655,447.

Annual recurring expenditures: Fire (rural fire department contracts expected to be in place for at least 5 years) - $64,564; Solid waste (tonnage fee) - $9,632; and Street lighting (electrical charge to CP&L) - $6,644. Total recurring expenditures - $80,840.

Annual capital expenditures: Water line improvements - $310,000; Sewer line improvements - $101,000; Solid waste (economic loss compensation for private solid waste haulers) - $25,920; Rollout containers - $12,040; Street signs - $1,599; Street repair - $2,500; and Street lighting - $2,307. Total one-time annual capital expenditure - $455,366.

Mr. Benson explained the impact on insurance rates to property owners and commercial properties.

City Attorney Oast noted that if this Plan is found to be deficient after the public information meeting or after the City Council public hearing, it could be amended during Council deliberation of adoption of the ordinances.

Mr. Benson responded to various questions/comments from Council, some being, but are not limited to: does the City automatically take in all the streets in the annexation areas; are people required to tap into water or sewer after annexation; how much does it cost to tap into an existing water line; how long do we contract with the rural fire departments; how does the City handle street lights when subdivisions have more decorative street lights installed; are there different size roll-out containers; do we anticipate growth and more development around these proposed areas that will require building another fire station in the future; what is the status of multi-family apartments having recycling pick-up; how does the street scheduled maintenance rotation work; does the City feel that the police/citizen ratio is sufficient to protect our citizens; where does the City rank in crime throughout the state; what is the average response call for a Priority 1 police call; what constitutes Priority 1 police calls; and describe fire insurance rates.

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that the City is legally bound to provide services to the annexation areas on the effective date of annexation, except water and sewer line improvements which can be completed within a two year period after the effective date of an annexation.

Councilman Dunn briefed Council on a problem in Hollybrook where elderly people cannot roll down the trash containers for pick-up. He felt that if the City annexes an area, they should have the equipment to take care of the needs of that area. He understood the need for efficiency, but he felt that we are sacrificing services. Public Works Director Mark Combs explained the circumstances in Hollybrook and said that he is working with the homeowners association on that concern. He also noted that the City does have a set-out system in place for people who are physically not able to get their trash out to the curb.

Councilman Mumpower said that he wouldn't feel comfortable going forward with further annexations if the City is not providing good service to the current residents. However, Council does have assurance by staff that they are trying to provide good service. He invited City residents to contact Council to report if they see patterns of inadequate service.

At 7:25 p.m., Mayor Worley announced a short break.

394

Mr. Fred English, resident in Haw Creek, felt that the City should maintain what they have before trying to annex more people. He pointed out that there is only one short section of sidewalk in the whole Haw Creek valley.

Mr. Dennis Seeney, Forest Lake Subdivision resident, spoke against the annexation and said that even though he will be saving approximately $180-200 a year on fire insurance, it doesn't equal the amount of $1,000 of additional property taxes. He felt that he has adequate law enforcement protection already from the Sheriff's Department and their response time would be pretty much the same as the Asheville Police Department's response time. He wondered if the City would start maintenance of the common area that the association currently pays for.

In reply to Mr. Seeney, Mr. Benson said that the Forest Lake common area would be private property, however, if they would like to dedicate the land to the City, our Parks and Recreation Department may take over the maintenance.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 02-75 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE LEICESTER HIGHWAY AREA

Councilman Ellis moved for the adoption of Resolution No. 02-75. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 145

RESOLUTION NO. 02-76 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE SHERWOOD HEIGHTS AREA

Councilman Peterson moved for the adoption of Resolution No. 02-76. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 146

RESOLUTION NO. 02-77 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HUNTINGTON CHASE AREA

Councilman Ellis moved for the adoption of Resolution No. 02-77. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 147

RESOLUTION NO. 02-78 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS A PORTION OF BELL ROAD

Councilwoman Jones moved for the adoption of Resolution No. 02-78. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 148

RESOLUTION NO. 02-79 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE FOREST LAKE AREA

Councilwoman Jones moved for the adoption of Resolution No. 02-79. This motion was seconded by Councilman Ellis and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 149

RESOLUTION NO. 02-80 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE MILL STONE AREA

Councilman Peterson moved for the adoption of Resolution No. 02-80. This motion was seconded by Councilman Ellis and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 150

RESOLUTION NO. 02-81 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE KENSINGTON-WINDSOR AREA

Councilman Ellis moved for the adoption of Resolution No. 02-81. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilman Dunn voting "no."

RESOLUTION BOOK NO. 27 – PAGE 151

Councilman Dunn said that he is not against annexation and he would have voted in favor had he felt like the City was not stretched as far as we are. He was not convinced this was the right time to annex.

B. RESOLUTION NO. 02-82 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE SCHOOL BOARD

Vice Mayor Bellamy said that on April 16, 2002, City Council interviewed Allison Jordan, Marsha Bate, Roxie Wynn, Pegi O'Hagan and Keith Thomson for a vacancy on the Asheville School Board.

After each Council member spoke about the excellent credentials of all candidates, Councilman Ellis nominated Allison Jordan, Councilman Dunn nominated Allison Jordan, Councilwoman Jones nominated Marsha Bate, Mayor Worley nominated Allison Jordan, Councilman Mumpower nominated Marsha Bate, Councilman Peterson nominated Marsha Bate, and Vice-Mayor Bellamy nominated Roxie Wynn. There being a tie between Allison Jordan and Marsha Bate, Vice-Mayor Bellamy changed her vote in support of Allison Jordan.

Therefore, Allison Jordan was appointed as a member of the Asheville School Board to fill the unexpired term of Mr. Mark Gordon. Said term will begin immediately and expire on April 1, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 152

VI. OTHER BUSINESS:

Salvation Army Boys & Girls Club

Vice-Mayor Bellamy presented the City with several hand-made thank you cards and pictures from the Salvation Army Boys & Girls Club thanking firefighters and police officers.

Southeastern Airport Managers' Association

Mayor Worley said that he was presented with a resolution from the Southeastern Airport Managers' Association thanking the City of Asheville and the Asheville Regional Airport Authority for their generosity in assisting the 2002 Annual Conference held in Asheville.

Consolidation of Services

There was a brief discussion on the issue of consolidation with Buncombe County, in particular parks and recreation services. City Manager Westbrook said that as a result of a list of items Councilman Dunn had given him with regard to a proposal from Buncombe County, he prepared a memo to City Council noting that staff is analyzing the proposal and he would report back to Council within the next month on those items. Councilman Peterson felt that a subcommittee of Council working with a subcommittee of County Commissioners might be a better approach than having City staff working with County staff on consolidation proposals.

With regard to the consolidation of after-school programs, City Manager Westbrook said that at the budget worksession on May 13, 2002, Parks & Recreation Director Irby Brinson will explain his proposal.

Claims

The following claims were received by the City of Asheville during the period of April 5-11, 2002: Tim Vorst (Fire), Joy Reid (Water) and Michael H. Carter (Transit Services).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Veterans Memorial Request

Mr. Tuck Gudger, North Asheville resident, presented City Council with a petition containing approximately 650 names which read: "There is not a Veterans' Memorial in downtown Asheville commemorating those who have served, are serving and will serve in the military forces of the United States of America, especially during times of armed conflict, and there has long been a need for an appropriate veteran's memorial. The last open space in the city for a Veterans' Memorial is in the Pack Square/City/County Plaza area which area is being configured for better public use. We petition for a reservation of space in the Pack Square/City/County Plaza area for erection of a monument commemorating all veterans and, to the extent feasible, for erection of such monument." He asked that Council adopt a resolution supporting a veterans' memorial to be included in the projected plans for the renovation of the City/County Plaza. He also asked that the City contribute $50,000 towards the $100,000 total project cost. The other $50,000 is being requested from the Buncombe County Commissioners. He said that the City could maybe allocate the $50,000 over 3 years since the project may not be completed until that time.

Mr. Bill Griffin also spoke in support of the veterans' memorial and passed out to Council a sketch on what they would like the memorial to look like.

Mr. Richard Griffin supported the veterans memorial and stressed they need a place in Asheville that is appropriate and accessible for large crowds.

Mayor Worley asked the City Manager to place this item on Council's worksession agenda within 30 days and asked that Pack Square Conservancy Inc. (group contracted with the City) be invited to the worksession for a briefing on the project.

Comments by Walter Plaue

Mr. Walter Plaue invited City Council to attend the Memorial Day Services at 10:00 a.m. on Monday, May 27, 2002, at the City/County Plaza. He hoped this celebration would be the first of many.

Comments by Fred English

Mr. Fred English, Haw Creek resident, felt that the $15,000 appropriation to the Asheville Youth Sports Program voted on by Council at their worksession on April 9, 2002, was a conflict of interest for Vice-Mayor Bellamy and she should not have voted on that issue.

Closed Session

At 8:42 p.m., Councilwoman Jones moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Henderson County, Cane Creek Water and Sewer District, Asheville-Buncombe-Henderson Water Authority, James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. Williams, Paul E. Fruits, B. Joy MacFadyen Bulluck, Buncombe County, and City of Asheville – G. S. 143-318.11(a)(3). This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

At 10:10 p.m. Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 30, 2002
North Asheville Community Center
37 East Larchmont Road

7:00 p.m. - Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

The following topics were raised by residents and addressed by City Council and City staff: request to withhold any decision regarding the renovation of the Civic Center until a plan can be produced for the alternate use of the Civic Center at no cost to the City; determination needs to be made if Dunwood Road is a private or City-maintained street; large potholes on Dunwood Road; Dunwood Road is in such disrepair that trash trucks cannot collect garbage; annexation policies in the past with regard to street maintenance; Black Oak Drive, which was annexed several years ago, is in bad disrepair and residents requested the City take over maintenance of that private road; street assessment process unfair to property owners on Black Oak Drive who have a lot of street frontage; request to have Black Oak Drive's potholes repaired and snow removal service even if it is a private road, request for a pedestrian signal at the corner of Larchmont Road and Merrimon Avenue; request for sidewalk between Burger King and Swannanoa Cleaners on Merrimon Avenue; request for speed bumps on Fenner Avenue; request for sidewalks on Fenner Avenue; need for more speed enforcement on Fenner Avenue; request for "Children at Play" or "Slow" signs on Fenner Avenue near the bottom of the hill or near the corner of Lookout and Fenner; need Police Department to enforce parking violations on Fenner Avenue; Civic Center renovation should not include a sport activities complex because that should be built by the river or closer to the Airport in order to have adequate parking; City should make a determination on what to do at the Civic Center soon because the price tag is getting higher every year; library at the North Asheville Community Center is small and perhaps should be expanded over the air rights of the parking lot; no speeding enforcement on Merrimon Avenue or Kimberly Avenue; need to look at City departments, e.g., Civic Center and Transit Services, for prioritization; need for the City to do a better job of communicating with the community; request for community to give input to the City's 2025 Comprehensive Plan; request for County Commissioners' meetings to be viewed on the City's Government Channel; and request for more greenways.

After discussion, Council requested City staff prepare a report regarding streets that are in the City of Asheville but not maintained by the City. Said report is to contain a list of streets; the cost of bringing the streets up to City standards; and a financial plan with potential funding options, e.g. how much the City would pay and where those funds would come from, and how much the property owners would pay. Due to the current budget concerns, the City Manager requested this information be provided to Council between September 2002 – March 2003. Councilman Mumpower requested a worksession before late fall as he just wanted to explore possibilities without dollars being attached.

Mayor Worley adjourned the meeting at 8:42 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 7, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Resolution setting a Public Hearing on May 28, 2002, for the Voluntary Annexation of Reynolds Mountain Subdivision, Phase I

Budget Amendment for Mobile Safety House Grant from Federal Emergency Management Agency

Summary: The consideration of a budget amendment, in the amount of $52,277, to receive grant money from the Federal Emergency Management Agency (FEMA) for a mobile safety house and associated equipment.

The City of Asheville Fire and Rescue Department requested $52,277 from FEMA for the purchase of a mobile safety house and associated equipment. Staff was successful in obtaining those funds and was awarded Federal grant EMW-2001-FG-06774. The grant provides 70% of the total project, with the remainder from Fire Department's operating budget.

The safety house is primarily designed to educate adults about fire safety and home safety. Part of the mobile house is also to educate the public about residential fire sprinkler systems.

City staff recommends City Council approve the budget amendment to receive grant money from FEMA.

Contract to Audit City Accounts

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Crisp Hughes Evans LLP, Certified Public Accountants, for auditing services for Fiscal Year 2001-2002.

N.C. General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998 the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Crisp Hughes Evans LLP to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2000-2001. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the Fiscal Year 2001-2002 audit. The base fee has been proposed at $54,000 (this is the same fee as last year and $700 less than two years ago). Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution, which authorizes the Mayor to execute a contract with Crisp Hughes Evans LLP for auditing services for Fiscal Year 2001-2002.

Budget Amendment for Master Street Tree Plan, Phase III

Summary: The consideration of a budget amendment, in the amount of $10,000, from a grant from the North Carolina Department of Environment and Natural Resources for implementation of the Master Street Tree Plan, Phase III.

The City of Asheville applied for funds in August 2001 for a grant from the North Carolina Department of Environment and Natural Resources, Division of Forest Resources in the Urban and Community Forestry Grants Program. The grant was recently awarded in the amount of $10,000 and designated for implementing the next phase of the Master Street Tree Program (MSTP) in the east area of Asheville.

The Parks and Recreation Department has completed the first two phases of the MSTP, and the Public Works Department will complete the remaining phases. Once complete, the MSTP will be an inventory of all the street trees on City right-of-ways located within the City limits of Asheville. The existing inventory is almost fifteen years old and does not accurately reflect the trees of the City. The next phase of the process will identify the location, size, condition, and site conditions of trees located in the east area of Asheville. The MSTP will serve as a critical link in developing a long term management plan for Asheville's urban trees, provide information for future tree planting and forestry planning, and provide educational and volunteer opportunities for community organizations.

The Parks and Recreation Department recommends City Council to approve the budget amendment in the amount of $10,000 to establish a budget for the next phase of the MSTP.

Youth Employment Program

Summary: The consideration of accepting a proposal by Community Solutions for Youth Employment to fund and manage the Youth Employment Program for the Summer of 2002, and approval of a budget amendment, in the amount of $37,400, to fund the program.

Community Solutions for Youth Employment (CSYE), part of a multi-agency support system for high risk youth ages 14 – 21 years of age, was informed of the City's inability to continue its youth employment program for 2002 due to budget constraints caused by State revenue shortfalls. CSYE is a program of Eliada Homes, Inc. CSYE, in cooperation with the Parks and Recreation Department, immediately began work to determine the best way to continue funding the youth employment program.

CSYE is proposing to fund summer jobs for 26 youth for eight weeks at 30 hours per week. In addition, CSYE agrees with the department that employment for these youth is only one part of the overall assistance that they need and therefore has agreed to manage the program for the Department at no additional cost. This management will include: recruitment of applicants, application activities, recruitment of employers in addition to the City of Asheville, interviewing activities, hiring, pre-employment training and orientation, job retention activities, mid-summer training, and volunteer placement for any additional youth needing experience but not included in the employment process. CSYE staff will provide weekly onsite contact with each youth employee to monitor their work and to supply support. CSYE will conduct an evaluation of the program. A special event at the end of the eight weeks is planned to celebrate the successful conclusion of the program.

The City of Asheville will accept a grant from the Community Solutions for Youth Employment for $37,400 to fund the cost of the program. The City of Asheville will use these funds to pay the wages and social security for each youth and provide pre-employment drug screening. Cost to the City will be the staff and time necessary to process payroll and to administer the drug screening program.

Traditionally, youth employed through this program have worked in a number of different City Departments including Parks and Recreation, Fire, Public Works and Human Resources.

The Parks and Recreation Department recommends that the City accept the proposal and grant funds from CSYE for the 2002 summer youth employment program and approve the budget amendment to fund the program.

Upon inquiry of Vice-Mayor Bellamy, Superintendent of Recreation Butch Kisiah explained the recruitment procedure.

Provisions for Possession & Consumption of Malt Beverages and/or Unfortified Wine at Goombay Festival, Greek Festival, Asheville Mountain Sports Festival, Asheville Downtown Association's events and the Bele Chere Festival

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: 2002 Goombay Festival, 2002 Mountain Sports Festival, 2002 Greek Festival, Asheville Downtown Association's 2002 events and Bele Chere 2002.

The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 23-25, 2002. The 2002 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

The Asheville Mountain Sports Festival is a unique combination of competitions and demonstrations throughout Asheville. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 27-29, 2002. The 2002 Mountain Sports Festival has requested permission to allow possession and consumption of beer and wine during these events.

For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.* The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the Downtown area. This year the request is being made for July 26-27, 2002. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

402

Vice-Mayor Bellamy asked that these be voted on separately at the next formal meeting.

- **Grant from U.S. Dept. of Justice for Three New Police Officer Positions**

Summary: The consideration of a resolution authorizing the City Manager to apply for a federal grant from the U.S. Department of Justice to fund three new police officer positions.

The City is eligible to receive a $225,000 grant form the U. S. Department of Justice, Office of Community Oriented Services, to fund three new police officer positions for a period of three years. It is intended to assign three police officers to provide additional police services to the City's public housing communities. In consideration thereof, the Housing Authority of the City of Asheville has agreed to provide $107,736 for the required local cash match. No City funds are required for the match.

City staff recommends City Council authorize the City Manager to apply for and enter into an agreement with the U.S. Department of Justice to fund three new police officer positions.

Police Chief Will Annarino answered various questions from Council regarding these three positions.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

I-26 CONNECTOR UPDATE

Metropolitan Planning Organization Coordinator Dan Baechtold said that this is a presentation to City Council on the traffic projections to be used in the design of the I-26 Connector Project.

Mr. Baechtold said that Stantec Consulting, traffic consultant from Raleigh, recently completed an update to the traffic model for the Asheville urban area. The traffic model is a computer simulation of traffic patterns that predicts traffic volumes on major streets and highways over the next 25 years. This traffic data will be used as the basis for designing the I-26 Connector project in Asheville. Stantec had a contract with the City of Asheville in the amount of $145,300 to produce this product. Eighty Percent (80%) of this cost was paid for with federal funds. The City of Asheville provided the local match of twenty percent (20%) in the amount of $29,060.

He said the traffic model presentation would also be given to the Community Coordinating Committee, which is the citizen's group that has been working with the NCDOT on the design of the connector project. That presentation will take place on the morning of May 7th. The following day, on May 8th, the presentation will be given to the Transportation Advisory Committee for the Asheville Area MPO (TAC). The TAC serves as the body that provides local input to the NCDOT. The TAC will be asked, after their public hearing on May 16, 2002, to give their input to the NCDOT.

Mr. Drew Joyner, with the N. C. Dept. of Transportation (NC DOT) Project Development and Environmental Analysis Department, explained that for the past 1-1/2 years they have (1) added I-26/I-40/I-240 interchange; (2) updated the I-26 Connector website; (3) added two new alternatives – beginning functional design and completing field studies for environmental impacts; (4) worked with NC DOT staff to provide visualization of project alternatives; and (5) updated the Asheville Urban Area Traffic Model.

The traffic data was one of the factors used to determine the number of lanes that will be built through West Asheville. He explained the results of the traffic model stating that the NC

Vice-Mayor Bellamy moved to reappoint Jim McCulley, Kim Moore and Christiana Tugman to each serve a three year term respectively, terms to expire December 31, 2004, or until their successors have been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 80

E. RESOLUTION NO. 02-38 - RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Asheville Transit Commission.

The term of Claudia Nix, Ron Lambe, Althea Goode and Willie McDaniel, as members on the Asheville Transit Commission, expired on December 31, 2001.

On January 22, 2002, City Council interviewed Mickey Mahaffee and on February 12, 2002, City Council interviewed Richard Fosmoen.

Mickey Mahaffey received 5 votes and Richard Fosmoen received 2 votes.

Vice-Mayor Bellamy moved to reappoint Claudia Nix, Ron Lambe and Althea Goode to each serve an additional two year term, terms to expire December 31, 2003, or until their successor have been appointed; and to appoint Mickey Mahaffey to serve a two year term, term to begin immediately and expire December 31, 2003, or until his successor has been appointed. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 81

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 8-21, 2002: Perry Christopher (Parks & Recreation), Asheville Smoke (Civic Center), Jean Arrington (Water), Kent Cook (Streets) and Scott Bralley (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English, City resident, spoke about several matters concerning the Asheville Smoke, the Asheville Altitude, affordable housing, 2002 revaluation, and the City's budget as a result of the State's budget cuts.

B. COMMENTS BY KEVIN NUTTELL

Mr. Kevin Nuttell, representing the N.C. AIDS Policy Center, spoke about his dissatisfaction about the services provided by local AIDS service organizations.

Chris Goodwin received 0 votes; Lauren Malinoff received 3 votes; Dee Knight received 0 votes; Richard Fort received 3 votes; Robert Smith received 0 votes, Ned Guttman received 1 vote, Steven Sizemore received 4 votes; Beverly Robinson received 4 votes; Tom Muncy received 6 votes; and James Mills received 0 votes. Because of a tie between Beverly Robinson and Steven Sizemore, another vote was taken: Beverly Robinson received 5 votes and Steven Sizemore received 2 votes.

Vice-Mayor Bellamy moved to appoint Tom Muncy and Beverly Robinson, as Regular members, to each serve a three year term respectively, terms to begin immediately and expire on January 21, 2005; and to appoint Steven Sizemore, as an Alternate member, to serve a three year term, term to begin immediately and expire January 21, 2005. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote with Councilman Peterson voting "no".

RESOLUTION BOOK NO. 27 – PAGE 78

C. RESOLUTION NO. 02-36 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Bellamy said that this is the consideration of appointing members to the A-B Community Relations Council.

The terms of Bernadette Thompson and Cassandra Ingram, as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2001.

On January 22, 2002, City Council interviewed Rod Whiteside, Shirley Dillingham and Leslie Hennessee. On February 5, 2002, City Council interviewed Dan Comer.

Mayor Worley noted that he had received an e-mail from Rod Whiteside which stated he did not wish to be considered for the A-B Community Relations Council appointment.

Shirley Dillingham received 2 votes; Leslie Hennessee received 6 votes and Dan Comer received 6 votes.

Vice-Mayor Bellamy moved to appoint Leslie Hennessee and Dan Comer to each serve a three year term respectively, terms to begin immediately and expire on December 31, 2004, or until their successor have been appointed. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 79

D. RESOLUTION NO. 02-37 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Asheville-Buncombe Fair Housing Commission.

The terms of Christiana Tugman, Kim Moore and Jim McCulley, as members on the Asheville-Buncombe Fair Housing Commission, expired on December 31, 2001.

On February 12, 2002, City Council interviewed David Clegg.

City Council noted how impressed they were with Mr. Clegg.

Vice-Mayor Bellamy said that she people have brought to her attention problems with the Humane Society not enforcing the ordinance and their inability of responding in a timely manner. Police Chief Annarino said that the City's contract with the Humane Society is in the amount of $170,000 and expires on July 1 of this year. He noted that both parties are currently evaluating the contract. They do have a new director who is working on those issues. She has instituted training and certification for her officers, is working to enforce compliance and has supported the increasing of fees. This will help them bring in revenue to help offset some of their costs.

The following residents spoke in support of increasing the penalties for animal control violations:

Mr. Bob Brummond, Haw Creek resident
Mr. Walter Plaue, City resident
Mr. Robert Maddox, City resident
Mr. Fred English, Haw Creek resident
Mr. Lynwood Crump, Shiloh resident
Mr. Bernard Lancaster, Haw Creek resident
Mr. Thomas Penland, Haw Creek resident
Mr. Chris Pelly, President of the Community Association of Haw Creek

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2901. This motion was seconded by Vice-Mayor Bellamy.

Councilman Mumpower understands that there is a clear need for this increase of fees, however, felt that this is an extreme percentage of increase. He would prefer to support of a sequential increase in fees. He felt that our fees are higher than the healthier models in the survey, specifically speaking to Lee County, Salisbury and Cary. He was also concerned that we are changing the fees before we clarify our ordinance. He felt the enforcement part is as least as important as the fees, if not more. He felt this should be a more reasonable fee structure, for example $50 first offense and $25 increments from there on.

The motion made by Councilman Dunn and seconded by Vice-Mayor Bellamy and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 19 - PAGE [redacted] 425

At 6:55 p.m., Mayor Worley announced a short break.

B. RESOLUTION NO. 02-35 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Bellamy said that this is the consideration of appointing members to the Board of Adjustment.

The terms of Lauren Malinoff (Regular), Dennis Hodgson (Regular) and Joseph Brady (Alternate) on the Board of Adjustment expired on January 21, 2001.

On February 5, 2002, City Council interviewed Chris Goodwin, Lauren Malinoff, Dee Knight, Richard Fort, Robert Smith, Ned Guttman and Steven Sizemore. On February 12, 2002, City Council interviewed Beverly Robinson, Tom Muncy and James Mills.

The current penalty for animal control violations is $10.00 for the first offense; $20.00 for the second offense within 12 months of the first; and succeeding offenses within 12 months of a prior offense result in increased penalties in $10.00 increments per offense. Penalties of these amounts have proven ineffective in promoting voluntary compliance with animal control regulations. In addition, collection of penalties is a problem because of the costs of collecting delinquent penalties exceeds the value of the revenue.

It is proposed that the penalties be increased as follows:

- First offense --$50.00
- Second offense within 12 months ----------------$100 00
- Third offense within 12 months--------------------$150.00
- Succeeding offenses within 12 months result in increased penalties in $50.00 increments per offense. (For example the fourth offense within 12 months would carry a $200.00 penalty; the fifth would carry a $250.00 penalty, and so on.) The maximum penalty is set at $500.00.
- Unpaid penalties would be declared delinquent after the 30th day from the issuance of the citation and thereafter for each additional 30-day period of delinquency.
- Delinquency fee-------$50.00. (This is similar to the parking penalty delinquency schedule which provides for a $25 fee for each 30 day delinquency period.)

The following is a survey of seven cities' and counties' which have animal control penalties (none provide for a delinquency fee for non-payment):

- Chapel Hill: $50 per offense; if payment is not received a criminal summons is issued, to $500.
- Buncombe County: Each offense not to exceed $500 at the discretion of the Animal Control Officer.
- Lee County: 1st offense $25; 2nd $50; 3rd $250 and/or confiscation of animal.
- High Point: $50 per offense.
- Salisbury: 1st offense $25; 2nd $50; 3rd $75; 4th $250. Loose dog is $50.
- Sanford: 1st offense $50; 2nd $100; 3rd $250 and/or confiscation of animal.
- Cary: 1st offense $20; 2nd $50; 3rd $75; 4th $100; 5th $250 and confiscation of animal.

Public education of the penalty structure is an important component of the implementation plan. Asheville's Government Access Channel, the "City Works" section of the Asheville Citizen-Times, internet postings and other methods will be used to inform the public. The effective date of the ordinance will allow a 60-day window of opportunity for staff to carry out public education activities.

Spay and neuter alternatives to penalties will be considered on a case-by-case basis.

The contract for animal control services the City has with the Asheville Humane Society specifies that all civil penalties and license fees collected will be retained by the Humane Society to off-set expenses associated with enforcing the annual license fee, sterilization of animals adopted from the shelter, and public education. For 2001, approximately $1,700 in penalties and $10,000 in license fees were collected.

City staff recommends Council adopt the ordinance.

Councilman Peterson asked if the City considered confiscation of animal as the last resort as some cities and counties do. Police Chief Annarino said that administratively and realistically they don't get to that point. Confiscation of animals generally means a violation of some type of criminal offense.

the future. His concern has to do with the no payment loans where the loans are for 20 or 30 years and there is no principle being returned and no opportunity to revolve that money over and over again within the community. He does understand how incentives and subsidies are needed. Perhaps Community Development Block Grant (CDBG) funds could be used more effectively as a subsidy. He also suggested we look at our total funds available for affordable housing and see which fund sources are best for which aspects of affordable housing.

Councilwoman Jones said that CDBG funds and the Housing Trust fund are not enough to fix affordable housing problems in Asheville. We need to find more creative solutions and be open to land use planning if we are going to make a difference in affordable housing. Council needs to remember that while we are growing this Fund and using it wisely, let's not forget we are putting people in homes.

Councilman Dunn said that the Housing & Community Development Committee is already talking about some of the issues mentioned at this meeting.

Councilman Ellis asked if all of the new units pay property taxes. Ms. Caplan responded that the units owned and maintained by WNC Housing for special needs people will not be on the tax rolls – all the other units will be.

Mr. Walter Plaue, City resident, said that he was a member of the focus group that addressed the first year concerns. They agreed that (1) no more than 30% of the loan funds in any year should be deferred; (2) no more than 30% of the loan funds in any year should be at 0% interest; and (3) there should be a creation of a balanced citizens advisory committee for the 2002-03 year to be appointed by the City Council by the Spring of 2002. He agreed that this is not simply the matter of the best dollar, but that there needs to be a consideration of the human element. He personally felt that the City should look to expand the Fund into the ETJ areas. Granted those properties may not pay City taxes, but already one of the recommendations today is for a project that is not going to pay City taxes. By going into the ETJ we can find land that is less expensive and that is a key element in giving the people better units to live in.

Mr. Fred English, City resident, felt that the City should not be putting any of the Trust Fund into historic properties.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Peterson moved for the adoption of Resolution No. 02-34. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 77

Vice-Mayor Bellamy said that there are other ways to address the issues of affordable housing and some is looking at our policies and how we interpret those policies. We need to think about what people want in their existing neighborhoods – something that blends in with the character of the neighborhood. We need to look at more collaboration with non-profits and for-profits and look at how we can work together. She supported inclusionary housing, which the City needs legislative authority.

B. ORDINANCE NO. 2901 - ORDINANCE RESTRUCTURING AND INCREASING PENALTIES FOR ANIMAL CONTROL VIOLATIONS

Police Chief Will Annarino said that this is the consideration of an ordinance to restructure and increase penalties for animal control violations.

2. Mountain Housing Opportunities – $80,000 for construction of a 4-bedroom house for sale and rehabilitation of two dilapidated houses, one for sale and one as a rental duplex; on Jefferson Street, Clingman Avenue, and Rector Street.
3. Tim & Wendy Vorst – $40,000 for a duplex with a 1-bedroom and a 3-bedroom apartment to rent on Brookshire Street.
4. Tim & Wendy Vorst – $120,000 for a 6-plex of 1-bedroom apartments to rent on Hendersonville Road.
5. Carolina Custom Exteriors – $180,000 for a 3-bedroom house for sale, and two duplexes and a 4-plex to rent on Galax Street. The proposal includes an offer to buy the City-owned site on Galax Street.

Proposed loan terms are as follows:

WNC Housing:	2% interest payable annually; first year's interest and all principal repayment deferred for 30 years.
Mountain Housing:	Rental duplex: 2% interest with all payments deferred for 20 years; Single-family homes: x% interest with all payments deferred for 30 years, where x = the rate of appreciation of the properties.
Tim & Wendy Vorst:	2% for 30 years, amortizing, on both projects.
CC Exteriors:	2% construction loan only on the single-family house; 2% for 15 years amortizing on the rental units.

City staff recommends approval of the five loans from the City's Housing Trust Fund.

Councilman Dunn felt that the Housing & Community Development Committee (of which he is a member) should carefully review using the Housing Trust Fund monies to restore historic sites. He asked that if a focus group is again formed, he felt it should be more balanced by having an equal number of developers, non-profits and for-profits.

Upon inquiry of Councilman Dunn, Ms. Caplan said that since property in the extraterritorial jurisdiction does not provide tax revenue, City Council did not wish Housing Trust Fund monies to be expended outside the City limits.

Councilwoman Jones, member of the Housing & Community Development Committee, felt this would be a good time to ask the County to be a part of the Housing Trust Fund. She felt these five recommendations represent a balance of rehab and new construction; rental and sale; different types of dwellings as far as duplexes and single-family homes; is a mixture of private and non-profit; and are different parts of the City. She stressed that part of what we must do as policy and decision makers is be good stewards of hard earned tax money. However, the "bang-for-the-buck" is only one criterion in the bottom line and will not always be for the best decisions. When we talk about balance, we need to bring in other criteria as well.

Councilman Mumpower felt that accountability is a good criterion, but also defends getting the most benefit out of the monies that we have to spend.

Upon inquiry of Councilman Ellis, Ms. Caplan said that the City would gain 26 affordable housing units from the combined $520,000 loans this year.

Mayor Worley gave a brief history of the Housing Trust Fund and said that City Council has never adopted policies to apply to this Fund. He suggested the Housing & Community Development Committee look at adopting some policies on how the Trust Fund is administered in

Mayor Worley closed the public hearing at 5:33 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2900. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE [redacted] 423

IV. UNFINISHED BUSINESS:

A. AMENDMENT TO CITY COUNCIL POLICY ON RULES FOR BOARDS AND COMMISSIONS REGARDING U.S. CITIZENSHIP AS A QUALIFICATION FOR APPOINTMENT

Mayor Worley said that this issue has been referred to the City's Board and Commission Committee and will not be discussed at this meeting.

V. NEW BUSINESS:

A. RESOLUTION NO. 02-34 - RESOLUTION APPROVING FIVE LOANS FROM THE CITY'S HOUSING TRUST FUND

Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to award five loans from the City's Housing Trust Fund.

Ms. Caplan explained the 2nd Year Housing Trust Fund Program. She pointed out the concerns of Year 1 and explained the focus group, which was formed to address those concerns. She explained why repayments should be deferred: (1) funding structure depends on target income group; (2) making housing affordable at 80% median income requires incentives; and (3) making housing affordable at less than 50% median income requires subsidy. She explained the growth of the Fund through repayments vs. level of subsidy and then gave examples of finding the right loan structure.

Ms. Caplan said that available funds in the City Housing Trust fund stand at $512,000. This comprises $400,000 in new Fiscal Year 2002 funds and approximately $112,000 in loan repayments. Applications for these funds were invited by letter and advertisement on December 7, 2001.

Eight applications were received by the January 18 deadline, requesting loans totaling $840,000. They were reviewed by a five-person committee of City staff and outside experts, using criteria developed by a broad-based focus group last fall. The review committee reported to the Housing and Community Development Committee, which has recommended the five highest ranked applications for a total of $520,000 in loans, producing 26 affordable housing units. They are:

1. WNC Housing, Inc. – $100,000 for "Independence Cottages", five 1-bedroom houses for rent to very low income individuals with severe and persistent mental illness; on Clemmons Street and Spinet Street.

ORDINANCE NO. 2900 - ORDINANCE TO REZONE TWO LOTS LOCATED AT THE CORNER OF HENDERSONVILLE ROAD AND MILLS GAP ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:23 p.m.

Urban Planner Jeff Tacy said that this is consideration of an ordinance to rezone two lots located at the corner of Hendersonville Road and Mills Gap Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on February 15 and 22, 2002.

The Planning and Development Department has initiated this rezoning request (.88 acre) (PIN Nos. 9655.09-25-0433 and 1468) in an effort maintain the commercial character of the Hendersonville Road corridor. The Highway Business District is established to address the needs of commercial development along major thoroughfares. The district permits a wide range of residential, recreational, institutional, public/semi-public, office/business and other land uses. The majority of the properties in the vicinity that front on Hendersonville Road are zoned Highway Business. There are no industrial uses fronting on Hendersonville Road in the immediate area. Based on the purpose of the HB District and the development patterns along Hendersonville Road, HB zoning would be more appropriate than Commercial Industrial. HB zoning would prevent the location of incompatible uses in the area and promote the location of uses similar to those in existence. Next month, the Planning and Development Department will request the same rezoning for the property on the southeast corner of Hendersonville Road and Mills Gap Road. This will eliminate nearly all of the Commercial Industrial zoning fronting on Hendersonville Road at the Mills Gap Road intersection.

It should be noted that the current owner of the subject property has submitted a letter of agreement for the rezoning request.

The Planning and Zoning Commission voted unanimously to recommend approval of the rezoning of the property located at the northeast corner of Hendersonville Road and Mills Gap Road from Commercial Industrial to Highway Business. The Planning and Development staff recommends approval of the requested rezoning.

Councilman Peterson said that at their recent retreat City staff advised Council that the City needs to preserve property that is zoned industrial to encourage more industrial development in the City. This rezoning request is doing just the opposite. He wondered if by changing the zoning on this property, are we making it easier for the properties behind it to be more justified in changing to a more commercial use vs. a more industrial use. He admitted that it's easy for the City to say they need to preserve the industrial zones, but hard to enforce if property owners can get better use out of their property if zoned commercial.

Mr. Tacy said that these properties are not good from a planning or land use type perspective to be preserved as industrial. He pointed out that there are a lot of uses permitted in the industrial district that would not fit into the long-range plan for the Hendersonville Road corridor.

Planning & Development Director Scott Shuford said that at this particular location it is very unlikely that the property would be developed for anything industrial. In fact, with very rare exceptions, when property is placed in commercial industrial zoning classifications, the end result is that the commercial aspect usually gets developed. He advised Council that in the near future Planning staff will be bringing forward to Council an amendment that will allow more industrial development to occur in our commercial zoning classifications.

Mayor Worley said that this public hearing was opened on October 23, 2001, and continued several times.

On February 19, 2002, a letter was received from Ms. Diane Smoak, representing the petitioner, as follows: "We are requesting that our rezoning hearing for 1153 Sweeten Creek Road be rescheduled for the May meeting. We have been trying to work with the citizens of the Shiloh community to rezone this property and apologize for the inconvenience to the council but feel a mutually agreeable plan for the property would be good for the community as well as the owner of the property. Thank you in advance for working with us."

Councilman Ellis moved to continue the public hearing to May 28, 2002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 2270 HENDERSONVILLE ROAD KNOWN AS ARDEN SQUARE SHOPPING CENTER

ORDINANCE NO. 2899 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 2270 HENDERSONVILLE ROAD KNOWN AS ARDEN SQUARE SHOPPING CENTER.

Mayor Worley opened the public hearing at 5:17 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to consider the voluntary annexation for property located at 2270 Hendersonville Road, site of the Arden Square Shopping Center. This public hearing was advertised on February 15, 2002.

Mr. Winston W. Pulliam, sole owner of Arden Square LLC, has submitted an annexation petition for property located at 2270 Hendersonville Road.

This property is not contiguous to the City, but is located within the Arden annexation area, for which the annexation ordinance has been adopted with an effective date of June 30, 2002. The location of the property is further described as being on the east side of Hendersonville Road, south of Royal Pines Drive. The annexation area includes one lot, PIN No. 9654-09-15-9196, and consists of 2.2 acres.

City staff recommends City Council adopt the ordinance annexing 2270 Hendersonville Road.

Mayor Worley closed the public hearing at 5:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Ellis moved for the adoption of Ordinance No. 2899. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 421

C. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED AT THE CORNER OF HENDERSONVILLE ROAD AND MILLS GAP ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

K. RESOLUTION NO. 02-33 - RESOLUTION DIRECTING THE CITY CLERK TO PUBLISH A NOTICE REGARDING THE PROPOSED SALE OF REAL PROPERTY AT 9-13 BILTMORE AVENUE, ASHEVILLE, N.C., AND SETTING A PUBLIC HEARING ON MARCH 12, 2002

Summary: The consideration of a resolution setting a public hearing and directing the City Clerk to publish a notice regarding proposed sale of real property at 9 -13 Biltmore Avenue, Asheville, N.C.

The property at 9 -13 Biltmore Avenue is located about 125 feet south of Pack Square. It is improved with a store front building with three bays dating from the 1920s. The land area comprises 14,469 square feet and the total combined building area is approximately 6,529 square feet. The lot extends to the east side of South Lexington Avenue, about 125 feet south of the intersection with Patton Avenue, and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and sloped to street level access. The appraised value of the property is $530,000.

Asheville Area Arts Council has submitted a proposal to purchase the property minus the air rights over the rear parking lot in the amount of $462,500. The bid from the Arts Council includes the proposal to cooperate with the eventual purchaser of the air rights over the parking lot to allow construction a new building containing parking, office, retail and/or residential units on South Lexington Avenue. The new building would be constructed above the first level by the purchaser of the air rights. The calculated value of the air rights retained by the City to be sold separately is $67,500. The bid from the Arts Council reflects the appraised value minus the air rights. The City has a bid in hand from a redeveloper for the air rights. The bid from the Arts Council includes an offer of $339,000 cash and a request that the City finance $123,500 of the purchase price. If the bid of the Arts Council is accepted, Community Development staff recommends evidence of funding or financing be required within 60 days of acceptance.

Approval of the resolution will schedule a public hearing on March 12, 2002, and initiate the sale of the property through a private sale as provided in N. C. Gen. Stat. sec. 160A-457(4).

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 76

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Ellis and carried unanimously.

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

284

RESOLUTION BOOK NO. 27 – PAGE 73

H. **RESOLUTION NO. 02-31 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GLAZER ARCHITECTURE P.A. FOR RENOVATIONS AND ADDITIONS TO FIRE STATION 3 LOCATED AT 50 OREGON AVENUE**

Summary: The consideration of a resolution authorizing the City Manager to sign the contract with Glazer Architecture, P.A., in the amount of $18,600, for basic renovations and minor additions at Fire Station #3 located at 50 Oregon Avenue.

Fire Station 3 was constructed in 1976 and no major building renovations have been undertaken during the life of the building. Presently, a pumping fire engine and a ladder truck are housed within the station. The renovations include re-roofing the building, renovating the kitchen, new finishes in the dayroom, kitchen, and dorms, new HVAC for all areas except the apparatus bays, electrical and plumbing renovations as required by Code. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #3.

RESOLUTION BOOK NO. 27 – PAGE 74

I. **RESOLUTION NO. 02-32 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE DISPOSAL PARCEL 146 ON LINCOLN STREET IN THE EAST END/VALLEY STREET COMMUNITY**

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 146 in the East End/Valley Street Community for the amount of $3,200.

Disposal Parcel 146 is a substandard lot located on the north side of Lincoln Street comprising 3,659± square feet. The lot is irregular in shape and mostly flat about street level then sloping up sharply to the rear. The bid in the amount of $3,200 from Damon Rouse includes the proposal to combine the property with adjoining property currently owned by Mr. Rouse on Jordan Street.

Although the new tax appraisal is $5,600, this property was available for several years at the previous tax value of $2,000 and then at $4,900 with no offers having been received. A letter of opinion from Ben Mansell CRS, GRI with RE/MAX Advantage Realty, indicates that due to the limited utility of the property to any buyer except an adjoining owner, the market value of the property would be approximately $3,000.

Approval of the resolution will establish the minimum price in the amount of $3,200 and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 75

Summary: The consideration of a motion approving the 2002 festival and special events scheduled co-sponsorship by the City of Asheville.

In March of 1995, the Asheville City Council adopted a festival policy. A segment of that policy requires that City Council approve the list of festivals requesting co-sponsorship with Asheville Parks & Recreation on an annual basis. In 2001, the City co-sponsored 37 events produced by 25 organizers. For 2002, the request is for 65 events produced by 35 organizers.

The criteria for inclusion as a co-sponsored event are laid out in the Outdoor Special Event Guide which are:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.
5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The Parks and Recreation Department recommends accepting the list of events as the only events eligible for co-sponsorship for 2002. All further requests for 2002 will be denied, and organizers will be encouraged to apply for 2003.

Councilman Mumpower pointed out the fact that the numbers have increased dramatically and City staff has been instructed to review the policy on the criteria for co-sponsorship.

G. RESOLUTION NO. 02-30 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GLAZER ARCHITECTURE P.A. FOR RENOVATIONS AND ADDITIONS TO FIRE STATION 8 LOCATED AT 902 TUNNEL ROAD

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Glazer Architecture, P.A., in the amount of $33,000, for renovations and additions at Fire Station #8 located at 902 Tunnel Road.

Fire Station #8 was constructed in 1966 and no major building renovations have been undertaken during the life of the building. The additional growth of east Asheville required the building to house a pumping fire engine and ladder truck today. However the building was only designed for one fire company. The renovations include women's locker area, storage area, enlarged dayroom and kitchen. A new public entry, bay for a quick response vehicle, and officer office are in the scope of work. Site work to improve the traffic flow is included in the contract. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #8.

The Public Works Department staff recommends City Council adopt the resolution to construct ADA and sidewalk amenities along the Urban Trail.

RESOLUTION BOOK NO. 27 – PAGE 71

E. RESOLUTION NO. 02-29 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GREEN LIGHT ELECTRIC INC. FOR PREVENTIVE MAINTENANCE OF TRAFFIC CONTROL SIGNALS

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc., for preventative maintenance of traffic control devices in the amount of $79,775.

In April 2001, the Public Works and Engineering staff undertook the project of reengineering the Division of Traffic Operations, given the fact that two signals technicians resigned and the impending retirement of the traffic signal supervisor. Staff goals were to evaluate the existing level of service and determine if reengineering options were available, with the possibility of contracting out some of the existing services. Other goals were to improve overall signal services, assure system reliability, and maintain direct accountability for fundamental system functions.

City staff has determined that preventative maintenance activities could, and should be, contracted to the private sector.

It was further determined that a minimum staff level of two signal technicians, whose pay scale and classification would more closely emulate the N. C. Dept. of Transportation technicians with similar responsibilities, would be maintained to insure emergency response and guarantee that timely repairs were enacted. Their primary responsibility, beyond emergency response, is to maintain and update signal system data and functions of coordination and timing.

Bids were solicited to determine actual costs for a comprehensive preventative signal maintenance program by the private sector. The City received three bids for the work. Bids were received from the following vendors:

Green Light Electric	$119,800
ALS of North Carolina	$199,800
MB Haynes Electric	$249,945

City staff negotiated with the successful bidder to further reduce the contract amount for the required work to $79,775 per year for the next 5 years, with annual options for renewal, calculating a 3% increase per year.

The overall cost savings from the reengineering idea, along with the improved services mentioned above, is approximately $40,000 per year.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

RESOLUTION BOOK NO. 27 – PAGE 72

F. MOTION APPROVING THE 2002 FESTIVAL AND SPECIAL EVENTS CO-SPONSORED BY THE CITY OF ASHEVILLE

state and local laws. In addition, the Manager will continue to report to City Council on a quarterly basis in writing regarding the contracts of the City.

The above changes would take some of the items off the Council's agenda, which sometimes tend to lengthen it with routine matters. In addition, it would follow the tradition of allowing Council approval of formally bid construction projects and large service contracts, while allowing the City Manager to execute the remaining contracts.

The City Manager requests that Council adopt the ordinance granting authority to approve, award and execute construction contracts, purchase contracts and service contracts as outlined.

RESOLUTION BOOK NO. 27 – PAGE 69

D. RESOLUTION NO. 02-28 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PRECISION CONTRACTING CO. TO CONSTRUCT ADA AND SIDEWALK AMENITIES ALONG THE URBAN TRAIL

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Precision Contracting Co. Inc. to construct ADA and sidewalk amenities located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to perform ADA and sidewalk construction services along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-129, formal bids for ADA and sidewalk construction services were solicited and four responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Carolina Specialties Construction Inc.	Non-Compliance	Yes	Yes	$111,827.00
Precision Contracting Inc.	100%	Yes	Yes	$133,410.00
Candler Concrete Works Inc.	0%	Yes	Yes	$137,328.54
Jerry Payne Const. Co. Inc.	0%	Yes	Yes	$191,300.00

These amenities will include: The installation of seven additional handicap accessible ADA ramps. Sidewalk replacement on Haywood Street adjacent to the downtown library, which will include new handicap accessible parking spaces to accommodate side-unloading vehicles, tree grates, and streetscape amenities such as benches and trash cans. The installation of thematic, directional markers will assist downtown visitors in finding their way along the Urban Trail.

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget. Under the provisions of a TEA 21 Transportation Improvement Project (project number E-4138), completion of this contract would qualify the City of Asheville for a reimbursement of $106,728.00.

The ordinance is drawn to be as narrow as possible. It does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council adopt the franchise ordinance.

The required second reading of this ordinance will occur on March 5, 2002.

ORDINANCE BOOK NO. 19 – PAGE [illegible] 416

C. RESOLUTION NO. 02-27 - RESOLUTION ESTABLISHING A NEW POLICY AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACTS AND AWARD BIDS

Summary: The current contract approval authority for the City Manager is relatively low compared to formal bid limits set in the North Carolina General Statutes and normal practices across the state, thus requiring many routine, budgeted, contracts to require approval of Council. This change, if approved, would increase the City Manager's authority consistent with state law and general practices across North Carolina.

Currently the City Manager is authorized to sign contracts up to $30,000.00. All contracts for construction and services above $30,000.00 require approval of City Council. In many cases contracts are approved by Council on the consent agenda and, therefore, require several additional weeks before the awarding of the contract can be accomplished. This slows down the process and, in several recent cases, you have noticed where staff has asked you to take special action at worksessions in order to be able to move projects forward at a more rapid pace.

Just recently the General Assembly amended General Statute §143-129 regarding the procedures for letting of public contracts. The General Assembly increased the amount of the contract needed to trigger the formal bidding requirements as outlined in the statute. The recent changes require that cities receive formal bids on construction or repair contracts that could amount to more than $100,000.00. In addition, the formal bid requirement for purchases of apparatuses, supplies, material or equipment has been raised from $30,000.00 to $50,000.00. (Note: Informal bids are still required for purchases from $5,000.00 to $49,999.99.)

In order to align local responsibilities with newly changed state law, it is recommended that the City Manager be given authority to approve contracts in the following manner:

A. Construction or repair contracts up to $100,000.00 could be approved and signed by the City Manager without City Council approval while construction contracts over $100,000.00 must be approved by City Council before the City Manager is authorized to sign the contract.

B. Purchase contracts for apparatuses, supplies, materials or equipment below $50,000.00 could be approved and signed by the City Manager without Council approval.

C. Service contracts up to $50,000.00 can be approved and signed by the City Manager without Council approval while service contracts $50,000.00 and over need City Council approval before the City Manager can sign the contract. Currently, the City Manager can sign a service contract under $30,000.00 without City Council approval. (NOTE: THERE IS NO REQUIREMENT TO BID A SERVICE CONTRACT AND THERE ARE NO MONETARY THRESHOLDS.)

All of the above recommendations are made with the understanding that there must be sufficient funding in the budget and that all contracts will be approved in accordance with federal,

II. CONSENT AGENDA:

A. **APPROVAL OF THE MINUTES OF THE RETREAT HELD ON FEBRUARY 8, 2002; THE REGULAR MEETING HELD ON FEBRUARY 12, 2002, AND THE WORKSESSION HELD ON FEBRUARY 19, 2002**

B. **ORDINANCE NO. 2898 – FIRST READING OF ORDINANCE GRANTING A FRANCHISE TO TROLLEY LEASING, LLC, TO OPERATE A NARRATED HISTORIC TOUR TROLLEY ON THE STREETS OF THE CITY OF ASHEVILLE**

Summary: This is the consideration of the first reading of a franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

Trolley Leasing, LLC, is a Florida Limited Liability Corporation. They propose to do business in Asheville as Asheville Historic Trolley Tours. The services to be offered will include narrated historic tours of the downtown and nearby historic areas. They intend to stop at a number of local hotels. The tickets will be sold at various locations including hotels and the Asheville Visitors Center.

The tour will follow an established route and could occur up to four times per day. The business plan does not contemplate point-to-point transportation of people on a scheduled basis for a fee, but does include the possibility of charter business.

At the request of City staff, the operator has met twice with the City Traffic Engineer and he has signed off on the proposed route as not unduly interfering with the normal flow of traffic.

The vehicle is a 30-foot rubber-tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

It is recommended that the Council franchise the historical tour aspect of this business. A tour trolley usually runs somewhat slower than prevailing traffic and occasionally stops to embark or discharge passengers from a public street. This creates the possibility of interfering with the flow of traffic on public streets by creating unsafe situations or by blocking a lane of traffic. The franchise, as drafted, would simply require that the City's Traffic Engineer sign off on the proposed routes and be advised of any changes subject to his approval. At this time, the Traffic Engineer has reviewed and approved the routes, but the operator is conferring with the Traffic Engineer on some proposed changes.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day of the week. For charter operations, the hours of operation are not limited to the above, providing that Trolley Leasing meets all local, state and federal laws regarding the operation of a chartered vehicle.

Tuesday – February 26, 2002 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. MAYOR WORLEY RECOGNIZED BOY SCOUT TROOP 77

B. ORDINANCE NO. 2897 - ORDINANCE ACCEPTING DONATION FROM THE ASHEVILLE PROFESSIONAL FIREFIGHTERS ASSOCIATION

Mayor Worley recognized Fire Chief Greg Grayson who in turn recognized Asheville Professional Firefighters Association Mike Marshall and thanked the Asheville Professional Firefighters Association for the $17,100 donation to the City to purchase a thermal imaging camera for use in the Fire and Rescue Division. The camera will allow firefighters to see in smoke and dark conditions. Use of the camera improves firefighter effectiveness and safety. The cameras also allow firefighters to locate and rescue fire victims quickly and to search for fire hidden in walls and building voids.

The Asheville Firefighter's Association, IAFF Local 865, recently received the "North Carolina Professional Firefighters and Paramedics of North Carolina Local of the Year" award for the State of North Carolina. This is a prestigious honor for the Association. The Association is comprised of approximately 85% of the Asheville firefighters.

Fire Chief Grayson was also pleased to announce that the Asheville Chapter of Professional Firefighters and Paramedics of North Carolina received the Local of the Year Award for the Year 2001.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Bellamy moved for the adoption of Ordinance No. 2897. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 414

C. PROCLAMATION PROCLAIMING MARCH 10-16, 2002, AS "GIRL SCOUT WEEK"

Mayor Worley read the proclamation proclaiming March 10-16, 2002, as "Girl Scout Week" and recognizing March 12, 2002, as the 90th Anniversary of Girl Scouts of the USA and recognizing 2002 as the 50th Anniversary of Girl Scouts of Western North Carolina Pisgah Council. He presented the proclamation to Ms. Jennifer Hallmark, Director of Communication/ Marketing for the Girl Scouts of Western North Carolina Pisgah Council.

Asheville Smoke

Discussion occurred with regard to a letter City Council members received from the Asheville Smoke asking for two things, both of which mean providing funding which would require a City Council appropriation. City Manager Westbrook said that based on the information from the State with regard to the budget, a reduction in City services, and infrastructure needs in the City, he did not recommend making an appropriation to those requests.

When Councilman Mumpower suggested the City write off the facility fee for the remainder of their season, City Manager Westbrook said that City Council would have to pass a resolution and then there could be a problem with the basketball team and other vendors who use the facility.

City Manager Westbrook stated that City Council has worked with the Asheville Smoke in the past by taking over some responsibilities. He stressed that we do value the Smoke.

All of Council stressed that the City of Asheville recognizes the importance of hockey, but given the City's financial situation is unable to help them financially. Therefore, it was the consensus of Council to ask staff to look for some non-financial support for the Smoke.

State Budget Cuts

Mayor Worley updated City Council on a meeting he had recently with the Metropolitan Coalition and Governor Easley regarding the State budget. In summary, Governor Easley agreed to work with the Coalition and try to determine if there are other areas of the State budget that can be cut to alleviate pain to cities and towns, and to also look at ways to make our revenues more secure. It will be difficult to get any of our reimbursements back this fiscal year and the State is anticipating a similar problem next year. He did state that our local delegation was sympathetic and very much willing to help to make Asheville's revenues more secure in years to come.

City Manager Westbrook said that the Governor has appointed a Revenue Commission whose charge will be to review the revenue laws passed in the 1930's.

Councilwoman Jones spoke of the need for leadership and mutual support in how we approach this problem on a local level.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:02 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Worksessions Items

Upon inquiry of Councilman Peterson, Mayor Worley said that the proper procedure for a Council member to have an issue placed on a worksession agenda is to let him know at least one week in advance of the worksession and he would advise the City Clerk to place it on the agenda.

U.S. Citizenship on Boards and Commissions

It was the consensus of Council to remove the U.S. citizenship on boards and commissions from City Council's consideration on February 26, 2002, and remand the issue back to the City's Boards and Commissions Committee.

Current Operations at the Civic Center Worksession Item

Upon inquiry of Councilman Mumpower, City Manager Westbrook said that it was his understanding that City staff was to provide City Council with a staff representation with regard to the current operations at the Civic Center – what is and is not working – at the March 5, 2002, worksession. He did not think that City Council wanted him to invite the tenants, but to hear the staff presentation and then if Council wanted different information, then the tenants could be brought in.

Councilman Mumpower felt strongly that the Civic Center Commission members should be invited to the worksession to hear the report, or possibly even share the report with them prior to City Council. City Manager Westbrook said that he would be happy to invite the Commission members, however, the City doesn't normally release information to others before City Council. In addition, due to time restraints, he didn't think that the staff's presentation could be ready any sooner than the Friday before the Tuesday worksession, if then.

Mayor Worley agreed that the Commission members should be present to hear the report in that Council may wish to defer the report to them or to ask them questions.

Public Hearing Procedures

Councilwoman Jones felt City Council should look at its deliberation process. She felt it was important that Council balance open government while not short-changing City Council discussion.

Mayor Worley said that he had once suggested that if a meeting reaches a certain hour (11:00 p.m. or Midnight) that a good breaking point be found and the meeting be recessed until the next day or next couple of days.

Vice-Mayor Bellamy agreed in at if the public knows ahead of time that the meeting will not last past Midnight, they could be better prepared.

Councilman Peterson agreed in that the Mayor can announce at 10:00 p.m. a short break at which time people can sign-in to speak if the meeting is recessed to another day. That way only those who attended the beginning of the meeting would be allowed to speak at the end of the meeting on a different day.

It was the consensus of Council to have Mayor Worley, Vice-Mayor Bellamy and Councilman Peterson work on a proposed policy regarding the length of the meetings.

- Succeeding offenses within 12 months result in increased penalties in $50.00 increments per offense. (For example the fourth offense within 12 months would carry a $200.00 penalty; the fifth would carry a $250.00 penalty, and so on.) The maximum penalty is set at $500.00.
- Unpaid penalties would be declared delinquent after the 30th day from the issuance of the citation and thereafter for each additional 30-day period of delinquency.
- Delinquency fee-------$50.00. (This is similar to the parking penalty delinquency schedule which provides for a $25 fee for each 30 day delinquency period.)

The following is a survey of seven cities' and counties' which have animal control penalties (none provide for a delinquency fee for non-payment):

- Chapel Hill: $50 per offense; if payment is not received a criminal summons is issued, to $500.
- Buncombe County: Each offense not to exceed $500 at the discretion of the Animal Control Officer.
- Lee County: 1st offense $25; 2nd $50; 3rd $250 and/or confiscation of animal.
- High Point: $50 per offense.
- Salisbury: 1st offense $25; 2nd $50; 3rd $75; 4th $250. Loose dog is $50.
- Sanford: 1st offense $50; 2nd $100; 3rd $250 and/or confiscation of animal.
- Cary: 1st offense $20; 2nd $50; 3rd $75; 4th $100; 5th $250 and confiscation of animal.

Public education of the penalty structure is an important component of the implementation plan. Asheville's Government Access Channel, the "City Works" section of the Asheville Citizen-Times, internet postings and other methods will be used to inform the public. The effective date of the ordinance will allow a 60-day window of opportunity for staff to carry out public education activities.

Spay and neuter alternatives to penalties will be considered on a case-by-case basis.

The contract for animal control services the City has with the Asheville Humane Society specifies that all civil penalties and license fees collected will be retained by the Humane Society to off-set expenses associated with enforcing the annual license fee, sterilization of animals adopted from the shelter, and public education. For 2001, approximately $1,700 in penalties and $10,000 in license fees were collected.

City staff recommends Council adopt the ordinance.

There was a lot of discussion with regard to how the spay and neutering alternatives would occur, how the penalties would escalate, the need for dogs to be licensed and benefits associated with that licensing, the cost for a license, how the public (especially renters who do not receive water bills with the licensing insert) is not aware that dogs need to be licensed, penalties are too high, maximum cap should be $500 per offense,

Police Chief Will Annarino stressed that the City wants to violators to pay for this program, not the general taxpayers.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

MISCELLANEOUS MATTERS

of the week. For charter operations, the hours of operation are not limited to the above, providing that Trolley Leasing meets all local, state and federal laws regarding the operation of a chartered vehicle.

The ordinance is drawn to be as narrow as possible. It does not attempt to franchise any other part of the business operation except that part which will regularly and routinely utilize local public rights-of-way with the potential of repeated constraints to the flow of traffic.

City staff recommends City Council adopt the franchise ordinance.

Mr. Rich Mills, owner of Trolley Leasing LLC, said that they are currently operating in Everglade City, Florida, and also Madison, Georgia.

Upon inquiry of Councilwoman Field, Mr. Mills said that his trolleys have the state of the art small diesel engine. He did state, however, that they are willing, as this progresses, to look at ways to address the issue of air quality.

Vice-Mayor Bellamy felt that the $1 day franchise fee was too low. Mr. Black responded that this is a one year agreement and that fee will be revised when, and if, the franchise renewal is requested. Mr. Mills said that he would also be willing to discuss the franchise fee at the end of the year. He also noted that in the cities he is currently operating in, they had no franchise fee in that they feel the trolley is a moving billboard advertising the City. He felt that the cities get a lot of intangible benefits from his business.

Upon inquiry of Councilwoman Jones, Mr. Black said that this trolley would also help with the problems of parking in downtown.

City Attorney Oast noted that the franchise, by law, has to be adopted by two votes, which need to happen at two different meetings. He suggested City Council vote on the franchise at the February 26, 2002, formal meeting and then at the March 5, 2002, worksession.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON RESTRUCTURING AND INCREASING PENALTIES FOR ANIMAL CONTROL VIOLATIONS

Police Chief Will Annarino said that this is the consideration of an ordinance to restructure and increase penalties for animal control violations.

The current penalty for animal control violations is $10.00 for the first offense; $20.00 for the second offense within 12 months of the first; and succeeding offenses within 12 months of a prior offense result in increased penalties in $10.00 increments per offense. Penalties of these amounts have proven ineffective in promoting voluntary compliance with animal control regulations. In addition, collection of penalties is a problem because of the costs of collecting delinquent penalties exceeds the value of the revenue.

It is proposed that the penalties be increased as follows:

- First offense ---$50.00
- Second offense within 12 months ----------------$100.00
- Third offense within 12 months-------------------$150.00

Councilman Dunn, member of the Housing & Community Development Committee, did note that WNC Housing requested no interest, however, they did agree to a 2% interest payable annually. He said that the Committee is aware of the deferral issue and also wants to see money being put back into the Fund.

Councilwoman Jones, member of the Housing & Community Development Committee, said that the Housing Trust Fund is only one answer to affordable housing, as is Community Development Block Grant funds. She said the Fund is a great tool and the Committee members are thinking of ways to improve the system.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

TROLLEY FRANCHISE

Transit Services Director Bruce Black said that this is the consideration of a franchise ordinance for the operation by Trolley Leasing, LLC, of a narrated historic tour trolley on the streets of the City of Asheville.

Trolley Leasing, LLC, is a Florida Limited Liability Corporation. They propose to do business in Asheville as Asheville Historic Trolley Tours, with two trolleys. The services to be offered will include narrated historic tours of the downtown and nearby historic areas. They intend to stop at a number of local hotels. The tickets will be sold at various locations including hotels and the Asheville Visitors Center.

The tour will follow an established route and could occur up to four times per day. The business plan does not contemplate point-to-point transportation of people on a scheduled basis for a fee, but does include the possibility of charter business.

At the request of City staff, the operator has met twice with the City Traffic Engineer and he has signed off on the proposed route as not unduly interfering with the normal flow of traffic.

The vehicle is a 30-foot rubber-tired trolley with open sides where the windows would normally be. This area can be closed off with clear plastic roll down curtains in inclement weather. The operator has assured the staff that the narration from within the trolley is not audible outside the vehicle.

The vehicle is driven and the tour narrated by one person, but could also include a second person if appropriate.

It is recommended that the Council franchise the historical tour aspect of this business. A tour trolley usually runs somewhat slower than prevailing traffic and occasionally stops to embark or discharge passengers from a public street. This creates the possibility of interfering with the flow of traffic on public streets by creating unsafe situations or by blocking a lane of traffic. The franchise, as drafted, would simply require that the City's Traffic Engineer sign off on the proposed routes and be advised of any changes subject to his approval. At this time, the Traffic Engineer has reviewed and approved the routes, but the operator is conferring with the Traffic Engineer on some proposed changes.

The franchise ordinance also limits operation of the narrated tour from 7:00 a.m. to 8:00 p.m., Sunday through Thursday, and between 7:00 a.m. and 12:00 Midnight Friday and Saturday. For City-recognized holidays and days on which City-approved festivals occur in the Central Business District, the operating hours may be extended to 12:00 Midnight, regardless of the day

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to award five loans from the City's Housing Trust Fund.

Available funds in the City Housing Trust fund stand at $512,000. This comprises $400,000 in new Fiscal Year 2002 funds and approximately $112,000 in loan repayments. Applications for these funds were invited by letter and advertisement on December 7, 2001.

Eight applications were received by the January 18 deadline, requesting loans totaling $840,000. They were reviewed by a five-person committee of City staff and outside experts, using criteria developed by a broad-based focus group last fall. The review committee reported to the Housing and Community Development Committee, which has recommended the five highest ranked applications for a total of $520,000 in loans, producing 26 affordable housing units. They are:

1. WNC Housing, Inc. – $100,000 for "Independence Cottages", five 1-bedroom houses for rent to very low income individuals with severe and persistent mental illness; on Clemmons Street and Spinet Street.
2. Mountain Housing Opportunities – $80,000 for construction of a 4-bedroom house for sale and rehabilitation of two dilapidated houses, one for sale and one as a rental duplex; on Jefferson Street, Clingman Avenue, and Rector Street.
3. Tim & Wendy Vorst – $40,000 for a duplex with a 1-bedroom and a 3-bedroom apartment to rent on Brookshire Street.
4. Tim & Wendy Vorst – $120,000 for a 6-plex of 1-bedroom apartments to rent on Hendersonville Road.
5. Carolina Custom Exteriors – $180,000 for a 3-bedroom house for sale, and two duplexes and a 4-plex to rent on Galax St. The proposal includes an offer to buy the City-owned site on Galax.

Proposed loan terms are as follows:

WNC Housing:	2% interest payable annually; first year's interest and all principal repayment deferred for 30 years.
Mountain Housing:	Rental duplex: 2% interest with all payments deferred for 20 years; S/F homes: x% interest with all payments deferred for 30 years, where x = the rate of appreciation of the properties.
Tim & Wendy Vorst:	2% for 30 years, amortizing, on both projects.
CC Exteriors:	2% construction loan only on the S/F house; 2% for 15 years amortizing on the rental units.

The Housing & Community Development Committee and City staff recommends approval of the five loans from the City's Housing Trust Fund.

Mayor Worley questioned the deferrals and his theory of the Housing Trust Fund was that the Fund would continue and evolve and help more people than having a good portion of our assets tired up for a number of years with the deferrals. Ms. Caplan explained that this issue did come up last year and was sent to a focus group. It was their consensus that only a limited amount would be deferred, stressing that the deferral is necessary for the low and very low income projects. She stressed that financing affects affordability.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled for Tuesday, March 12, 2002. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Identifying Artist's Studios & Workshops as Home Occupations in Residential Districts

Chief Planner Gerald Green said that this is the consideration of an ordinance amending the Unified Development Ordinance to identify artist's studios and workshops as home occupations in residential districts and to establish standards for these uses.

The Planning and Zoning Commission is recommending adoption of an amendment to the City's zoning standards to identify artist's studios and workshops as home occupations and to establish standards for these uses. Home occupations are currently permitted in all residential districts and although many artists have studios or workshops in their homes, these uses are not specifically identified in the City's zoning code. As a result of the City of Asheville's popularity as an arts center, the number of artist's studios and workshops located in residential areas will continue to increase. Artist's studios and workshops often require more space than traditional home occupations due to the need to store materials and for larger work areas. The proposed amendment addresses this need by allowing artist's studios and workshops to be larger than other home occupations. In order to protect adjacent residential uses from potential adverse impacts of artist's studios and workshops, a larger lot size is required for larger studios and workshops. Larger studios and workshops, when constructed as a separate building, must be setback a greater distance from the property lines. The studios and workshops must also adhere to the other standards for home occupations set forth in the City's zoning ordinance. These standards address:

- The display of goods and products as well as other advertising;
- Prohibition on retail sales from the home;
- Restriction on uses that create odor, noise, glare, etc.; and
- Standards for signs and parking.

Staff worked with a group of artists and craftspeople in developing the standards set forth in the draft ordinance amendment. No comments in opposition to the proposed revisions have been received.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Mr. Green responded to Councilman Peterson's questions about the definition of a workshop and also displaying of goods on the premises.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on March 12, 2002.

HOUSING TRUST FUND LOAN RECOMMENDATIONS

Councilman Dunn moved to excuse Vice-Mayor Bellamy from participating in this discussion due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously.

The above changes would take some of the items off the Council's agenda which sometimes tend to lengthen it with routine matters. In addition, it would follow the tradition of allowing Council approval of formally bid construction projects and large service contracts, while allowing the City Manager to execute the remaining contracts.

The City Manager requests that Council adopt the ordinance granting authority to approve, award and execute construction contracts, purchase contracts and service contracts as outlined.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

2002 TAX REVALUATION

Buncombe County Tax Collector Jerome Jones explained the 2002 Buncombe County revaluation. He explained how the City's tax base has grown. He pointed out that revaluation has three key points: (1) values are determined by market forces; (2) computer assisted mass appraisal: possible errors occur in some appraisals); and (3) every taxpayer has the right to appeal. Revaluation is (1) every four years; (2) 1998 last revaluation; (3) 2002 next revaluation; and (4) it's continuous. Revaluation is a process that determines fair market value and analyzes local real estate sale, cost and market trends. Thee approaches used to value include: (1) cost; (2) sales comparison/market; and (3) income. The following are reasons why we have revaluations: (1) North Carolina General Statutes; (2) insure fairness, equity and uniformity; (3) property values change at different rates; (4) sales/assessment ratio; and (5) public service companies. Revaluations are conducted by (1) the county assessor; (2) in-house personnel; and (3) local appraisers who are state certified. Mr. Jones then explained the Elderly/Disabled Exclusion Program. This program excludes the larger of $20,000 or 50% of residence value. Some facts of the program include (1) you must be 65 years of age or older; (2) totally and permanently disabled; (3) gross income of $18,000 or less (spouse); (4) must be a North Carolina resident; and (5) once you enroll, you don't have to enroll again. He said that there are approximately 3,400 people enrolled. Mr. Jones then explained that the value, not the taxes, can be appealed and reviewed the process starting out with the informal appeal, working it's way up to the NC Supreme Court. He did note that virtually all appeals are settled locally.

Mr. Jones then answered and responded to various questions from Council, some being, but are not limited to, historic designations, has there been any property depreciation, does the revaluation have any effect on the tax collection rates, flyer sent out has valuable information in it, many homes are becoming not affordable after revaluations; and how do our property tax rates stack up with the rest of the state.

Upon inquiry of Councilwoman Jones, Mr. Jones said that he would provide the Council with information on how many of the 3,400 people enrolled in the Elderly/Disabled Exclusion Program are City residents.

At the suggestion of Councilman Mumpower, City Manager Westbrook said that the City might be able to put something on it's governmental channel about the County's Elderly/Disabled Exclusion Program.

City Manager Westbrook said that he is working with Mr. Jones regarding the building being designated historical but then luxury apartments being built inside that building – all being taxed at 50% under the historic landmark designation.

City Manager Westbrook said that this is a good example of the cooperation between the City and the County working together.

If the bid of the Arts Council is accepted, Community Development staff recommends evidence of funding or financing be required within 60 days of acceptance.

Approval of the resolution will schedule a public hearing on March 12, 2002, and initiate the sale of the property through a private sale as provided in N. C. Gen. Stat. sec. 160A-457(4).

Community Development staff recommends adoption of the resolution.

Contract Approval Authority

Summary: The current contract approval authority for the City Manager is relatively low compared to formal bid limits set in the North Carolina General Statutes and normal practices across the state, thus requiring many routine, budgeted, contracts to require approval of Council. This change, if approved, would increase the City Manager's authority consistent with state law and general practices across North Carolina.

Currently the City Manager is authorized to sign contracts up to $30,000.00. All contracts for construction and services above $30,000.00 require approval of City Council. In many cases contracts are approved by Council on the consent agenda and, therefore, require several additional weeks before the awarding of the contract can be accomplished. This slows down the process and, in several recent cases, you have noticed where staff has asked you to take special action at worksessions in order to be able to move projects forward at a more rapid pace.

Just recently the General Assembly amended General Statute §143-129 regarding the procedures for letting of public contracts. The General Assembly increased the amount of the contract needed to trigger the formal bidding requirements as outlined in the statute. The recent changes require that cities receive formal bids on construction or repair contracts that could amount to more than $100,000.00. In addition, the formal bid requirement for purchases of apparatuses, supplies, material or equipment has been raised from $30,000.00 to $50,000.00. (Note: Informal bids are still required for purchases from $5,000.00 to $49,999.99.)

In order to align local responsibilities with newly changed state law, it is recommended that the City Manager be given authority to approve contracts in the following manner:

A. Construction or repair contracts up to $100,000.00 could be approved and signed by the City Manager without City Council approval while construction contracts over $100,000.00 must be approved by City Council before the City Manager is authorized to sign the contract.

B. Purchase contracts for apparatuses, supplies, materials or equipment below $50,000.00 could be approved and signed by the City Manager without Council approval.

C. Service contracts up to $50,000.00 can be approved and signed by the City Manager without Council approval while service contracts $50,000.00 and over need City Council approval before the City Manager can sign the contract. Currently, the City Manager can sign a service contract under $30,000.00 without City Council approval. (NOTE: THERE IS NO REQUIREMENT TO BID A SERVICE CONTRACT AND THERE ARE NO MONETARY THRESHOLDS.)

All of the above recommendations are made with the understanding that there must be sufficient funding in the budget and that all contracts will be approved in accordance with federal, state and local laws. In addition, the Manager will continue to report to City Council on a quarterly basis in writing regarding the contracts of the City.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #3.

Clerk to Advertise Offer to Purchase Disposal Parcel 146 on Lincoln Street

Summary: The consideration of a resolution establishing minimum price and authorizing the City Clerk to advertise an offer to purchase Disposal Parcel 146 in the East End/Valley Street Community for the amount of $3,200.

Disposal Parcel 146 is a substandard lot located on the north side of Lincoln Street comprising 3,659± square feet. The lot is irregular in shape and mostly flat about street level then sloping up sharply to the rear. The bid in the amount of $3,200 from Damon Rouse includes the proposal to combine the property with adjoining property currently owned by Mr. Rouse on Jordan Street.

Although the new tax appraisal is $5,600, this property was available for several years at the previous tax value of $2,000 and then at $4,900 with no offers having been received. A letter of opinion from Ben Mansell CRS, GRI with RE/MAX Advantage Realty, indicates that due to the limited utility of the property to any buyer except an adjoining owner, the market value of the property would be approximately $3,000.

Approval of the resolution will establish the minimum price in the amount of $3,200 and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Community Development staff recommends adoption of the resolution.

Sale of Property at 9-13 Biltmore Avenue

Summary: The consideration of a resolution setting a public hearing and directing the City Clerk to publish a notice regarding proposed sale of real property at 9 -13 Biltmore Avenue, Asheville, N.C.

The property at 9 -13 Biltmore Avenue is located about 125 feet south of Pack Square. It is improved with a store front building with three bays dating from the 1920s. The land area comprises 14,469 square feet and the total combined building area is approximately 6,529 square feet. The lot extends to the east side of South Lexington Avenue, about 125 feet south of the intersection with Patton Avenue, and is improved with marked parking spaces on an asphalt surface. The lot is rectangular in shape and sloped to street level access. The appraised value of the property is $530,000.

Asheville Area Arts Council has submitted a proposal to purchase the property minus the air rights over the rear parking lot in the amount of $462,500. The bid from the Arts Council includes the proposal to cooperate with the eventual purchaser of the air rights over the parking lot to allow construction a new building containing parking, office, retail and/or residential units on South Lexington Avenue. The new building would be constructed above the first level by the purchaser of the air rights. The calculated value of the air rights retained by the City to be sold separately is $67,500. The bid from the Arts Council reflects the appraised value minus the air rights. The City has a bid in hand from a redeveloper for the air rights. The bid from the Arts Council includes an offer of $339,000 cash and a request that the City finance $123,500 of the purchase price.

Councilman Mumpower realized the millions of dollars of secondary impact from the festivals last year, but still expressed concern over the City's tight budget. He suggested maybe half co-sponsorship or to totally postpone co-sponsorship until our budget is on firm ground.

Vice-Mayor Bellamy pointed out that there are some non-profit organizations that supplement their budget based on "walks" or "runs". The County has reduced their funding to non-profits and the City is looking at that as well. She stressed how the non-profits depend on the community and the City to help them raise money. She felt that by not co-sponsoring, especially non-profits, the City will do more harm than good. In addition, there are business entities that clearly benefit from co-sponsorship too. She supported co-sponsorship of each one of the festivals. She also noted that each of the festival organizers paid a $25 application fee, and Council doesn't realize that the festivals pay for a lot of the associated costs, e.g., electricity, etc.

At the suggestion of Councilwoman Jones, it was the consensus of City Council to have staff review the policy adopted back in 1995 and bring it back in early fall for Council review. This way people will be on notice ahead of time that the policy, and possibly the criteria, might change.

Fire Station 8 Renovations

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Glazer Architecture, P.A., in the amount of $33,000, for renovations and additions at Fire Station #8 located at 902 Tunnel Road.

Fire Station #8 was constructed in 1966 and no major building renovations have been undertaken during the life of the building. The additional growth of east Asheville required the building to house a pumping fire engine and ladder truck today. However the building was only designed for one fire company. The renovations include women's locker area, storage area, enlarged dayroom and kitchen. A new public entry, bay for a quick response vehicle, and officer office are in the scope of work. Site work to improve the traffic flow is included in the contract. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

The Fire Chief recommends City Council authorize the City Manager to sign the contract with Glazer Architecture, P.A. for renovations and additions to Fire Station #8.

Fire Station 3 Renovations

Summary: The consideration of a resolution authorizing the City Manager to sign the contract with Glazer Architecture, P.A., in the amount of $18,600, for basic renovations and minor additions at Fire Station #3 located at 50 Oregon Avenue.

Fire Station 3 was constructed in 1976 and no major building renovations have been undertaken during the life of the building. Presently, a pumping fire engine and a ladder truck are housed within the station. The renovations include re-roofing the building, renovating the kitchen, new finishes in the dayroom, kitchen, and dorms, new HVAC for all areas except the apparatus bays, electrical and plumbing renovations as required by Code. The contract is an AIA Document with modifications for the City of Asheville.

The funds for this project were appropriated in previous fiscal years and no funds would be used from Fiscal Year 2001-02 appropriations.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

Approval of 2002 Co-Sponsored Events

Summary: The consideration of a motion approving the 2002 festival and special events scheduled co-sponsorship by the City of Asheville.

In March of 1995, the Asheville City Council adopted a festival policy. A segment of that policy requires that City Council approve the list of festivals requesting co-sponsorship with Asheville Parks & Recreation on an annual basis. In 2001, the City co-sponsored 37 events produced by 25 organizers. For 2002, the request is for 65 events produced by 35 organizers.

The criteria for inclusion as a co-sponsored event are laid out in the Outdoor Special Event Guide which are:

1. The requesting applicant must represent a non-profit organization as defined by state or federal tax law.
2. The requesting applicant/organization does not discriminate on the basis of race, color, creed, sex, sexual orientation, age, political or religious affiliation, ethnicity, national origin or economic standing.
3. The proposed event is community focused and recreational in nature.
4. The proposed event is open to the general public.
5. The proposed event has been planned to facilitate a positive impact to the community.
6. Eligibility for co-sponsorship status is based on successful completion and submittal of application, agreements, letters of petition and/or contracts within the specified period of time.

The Parks and Recreation Department recommends accepting the list of events as the only events eligible for co-sponsorship for 2002. All further requests for 2002 will be denied, and organizers will be encouraged to apply for 2003.

When Councilman Mumpower expressed concerned about the City co-sponsoring 65 events with regard to the budget situation, Parks & Recreation Director Irby Brinson explained that it would be a total of approximately $95,000, two-thirds being non-direct costs. He explained that other third of that total is for overtime costs for Park Maintenance, Asheville Police Department, and some Public Works services.

Mr. Brinson explained that the policy was adopted in 1995 and it would be difficult to decide who and who not to co-sponsor, especially when the meet the criteria established in the policy. He said staff will do their best to limit co-sponsorship, however, they would need direction from City Council. A possible way to limit co-sponsorship would be to not allow any new festival or possibly look at a lottery system and draw from a hat.

Councilman Ellis felt that festivals are a great way to bring in some tax base to our City and create some jobs. The economic development factor also needs to be considered as hotels, restaurants, etc. benefit as well.

Councilman Dunn felt that the festivals that help people out are the important festivals, and given our budget constraints, the City needs to look for ways to save money.

These amenities will include: The installation of seven additional handicap accessible ADA ramps. Sidewalk replacement on Haywood Street adjacent to the downtown library, which will include new handicap accessible parking spaces to accommodate side-unloading vehicles, tree grates, and streetscape amenities such as benches and trash cans. The installation of thematic, directional markers will assist downtown visitors in finding their way along the Urban Trail.

As part of a TEA 21 Grant, 80% of the project funding is reimbursable from the N. C. Dept. of Transportation. The City's 20% match has already been allocated in the Public Works Department's Capital Improvement Project budget. Under the provisions of a TEA 21 Transportation Improvement Project (project number E-4138), completion of this contract would qualify the City of Asheville for a reimbursement of $106,728.00.

The Public Works Department staff recommends City Council adopt the resolution to construct ADA and sidewalk amenities along the Urban Trail.

Preventive Maintenance Contract for Traffic Signals

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc., for preventative maintenance of traffic control devices in the amount of $79,775.

In April 2001, the Public Works and Engineering staff undertook the project of reengineering the Division of Traffic Operations, given the fact that two signals technicians resigned and the impending retirement of the traffic signal supervisor. Staff goals were to evaluate the existing level of service and determine if reengineering options were available, with the possibility of contracting out some of the existing services. Other goals were to improve overall signal services, assure system reliability, and maintain direct accountability for fundamental system functions.

City staff has determined that preventative maintenance activities could, and should be, contracted to the private sector.

It was further determined that a minimum staff level of two signal technicians, whose pay scale and classification would more closely emulate the N. C. Dept. of Transportation technicians with similar responsibilities, would be maintained to insure emergency response and guarantee that timely repairs were enacted. Their primary responsibility, beyond emergency response, is to maintain and update signal system data and functions of coordination and timing.

Bids were solicited to determine actual costs for a comprehensive preventative signal maintenance program by the private sector. The City received three bids for the work. Bids were received from the following vendors:

Green Light Electric	$119,800
ALS of North Carolina	$199,800
MB Haynes Electric	$249,945

City staff negotiated with the successful bidder to further reduce the contract amount for the required work to $79,775 per year for the next 5 years, with annual options for renewal, calculating a 3% increase per year.

The overall cost savings from the reengineering idea, along with the improved services mentioned above, is approximately $40,000 per year.

Tuesday – February 19, 2002 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Donation from Asheville Professional Firefighters Association

Summary: The consideration of a budget amendment to accept a donation of $17,100 from the Asheville Professional Firefighters Association.

The Asheville Professional Firefighters Association has raised money through fundraising efforts. The Association desires to donate money to the City to purchase a thermal imaging camera for use in the Fire and Rescue Division. The camera will allow firefighters to see in smoke and dark conditions. Use of the camera improves firefighter effectiveness and safety. The cameras also allow firefighters to locate and rescue fire victims quickly and to search for fire hidden in walls and building voids.

The Asheville Firefighter's Association, IAFF Local 865, recently received the "North Carolina Professional Firefighters and Paramedics of North Carolina Local of the Year" award for the State of North Carolina. This is a prestigious honor for the Association. The Association is comprised of approximately 85% of the Asheville firefighters.

City staff recommends City Council adopt a budget amendment accepting the donation.

Urban Trail ADA and Sidewalk Improvements Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Precision Contracting Co. Inc. to construct ADA and sidewalk amenities located along the Urban Trail in downtown Asheville.

The City is in need of a contractor to perform ADA and sidewalk construction services along the Urban Trail. In accordance with N.C. Gen. Stat. sec. 143-129, formal bids for ADA and sidewalk construction services were solicited and four responses were received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Carolina Specialties Construction Inc.	Non-Compliance	Yes	Yes	$111,827.00
Precision Contracting Inc.	100%	Yes	Yes	$133,410.00
Candler Concrete Works Inc.	0%	Yes	Yes	$137,328.54
Jerry Payne Const. Co. Inc.	0%	Yes	Yes	$191,300.00

A. COMMENTS BY KEVIN NUTTELL

Mr. Kevin Nuttell, representing NC AIDS Policy Center, stressed the need for education for HIV and AIDS.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:56 a.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

meeting. He did have several site specific questions, but would wait until the appropriate time to ask those questions.

Councilman Worley explained why the PUD Overlay district with the density bonus was adopted in 1997 as part of the UDO, noting that the UDO was just a recompilation of the existing zoning ordinances. There was a serious concern about recognizing the lack of affordable housing in 1997. He sees this project as a comprehensive plan for the development of this site that utilizes the density bonus. This density is no different than in any of our other zoning districts, in that whether you have a density bonus or not, the density allowed is done that way. You frequently see a concentration on one portion of the lot, where another portion may not be buildable or you want to preserve open space. Again, the application of the density bonus is no different than that theory when you apply just regular zoning density to it. He did have some concerns about the site plan, especially with regard to fire safety and he will discuss those at the appropriate time. He, too, was a little concerned about the height of the building at the front and hoped MHO will come back with a lower building and slightly fewer units on that front building. However, at this stage, he is prepared to vote for application of the PUD.

Upon inquiry of Councilman Dunn, Mayor Worley said that Council may have some influence, but not total control, of the number of units that can be placed on that site.

When Mayor Worley called for a vote on the motion to approve of the PUD Overlay District, said motion failed on a 5-1 vote, with Councilman Dunn voting "no."

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of February 1-7, 2002: Claire Payne (Water), Rose Gwaltney (Water), Dave Ariola (Streets), Marilyn Pagett (Water), Koriander (Streets), Rita Lunsford (Water), Glenda Whitten (Streets), Hazel Guthrie (Water) and Stanley Woodruff (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUITS

The City was served with the following Complaint on January 31, 2002: Kenny McDaniels v. City of Asheville. The nature of the complaint is EEOC charge of racial discrimination.

The City was also served on January 28, 2002, with the following Complaint: Charles D. Williams v. City of Asheville. The nature of the complaint is EEOC charge of racial discrimination.

Both lawsuits will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

with 30 units, the developments MHO has done have been 38, 40 and 48 units and those have been successful tax credit developments.

Councilman Dunn pointed out that not only is height a concern of his, but also the density.

Mr. Dedman said that there are a lot of regulations when you start building on steep land. Some of the older developments, e.g., Buck Cove Townhomes and Pinecliff Condos, could not be built today because of those regulations. He, frankly,, would like to move a little further up the hill with some of the buildings, but didn't know if regulations would allow him to do that. As to other accommodations of the site plan, there wasn't a lot of room for that in the process because the neighbors chose the position of only 20 units. If Council approves the PUD Overlay, he would commit to coming back and sitting with the neighbors and discussing the density on the site plan. Even though this PUD Overlay public hearing is not supposed to be about how many units are on that site, they had to submit a site plan saying how many units were on the site. They couldn't submit the application without it. He did reiterate that if Council wants to discuss 30 or 31 units, he would be willing to discuss that in the next public hearing and would accommodate Council's wishes as to the site plan.

Upon inquiry of Mayor Worley, City Attorney Oast explained Council's ability to change the site plan is limited to a large extent by what the applicant brings to Council. If the applicant brings a site plan that meets the qualifications of the ordinance, Council doesn't have a lot of room to amend it, from a legal standpoint. They can't require adjustments to the site plan, but can strongly encourage them. Again, if the applicant can demonstrate that they have met the requirements, Council may not have a choice but to approve the site plan. He did note that the site plan can change, but it would have to be approved by the Planning & Zoning Commission or by the City Council, if appealed.

Councilman Mumpower said it was Council's job to implement the ordinances in a fair and consistent manner, therefore, he moved to adopt the PUD Overlay District designation for Ross Creek Commons, located at Chunns Cove Road and Old Chunns Cove Road. This motion was seconded by Councilwoman Jones.

Councilman Peterson pointed out how this is a discretionary call for City Council with regard to whether the project is compatible with the surrounding area. Looking at what is immediately around the property, with no development on two sides, apartments and multi-family mostly on the other side and then other multi-family further down the road, his judgment is that it is a close call, but feels it is compatible.

Councilwoman Jones said that during the campaign process a lot of the comments were that City Council was not predictable and were inconsistent. The City does have mechanisms in place to give Council information and she has to rely on staff's expertise. She felt MHO has followed the rules. She felt it's a scary precedent in the other direction for the business and development community if Council sends mixed messages.

Councilman Dunn reiterated his comments with regard to density and how it should be spread over the entire property and not just in one small area. Again, the City has an Housing Trust Fund and the Housing & Community Development Committee will recommend $500,000 in affordable housing projects. He said this Council is committed to affordable housing, so, he didn't think, this vote won't kill affordable housing or economic development.

Councilman Ellis pointed out some of the similarities of the Stone Ridge Condominium Project City Council recently approved, noting that Councilman Dunn was absent from that plans come in for a permit there would be an additional review by all of the different departments that are involved. That gives the City an opportunity to catch any changes, mistakes or omissions.

Councilman Dunn felt like Council needs to look at the spirit of the law and then the letter of the law. He felt that if you have a certain density, that density should apply to the entire property, however, he does understand the upper part is too steep on this site. Even though City staff feels that the extra acreage is a buffer, the truth is that it's too steep to build on. He felt we should be looking at putting apartments in a project that may be spread out a little more. When you have a density of 6 per acre, that means six units per acre – not just crammed into a little area that calculates to 18 units per acre. That fulfills the letter of the law, but doesn't think it is the spirit of the law. He felt if Council votes to approve this and allows a developer to arbitrarily put buildings where they want to when it's zoned to be put on the entire property, that would be starting a dangerous precedent.

Mr. Shuford explained that they encourage developers to do just that - whether or not we had the density bonus provision that encourages clustering. If the units were spread out into the steeper area, they would be just as difficult to serve as Buck Cove Townhomes which is in a very steep environment. Those Townhomes would run into very serious permitting issues today due to the steepness of the road and the design of the facility. In addition, we want to encourage the preservation of open space and in this particular case, roughly 1/3 of the site would be retained for open space. It's good planning to concentrate the units on the flatter part and try to preserve the steeper part and the wildlife habitat up towards the top of the mountain.

Councilman Mumpower confirmed that City Council recently passed the Stone Ridge Condominium development which built their units on the flatter property and left the higher elevations open. When he asked why there is no elevation drawing for this project, Mr. Shuford said that the developers actually have a model that would show how the elevation pieces work but that information has to be presented when Council talks about the actual site design.

Councilman Peterson said that some concern is about a very large building right-up-against Chunns Cove Road. Because of the N. C. Dept. of Transportation right-o-way, he questioned if there will be some setback requirements and if staff took those into consideration with regard to buffering on the property. Mr. Shuford said that at the request of the neighborhood, MHO did try to make some adjustments to the building in front and saved a fairly good stand of taller trees. But that gets into the site design issue. However, the buildings meet the height limit and anything that is built on that site could probably meet that setback and have that height whether it be a single family home, a duplex, or some other form of multi-family.

Upon inquiry of Councilman Dunn about how the height of the buildings are measured, Mr. Shuford said the building height is measured from the ground up. He explained that the first building will be approximately 10-15 feet above the road because of how the land lays. It would require extensive grading to reduce that back to the road level.

Councilman Dunn said he didn't think a decision tonight will kill affordable housing in this community. The Housing & Community Development Committee have just recommended spending $500,000 on affordable housing projects and the City just started, last year, designating $400,000 to the Housing Trust Fund. He didn't feel that 15 units is going to destroy economic development.

Councilwoman Jones asked if some common ground might be achieved by cutting off a few units from the three story buildings. Mr. Dedman said that if they remove the third story units on the front building and make it a two story, that would be a reduction of four units for a total of 31 units. Even though he believed there are tax credit developments that have been successful because they believe that is what is compatible to their neighborhood. Chunns Cove is not against affordable housing. There are affordable units going up in other areas of the City and these 15 units are not going to bring us from last place to first place. This development is clearly not going to be compatible with this neighborhood. There are safety problems, road problems, sewer problems and water problems in this area. The area residents want these problems cleared up before something of this size is allowed in this area. Pinecliff Condos and the Stone Ridge development sewer does not go into Chunns Cove but into the Haw Creek sewer. The TRC did not approve the revised plans and they are not something with one change on them – they go from two access to one and that's a big change. He said that if City Council denies the PUD Overlay, there will still be 20 units of affordable housing. He entered into the record a petition containing 275 names. Said petition read "Petition against proposed 40-unit, 3-story Mountain Housing Opportunities/Blue Ridge Mental Health Joint P.U.D. project/development to be known as 'Ross Creek Commons.' Proposed project to be located at the corner of Chunns Cove Road and Old Chunns Cove Road. Said project is to begin 2002. Please sign your name, address and are you a voter (Y/N)?"

Mr. Dick Washam reiterated that the issue with the Chunns Cove community is not affordable housing – it's the density overlay position of the UDO. He felt the property should be built to the existing zoning and they would support 20 units. The cost of the property has a significant impact on the ability to have affordable housing and that is driving the number of units they would like to have there in order for it to be affordable housing. Either too much was paid for the property or the property is an inappropriate choice for affordable housing. If that is the case, then that is a poor business judgment and why ask the community to stand behind a poor business judgment by a developer.

Mayor Worley closed the public hearing at 11:50 p.m.

City Attorney Oast reiterated that there are certain things that are not relevant to City Council's consideration on the rezoning issue: nature or degree of ability or disability of the potential tenants of the project; as with any rezoning, MHO may not always be the owner or operator of the project and so their policies, practices and track record is not relevant to Council's consideration; the PUD Overlay is in the UDO and the applicant has applied to the law and that is what Council needs to apply; and whether it is a good or bad financial decision, or the price paid for the property is irrelevant to Council's consideration.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that a PUD may contain any type of residential use except manufactured homes. He said there is nothing in the Code that restricts the application of PUDs to mixed use developments.

Mayor Worley clarified that City Council has used the PUD Overlay District before, but just not with density bonuses.

Upon inquiry of Councilman Peterson, Mr. Shuford said that by the time the site is prepared and ready for occupancy that would put a demand on the sewer system, the sewer line improvements will be in place. MSD has issued a sewage allocation letter for the project saying there is sufficient sewage capacity in the treatment facility and the lines leading to that treatment facility to accommodate this use.

Councilwoman Jones questioned the process for review with regard to fire safety. Mr. Shuford explained that this project went to the TRC in May of 2001. Since that time the developer did reduce the density and change some of the site configurations. They did go from a loop access road to a single access road. To do that requires a fire truck turn-around which he believed has been approved. There are also some additional minor adjustments for the Fire Department that the plan will require in order to get the lane configuration. In addition, when the change to allow for changing circumstances and the PUD Overlay is to promote innovative design by providing flexibility. The flexibility and site design is intended to accomplish, among others, to facilitate more affordable housing through clustering of dwellings through increased density. The issue here is whether City Council will assist affordable housing at this site by increasing the density. City Council should follow the philosophy set forth in the UDO and support the PUD Overlay for this property.

Mr. Steve Barden, attorney representing MHO and City resident, said that MHO undertook an exhaustive search for suitable property for affordable housing and this tract was one of the few suitable places in the City. MHO submitted a first-class application and made many concessions to please the Chunns Cove Road homeowners. The City's TRC approved this and the Planning & Development staff recommended approval. They say that it meets the City's smart growth policies, preserves a significant amount of open space and it helps the City meet it's affordable housing goals. He stressed this is an ideal site for a PUD Overlay and it meets all of the UDO's criteria. One of the rights of all of us as property owners is to use our property as we see fit as long as that use complies with laws and land use regulations. The applicant/property owner in this case has complied to the letter of the law. Mr. Bissette stated that none of the other MHO projects had the same density, but that is not true. With regard to the traffic impact, the City's Traffic Engineer determined that it's below the threshold to require a traffic study. The City has certified there are no water, sewer or fire problems. The price of the site has absolutely nothing to do with this issue, but the fact of the matter is that the contract price in this acquisition was completely supported by an appraisal by a qualified professional appraiser in Asheville. Mr. Bissette referred to Mr. Baechtold's letter being outdated. The plan changed but the changes did not reflect the substance of the letter. When the plans were revised the revised plans did not have to go back to the TRC because it involved an actual reduction in the density. In a letter dated today to City Attorney Oast from Mr. Bissette, it reads in part "We are very concerned that the City Council's prior action in approving the $100,000.00 in CDBG funds for this project will make it very difficult for the Council to make an impartial decision on this Appeal. It is our understanding that $100,000.00 in City of Asheville CDBG funds was approved by the Asheville City Council last year for this project and those funds have already been disbursed to the Developers for acquisition of the property." Mr. Barden was confident that City Council will be fair and impartial. He cited a case in that the City of Raleigh Court of Appeals held that there is nothing improper about a council voting on a project it previously participated in planning on. There were comments about the project being higher than the rock pile, but is it not. There was a comment about the sewer line capability, but pointed out that a 80 unit condo complex was approved and that runs into the same main sewer line but only two residents of Chunns Cove residents were present at that hearing. There was a question about fire hydrant pressure, but it's indicated that there is no problem with fire hydrant pressure. There has been no good reason raised why this application should not be approved. He stressed that they have complied with all the requirements and are entitled to a PUD Overlay.

Mr. Dedman admitted to stating that if they did not get approval for 35 units and were only able to build 20 units that there might in fact be more mental health units. The reason is that a tax credit development is very complex and when you get to a certain size of units its not feasible. A 20 unit development is very difficult for a tax credit development. If eight of those 20 are mental health, it's that much worse as far as the flexibility of the funding. With regard to not being flexible about the plan and the number of units, that is not true. He has offered Mr. Bissette and Mr. Washam several times to sit down. They took the position that 20 units is it and anything above 20 units would not be acceptable.

Mr. Bissette cleared up a statement in that he meant to say that if they want to put this number of affordable housing apartments in an area, do it in an area that is zoned for that number. This seems to be framed as a referendum on affordable housing. It's not. Chunns Cove residents say they want, will take and will be great neighbors to 20 affordable housing units say they support affordable housing, but not in their neighborhood or less of it or they want houses and not apartments; there is not much more land available for multi-family development; zoning should have nothing to do with the wealth of a resident or ownership status of resident; this development is over a one million dollar private investment in affordable housing; the more units that can be built, the less rent they have to charge; to allow this development is pro business and pro economic development; if MHO doesn't get funded for Ross Creek, there will be no new affordable housing units built in Asheville next year; for the City's investment of $1 Million the City can receive approximately $3 Million in return; and development will not overtax water, sewer or roadways:

Mr. Robert Todd, Asheville resident
Ms. Willie Vincent, Asheville resident
The Rev. Jim Abbott, Pastor of St. Matthias Episcopal Church and East End/Valley Street resident
Mr. Mathew Ashworth
Ms. Suzanne Walker Wilson, Asheville resident
Ms. Veronika Gunter, Asheville resident (entered into record letter with 11 signatures)
Mr. Barry Summers, Asheville resident
Mr. Alan Ditmore, County resident
Ms. Ann Bamburger, East Asheville resident
Mr. Richard Genz, 355 Sunset Drive
Ms. Pauline Counsel, 415 Chunns Cove Road and Asheville resident
Mr. Tony Sayer, resident on Florida Avenue
Mr. Douglass Keen, 105 Sunny Ridge Drive in Town of Woodfin
Mr. Al Mojonnier, Buncombe County resident
Mr. Bud Walker, 315 Chunns Cove Road
Mr. Brownie Newman, Asheville resident
Ms. Beth Maczka, Asheville resident
Ms. Amanda Ross, Asheville resident
Ms. Robin Merrill, housing attorney for Pisgah Legal Services
Mr. Jim Barrett, Asheville resident
Mr. Greg Walker Wilson, North Asheville resident
Mr. Rich Olejniczak, Asheville resident (entered into record NCHFA Multi-Family Rental Development 2002 Preliminary Application Report)
Ms. Karen Keenan, Executive Director of the Affordable Housing Coalition
Ms. Melendez, Asheville resident
An unidentified lady
Ms. Beth Duttera, Asheville resident
Mr. Howard Shepherd, West Asheville resident
Ms. Noel Nickle, Asheville resident
Ms. Selina Sullivan, Asheville resident
Mr. Bob Smith, Montford resident

Ms. Rebecca Campbell felt both sides of the issue need to sit down and find a way to work together.

Mayor Worley said that Mr. Tom Hartye, General Manager of the Metropolitan Sewerage District, called him earlier that day and said that they have plans to line this section within the next four months and that lining that section will stop the current infiltration. He said that the date of completion of this lining is June and the line is scheduled for a major upgrade in approximately two years.

Mr. David Matney, attorney representing WNC Housing Inc. and Buncombe County resident, said that they do have a legal right-of-way to the roadway. Zoning has the provision for there are no other 3-story buildings in Chunns Cove; keep the zoning only RM-6; the extra 15 units (if a PUD Overlay is granted) will not solve Asheville's affordable housing needs; 20 units will be welcomed into the Chunns Cove neighborhood; City and County should work together to solve affordable housing problems; and more higher paid jobs than $7.00 need to be created:

Mr. Jeff Burleson, adjoining property owner and resident in the City's extraterritorial jurisdiction
Mr. Thomas Custer, resident of Chunns Cove
Mr. James Judd, 26 Rollingwood Road (entered into record four letters)
Mr. Gerald Wagstaff, resident on Honey Drive
Ms. Rhonda Byrd, 156 Chunns Cove Road
Ms. Patty Robertson, 35 Covewood Road in Chunns Cove
Ms. Jean Wall Penland, resident on Rollingwood Road
Mr. Nian Avery, 46 Chunns Cove Road
Ms. Jean Baker, resident of Chunns Cove
Ms. Linda Price, property owner in Chunns Cove
Ms. Beth Pilz, resident on Covewood Road
Ms. Carol Collins, Co-Chair of Highland Gate Neighborhood Association
Ms. Nancy Orbin, resident on Rollingwood Road in Chunns Cove
Ms. Patricia Teague, resident of East Asheville
Mr. Kermit Brown, 398 Chunns Cove Road
Ms. T. Finch, 655 Chunns Cove Road
Mr. Ed Teague, Asheville resident
Ms. Beth Chestnut, resident on Rollingwood Road
Ms. Judy Marshall, 1 Honey Drive
Mr. Wayne Marshall, 1 Honey Drive
Mr. Dick Washam, resident on Honey Drive
Ms. Susan Counsel, 37 Rollingwood Road
Ms. Helen Coman
Mr. Don Sly, Asheville resident
Ms. Madge Murray, 19 Old Chunns Cove Road
Mr. David Herbert, Kenilworth resident
Ms. Carolyn Turminy, 658 Chunns Cove Road
Ms. Karen Hunnicutt, resident in Chunns Cove
Ms. Linda Baker, 33 Rollingwood Road
Ms. Denise Garrison, 5 Rollingwood Road
Mr. Joe Wald, property owner in Chunns Cove
Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods and Haw Creek resident
Mr. Walter Plaue, Carolina Real Estate Investors Association

The following residents urged City Council to approve the PUD Overlay District to allow a 35 unit development for MHO for various reasons, some being, but are not limited to, the project is actually less that the allowed 44-units; the PUD is a new concept that forward thinking cities have used; the PUD gives the City an additional tool to accept higher density if other conditions are met; affordable housing is desperately needed in Asheville; good design of the project; people shouldn't have to fight to live in a section of town; people need a place to live; neighborhoods should be enriched with diversity; this project is an opportunity to advance the cause for affordable housing; affordable housing is important to the City's economic development; MHO has complied with all the City's regulations and should be allowed to build these needed affordable housing units; working people can't afford a decent place to live; Chunns Cove Road neighborhood is changing just by the fact that people move to Asheville; affordable housing will increase the affordability of nearby houses; MHO has had meetings with the neighborhoods and have reduced the number of units as a result of those meetings; some Chunns Cove residents the trust which should exist between the City and its neighborhoods. He felt that every neighborhood in Asheville should be concerned about this. If we are going to have areas where we want affordable housing, let's zone it that way so that people know what's there and what's going to be there. We content that the people who live in the proposed development will be jammed into a crowded environment that is not going to be adequate for what is trying to be done. They would like to see a smaller project with 20 units with more amenities and a safer and comfortable residency for those people who will be living in the development. He realized that cost considerations have no bearing on Council's decision but the people in Chunns Cove are taxpayers and they are disturbed by the magnitude of the monies used to purchase this site. The site was purchased in late 1996 by a local attorney for $59,000. It's valued on the tax books of Buncombe County for $40,000. According to the tax stamps, the developers paid last week $282,000. He can't believe that other sites are not available. On behalf of the citizens of Chunns Cove, he promised that if the developer will reduce the density of this project to the allowed 20 units, the people of Chunns Cove will welcome these new residents into the Cove as friends and neighbors. He said that Mr. Dedman visited the neighborhood about two weeks ago and one of the things he said was that if they don't get this density bonus, they will build 20 units and they will put more mentally disadvantaged people in those 20. He said that the Chunns Cove residents don't care. He said since Mr. Dedman will not voluntarily consider a reduction in density, they respectfully request City Council deny their appeal and require them to comply with the existing RM-6 density requirements. This will be a win-win-win for the City, the Chunns Cove neighborhood and also for affordable housing.

The following residents support affordable housing, however, they urged City Council to deny the PUD Overlay District request for various reasons, some being, but are not limited to, the height elevation of the buildings, once constructed, will be overwhelming since the first building will already start off at 20 feet higher than Chunns Cove Road and then the 38 foot building would be built on top of that; development is out of proportion for the area; the development would denominate the entrance to Chunns Cove and the surrounding neighborhood; the project is not compatible to the neighborhood; density of the project is too high; project doesn't fit into the character of the neighborhood; already existing sanitary sewer, stormwater and traffic problems on Chunns Cove Road; fire safety; buffers and setbacks are insufficient; revised plan was not approved by the Fire Department as reported at the Planning and Zoning Commission meeting; fire safety concerns; turn area in the drive is inadequate in that it a 30-foot fire truck (medium size) has to use both lanes of the road to complete the turn; not a well-designed project; only one close by fire hydrant; speeding on Chunns Cove Road; Chunns Cove Road is dangerous with a blind hill; there have been many traffic accidents on Chunns Cove Road; Chunns Cove Road and Old Chunns Cove Road is a dangerous intersection; existing sewer line is inadequate; existing seepage, overflow and spilling sewage problems; developer knew what the zoning was when they purchased the property; there will be clear-cutting of large trees; there will be bull-dozing of historical artifacts; City to be looking to attract businesses with good paying jobs and then people could affordable homes; other sites are available that would support the density, in particular the 30 acres behind Memorial Stadium; Chunns Cove neighborhood just wants the residents of this development to have a little space and not be overcrowded in the development; property values will be harmed; if the PUD Overlay is granted, other area properties will petition to rezoned to a higher density; since the PUD Overlay process is going to be reviewed, why rush to approve it and then it will be the only one standing that already is greatly at variance with traditional UDO policies and would then be grandfathered in at a later time; several old oak trees need to be protected so they can live through the grading and construction of the site; important historic reminders of Asheville and southern history should stay in their original places and be preserved for future generations; proposed site is too hilly; Chunns Cove Road has no sidewalks; entire development will be on the front half of the lot; there is not enough parking, buffer zones, outdoor recreation space or setbacks provided for the residents of the development; inadequate water flow; with only one access, if an emergency occurs people will be trying to drive out and the emergency vehicles cannot get into the development; the 3-story buildings will block the views;

commercial strip. City Council has set out the rules and they have complied with those rules. She respectfully urged City Council to adopt this zoning designation for the site.

At 7:00 p.m., Mayor Worley announced a short break.

Mr. W. Louis Bissette, attorney representing the Chunns Cove neighborhood and City resident, started out by saying he was disappointed in Mr. Dedman's attacking the Chunns Cove. The Chunns Cove Road neighborhood is made up of good people in a diverse neighborhood with low, medium and high income residents. These are working people, retirees, minorities, single-family parents and others and they share a fierce pride in their homes and community. City Council needs to look at the compatibility of this project to the neighborhood. The neighborhood is asking that Council deny the appeal of the developers for the proposed Ross Creek Commons project. The Planning & Zoning Commission denied the request after a thorough review of the facts and a full hearing. The Commission is a body Council appoints and they should listen to those members. The property located at the corner of Chunns Cove Road and Old Chunns Cove Road is a steep site rising 10 feet above Chunns Cove Road at the entrance to the Chunns Cove community. The property is currently zoned RM-6, Residential Multi-Family Low Density District. He read the description of RM-6 from the UDO. RM-6 is what the people of Chunns Cove counted on at the entrance to their community – a zoning district that would limit the size and density of multi-family development. The RM-6 district allows the developer to build 20 units and the PUD Overlay with its density bonus provisions would permit the developers to put more than twice that many units. He said their plan, which they contend is partially through the process, shows 35 units plus an office. But there is nothing that says if Council passes this PUD Overlay that they can't come back with a plan for 44 units. This is a 3.38 acre site, but really the construction of the project will be on 1.77 acres – less than one-half of that site. That calculates to be 18 units per acre. Very few, if any, of MHO existing projects have this level of density per acre. Furthermore, they disagree with some of the numbers given on the multi-family developments in Chunns Cove. Buck Cove is 20 units on 2.41 aces (8 units per acre) and Pinecliff Condos and Stone Ridge Condos are not in the Chunns Cove area. The Chunns Cove neighborhood strongly supports affordable housing and they support many of the efforts of MHO. This neighborhood, however, opposes the density and scale of this project. It simply does not fit into the character of their neighborhood. They think, in addition to the project being incompatible with the character of the neighborhood, this oversized project will exacerbate existing sanitary sewer, stormwater and traffic problems that already exist in the Cove. He has a police report that lists 23 accidents last year at different spots on Chunns Cove Road. These issues have not been properly addressed by needed traffic, infrastructure or environmental studies. Setback and buffering requirements have been waived and there are none on one side of the project at all. There are serious concerns about fire safety and concerns about the site. Mr. Baechtold's letter that Ms. Brison submitted into the record was dated May of 2001 and was based on a plan that is no longer in existence. That was the original plan that had two access points and had a different configuration of buildings. We contend that the new plan only has one access point and the Fire Department has never seen the revised plan. He didn't think the Tree Commission has seen the revised plan either. After looking at the plat of ownership for this project and it looks like their property line does not come over to Old Chunns Cove Road where this access road exists. So, they're not sure if they actually own the property that their one access road goes on. He felt the PUD Overlay process is unfair – not just to Chunns Cove, but to anyone. The PUD Overlay with its density bonus provisions have never been used by the City to date. It was also his understanding that there have been some issues about this process and there may well be some forthcoming modifications or deletions recommended to City Council. Chunns Cove was the only neighborhood who was forced to suffer through the "rock pile" fiasco when I-240 was built. They request City Council not vote to make it the only neighborhood to suffer through the unfair provisions of the PUD Overlay District. People in a neighborhood have the right to know, with some certainty, what can be constructed in that neighborhood. That's why there is zoning. The residential PUD Overlay process, however, does nothing but bring about uncertainty and destroys plan for the City is known as the 2010 Plan. She then pointed out some case law regarding zoning designations. Again, there is clearly authority in North Carolina for establishing this overlay district. City Council must consider the character of the land, the suitability of the land for the uses permitted, and the comprehensive plan or the existence of circumstances justifying the rezoning application. She asked Council to apply the law set forth in those cases in determining how they have met the rules for this zoning designation and to base their decision on those factors, not on someone's characteristic of the area or on unfounded facts set forth. She reviewed language from the City's 2010 Plan to show that this zoning designation requested will be in compliance with the comprehensive plan. Another policy adopted by the City regarding affordable housing is the Consolidated Housing and Community Development Plan for 2000-2005 adopted on June 9, 2000. In concert with the 2010 Plan and the Consolidated Housing and Community Development Plan, City Council adopted the PUD Overlay District in the UDO. She noted it has been shown how this project is compatible of the uses in the area and also the density in the area with this proposed zoning designation. This proposal fits within the uses in the area, not that this proposal would provide for about 10.4 units per acre, whereas Buck Cove Townhomes are about 9 units per acre and Willow Ridge Apartments are about 10.1 units per acre. There is clearly compliance with uses and with density in order to support this designation. Ms. Meldrum entered into the record a letter from Mr. Dan Baechtold, Urban Planner, dated May 24, 2001, noting that on May 21, 2001, the TRC reviewed the proposed site plan and took action to move forward with conditions. She believed that by the action of the TRC, that clearly shows that the infrastructure supports this zoning designation She referred to letters in the booklet Mr. Dedman entered into the record earlier regarding water commitment; sewer allocation; adequate capacity in the fire hydrants and fire flow; and no problems with crime in the area. She then submitted into the record email correspondence from Michael Moule, the City's Traffic Engineer, regarding the analysis of the traffic in the area that it was well below the threshold of requiring an Traffic Impact Analysis. Mr. Moule also detailed that he "pulled the crash reports for Chunns Cove Road. According to our data, since 1994, there have been no crashes at the intersection of Chunns Cove Road and Old Chunns Cove Road." He did point out, however, that there have been some minor fender-benders in the vicinity. Another reason the zoning designation should be approved is because it meets the purposes of the PUD. She detailed how it encourages more open space; it retains natural features, especially on steep slopes, and to encourage developments that will be compatible with environmentally sensitive areas; facilitates more affordable housing; facilitates energy costs through clustering of dwellings; effective use of transportation system; and encourages pedestrian circulation. The project meets the location standards of the PUD in that it shall be located on a street which is capable of accommodating the projected traffic needs of the proposed development. It must meet the infrastructure standards and the infrastructure in this area supports the density proposed. There may be other issues raised, such as an environmental impact statement and also concern about whether or not there may be some history to the site related to the underground railroad. Because federal funding is involved there is approval for the project from the N.C. Dept. of Cultural Resources in a letter dated September 28, 2001, saying they have conducted a search of their maps and files and determine that this structure is not located in or adjacent to any district which is listed in or eligible for listing in the National Register of Historic Places. In addition the structure, meaning also the property, is neither listed in, nor eligible for listing in, the National Register as an individual property. "We therefore have no comment." Also a notice to the public of no significant impact to the environment was published in the Asheville Citizen-Times on October 9, 2001, pursuant to requirements of the United States Dept. of Housing and Urban Development to release federal funds under the Title 1 of the Housing & Community Development Act. Clearly there has been a determination that there is no historic designation for the property and no need for an environmental impact study under federal regulations. In summary, the UDO, the comprehensive land use plan and the Consolidated Housing Plan has set forth Council's policies. In carrying out those policies, a provision in the UDO, the PUD has been adopted to allow for an affordable housing density bonus to carry out Council's policies. We have presented evidence that this is the right location, the right size, has access to I-240 and Tunnel Road, to a major

Council approves the PUD Overlay, then the exact details of the site plan will be discussed in detail. If Council does not approve the PUD Overlay, then they will build 20 apartments on the site. Fifteen families or individuals will live somewhere else, most likely further away from convenient shopping, transportation, jobs and services. He showed slides to illustrate the location of the site, noting that the site is less than 2/10 of a mile from I-240, 1/4 of a mile from Tunnel Road and 1.5 miles from downtown. He then entered into the record a booklet entitled "The Story of Ross Creek Commons" dated February 8, 2002, which included (among other things) a timeline of communication with the neighbors. He agreed that people should care about and be involved their neighborhoods. But issues of "Not in My Back Yard" (NIMBY) are issues of concern all across our nation, many which reference inadequate infrastructure. Infrastructure is a significant reason MHO has chosen this site. Water and sewer lines are ample and right at the site, grading costs will be well below any other site they have been able to find and develop, and the land is located on a good road and a good intersection. All regulations have been met. Concerns have been raised about the height of the buildings and they will address that concern fully if the PUD Overlay is approved. But as a side note, the buildings are below the height of the City's regulations not only for multi-family development but for single-family development. Even though neighbors stress that building height is the main difference between other developments in the community and this proposed development, he showed slides to dispute that issue. Therefore, the question is density and density is people. He read various letters from residents that support the phrase "we support affordable housing, but ...." Some excerpts were (1) "if they just build 20 units and not ask for any affordable housing density bonus, they well welcome us with open arms;" (2) "hope you will look elsewhere for another piece of property;" (3) "affordable housing belongs in areas where similar housing exists just as commercial buildings belong in settings that foster other commercial enterprises;" (4) "the proposed development will house people with substance abuse and mental illness problems. Similar MHO developments may be accepted by other communities, but I do not believe it will be accepted here – certainly not by me or many of my neighbors in Buck Cove Townhouses;" (5) "children will have to spill over onto a very congested part of Chunns Cove Road and into the properties of those who are and have been established. This is a real cruelty to the people would be living under these conditions. There is plenty of land to be had to allow more space and probably cost less. Perhaps the deserted theatre at Innsbruck Mall with the space around it could be bought, along with the Heilig Meyers space." He said that after the Planning & Zoning Commission meeting of 2-1/2 hours of discussion about traffic, sewer, buffers, density and building height, a neighborhood representative asked "I just want to know one thing – why type of people will live there." The City Attorney ruled her out of order in that the question was not relevant to the rezoning issue. Mr. Dedman said their families are typically in the income range of $15-30,000. These families can afford the rent, they just can't afford Asheville's market rent which is very high. MHO does not build public housing and they do not admit residents who have had a violent history or history of sexual offense. Because of neighborhood concerns expressed, MHO will commit to having a paid person on site to keep watch and alert other professionals if a problem arises. This goes beyond what is available to any other home or property in the neighborhood. He summarized by saying that City Council unanimously approved the zoning map of six units per acre on their site and they also unanimously approved the affordable housing density bonus. MHO try to help the families who live in their apartments and homes to fulfill their highest aspirations. He asked City Council to help not just 20 families but 15 additional families to achieve their highest aspirations.

Ms. Patsy Brison-Meldrum, attorney representing MHO and extra-territorial jurisdiction resident, addressed the legal issues. She discussed the authority for a PUD Overlay District, clearly pointing out that it is authorized under North Carolina law. She then said that State law also sets out the purposes that should be considered in determining whether to adopt a zoning designation. She cited from a few cases which note that you do not have to consider all of the purposes or to adopt a zoning designation that complies with all of these purposes. One purpose is that zoning regulations shall be made in accordance with a comprehensive plan. That institutions and technical graduate programs; (7) Problems with the planning, zoning, and permitting process; (8) Lack of cooperation between City and County governments; (9) Need to revitalize the riverfront; (9) High underemployment; (10) Lack of available buildings for manufacturing and distribution; and (11) City's economic development role needs to be more clearly defined.

Mr. Shuford then provided Council with the project description and discussed some of the surrounding land uses in an effort to demonstrate compatibility of this project with the overall development pattern of this part of the City. He said that Ross Creek Commons is a 35 unit multi-family complex to be located at the corner of Chunns Cove and Old Chunns Cove Roads on a 3.38 acre parcel. The project site is located about ¼ mile from the intersection of Chunns Cove Road and I-240. The property is currently zoned RM-6; prior to the UDO, the property was zoned R-2 which also allowed six residential units per acre. Surrounding zoning is almost all RM-6 although there is some RS-2 on the steep, western side of the property. It is in the proximity of nonresidential and other multi-family development – Churches; Buck Cove Townhomes; CentrePark Business Park; multi-family projects farther south and north on Chunns Cove Road (Willow Springs, 24 Old Chunns Cove Road). He described the building height, massing, scale and location (building elevations; meet maximum height limits of zoning ordinance; similar design; Laurelwood).

He said that staff feels that the project is physically compatible with the surrounding neighborhood due to (1) the amount of existing multi-family development immediately proximate to and in close vicinity to the subject property; (2) the relationship of the subject property to streets and highways; (3) the natural and topographic circumstances of the subject property; and (4) the surrounding area and the proximity of nonresidential development.

The next questions that must be answered are: whether there is adequate public services to serve this development; and whether other existing or potential development in the area will be substantially and negatively impacted if these services are used to support this proposed development. Water service has been reviewed by the Water Authority and they have no capacity concerns. Sewer service has been reviewed by the Metropolitan Sewerage District (MSD) and they have no capacity concerns. Streets have been reviewed by the City's Traffic Engineer and he has no capacity concerns. Public Safety (Fire, Police and Emergency Medical Services) have been reviewed by City staff and there are no response time concerns.

He hoped he had sufficiently demonstrated to Council the extent of our affordable housing problem, the importance of resolving that problem to the City's economic development program, the overall compatibility of the proposed development with surrounding properties, and the adequacy of public services necessary to support the development. Based on this analysis, staff recommends your approval of the PUD Overlay zoning.

Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities (MHO) and City resident, asked City Council to approve the City's only land use provision that supports affordable housing for their site in Chunns Cove. On 3.38 acres they want to put 35 attractive apartments. Twenty-seven of those apartments will be affordable to families in the $15-30,000 income range. Eight of the apartments will be for individuals who have receive care from the Blue Ridge Center and are able to live independently. One additional unit, in addition to the 35 residences, will be a community meeting space. If the PUD Overlay designation is approved, they could have asked for 40 apartments with a double density bonus allowed in the UDO. With other provisions of the PUD, they could have requested up to 44 units. In fact, the did initially request 44 units and last year the City's Technical Review Committee (TRC) unanimously reviewed their proposal on all technical issues. However, after hearing concerns from neighborhood residents about the number of units and the scale of their buildings, they reduced their plan to 35 units (and one community space) and reduced the side of the buildings. If no taller than those allowed under the current zoning of the subject property and under the surrounding residential zoning, including the single family zoned areas. The development will be clustered towards the front of the property (the least steep part of the property along Chunns Cove Road), leaving over 40,000 sq. ft. of undeveloped open space to the west side of the property. A small playground will also be provided on site. Overall the site will have over 56,000 sq. ft. of open space; open space would constitute 38% of the total site. The site will be landscaped in accordance with the City Code for this type and impact of development.

Staff has received considerable public comment on this project. Neighboring property owners are primarily concerned about increased density, traffic impacts, and water and sewer capacity. Most of these issues were addressed through the Technical Review Committee (TRC) review process. A traffic impact analysis was not required for this project because the traffic generated from the site would be below the threshold for such an analysis. The site was redesigned with a single entrance off of Old Chunns Cove Road. The applicant is working with the Transit Services Department to work out the provision of public transit via Mountain Mobility. A Letter of Commitment for water availability has been issued and MSD has issued a Wastewater Allocation, which will require the applicant to complete some minor manhole improvements.

Staff recommends approval of the PUD Master Plan and Zoning Overlay, subject to the following conditions: (1) Provide details for the playground equipment; and (2) Provide pedestrian connections between the apartments and the large area of common open space.

Planning & Development Director Scott Shuford said that this proposed zoning change comes before Council with a recommendation of denial (3-3) from the Planning and Zoning Commission. This is the first Planned Unit Development request that has included the affordable housing density bonus. This public hearing was advertised on February 1 and 8, 2002.

He said his first presentation involves the zoning change to the PUD Overlay classification. If Council approves that change, then there will be a separate presentation that deals with the applicant's master plan. He said he would not get into details about site design in this first presentation but that his comments will be limited to general compatibility and infrastructure sufficiency issues associated with the proposed zoning overlay.

As noted at the Council retreat, the PUD zoning tool is relatively cumbersome and has been largely replaced by conditional use zoning. However, the PUD regulations contain an extremely important provision that supports key community goals: density bonuses for affordable housing and for environmental protection. Also as pointed out at the retreat, Asheville has a major affordable housing problem. One of the most important incentives local government can provide for affordable housing is to allow increases in density that reduce the per-unit cost of providing housing. He then reviewed graphs and charts demonstrating the affordable housing problem in Asheville.

He said that if we are to provide affordable housing to the extent that we must provide it to meet the obvious community-wide affordable housing and economic development needs, it will have to occur in multi-family developments. In our land-short situation, we cannot expect single-family development to come close to meeting the need for affordable housing. He showed a map of what land is available for multi-family housing. He said that approximately 2,200 is available and vacant for multi-family development.

Mr. Shuford then reviewed with Council the Sustainable Economic Development Strategic Plan priorities. (1) Shortage of diverse and affordable housing within the City, including rental units; (2) Lack of developable sites; (3) Tight labor supply with a shortage of skilled workers; (4) Lack of local agreement about the type business and industry the City should try to attract; (5) The water supply is inadequate and high cost; (6) Lack of prestigious research

City Attorney Oast also said that an issue was raised regarding a possible conflict of interest with regard to Councilman Ellis' position as a member on the Board of Directors of the Blue Ridge Area Authority. He has investigated that contention and does not feel there is a disqualifying conflict, therefore, Councilman Ellis must vote in this matter.

City Attorney Oast said that in connection with the rezoning, the main question is whether the PUD Overlay designation is appropriate for this particular property. The PUD Overlay does not change the underlying zoning of the property. What it does is permit increases in density if the developer meets certain standards set out in the Unified Development Ordinance (UDO). Relevant issues on this question are whether the PUD Overlay designation, with the increased density that PUDs allow, is appropriate here. Consideration should be given to such usual rezoning considerations as to whether and to what extent the PUD designation advances the City's policy objectives, as set forth in its various plans (comprehensive plan, land use plan, smart growth policy, etc.), compatibility with surrounding land uses, adequacy of infrastructure, and other general health, safety and welfare considerations. Even though some specific information regarding the Ross Creek Commons master plan will necessarily come before Council with Council's consideration of the rezoning element, it is important to remember that the plan can change and, as with any rezoning, any information regarding its specific proposed use should be considered as an example of what could go on the property, not necessarily what will. Once the PUD Overlay is established, any of the density bonuses allowed under Section 7-9-1 may be obtained if the applicable standards are met.

With regard to the master plan approval, it would be appropriate to get into more specific issues such as the placement of buildings on the site, the number of units in each building and the total number of units, the availability of parking, landscaping and preservation of natural landscape or topographic features on the site, setbacks, pedestrian and traffic circulation within the project etc. City Council may be as specific as it wishes in asking questions about the proposed use of the property. He stressed that City Council must not take into consideration the possibility that one or more of the units may be occupied by persons with mental disabilities or any other kind of disability

Mayor Worley opened the public hearing at 5:46 p.m.

Summary: WNC Housing and Mountain Housing Opportunities, Inc., have applied for a Master Plan approval and Planned Unit Development zoning overlay designation for Ross Creek Commons, a 35 unit affordable housing development. The proposed site for the development is a 3.38 acre parcel located at the corner of Chunns Cove Road and Old Chunns Cove Road, near Buck Cove Terrace. The parcel is currently zoned RM-6 Residential Multi-Family Low Density District, 6 units per acre. The PUD zoning overlay district provides a density incentive bonus for affordable housing and conserving open space that would allow the site to be developed at a density of up to 13 units per acre. The actual development density, as proposed, would be 10 units per acre. While this density is higher than that allowed under much of the surrounding property, it is not inconsistent with multi-family development in other areas of the Chunns Cove community, including the adjacent Buck Cove Townhomes, which have a density of 9 units per acre on much steeper property. It should also be noted that the subject property is located at the entrance to the Chunns Cove community, quite near an interstate interchange, and across the street from a church use. Such locational characteristics lend support to this site as a suitable place to allow density bonuses for affordable housing and open space conservation since traffic and site activity impacts would already be at a center of activity for the Chunns Cove community and will not be directed toward the interior of the community.

The proposed project is comprised of 4 buildings with a total of 36 units, one of which will be used as a community gathering space. Two buildings will be three stories, with twelve units each. The other two buildings will be two stories high, with six units in each. The buildings will be

Staff has received no comments in opposition to the proposed revisions.

At their January 2, 2002, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Vice-Mayor Bellamy asked that staff look at the possibility of flexible development standards for developments other than residential or subdivisions. Mr. Green responded that staff continually looks for ways to increase the flexibility of our ordinances.

Upon inquiry of Councilman Dunn, Mr. Green said that any staff decision on this matter can be appealed to the Board of Adjustment.

Mayor Worley closed the public hearing at 5:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2896. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE ~~5[illegible]~~ 412

C. PUBLIC HEARING ON THE PLANNED UNIT DEVELOPMENT OVERLAY DISTRICT DESIGNATION AND MASTER PLAN REVIEW FOR ROSS CREEK COMMONS LOCATED AT CHUNNS COVE ROAD AND OLD CHUNNS COVE ROAD

Due to a conflict of interest, Councilman Peterson moved to excuse Vice-Mayor Bellamy from participating in this matter. This motion was seconded by Councilman Dunn and carried unanimously.

City Attorney Oast said that this matter involves two steps: (1) adoption of the Planned Unit Development (PUD) Overlay zoning classification (involves consideration of the usual issues in rezoning: appropriateness of the classification for the location, consistency with the City's master plan, compatibility with surrounding land uses, etc.); and (2) adoption of the master plan for the PUD (involves determination as to whether the master plan meets specific criteria set out in the ordinance). He said it may be helpful to think of the first step in the PUD process as establishing a zoning classification and applying it to a particular property, and the second step as adopting the regulations that apply within that newly-established zone.

He said that a valid protest petition has been filed by the property owners surrounding the property that is the subject of the application. This protest petition relates to the rezoning element only. The effect of the protest petition is that an affirmative vote of 3/4 of all the members of City Council is required in order to rezone the property. This means that six votes of the City Council will be required to approve the rezoning request. And since Vice-Mayor Bellamy has a conflict her absence does not lower the number of votes required. This, a 6-0 vote will be required in order to approve the rezoning element of the PUD application. He noted that attorneys for the applicants have objected to this ruling. He did note that the protest petition does not affect the master plan; if the rezoning is approved, the vote required to approve the master plan will be a simple majority. He said that the attorneys for the applicants have objected to this ruling as well. If the rezoning element fails to pass, the project is denied and there is no necessity for consideration for voting on the master plan. Letters from Mr. Steven L. Barden, III, and Mr. W. Louis Bissette, Jr., were entered into the record.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE REGARDING FLEXIBLE DEVELOPMENT STANDARDS

ORDINANCE NO. 2896 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO IDENTIFY FRONT SETBACKS AS A CATEGORY FOR MODIFICATION USING FLEXIBLE DEVELOPMENT STANDARDS AND TO CLARIFY THE PROVISIONS REGARDING VARIANCES AND FLEXIBLE DEVELOPMENT STANDARDS

Mayor Worley opened the public hearing at 5:18 p.m.

Chief Planner Gerald Green said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to identify front setbacks as a category for modification using flexible development standards and to clarify the provisions regarding variances and flexible development standards. This public hearing was advertised on February 1 and 8, 2002.

Flexible development standards allow City staff to make administrative exceptions to certain parts of the UDO under specific circumstances. We have identified a new dimensional category for the application of flexible development standards - front setbacks.

To a great extent, front setbacks determine the character of most subdivisions. Front setbacks are generally measured from the right-of-way and, in Asheville, street pavement and right-of-way widths have not been consistent. Consequently, subdivisions in the same zoning classification may have front setbacks that measure different distances from the edge of pavement due to this variety. Additionally, in our mountainous terrain, some lots in a subdivision are differently situated than other lots due to topography. These circumstances, among others, warrant some flexibility in establishing the front setbacks for both entire subdivisions and for individual lots within subdivisions.

Currently staff is authorized to grant modifications in the following rules using the flexibility standards: lot size, lot width, setbacks and off-street parking requirements. If a project is required to be reviewed by a design review board, the design review board can waive requirements for the following, if the building design is approved: building size, building height, setbacks and landscaping.

The ordinance provides for the application of flexible development standards in order to make minor adjustments to front setbacks in entire subdivisions or portions of subdivisions. The front setback may be reduced by up to 10 feet in an entire subdivision as part of the plat approval process. A minimum 10 foot setback is required. The front setback in up to 10% of the lots in a subdivision may be reduced by up to 10 feet, except in the RS-2 zoning district where the front setback may be reduced up to 20 feet. The minimum front setback of 10 feet is required.

He said the following conditions must exist that warrant approval of the reduced front setback: (1) protection of significant existing vegetation; (2) accommodation of trails and greenways; (3) provision of a more usable lot arrangement due to topographical constraints; and (4) maintenance of consistent appearance within the subdivision.

Staff believes that this ordinance will provide the needed flexibility to evaluate and approve reasonable adjustments to front setbacks in a number of cases where such flexibility is needed. Property owners/developers can request and receive minor modifications under the flexible development standards without the need to present a variance request to the Board of Adjustment. The Board of Adjustment is in agreement with this amendment. The ordinance amendment also clarifies the relationship between flexible development standards and variances.

Staff has received no comments in opposition to the proposed revisions.

At their January 2, 2002, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Vice-Mayor Bellamy asked that staff look at the possibility of flexible development standards for developments other than residential or subdivisions. Mr. Green responded that staff continually looks for ways to increase the flexibility of our ordinances.

Upon inquiry of Councilman Dunn, Mr. Green said that any staff decision on this matter can be appealed to the Board of Adjustment.

Mayor Worley closed the public hearing at 5:36 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2896. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

Tuesday – August 28, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Sitnick gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 14, 2001, AND THE WORKSESSION HELD ON AUGUST 21, 2001

B. RESOLUTION NO. 01-131 - RESOLUTION ACCEPTING THE STREET MAINTENANCE OF PINEY MOUNTAIN ROAD AND ARNOLD ROAD

Summary: The consideration of a resolution accepting Piney Mountain Road and Arnold Road for public maintenance.

As part of the annexation process, staff identifies streets in proposed annexation areas that should be maintained by the City after annexation. As part of the 2001 annexation process, two streets were identified to be maintained by the City following annexation.

The first street identified is Piney Mountain Road. Piney Mountain Road is currently a N. C. Dept. of Transportation (NC DOT) maintained roadway approximately 0.73 miles in length known as State Route 2243. It begins at Chunn's Cove Road and ends at the Piney Mountain Condominium Complex. Only a portion of this road was in the City prior to this annexation. Following annexation, all of the roadway will be in the City limits. Staff is requesting that the City maintain the entire length of Piney Mountain Road.

The second street identified is Arnold Road. Arnold Road is located near the Veterans Administration Hospital off Tunnel Road. The length of the road is approximately 0.37 miles and is currently maintained by the NC DOT as State Route 2000 and 2001. Arnold Road is a dead-end street that begins at Tunnel Road.

Staff recommends that City Council adopt a resolution accepting Piney Mountain Road and Arnold Road for public maintenance.

RESOLUTION BOOK NO. 26 – PAGE 441

C. RESOLUTION NO. 01-132 - RESOLUTION APPROVING A GRANT FROM THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $5,381,370.

2

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $5,381,370, consists of the following projects: rehabilitate airfield electrical vault; expand general aviation apron; construct by-pass taxiway, Runway 34; and expand terminal building, Phase I.

Staff recommends adoption of the resolution and authorize the Mayor to execute the grant agreement for Project No. 3-37-0005-25.

RESOLUTION BOOK NO. 26 – PAGE 442

D. RESOLUTION NO. 01-133 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT DONATION AND CONVEYANCE OF REAL PROPERTY ON THOMPSON STREET FROM TROY E. MUSE

Summary: The consideration of a resolution authorizing the Mayor to accept a donation of real property on Thompson Street from Troy E. Muse for the City of Asheville greenway system.

The City of Asheville is interested in establishing greenways or greenway systems throughout the corporate limits of the City of Asheville. Quality Forward has worked with the owners of real property along the Swannanoa River at Thompson Street to obtain easements for the proposed Swannanoa River Greenway. Troy E. Muse has offered to donate a portion of property he owns (approximately 0.35 acre) between Thompson Street and the Swannanoa River (a portion of PIN 9648.20-81-3179) for the greenway system.

A Phase I Environmental Site Assessment has been completed by T. & E. Technology. The property has been surveyed by W. K. Dickson. The Parks and Recreation staff have reviewed the proposed donation and found that the property is appropriate for the greenway system.

City staff recommends City Council adopt the resolution authorizing the Mayor to accept a donation of real property adjoining the Swannanoa River from Troy E. Muse.

RESOLUTION BOOK NO. 26 – PAGE 443

E. RESOLUTION NO. 01-134 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH SENTRY ALERT SECURITY INC. FOR PARKING FACILITIES AFTER-HOURS AND WEEKEND SECURITY PATROL SERVICES

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Sentry Alert Security, Inc., for parking facilities after-hours and weekend security patrol services.

With the installation of automated parking deck gate equipment last fiscal year, Council authorized the implementation of a $1.00 fee for parking in the City's decks after-hours and all day on weekends (whenever Parking Services Staff were not manning the decks). The revenues from the $1.00 fee are to be used to provide security enhancements for the decks during those periods. (The after-hours revenues have averaged approximately $10,000.00 per month since their initiation last March.) The first security enhancement implemented was a contracted roving security patrol of the decks, surface lots and surrounding on-street parking area. Sentry Alert Security, Inc., began providing the patrol service in the spring of this year. Their service has been highly satisfactory and a number of favorable comments have been received from the public. The patrols have not only increased the public's sense of security and safety; but, have also aided customers who find themselves trapped in the deck by malfunctioning gate equipment or without funds to pay the $1.00 fee or who find their car has a dead battery or flat tire. If future revenues prove adequate, additional security enhancements, such as monitored security cameras, blue-light emergency phones, etc. will be considered for implementation.

The proposed contract with Sentry Alert Security, Inc., is effective for Fiscal Year 2002 and provides hourly rates for patrol services and a maximum compensation of $60,000.00 for the year. Funding is included in the Parking Services Fund Fiscal Year 2002 Budget for contracted security patrol service.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a contract with Sentry Alert Security, Inc.

RESOLUTION BOOK NO. 26 – PAGE 444

F. RESOLUTION NO. 01-135 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO RECEIVE A GRANT FROM THE U.S. DEPT. OF JUSTICE, LOCAL LAW ENFORCEMENT BLOCK GRANT PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to accept a federal grant from the U. S. Department of Justice, Local Law Enforcement Block Grant Program and the associated budget amendment.

The City of Asheville is eligible to receive a federal grant through the U. S. Department of Justice, Local Law Enforcement Block Grant Program. The grant is in the amount of $141,904. A local match of $15,767 is required. The source of the local match will be the City General Fund.

Under conditions of the grant, funds are being used to reduce crime and improve public safety.

Staff recommends Council adopt the resolution and budget amendment.

RESOLUTION BOOK NO. 26 – PAGE 445

G. ORDINANCE NO. 2837 - BUDGET AMENDMENT, IN THE AMOUNT OF $157,671, FOR A GRANT FROM THE U.S. DEPT. OF JUSTICE, LOCAL LAW ENFORCEMENT BLOCK GRANT PROGRAM

Summary: See Consent Agenda Item "F" above.

ORDINANCE BOOK NO. 19 - PAGE 242

H. ORDINANCE NO. 2838 - BUDGET AMENDMENT TO CREATE THE BUDGET FOR THE FRENCH BROAD RIVER CORRIDOR CONNECTORS

Summary: The consideration of a budget amendment, in the amount of $203,040, for an appropriation from the N. C. Department of Transportation in the Transportation Enhancement Program for the Transportation Equity Act for the 21st Century (TEA21).

The City of Asheville applied for grant funds in June 2000 to the N. C. Department of Transportation. The grant was recently awarded in the amount of $203,040 and designated to pay for the cost associated with constructing walkways and sidewalks connecting the series of parks along the French Broad River on Amboy Road. A 20% match, or $50,760, is required and already funded by the Public Works Department.

The Parks and Recreation Department recommends City Council approve the budget amendment in the amount of $203,040 to create the budget for the French Broad River Corridor Connector.

ORDINANCE BOOK NO. 19 – PAGE 244

I. ORDINANCE NO. 2839 - BUDGET AMENDMENT FOR THE URBAN TRAIL STATION 10 GROVE'S VISION

Summary: The consideration of a budget amendment, in the amount of $6,600, for the Urban Trail's Station 10 Grove's Vision.

The City of Asheville and the Urban Trail Committee develops funding through private donations to support the development of the Trail. Donations in the amount of $6,600 were recently received to complete the construction of Station 10 Grove's Arcade.

The Parks and Recreation Department recommends City Council to approve the budget amendment to increase the budget for the Urban Trail's Station 10 Grove's Vision.

ORDINANCE BOOK NO. 19 – PAGE 246

J. ORDINANCE NO. 2840 - BUDGET AMENDMENT FOR THE URBAN TRAIL'S THEMATIC MARKERS

Summary: The consideration of a budget amendment, in the amount of $7,251, for the Urban Trail's Thematic Markers.

The City of Asheville and the Urban Trail Committee develops funding through private donations to support the development of the Trail. Donations in the amount of $7,251 are being received to complete the construction of the Urban Trail's Thematic Markers.

The Parks and Recreation Department recommends City Council to approve the budget amendment to increase the budget for the Urban Trail's Thematic Markers.

ORDINANCE BOOK NO. 19 - PAGE 248

K. RESOLUTION NO. 01-136 - RESOLUTION MODIFYING THE SCHEDULED CITY COUNCIL MEETINGS TO (1) CANCEL THE SEPTEMBER 11, 2001, FORMAL MEETING; (2) CANCEL THE OCTOBER 16, 2001, WORKSESSION; (3) RESCHEDULE THE OCTOBER 9, 2001, MEETING UNTIL OCTOBER 10, 2001; AND (4) RESCHEDULE THE NOVEMBER 6, 2001, MEETING UNTIL NOVEMBER 7, 2001

RESOLUTION BOOK NO. 26 – PAGE 446

L. RESOLUTION NO. 01-137 - RESOLUTION CONFIRMING THE APPOINTMENT OF CAROL GOINS TO THE HOUSING AUTHORITY BOARD OF DIRECTORS

Summary: The consideration of endorsing the Mayor's appointment to the Housing Authority of the City of Asheville.

Marshall Logan has resigned as a member of the Housing Authority Board of Directors, thus leaving an unexpired term until June 11, 2003.

s action will endorse the appointment by Mayor Sitnick appointing Ms. Carol Goins to serve the unexpired term of Mr. Logan, term to expire on June 11, 2003, or until her successor has been appointed.

Staff recommends City Council endorse the Mayor's appointment to the Housing Authority Board of Directors.

RESOLUTION BOOK NO. 26 – PAGE 447

M. RESOLUTION NO. 01-138 - RESOLUTION REQUESTING THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO RECONSIDER FUNDING THE COMPRESSED NATURAL GAS FUELING GRANT

Summary: In December, 2000 the City of Asheville and its partners submitted a mobile source emissions grant application to the North Carolina Department of Environment and Natural Resources (NC DENR) to construct a compressed natural gas fuel station. Such a fuel station located in Asheville would complete the infrastructure to allow zero emissions vehicles to travel the length of this fair state. The City of Asheville and its partners desire to proactively promote vehicle pollution by installing the infrastructure to support zero emission vehicles. On April 10, 2001, the City of Asheville received a favorable response from NC DENR pending a state budgetary decision. WHEREAS, on July 27, 2001, the City of Asheville received a letter from NC DENR which stated that no funds were available to fund the grant. This resolution urges the General Legislature's honorable members to restore the awarded grant funds to the City of Asheville so that they may complete the western-most fuel station for alternatively fueled vehicles.

RESOLUTION BOOK NO. 26 – PAGE 448

M. RESOLUTION NO. 01-139 - RESOLUTION AUTHORIZING UTILITY ENCROACHMENT AGREEMENT FOR PROPERTY AT LEXINGTON AND PATTON AVENUES

Summary: The consideration of a resolution authorizing a utility encroachment agreement on City property at Lexington and Patton Avenues.

The developer of the old Kress building on the northwest corner of the intersection of Patton Avenue and Lexington Avenue has been advised by CP&L that a transformer in the immediate vicinity of the building is needed in order to supply it with adequate power meeting current standards.

The developer has explored on-site options for the transformer but these are undesirable from a practical standpoint and prohibitively expensive. CP&L and the developer have identified the property across College Street as a place where a transformer could be located. Such a location would not only serve the Kress Building, but would also serve other anticipated development in the area. The City owns the small lot on the east side of the lot next to Lexington Avenue, and the developer and CP&L are requesting an easement to allow the location of a transformer, as shown in the drawing attached as Exhibit A to the resolution.

The City acquired this property by gift in 1986 from Helen Zageir. Although it is currently used as a planting strip, there are no restrictions on its use, and

6

information in the file suggests that it should be held for future development. City staff have reviewed the proposal and determined that a transformer can be located in the strip without impairing the function of the property or any City services. Moreover, due to its size, it is unlikely that the lot could be feasibly developed with a building. The City will work with CP&L and the developer to install and maintain some landscaping on the property.

The City Code, Sec. 16-75, provides that Council may approve or deny the project; a public hearing is permitted but no required. The encroachment agreement would be subject to the usual provisions for encroachment agreements in the City Code, and appropriate legal documentation would be required. Council may also attach conditions to the encroachment agreement.

If Council wishes to allow the use of this property for the siting of a transformer and pad, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 26 – PAGE 449

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ANNOUNCEMENT

Transit Center Addition

Mayor Sitnick was pleased to announce that on August 21, 2001, City Council approved a resolution authorizing the construction of a new Transit Center passenger waiting room. The addition is 560 square feet, will seat 40 passengers, 2 wheelchairs and will have standing room for an additional ten people. The addition will be fully enclosed with heat. She said that the City will do its best to have this addition complete by cold weather.

Award Presented to City Manager

Mayor Sitnick recognized City Manager Jim Westbrook who received this year's ICMA's In-Service Training Award. This Award is presented to the administrator who has developed an implemented highly effective in-service training programs for local government employees. This Award was established in memory of Clarence E. Ridley, a pioneer in the field of local government management.

AGENDA CHANGE

At the suggestion of Vice-Mayor Cloninger, it was the consensus of City Council to move consideration of approving the Public Art Master Plan before the public hearings.

RESOLUTION NO. 01-140 - RESOLUTION ADOPTING THE PUBLIC ART BOARD MASTER PLAN

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution approving the Public Art Master Plan.

Mr. Brinson said that in September, 1999, Asheville City Council established a Public Art Board for the City of Asheville. This seven-member board has been working over the past two years to develop a comprehensive planning tool to assist in the acquisition, retention and maintenance of a public art program in Asheville. A sub-committee was formed in 2000 to assist Board members in developing the overall outline for the plan. In addition, funds were secured through the N. C. Arts Council to match City funds to complete the final master plan that is being presented to City Council. This plan addresses a number of ways to implement the public art program, both for permanent and temporary art.

Mr. Kenn Kotara, Chair of the Public Art Board, explained briefly the plan which he presented in detail at City Council's August 21, 2001, worksession. He outlined the public process for solicitation of artists and artwork for various projects, as well as allowing for methods of deaccessioning art that will be owned by the City of Asheville. The Public Art Master Plan will serve as the foundation for the City of Asheville in regard to a vibrant and exciting Public Art Program for years to come.

The Parks and Recreation Department and the Public Art Board recommend City Council's approval of the Public Art Master Plan.

Mayor Sitnick said that we need to recognize art as a major player in economic development.

Councilwoman Field noted that a few years ago an economic impact study was done of the impact of crafts in western North Carolina. It turned out that crafts had a larger economic impact than tobacco and all agriculture in all western North Carolina.

Upon inquiry of Councilwoman Bellamy, City Manager Westbrook said that the cultural arts superintendent vacancy is on hold until the State decides on the reimbursements. Mr. Brinson noted that this person will be the liaison directly to the Public Art Board, the Urban Trail Committee and Festivals.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Field moved for the adoption of Resolution No. 01-140. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 451

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARINGS TO INITIALLY ZONE (1) ONE LOT IN THE EXTRATERRITORIAL JURISDICTION AREA KNOWN AS US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA AND (2) TWO LOTS IN THE EXTRATERRITORIAL JURISDICTION AREA KNOWN AS FAIRVIEW ROAD/US 74

ORDINANCE NO. 2841 - ORDINANCE TO INITIALLY ZONE ONE LOT IN THE EXTRATERRITORIAL JURISDICTION AREA KNOWN AS US 19-23/SARDIS ROAD/SAND HILL ROAD/BREVARD ROAD AREA

ORDINANCE NO. 2842 - ORDINANCE TO INITIALLY ZONE TWO LOTS IN THE EXTRATERRITORIAL JURISDICTION AREA KNOWN AS FAIRVIEW ROAD/US 74

Mayor Sitnick said that these lots were deferred from the August 14, 2001, City Council public hearings and only the three lots deferred will be considered at this meeting.

At 5:35 p.m., Mayor Sitnick said that this public hearing was opened on August 14, 2001, and continued until this date only to consider the one lot in the extraterritorial jurisdiction area (ETJ) known as US 19-23/Sardis Road/Sand Hill Road/Brevard Road area.

Urban Planner Paul Benson said that the single property in the US 19/23 area, owned by the BASF Corporation, PIN 9617-15-63-8026 (1,604.09 acres) contains Enka Lake and the now vacant Enka Lake Clubhouse and recreational facilities. The Planning and Zoning Commission has recommended Community Business II zoning along the frontage of the property on Sand Hill Road to a depth of 400' with the remainder of the property being zoned RM-16.

On August 14, 2001, City staff concurred with the recommendation of the Planning & Zoning Commission, with the exception of an approximately 5 acre area containing the clubhouse and recreational facilities for which the staff recommended Community Business I.

After the discussion on August 14, 2001, City staff has obtained information from the Daniel Boone Council of Boy Scouts of America regarding their proposed use. At this time, City staff is now recommending the majority of the property be zoned RM-16, with the approximately 5 acre tract containing the clubhouse and recreation facilities be zoned Community Business I, and Community Business II zoning along the frontage of the property on Sand Hill Road to a depth of 400'.

The Planning and Development staff recommends adoption of the ordinance establishing the initial zoning for PIN No. 9617-15-63-8026 to be RM-16, CB I and CB II.

Upon inquiry of Mayor Sitnick, City Attorney Oast said that this is not spot zoning.

Mayor Sitnick closed the public hearing at 5:38 p.m.

Mayor Sitnick said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2841. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 250

At 5:39 p.m., Mayor Sitnick said that this public hearing was opened on August 14, 2001, and continued until this date only to consider two lots in the extraterritorial jurisdiction area (ETJ) known as Fairview Road/US 74 area.

Urban Planner Paul Benson said that the Fairview Road parcels consist of two properties owned by Kitzi Bocook. The first lot, PIN No. 9667-10-26-7774, (1.05 acres) has been recommended by the Planning and Zoning Commission and the City staff for RS-4 zoning. Using topography maps and pictures, Mr. Benson said that this property is currently vacant and wooded. He explained in detail how the lot has a very steep average slope of 43%, rising from Gashes Creek, which separates the entire property from Highway 74. The owner has requested commercial zoning.

Mr. Benson explained that generally this type of slope within the existing zoning jurisdiction of the City would be zoned RS-2, in order to protect steep slopes. That is the primary motivation for our recommendation. Even though there is water and sewer available and it is on a five-lane highway with adequate capacity, because of the extreme steep slope on this property and on the adjacent properties, and the gateway preservation aspect of the ETJ extension, the recommendation to RS-4 remains. He said that in order to get a commercial development on this property, you would basically have to fill the creek area and grade a notch into the hill and he felt that was something the ETJ extension was designed to prevent.

Upon inquiry of Councilman Peterson, Mr. Benson said that the only road to service this property is from Charlotte Highway.

Councilwoman Field said that as steep as the property is, could you get four units per acre on it based on our hillside ordinance. Mr. Benson responded that this lot is entirely below the 2220 feet hillside ordinance criteria, but as to four units per acre, the developer would have to be creative because it would not be easy to do on this site.

With regard to the second lot, PIN No. 9667-10-46-2592 (15.02 acres) has been recommended for a split zoning with approximately 2.5 acres adjacent to Fairview Road being zoned Community Business 1, and the balance of the property (approximately 12-1/2 acres) being zoned RS-4. Additional research since the August 14, 2001, reveals that the property is vacant and wooded. Using topography maps, he explained in detail how the CB 1 portion has a moderate to steep slope of 14%, with the remainder being steeper, with an average slope of approximately 23%. The owner has requested that the RS-4 portion of the property be zoned for high-density multi-family development.

Mr. Benson said even though the site has water and sewer access along Fairview Road, slope is a concern. Because of the Blue Ridge Parkway viewshed issue, staff looked at parts of the site visible from the new visitor's center and identified the property that can be seen from those points. He noted that a substantial amount of the property, which is a ridge with a peak, is visible and in the winter a lot more of the ridge will be visible. For these reasons, staff is recommending zoning of PIN No. 9667-10-46-2592 to Community Business I for the portion adjacent to Fairview Road with RS-4 low density residential on the remaining portion of the property.

The Planning and Development staff recommends adoption of the ordinance establishing the initial to RS-4 and Community Business I District.

Mr. Benson said that Ms. Bocook has some plans for the property for development of her property and she has met with staff on several occasions. However, staff is not comfortable with the requested density of 17 units per acre that she is seeking for the upper portion of her property.

Planning & Development Director Scott Shuford said that the City is not necessarily opposed to some form of multi-family on this ridge, but as you can see, it is a sensitive site that demands a good site plan to make it work from the prospective of all parties involved. Unfortunately we've been unable to reach an agreement with Ms. Bocook because she feels a site specific type plan is not in her best interest in terms of marketing her property. So, we have not been able to come to any agreement, even though we have spent time with her over the past two weeks.

Mr. Benson then answered various questions/comments from Council, some being, but are not limited to: how does the hillside ordinance apply to this property; what is the elevation of the proposed visitor's center; what other mountain in that area is similar to the elevation of the Bocook's property; what is the density of the condominiums on Town Mountain Road; is the Bocook property visible only from the visitor's center or the actual parkway; and has the Blue Ridge Parkway been working with Buncombe County for viewshed protections.

10

Ms. Sheila Gasperson, Land Resource Specialist representing the Blue Ridge Parkway, spoke about some of the viewshed analysis they have been doing. The Bocook's property is in full view of the Blue Ridge Parkway Headquarters and is a forested ridge, running parallel to the Parkway at eye level from the Visitor Center site and lower parking lot where visitors park and prepare for hikes on the Mountains-to-Sea Trail. The property is a dominant foreground ridge and less than 1/4 mile away from the proposed visitor center site. Landscape architects say that textures and individual plant species can be identified by the naked eye usually out to about 1/2 mile away. In October of 2000 an Asheville Scenic Quality Assessment Team drove the parkway and views were rated. The Bocook's view scored 11 of 18 points rating the scene high in vividness, intactness and duration. Ms. Bocook has plans that show for an intensely developed apartment complex on that site. If allowed to be constructed, the results will be a nearly completely denuded site. The Blue Ridge Parkway understands Ms. Bocook's desire for a zoning classification that allows her to market her land for maximum profit, however, they disagree with this kind of use on a steep hillside. They believe the best use for this site is one that keeps the original forest cover intact in order to minimize slope destabilization and prevent landslides and erosion. A single family residence, carefully sited with gravel roads, is the best choice considering the environmental limits. Visitors come to western North Carolina to bask in nature's glory and to gaze upwards to the mountains that loom over the valley floor – not to see new construction. The Blue Ridge Parkway originally asked the Planning & Zoning Commission to zone the Bocook property RS-2. However, after several discussions with Planning staff, the Parkway now supports the Planning staff's recommendation to zone the 10.55 acres on the upper slope and ridgeline RS-4 and to zone the 3.33 acres on the lower slope along US 74 Community Business I. They asked City Council to direct the Planning staff to provide the Blue Ridge Parkway the opportunity to review and comment on all proposed development plans for the Bocook land.

Mr. Brett Bocook, son of Ms. Kitzi Bocook, developer working on this project, and real estate attorney, said that he has invested a substantial amount of money in soft costs into marketing this property and he felt it was unfair to pit a state funded agency against a small family and single mother. He said that while they have been dealing with an illness in his family, the Parkway has used their time to attempt to justify the inherent inverse condemnation that is occurring on their property. His grandfather purchased this property in the 1920s before the Parkway existed. They have been working for the past five years to market the property to either sell it and/or develop it to meet financial obligations. Because of a cloud on the title that occurred from the highway construction, they have been obstructed to market this land. He felt there is an unbalanced fight against their own property rights. He said the issue with the viewshed did not occur until approximately six months ago when his mother went to the Parkway, under good faith negotiations, and met with Parkway representatives to explain that there was a potential view issue with the Parkway and suggested to the Parkway that they might want to purchase the property in order to preserve the integrity of that view. That was not meant to be used against them. They were trying to give the Parkway the opportunity to purchase the property and now they are using that against them and are attempting to put political pressure on City Council to down-zone their property. After the Planning & Zoning Commission hearing was closed, he said a letter dated July 5, 2001, from the Parkway was taken into account in the Commission's decision-making process. He stressed that they did not have an opportunity to respond to that letter. That is cause for this complete turn around by the Planning staff to support the down-zoning of this property. They were originally recommended to have RM-16 on a large portion of their property and now being told it should only be used for RS-4. This is the only site in the area that is actually being developed for multi-family over the last three years. He asked City Council to take into account their desire to work with the Parkway and their attempt to sell the Parkway the property at market value. There is no reason why the Parkway should be able to essentially take the property without justifying the compensation to the landowner. He also asked Council to take into consideration that there is tremendous devaluation of property (70%) in proportion to the amount of units that are proposed on the property. He felt it was critical that they get multi-family zoning on this property. He said their initial plan was 18 units per acre but they would be willing to compromise on 12 units per acre.

Ms. Kitzi Bocook, property owner, said that she is requesting Highway Business District for PIN No. 9667.10-26-7774 (1-1/2 acres). She showed Council various renderings for possible use on that property. She said if this lot is zoned residential, it will effectively have no value whatsoever.

With regard to the larger lot (PIN No. 9667.10-46-2592), Ms. Bocook said they are willing to compromise from their original 18 units per acre to 12 units per acre on average. As a result of prior meetings with Mr. Shuford, she felt they agreed that this property meets a lot of the criteria for higher density - either housing or offices. The RM-16 designation was what was originally recommended as a viable use for that property. She explained that there is sparse single family residences down the road because it's mainly multiple housing or mixed housing. She reiterated that she approached the Parkway about purchasing her land about a year ago. She explained about the costly illness in her family and that she needed to get full value out of her land. She said she was not in a position to donate the land, but she did indicate that she would consider reducing the price somewhat and making personally contribution (approximately $50,000) to the cause. She even explained that she would divide her property and sell it for less if she had to. The Parkway was unable to purchase the land because it was not contiguous to the Parkway property. According to case law, she said that one person should not be required to bear the entire financial burden of the public interest. She feels that she will be losing $200,000 in value with the current staff recommendation. She argued that the process used, from RM-16 to then RM-8 and then subsequent to the Parkway viewshed issue to RS-4, was not right.

Upon inquiry of Councilman Hay, Mr. Bocook said that in all fairness, they are not getting what they want and the Parkway should not get what they want. Again, he said they planned an 18-unit complex on the site, however, they would compromise to 12-units per acre. Councilman Hay explained that the City does not have that zoning designation – either RM-16 or RM-8.

City Attorney Oast cautioned City Council that they need to make a decision on what is the best land use designation and what zone is most appropriate for the property. There will be opportunities at a later time for approval of site specific development plans or a conditional use permit.

Councilwoman Bellamy suggested an RM-8 designation and still preserve some of the mountainside and viewshed.

Mr. Bocook said they would be willing to compromise with RM-8, which would preserve the value. There would still be a substantial cut, but they could at least market the property and/or develop it with a conditional use permit. However, as a real estate person, they will not be able to get the value out of the property if someone has to buy it contingent upon rezoning at a later time.

There was discussion about the hillside ordinance regulations and how they would be applied to this property.

Mr. Shuford said that one of the staff's proposals that the Planning & Zoning Commission didn't accept was to go up to the 2220 line with RM-16 and then an RS-4 above. Again, staff's position has been that they understand the Bocook's circumstances, but they feel this is one of those cases where a lower density zoning would be appropriate until they have a more fully articulated development plan that would address some of the issues raised at this meeting.

Upon inquiry of Councilman Worley, Mr. Shuford said that staff's initial recommendation for the property was RS-4. After hearing comments at the first Planning & Zoning public hearing, staff re-examined several parcels, including this one, and then came back with a recommendation of RM-16 south of the 2220 line and an RS-4 above it – reflecting the fact that it's a fairly steep sight. At the next Planning & Zoning Commission hearing, the Commissioners heard that recommendation and heard from Ms. Bocook about the possibility of some commercial development near the road, and came up with the compromise of CBI and RS-4.

Councilman Worley asked if the property was zoned RS-4, does it still lend itself to a planned unit development (PUD) project that could increase that density. Mr. Shuford said that either a conditional use zoning or a PUD zoning would come closer to allowing a lot of these issues to be addressed. That has been discussed with the Bocooks but they feel that limits their ability to market the property. They want a straight zoning of the property. However, given the sensitivity of this particular site, both from the slope and view issues, it's difficult for staff to make that recommendation to City Council. That's not to say that an extremely well designed high density multi-family project couldn't perhaps work, at least over a portion of the site. He explained how the PUD would allow the Bocook's to recoup the full RS-4 zoning, plus the opportunity with a quality design, to increase that. He said the PUD does supercede the hillside development regulations.

Mayor Sitnick closed the public hearing at 7:10 p.m.

After discussion, Vice-Mayor Cloninger moved to adopt Ordinance No. 2842 which is the recommendation of the Planning staff and rezone PIN No. 9667-10-26-7774 (1.05 acres) RS-4 and split zone PIN No. 9667-10-46-2592 (15.02 acres) with approximately 2.5 acres adjacent to Fairview Road being zoned Community Business 1 and the balance of the property (approximately 12-1/2 acres) being zoned RS-4. This motion was seconded by Councilman Peterson.

Councilman Worley moved to amend the motion (with regard to the 15.02 acre lot) to rezone approximately 2.5 acres adjacent to Fairview Road Community Business I, from the Community Business I zone up to the 2220 contour line RM-16, and above the 2220 contour line RS-4. This motion was seconded by Councilwoman Bellamy. Said amendment to the motion was defeated on a 3-4 vote, with Mayor Sitnick, Vice-Mayor Cloninger, Councilman Hay and Councilman Peterson voting "no".

Councilman Worley moved to amend the motion (with regard to the 15.02 acre lot) to rezone approximately 2.5 acres adjacent to Fairview Road Community Business I, from the Community Business I zone up to the 2220 contour line RM-8, and above the 2220 contour line RS-4. This motion was seconded by Councilwoman Bellamy. Said amendment to the motion passed on a 5-2 vote, with Vice-Mayor Cloninger and Councilman Peterson voting "no".

The main motion, as amended, carried on a 4-3 vote, with Vice-Mayor Cloninger, Councilwoman Field and Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 - PAGE 252

At 7:38 p.m., Mayor Sitnick announced a ten minute break.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE REQUIREMENT FOR CITY COUNCIL TO SET PUBLIC HEARINGS

13

ORDINANCE NO. 2843 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO DELETE THE REQUIREMENT FOR CITY COUNCIL TO SET PUBLIC HEARINGS

Mayor Sitnick opened the public hearing at 7:50 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to delete the requirement for City Council to set date for public hearings. This public hearing was advertised on August 17 and 24, 2001.

The proposed ordinance amendment would delete the requirement for City Council to set the date for public hearings for review of development proposals, including Level 3 site plan projects, Planned Unit Developments, and conditional uses. Under the current ordinance, City Council must take action at a formal Council meeting to approve (set) the date for a public hearing after that date has been scheduled by the City Clerk. The requirement for Council to officially set the date for the public hearing prolongs the review process by at least two (2) weeks. A public hearing before City Council would still be required under the proposed wording amendment, but the Council would not have to take official action to approve the date scheduled for the public hearing. The change in procedure proposed by the ordinance amendment would result in a more efficient process for all involved -- the applicants, the City Council, the City staff, and the general public. The proposed ordinance amendment would help streamline the development review process by removing an unnecessary step. No individual or organization involved in the development review process will be adversely impacted by the simplification of the development review process proposed in the draft ordinance amendment. Staff will keep you informed of these projects and requests by providing you with a memorandum detailing the project or request and providing location and development intensity specifics at least two weeks prior to your consideration of the case.

At their July 11, 2001, meeting, the Asheville Planning and Zoning Commission voted 7-0 to recommend approval of the wording amendment eliminating the requirement that City Council formally set the public hearing date for review of certain development projects. The Planning and Development staff recommends approval of the wording amendment.

Upon inquiry of Councilwoman Bellamy, Mr. Green said that all advertising is the same -- the only difference is the deletion from the Consent Agenda of the actual setting of the public hearing date.

Councilman Peterson could not support this amendment because announcing it on the Consent Agenda does help give the public notice about what is coming up in two weeks. He understands that the legal advertising process will not change, but not many people follow the legal ads. He doesn't think this slows things down so much that it would create a problem.

Councilman Worley suggested the public hearings be included in our CityWorks ad in order to get enough notice out.

Councilman Hay suggested including an informal note at the bottom of the agendas what public hearings will be taking place at the next formal meeting.

Mayor Sitnick wanted to make sure that the public is made aware of the public hearings far enough in advance of the actual date in order to arrange their schedules. She said that if this process does not work, that City Council should be willing to reconsider the amendment.

Mayor Sitnick closed the public hearing at 8:07 p.m.

14

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2843. This motion was seconded by Councilman Worley and carried on a 6-1 vote, with Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 - PAGE 254

C. PUBLIC HEARING RELATIVE TO REZONING 350 SHORT MICHIGAN AVENUE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

ORDINANCE NO. 2844 - ORDINANCE REZONING 350 SHORT MICHIGAN AVENUE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT

Mayor Sitnick opened the public hearing at 8:08 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to rezone property located at 350 Short Michigan Avenue from RM-16 Residential Multi-Family High Density District to Neighborhood Business District. This public hearing was advertised on August 17 and 24, 2001.

The City has received a rezoning petition requesting the rezoning of property located at 350 Short Michigan Avenue (PIN 9638.19-60-0368) from RM-16 Residential Multi-Family High Density District to Neighborhood Business District. The 0.48 acre tract is located on Short Michigan Avenue approximately 100 feet from Amboy Road. It is bounded to the south by River District zoning and all other sides by RM-16 zoning. The location of the lot at the entrance to the residential neighborhood provides a good opportunity for the use(s) on the lot to serve as a transition from the high intensity uses permitted in the River District to the surrounding residential uses. The Neighborhood Business District, which reserves areas for low-intensity businesses accessible to pedestrians from the surrounding neighborhood, is designed to be located in or adjacent to residential neighborhoods. Structure size standards and limitations on permitted uses in the Neighborhood Business District are designed to minimize conflict with adjacent residential uses.

Staff has received no comments in opposition to the requested rezoning.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the rezoning of the property located at 350 Short Michigan Avenue from RM-16 to NB. The Planning and Development staff recommends approval of the requested rezoning.

When Councilwoman Field expressed concern that a multi-family zone is being rezoned, Mr. Green said that Neighborhood Business does have an incentive for providing residential development.

Mayor Sitnick closed the public hearing at 8:11 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2844. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 257

D. PUBLIC HEARING RELATIVE TO REZONING 100-120 COXE AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 2845 - ORDINANCE REZONING 100-120 COXE AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

At the request of Vice-Mayor Cloninger, Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Mayor Sitnick opened the public hearing at 8:12 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to rezone property located at 100 and 120 Coxe Avenue (plus a vacant lot to the south) from RB Regional Business District to Central Business District. This public hearing was advertised on August 17 and 24, 2001.

The City has received a rezoning petition requesting the rezoning of property located at 100 and 120 Coxe Avenue, and a vacant lot to the south (PIN Nos. 9648.06-3540, 3620, 3750 and 3851), from Regional Business District to Central Business District. The parcels, which have a total size of 1.18 acres, are located on the east side of Coxe Avenue just south of Hilliard Avenue. The property at 100 Coxe Avenue is known as the Sawyer Motor Building. Central Business District zoning abuts the property to the north; it is bounded by Regional Business District zoning on all other sides. The requested CBD zoning would permit development of the area in a more intense manner, similar to the historic development pattern of the area. Although the rezoning will result in a finger of CBD zoning extending south of Hilliard Avenue, this unusual zoning pattern will be corrected by the proposed extension of the CBD to the southslope area. The proposed extension of the CBD is scheduled to be brought to Council by November after a public meeting and consideration by the Downtown Commission and Planning and Zoning Commission.

Staff has received no comments in opposition to the requested rezoning.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the rezoning of the property located at 100 and 120 Coxe Avenue, plus the vacant lot to the south be rezoned from RB to CBD. The Planning and Development staff recommends approval of the requested rezoning.

Mayor Sitnick closed the public hearing at 8:17 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Field moved for the adoption of Ordinance No. 2845. This motion was seconded by Councilman Hay and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 259

IV. UNFINISHED BUSINESS:

16

V. NEW BUSINESS:

A. PARKING STUDY UPDATE

Traffic Engineer Michael Moule and Finance Bill Schaefer gave a detailed status report on the progress of the Parking Study implementation. They reviewed the implementation methodology; Finance Department issues; parking deck initiatives; Civic Center, Wall Street and Rankin Avenue garage uses; off-street initiatives; net income; new directional signs to parking; new color-coordinated banners; new parking opportunities and designs; pedestrian and bicycle issues; and transportation issues.

Council made suggestions to staff, some being, but are not limited to: adding instructions on how to use the new parking meters in the next printing of the Parking Guide; lighted sign outside of decks when they are full; request on Eagle Street for an additional loading zone; and need to contact the N. C. Dept. of Transportation to paint and clean up the McDowell Street Tunnel.

It was the consensus of City Council to instruct staff to continue implementing the Parking Study.

B. RESOLUTION NO. 01-141 - RESOLUTION AMENDING CITY COUNCIL RULES AND PROCEDURES TO ALLOW PUBLIC HEARINGS TO BE SET ADMINISTRATIVELY

City Attorney Oast said that this is the consideration of a resolution amending the rules of procedure for City Council.

The a proposed amendment to Rule 27 of Council's Rules of Procedure, to specify that the requirement that public hearings be set by special order of Council does not apply to zoning items for which a public hearing is required by law. This amendment is necessary to conform Council's rules to the amendment to the UDO that Council will have considered previously. Reference to that Staff Report is hereby made for a more complete description of the action being proposed.

Assuming that the UDO amendment is adopted, adoption of the resolution is recommended.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Hay moved for the adoption of Resolution No. 01-141. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 452

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of August 10-16, 2001: Brunner & Lay (Water), Montgomery Ins. (Traffic Operations), Tim Welsh (Streets) and Josephine Holloway (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Comments by Margaret Shook

Ms. Margaret Shook, 709 Crowfields Lane, urged City Council to amend the stormwater ordinance for a 100-year storm in particular as it relates to flooding in the Hendersonville Road area. She also asked Council to contact the N. C. Dept. of Transportation and request them to provide its share of the responsibility for long-term storm-sewer management and planning with its contiguous road improvements.

Councilman Peterson said that it was his understanding that the City Engineer will be briefing City Council on stormwater issues at an upcoming worksession.

Banners

Mayor Sitnick said that she has received a letter from Kelly Martin from the Conventions and Visitors Bureau asking City Council to consider paying for a few banners that have the words "We're Glad You're Here." These banners can be used for not only the N. C. League of Municipalities Convention coming to Asheville in October, but for other events as well.

It was the consensus of City Council to instruct the City Manager to contact Mr. Kelly and find out how many banners and how much financial participation they are requesting from the City.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9:10 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – September 4, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

ASHEVILLE SYMPHONY

Dr. Robert Hart Baker, Music Director and Conductor of the Asheville Symphony Orchestra, gave a brief history on the Asheville Symphony which has been in existence since 1960. Currently the Asheville Symphony operates on a budget in excess of $1 Million, employing an 80-100 member orchestra paid on a per-service basis and presents concerts featuring nationally renowned as well as local guest artists. The Symphony presents six Masterworks concerts, a Holiday Pops, a May Pops, a free Children's Concert and a joint production with the Asheville Lyric Opera Company. With regard to education, Dr. Baker explained that the Asheville Symphony management administers the Strings-in-the-Schools educational program in the Asheville City and Buncombe County schools, employing six teachers who work with 250 students. The string instruments include violin, viola, cells and bass.

On behalf of City Council, Mayor Sitnick thanked Dr. Baker and recognized the importance the Asheville Symphony is to Asheville's economic development.

ASHEVILLE-BUNCOMBE VISION DIALOGUES

Mr. Joe McGuire explained that the goal of Asheville-Buncombe VISION Inc. is (1) to encourage discussion among diverse residents in order to promote understanding of how local issues affect different segments of our community and (2) to encourage citizens to collaborate on efforts that benefit the whole community. This year's topic, "How can our community create and support good jobs with good wages?", relates well to the VISION's current focus on economic development and the goal of increasing Buncombe County's per capita income. The jobs and wages topic also received the 2nd highest number of votes during last year's dialogue topic public vote and, with the current economic uncertainty and the upcoming local elections, promises to engage a diverse group of citizens in dialogue. All groups will be talking about this same topic.

Mayor Sitnick thought the topic should read "How can our community create and support more good jobs with more good wages." She also hoped that they would consider discussing, in part, the North American Free Trade Agreement and how it impacts the American worker. Also, she suggested discussion on what the national minimum wage impact has been on the inability for certain sectors to be self-sufficient. Also, they should focus on a living wage and exactly what that means and how it impacts the labor market.

UDO AMENDMENT REVIEWS

Conditional Use Permit Standards for Approval

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which are scheduled on September 25, 2001. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise the findings for conditional uses.

The proposed ordinance amendment would revise two of the seven findings that must be made in order for City Council to grant a Conditional Use Permit. The findings currently in the ordinance are based upon wording found in enabling legislation and in ordinances across the state. While these findings are generally adequate to assess the impacts of proposed uses identified as conditional uses, some refinement is needed to assure that the findings address Asheville's unique conditions and meet the goals of the City.

One issue that has been identified during the review of Conditional Use Permit requests is how the proposed project would impact the natural and topographic features of the site. A proposed revision to finding # 2 would delete the need to find that the proposed use is reasonably necessary for the public health or general welfare. This finding would be revised to require the use or development to be reasonably compatible with significant natural and topographic features on and in the vicinity of the site. The proposed revision would reinforce the concern for protecting and maintaining the natural and topographic features that help define the character of the City of Asheville.

The findings currently address the need for the proposed use or development to conform with the City's comprehensive plan. However, there is no requirement that the use or development conform with the City's smart growth policies or sustainable economic development strategic plan. A proposed revision to finding # 5 identifies these policies and plans, noting that the use or development should comply with them.

The proposed revisions provide clear guidance for applicants in preparing applications for Conditional Use Permits and for the City Council in reviewing the requests. With the proposed revisions, the importance of preserving the City's natural and topographic features is made clear. In addition, the role of the City's smart growth policies and sustainable economic development strategic plan in guiding development is reinforced.

At their July 11, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the wording amendment revising the findings for conditional uses. The Planning and Development staff recommends approval of the wording amendment.

Discussion occurred with regard to Finding #2 and the result was that Mr. Green would review the issues raised by Council and come back to them with an update at the September 18, 2001, worksession.

Establishment of New Urban Village Zoning District

Planning & Development Director Scott Shuford said that this is consideration of an ordinance to amend the Unified Development Ordinance (UDO) by adding the Urban Village Zoning District.

As part of City Council's Smart Growth initiative, staff has developed a new zoning district of Urban Village. Staff is expediting its review because there are two property owners who wish to have it applied to their property. The two projects where this new zoning district may be initially applied are the Biltmore Park Town Center, currently under construction, and the former Gerber site.

In preparing this ordinance, staff enlisted a focus group of local design professionals, Smart Growth advocates, and a Planning and Zoning Commissioner to review the original draft ordinance and provide comments.

20

The Urban Village District is generally intended to be used at the request of a property owner rather than being unilaterally applied to a site by the City. It is a large site zoning district, with a minimum initial property size of 10 acres. Its application will likely be limited to fairly level sites rather hillsides due to the requirement that the developer create an internal network of streets forming a series of blocks, however, a creative designer may be able to adapt it to a hilly situation.

This internal street network is the key to the Urban Village zoning district. The street network will shape the form that the development takes by providing a series of blocks that organize how the buildings are arranged, provide a place for on-street parking, and create a public sphere for community interaction. Off-street parking generally must be shielded from the street by buildings and incentives are provided for the use of structured parking. In effect, the district's requirements for an internal street system, on-street parking, and building setbacks create a small-scale replica of a traditional downtown.

As in a traditional downtown, there is considerable leeway given to the developer regarding building height (the district calls for most structures to be in a range from two to four stories, but some buildings can be single story and others can be as tall as eight stories), residential density (no formal density limits -- the building size and placement will ultimately determine the number of units that can be placed in an Urban Village), on-street parking (the ability to count this parking toward the total parking required for the development), and development review (projects within an Urban Village are considered Level II projects for review purposes). In exchange for this flexibility, the developer must work within the provisions of the ordinance regarding site design and provide a traffic impact analysis.

The Planning and Zoning Commission voted unanimously to recommend adoption of the ordinance amendment. The Planning and Development Department staff supports the ordinance amendment.

Discussion surrounded enforcement of the Master Plan, how much flexibility there will be in the Master Plan once approval is granted, and will major deviations from the Master Plan come back to City Council for a re-review. As a result of this discussion, Mr. Shuford said he would review the issues raised by Council and come back to them with an update at the September 18, 2001, worksession.

Suggestions and concerns raised by Councilwoman Field will also be addressed at the September 18, 2001, worksession.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearings on September 25, 2001.

RESOLUTION NO. 01-142 - RESOLUTION AUTHORIZING THE PURCHASING DIRECTOR TO SELL SURPLUS MOTOR VEHICLES, OFF-ROAD EQUIPMENT AND OTHER SURPLUS PROPERTY AT PUBLIC AUCTION

Purchasing Director Norwood Dunn said that this is the consideration of a resolution authorizing the Purchasing Director to dispose of City-owned personal property by public auction.

The resolution authorizes the City's Purchasing Division to hold a public auction to dispose of motor vehicles, off-road equipment, and other miscellaneous property declared as surplus by various City departments. The auction is to be held Saturday, October 6, 2001, at 10:00 a.m. in the Public Works Complex, 161 S. Charlotte Street, Asheville, N.C.

City staff recommends City Council adopt the resolution.

Due to the next formal meeting of September 11, 2001, being cancelled, Councilman Hay moved to waive the rules and take formal action at this meeting. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

Councilman Hay moved to adopt Resolution No. 01-142. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 453

BOARDS AND COMMISSIONS

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Sherry Fitzpatrick and to appoint Mary Robertson to the ADA Compliance Committee.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Gene Bell as Chair to the Civil Service Board.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Edward Metz, Gail McCarthy, Ken Fulford, Hunt Mallett, Laura Webb and Robert Camille, and to appoint Marvin Slosman to the River District Design Review Committee. In addition, City Council instructed the City Clerk to include the possible expansion of two neighborhood representatives on the River District Design Review Committee on the Boards and Commissions next meeting agenda.

It was the consensus of City Council to instruct the City Clerk to re-advertise for vacancies on the Taxicab Advisory Board.

It was the consensus of City Council to wait until after the election (with no further advertisement) to make a decision with regard to the position currently being held by Tommy Sellers.

When Councilman Peterson suggested a bullet-type list of priorities City Council wants to come out of the renegotiation of the 1994 Water Agreement, Mayor Sitnick assured him that they are working on that. Along those lines, Councilwoman Bellamy felt that for some of the major boards should have a list of priorities as well. She agreed to make a list of the boards and commissions for City Council consideration.

Vice-Mayor Cloninger announced the Bill Moore has resigned from the Airport Authority and instructed the City Clerk to place that vacancy on the next quarterly appointment process.

OTHER BUSINESS

There was a brief discussion about the pole banners requested by the Convention and Visitors Bureau. The 25 pole banners for the "We're Glad You're Here" campaign would cost approximately $4,000. City Manager Westbrook said that he would like to make a modification on the banner to include the City of Asheville logo, not the Chamber of Commerce's logo. Therefore, it was the consensus of City Council to authorize the City Manager to spend up to $4,000 out of contingency with the understanding that he will negotiate the best deal he can with the Convention and Visitors Bureau to possibly half the cost with them.

22

Mayor Sitnick explained that not all funds needed for the green building roundtable on October 26, 2001, have been received. Upon her request, it was the consensus of City Council to authorize the City Manager to spend up to $2,000 out of contingency, if necessary.

CLOSED SESSION

At 5:07 p.m., Councilman Hay moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Buncombe County, Henderson County, Regional Water Authority and City of Asheville – G.S. 143-318.11 (a) (3). This motion was seconded by Councilwoman Field and carried unanimously.

At 5:30 p.m., Councilman Worley moved to come out of closed session. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 5:30 p.m.

Magdalen Burleson

Leni Sitnick
MAYOR

Tuesday – September 18, 2001 - 3:00 p.m.

Worksession

Present: Vice Mayor M. Charles Cloninger, , Presiding; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Leni Sitnick

RESOLUTION NO. 01-143 - RESOLUTION CONDEMNING TERRORIST ATTACK AND SUPPORTING THE PRESIDENT OF THE UNITED STATES

Vice-Mayor Cloninger read the following resolution condemning terrorist attack on September 11, 2001, and supporting the President of the United States: "On September 11, 2001, the United States was suddenly and brutally attacked by foreign terrorists. These terrorists hijacked and destroyed four civilian aircraft, crashing two of them into towers of the World Trade Center in New York City, and a third into the Pentagon outside Washington, D. C. Thousands of innocent Americans were killed and injured as a result of these attacks, including the passengers and crew of the four aircraft, workers in the World Trade Center and in the Pentagon, rescue workers, and bystanders. These cowardly acts were by far the deadliest terrorist attacks ever launched against the United States, and by targeting symbols of American strength and success, clearly were intended to intimidate our nation and weaken its resolve. These horrific events have affected all Americans. It is important that we carry on with the regular activities of our lives. Terrorism cannot be allowed to break the spirit of the American people, and the best way to show these cowards that they have truly failed is for the people of the United States to stand tall and proud. Now, therefore, (1) The Asheville City Council condemns the cowardly and deadly actions of these terrorists; (2) That the Asheville City Council supports the President of the United States as he works with his national security team to defend against additional attacks, and find the perpetrators to bring them to justice; and (3) That the Asheville City Council recommends to its citizens to support relief efforts by giving blood at the nearest available blood donation center."

Councilman Worley moved to suspend the rules and take formal action at this meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Thirteen individuals spoke with some comments expressed as follows: the word "cowardly" should be removed from the resolution, need for dialogue, discourage acts of retribution, support for President should be conditional, public hearing should be held, and others were in the World Trade Center other than Americans.

After hearing comments and suggestions from the public and after discussion by Council, Councilman Worley moved to adopt the amended resolution as follows : "On September 11, 2001, the United States was suddenly and brutally attacked by foreign terrorists. These terrorists hijacked and destroyed four civilian aircraft, crashing two of them into towers of the World Trade Center in New York City, and a third into the Pentagon outside Washington, D. C. Many innocent people, including thousands of Americans, were killed and injured as a result of these attacks, including the passengers and crew of the four aircraft, workers in the World Trade Center and in the Pentagon, rescue workers, and bystanders. These unprovoked acts were by far the deadliest terrorist attacks ever launched against the United States, and by targeting symbols of American strength and success, clearly were intended to intimidate our nation and weaken its resolve. These horrific events have affected all Americans, it is important that we carry on with the regular activities of our lives, terrorism cannot be allowed to break the spirit of the American people, and the best way to show the perpetrators that they have truly failed is for the people of the United States to stand tall and proud. Now, therefore, (1) The Asheville City Council condemns the unprovoked and deadly actions of these terrorists; (2) The Asheville City Council supports the President of the United States as he works with his national security team to defend against additional attacks, and find the perpetrators to bring them to justice; (3) The Asheville City Council recommends to its citizens to support relief efforts and, as necessary, to give blood at the nearest available blood donation center; and (4) The Asheville City Council encourages dialog among all people, and discourages acts of retribution against any person based on ethnicity or religious belief." This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 455

CONSENT AGENDA:

Budget Amendment for Water 35 Fund

Summary: The consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect funding for a $3 million State Grant for Critical Needs Phase III Water System Improvements.

The Authority has been awarded a $3 million grant from the State of North Carolina for critically needed water system improvements including areas with undersized lines, low pressure problems, and frequent water interruptions. This is the third year in a row that the Authority has received a grant from the State. They were one of the few water systems fortunate enough to receive a $3 million grant in 1999, a $2 million grant in 2000, and a $3 million grant this year. The combined $8 million will go a long way to help fund the replacement of our aging water system and improve service to locations most in need.

The following improvement projects have been identified as critical needs and will be funded with this grant: North Bear Creek Road, Deavermont Circle, Starnes Cove Road, Old Oak Hill Road, Town Mountain Road/Peach Knob Reservoir, Reed Road, US 70 East (Grovemont), Bull Mountain Road, Burgins Chapel Road, Old Buckeye Cove Road, Flint and Ocala Streets, Short Shiloh Road, June Sayles Road, Vista Street, Allen Avenue, Galax and Holly Streets, Dale and Courtney Streets, Branning Street, Millbrook Road, Worley Place, and Sunrise Drive. Most of these are very old two-inch water lines that need to be upgraded to six inch or larger lines. Construction is tentatively scheduled to start in Spring 2002.

Staff recommends approval of the budget amendment to the 35 Fund.

Intent to Close Cherry Street from Marigold Street to Shiloh Road and Setting a Public Hearing on October 23, 2001

Summary: The consideration of a resolution of intent to close the unopened right-of-way known as Cherry Street and setting a public hearing for October 23, 2001.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process, Matney and Associates Law Firm, on behalf of M Realty Limited Partnership, has requested to close Cherry Street.

Public Works Department staff has determined that the right-of-way known as Cherry Street, beginning at Shiloh Road, and ending at the Marigold Street, as shown on Plat Book 6 at Page 137, is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution of intent to close the unopened right-of-way known as Cherry Street and to set the public hearing for October 23, 2001.

Appropriation of Fiscal Year 2001 Fair Housing Assistance Program Grant

Summary: The consideration of a budget amendment, in the amount of $50,800, for the Fair Housing Assistance Program (FHAP) for Fiscal Year 2001-02.

The City has been carrying out its Fair Housing Program under contract with the Asheville-Buncombe Community Relations Council (ABCRC) and Fair Housing Commission since January 1988, using HUD FHAP funds. The City's Community Development Division serves as Lead Entity and monitors the program.

In August 2001 we received notification of the grant awarded to the City for the current federal fiscal year of 10/1/00-9/30/01. This notification required the City to draw down the funds no later than September 15, 2001. Staff has submitted the necessary paperwork to HUD. It is characteristic of this grant program that we receive notification of the grant amount near the end of the program year.

A budget ordinance is required in order to receive these funds and subgrant them to ABCRC.

Community Development staff recommends adoption of the ordinance.

Budget Amendment from N.C. Dept. of Environment & Natural Resources for Computer Equipment and Training

Summary: The consideration of a budget amendment, in the amount of $25,000, to receive grant money from the N. C. Dept. of Environment & Natural Resources (NCDENR) for computer equipment and training.

The City of Asheville Engineering Department requested $25,000 from NCDENR for training and computer equipment. Staff was successful in obtaining those funds. We received money to purchase five laptop computers and provide training for staff and contractors.

The computers and training will improve the City of Asheville Erosion and Sediment Control Program.

City staff recommends City Council approve the budget amendment to receive grant money from the NCDENR.

Contract for Improvements on W. T. Weaver Boulevard

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Precision Contracting, Inc. in the amount of $635,465 for the greenway and roadway improvements on W.T. Weaver Boulevard.

City of Asheville requested bids for the construction of a new greenway and roadway improvements to W.T. Weaver Boulevard. Three bids were received on August 30, 2001. The bids were as follows:

☐ Precision Contracting	$635,465.00
☐ Carolina Mountain Construction	$868,227.00
☐ Taylor and Murphy Construction	$1,155,476.75

After reviewing the bids, staff recommends that the project be awarded to Precision Contracting in the amount of $635,465. The Engineer's estimate for this project was $600,000.

The City will receive a grant from the N. C. Dept. of Transportation, in the amount of $195,465, for the cost of the greenway. The roadway portion of the project ($440,000) is currently budgeted in the City budget.

Precision Contracting is a Certified Minority contractor and met the minority bidding requirements.

City staff recommends City Council authorize the City Manager to execute a contract with Precision Contracting, Inc.

Encroachment Agreement on West Haywood Street

Summary: The consideration of a resolution authorizing an encroachment agreement at 401 West Haywood Street.

The owners of property at 401 West Haywood Street in the Chicken Hill neighborhood recently learned, through a survey, that the house on the property encroaches slightly on the City's right-of-way along West Haywood Street. This encroachment has existed since the house was built, many years ago. The encroachment is minimal, and does not extend into the paved portion of the right-of-way, but stops about 6-8 feet short of the pavement. The encroachment does not interfere with the use of the right-of-way.

The owners are trying to clear up this title issue in order to obtain financing for renovation of the house.

If Council agrees that the encroachment should be permitted, adoption of the resolution is recommended.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

AZALEA ROAD PARK

Director of Parks and Recreation Irby Brinson said that this is the consideration of a resolution approving the master plan for Azalea Road Park.

In January, 2001, City Council approved the purchase of 155 acres of property on Azalea Road for the development of a park. The City continued its agreement with Woolpert LLP to enter into the next phase of the contract which included the development of a master plan for the park.

Mr. Gary Stewart, representative from Woolpert LLP, said that a Steering Committee was formed as part of this master plan process which included members of adjacent neighborhoods, potential user groups, and other agencies such as Buncombe County Recreation Services and Blue Ridge Parkway. The process for developing the master plan included two public input sessions and three Steering Committee meetings with Woolpert. A consensus-building process was used to develop the master plan that included ideas generated by the public, Steering Committee, and staff for elements to be included in the park.

Mr. Stewart said the following sources were used in the program analysis: Asheville Parks 2015 Comprehensive Master Plan, Asheville Greenways Master Plan, recreation providers/City staff, the Steering Committee and the general public. He reviewed with Council the different facilities with high and moderate percentage of approval. Two alternative concepts were developed and evaluated.

Final recommended recreational facilities included: soccer complex (both youth and adult); multi-field complex (youth baseball, girls softball and multi-purpose field); disc golf; meeting/retreat center; outdoor amphitheater (350) day-use only; picnic areas/shelters (throughout the park); volleyball, horseshoe, and playgrounds; fishing areas along the river and existing ponds; maintain open space throughout the park; Azalea Road to be closed; no vehicular access to Thomas Wolfe cabin; bikeway/greenway separate (can use same corridor); bikeway/greenway trails to be paved; bikeway to follow both Azalea Road and Swannanoa River; fitness trail – both moderate and extreme; interpretive trail – woods/river/wetlands; arts sculpture/ADA sensory trail; two pedestrian bridge connections; connection to Mountain to Sea Trail; connection to Recreation Park; and kayak launch/takeout areas.

It should be noted that this plan represents approximately a $16 million investment. The consultant and staff are quick to share that this plan will be developed in five phases over at least a 10 to 15 year period. Phase I recreation facility improvements include: two picnic shelters; one large playground; two observation decks; one kayak launch area; walkway trail; fitness trail; interpretive trail; two soccer fields with irrigation; bleacher areas; 205 parking spaces; one restroom/concession building; and one maintenance building with security lighting, security gates and water/sewer service.

Funding will be from a number of sources including a commitment from the Western North Carolina Soccer Foundation to develop and maintain the soccer facilities.

The Parks and Recreation Advisory Board and staff recommend City Council approve the master plan for Azalea Road Park.

Mr. Stewart answered several questions from Council, some being, but are not limited to, concerns expressed by the Steering Committee, phasing, the reasoning behind the recommendation to close Azalea Road, and are soccer fields open to the public.

Councilwoman Field urged the City Manager to come back quickly with a report on the beneficial fill site as the City is spending a large amount of money every day dumping in other places.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

UPDATE – Establishing a New Urban Village Zoning District

Planning & Development Director Scott Shuford reviewed with Council the changes they recommended at the September 4, 2001, worksession with regard to this Unified Development Ordinance amendment which is scheduled for public hearing on September 25, 2001.

Mr. Shuford addressed Councilman Peterson's concern about what would constitute increases in the overall development intensity to require the developer to bring back his revised master plan to City Council for review.

UPDATE – Revise Findings for Conditional Use Permits

Chief Planner Gerald Green reviewed with Council the changes they recommended at the September 4, 2001, worksession with regard to this Unified Development Ordinance amendment which is scheduled for public hearing on September 25, 2001.

Exempt Agricultural Uses from Zoning Regulation, Define Confined Animal Feeding Operation, Add Research and Technology Production as Permitted Use in Certain Business Districts and to Eliminate Level III Review of Industrial Uses

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which is scheduled on Wednesday, October 10, 2001. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to exempt agricultural uses from zoning regulation, to define confined animal feeding operation, to add research and technology production as a permitted use in certain business districts, and to eliminate level III site plan review of industrial uses.

The proposed ordinance amendment would make several small changes in the UDO in an effort to address several small issues that have been identified by the staff and the public. These changes, though minor, will make it easier to undertake a variety of business activities in the City of Asheville and its jurisdiction while protecting the public interest. The proposed changes and the impacts of each change are described below:

- Exemption of bona fide agricultural uses from zoning regulation. This amendment codifies the City's existing approach to regulation of bona fide agricultural uses. An agricultural use recognized as such for tax purposes would be exempt from all zoning regulations. In order to recognized as a bona fide agricultural use, the use would have to meet minimum acreage, income, and production standards. Confined animal feeding operations would not be exempt from zoning regulation.
- Confined animal feeding operations are defined as operations where the animal (or poultry) is confined inside a building for at least 60% of its life with waste products collected from the building and treated either on-site or off-site. Operations of this type can produce adverse environmental impacts and therefore would not be exempt from zoning regulation.
- Research and technology production uses are identified as permitted uses in several business districts. As our economy changes, we find that most high tech production activities do not create the type of adverse impacts typically associated with manufacturing and production activities. Research and technology production is often carried out in conjunction with retail operations. The proposed change would permit research and technology production uses in the Community Business II and higher intensity business districts, providing more opportunities for the location of businesses of this type.
- Elimination of the requirement that large industrial development projects be subject to the level III site plan review process. The level III site plan review process requires projects with potential community wide impacts to be reviewed and approved by City Council as conditional uses. Requirements already in place for industrial development projects would ensure that any impacts of these developments would be mitigated and industrial zones are located in areas that minimize the potential for such impacts. Elimination of this requirement would ensure that the City is committed to proactive economic development.

The proposed amendments would address issues that have come to staff's attention during the extension of the City's extraterritorial jurisdiction area and through discussions with persons involved in economic and industrial development. In presenting these amendments, the staff is being responsive to the reasonable needs of the community.

At their August 23, 2001, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment. The Planning and Development staff recommends approval of the wording amendment.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on Wednesday, October 10, 2001.

CIVIC CENTER FACILITY FEE

Budget Director Ben Durant said that this is the consideration of a resolution charging a $1.00 facility fee for all ticketed entertainment events and a $0.50 facility fee for all trade show events at the Asheville Civic Center.

The National Basketball Developmental League (NBDL) contract with the City of Asheville makes provisions for the collection of a $1.00 facility fee. City staff surveyed other civic center and entertainment facilities in the southeast of similar size to determine if they charged a similar fee and if there was a revenue sharing arrangement between the city and event promoters regarding facility fee proceeds.

Seven cities were included in the survey and they are as follows: Roanoke, Virginia; Huntsville, Alabama; Mobile, Alabama; Fayetteville, North Carolina; Spartanburg, South Carolina; and Johnson City, Tennessee. All cities in the survey either collected such a fee or anticipated charging one in the near future. In addition, unless otherwise expressed in a contract, all revenue generated from the facility fee was retained exclusively by the city.

Based on the results of the survey, staff recommends charging a facility fee of $1.00 on all entertainment tickets and $0.50 on all trade show tickets. Staff further recommends that the City retain all revenues generated from this fee unless other contractual provisions have been made. Staff estimates that if implemented for a full year, this fee could provide an additional $200,000 per year in revenues to the Center.

Staff further recommends this revenue be used in one or more of the following ways:

1) To fund capital maintenance projects;
2) To fund future expenses related to the on-going renovation efforts of the Civic Center Task Force,
3) To reduce the General Fund operating subsidy to the Center.

City staff recommends City Council adopt a $1.00 facility fee on all entertainment tickets and a fee of $0.50 on all trade show tickets with all fees taking effect immediately after adoption by Council.

Mr. Durant said that the Civic Center Commission has endorsed this fee.

Councilwoman Bellamy felt that if the City had a plan on how this revenue will be used, it may have more public support.

Councilman Hay said that he personally would like the first year's allocation to be earmarked for improvements to the Civic Center.

Upon inquiry of Councilman Peterson, Mr. Durant explained why they are recommending a flat fee and not a percentage fee.

Dr. Carl Mumpower, Chairman of the Civic Center Committee, said that the Commission is in favor of the development of a facility fee program for the Civic Center at the rate recommended by staff. They offered the following comments and considerations: (1) the Commission raised the issue of a possible facility fee approximately two years ago and at that time the Commission was generally supportive of the concept; (2) prior to finalization of a fee plan, they would encourage that some input be solicited from promoters, consumers, and other facility users as to the potential impact of this fee; (3) they acknowledge that a facility fee is a standard practice with Civic Centers, and that a majority of facilities surveyed by staff receive substantial revenue support through such a fee; (4) they encourage that all funds received through this fee be specifically devoted to facility improvements; (5) they courage the name of the fee be changed in such a way as to provide clarity to the public as to the targeted use of the fee – for example – facility improvement fee; and they recommend that, excepting existing contracts, all funds from this fee be retained for use by the facility and not implemented as a shared revenue source with other promoters or tenants.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ADJOURNMENT:

Vice-Mayor Cloninger adjourned the meeting at 5:21 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – September 25, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; Assistant City Manager Jeffrey B. Richardson; and City Clerk Magdalen Burleson

Absent: City Manager James L. Westbrook Jr.

INVOCATION

Councilman Hay gave the invocation.

RECOGNITIONS

Mayor Sitnick recognized the Ms. Betsy Yarborough and her 6th Grade Class from Carolina Day School.

Mayor Sitnick thanked Ms. Robin Nix, the City's Public Information Coordinator, and Ms. Debbie Welch, Buncombe County's Public Information Officer, for arranging the vigil at the City-County Plaza on September 17, 2001, which honored the people who were missing or dead after the terrorist attacks in New York and Washington on September 11, 2001.

ADDITION TO THE AGENDA

Mayor Sitnick asked that a resolution be placed on Council's agenda after the proclamations..

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER, 2001, AS "ASHEVILLE SYMPHONY MONTH"

Vice-Mayor Cloninger read the proclamation proclaiming September, 2001, as "Asheville Symphony Month" in the City of Asheville. He presented the proclamation to Dr. Robert Hart Baker who briefed City Council on some activities that took place during the month.

B. PROCLAMATION PROCLAIMING SEPTEMBER 24-28, 2001, AS "KIDS VOTING WEEK"

Mayor Sitnick read the proclamation proclaiming September 24-28, 2001, as "Kids Voting Week" in the City of Asheville. She presented the proclamation to Ms. Susan Fisher, Director of Kids Voting – Buncombe County, who briefed City Council on some activities that will take place during the week.

C. PROCLAMATION PROCLAIMING OCTOBER, 2001, AS "ASHEVILLE-BUNCOMBE VISION'S HOW CAN OUR COMMUNITY CREATE AND SUPPORT GOOD JOBS WITH GOOD WAGES MONTH"

Councilwoman Bellamy read the proclamation proclaiming October, 2001, as "Asheville-Buncombe VISION'S How Can our Community Create and Support Good Jobs with Good Wages Month" in the City of Asheville. She presented the proclamation to Ms. Leslie Burnside who briefed City Council on some activities that will take place during the month.

RESOLUTION NO. 01-144 - RESOLUTION CONDEMNING TERRORIST ATTACK AND SUPPORTING PRESIDENT OF THE UNITED STATES (also rescinded Resolution No 01-143)

Mayor Sitnick said that since she was not at the September 18, 2001, meeting when the resolution regarding condemnation of the terrorist attack and support for the President of the United States was adopted, she wished to rescind her signature on that resolution. Therefore, she moved to adopt the original resolution with the words "cowardly" and "cowards" reinserted as in the original version of the resolution, along with the other amendments approved by City Council on September, 18, 2001. Said resolution rescinds Resolution No. 01-143 which was adopted on September 18, 2001. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 455

II. CONSENT:

Councilwoman Bellamy asked that Item D be removed from the Consent Agenda due to a conflict of interest.

Councilman Peterson asked that Items H and I be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 28, 2001; THE WORKSESSION HELD ON SEPTEMBER 4, 2001; AND THE WORKSESSION HELD ON SEPTEMBER 18, 2001

B. ORDINANCE NO. 2846 - BUDGET AMENDMENT TO THE WATER 35 FUND

Summary: The consideration of a budget amendment to the 35 Fund (Water Major Capital Improvements Fund) to reflect funding for a $3 million State Grant for Critical Needs Phase III Water System Improvements.

The Authority has been awarded a $3 million grant from the State of North Carolina for critically needed water system improvements including areas with undersized lines, low pressure problems, and frequent water interruptions. This is the third year in a row that the Authority has received a grant from the State. They were one of the few water systems fortunate enough to receive a $3 million grant in 1999, a $2 million grant in 2000, and a $3 million grant this year The combined $8 million will go a long way to help fund the replacement of our aging water system and improve service to locations most in need.

The following improvement projects have been identified as critical needs and will be funded with this grant: North Bear Creek Road, Deavermont Circle, Starnes Cove Road, Old Oak Hill Road, Town Mountain Road/Peach Knob Reservoir, Reed Road, US 70 East (Grovemont), Bull Mountain Road, Burgins Chapel Road, Old Buckeye Cove Road, Flint and Ocala Streets, Short Shiloh Road, June Sayles Road, Vista Street, Allen Avenue, Galax and Holly Streets, Dale and Courtney Streets, Branning Street, Millbrook Road, Worley Place, and Sunrise Drive. Most of these are very old two-inch water lines that need to be upgraded to six inch or larger lines. Construction is tentatively scheduled to start in Spring 2002.

Staff recommends approval of the budget amendment to the 35 Fund.

ORDINANCE BOOK NO. 19 - PAGE 241

C. RESOLUTION NO. 01-145 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE CHERRY STREET FROM MARIGOLD STREET TO SHILOH ROAD AND CALLING FOR A PUBLIC HEARING ON OCTOBER 23, 2001

RESOLUTION BOOK NO. 26 – PAGE 457

D. ORDNANCE TO APPROPRIATE FISCAL YEAR 2001 FAIR HOUSING ASSISTANCE PROGRAM GRANT

This item was removed from the Consent Agenda due to a conflict of interest for Councilwoman Bellamy.

E. ORDINANCE NO. 2847 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR COMPUTER EQUIPMENT AND TRAINING

Summary: The consideration of a budget amendment, in the amount of $25,000, to receive grant money from the N. C. Dept. of Environment & Natural Resources (NCDENR) for computer equipment and training.

The City of Asheville Engineering Department requested $25,000 from NCDENR for training and computer equipment. Staff was successful in obtaining those funds. We received money to purchase five laptop computers and provide training for staff and contractors.

The computers and training will improve the City of Asheville Erosion and Sediment Control Program.

City staff recommends City Council approve the budget amendment to receive grant money from the NCDENR.

ORDINANCE BOOK NO. 19 – PAGE 263

F. RESOLUTION NO. 01-146 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PRECISION CONTRACTING INC. FOR THE GREENWAY AND ROADWAY IMPROVEMENTS ON W.T. WEAVER BOULEVARD

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Precision Contracting, Inc. in the amount of $635,465 for the greenway and roadway improvements on W.T. Weaver Boulevard.

City of Asheville requested bids for the construction of a new greenway and roadway improvements to W.T. Weaver Boulevard. Three bids were received on August 30, 2001. The bids were as follows:

☐ Precision Contracting	$635,465.00
☐ Carolina Mountain Construction	$868,227.00
☐ Taylor and Murphy Construction	$1,155,476.75

After reviewing the bids, staff recommends that the project be awarded to Precision Contracting in the amount of $635,465. The Engineer's estimate for this project was $600,000.

The City will receive a grant from the N. C. Dept. of Transportation, in the amount of $195,465, for the cost of the greenway. The roadway portion of the project ($440,000) is currently budgeted in the City budget.

Precision Contracting is a Certified Minority contractor and met the minority bidding requirements.

City staff recommends City Council authorize the City Manager to execute a contract with Precision Contracting, Inc.

RESOLUTION BOOK NO. 26 – PAGE 458

G. RESOLUTION NO. 01-147 - RESOLUTION AUTHORIZING AN ENCROACHMENT AT 401 WEST HAYWOOD STREET

Summary: The consideration of a resolution authorizing an encroachment agreement at 401 West Haywood Street.

The owners of property at 401 West Haywood Street in the Chicken Hill neighborhood recently learned, through a survey, that the house on the property encroaches slightly on the City's right-of-way along West Haywood Street. This encroachment has existed since the house was built, many years ago. The encroachment is minimal, and does not extend into the paved portion of the right-of-way, but stops about 6-8 feet short of the pavement. The encroachment does not interfere with the use of the right-of-way.

The owners are trying to clear up this title issue in order to obtain financing for renovation of the house.

If Council agrees that the encroachment should be permitted, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 26 – PAGE 460

H. RESOLUTION ADOPTING THE AZALEA ROAD PARK MASTER PLAN

This item was removed from the Consent Agenda for further discussion.

I. ORDINANCE AMENDING FISCAL YEAR 2001-02 BUDGET TO PROVIDE FOR CIVIC CENTER FACILITY FEE

This item was removed from the Consent Agenda for further discussion.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA TO BE DISCUSSED

ORDINANCE NO. 2848 - ORDINANCE TO APPROPRIATE FISCAL YEAR 2001 FAIR HOUSING ASSISTANCE PROGRAM GRANT

Vice-Mayor Cloninger moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: The consideration of a budget amendment, in the amount of $50,800, for the Fair Housing Assistance Program (FHAP) for Fiscal Year 2001-02.

The City has been carrying out its Fair Housing Program under contract with the Asheville-Buncombe Community Relations Council (ABCRC) and Fair Housing Commission since January 1988, using HUD FHAP funds. The City's Community Development Division serves as Lead Entity and monitors the program.

In August 2001 we received notification of the grant awarded to the City for the current federal fiscal year of 10/1/00-9/30/01. This notification required the City to draw down the funds no later than September 15, 2001. Staff has submitted the necessary paperwork to HUD. It is characteristic of this grant program that we receive notification of the grant amount near the end of the program year.

A budget ordinance is required in order to receive these funds and subgrant them to ABCRC.

Community Development staff recommends adoption of the ordinance.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2848. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 265

RESOLUTION NO. 01-148 - RESOLUTION ADOPTING THE AZALEA ROAD PARK MASTER PLAN

Director of Parks and Recreation Irby Brinson said that this is the consideration of a resolution approving the master plan for Azalea Road Park.

In January, 2001, City Council approved the purchase of 155 acres of property on Azalea Road for the development of a park. The City continued its agreement with Woolpert LLP to enter into the next phase of the contract which included the development of a master plan for the park. A Steering Committee was formed as part of this master plan process which included members of adjacent neighborhoods, potential user groups, and other agencies such as Buncombe County Recreation Services and Blue Ridge Parkway. The process for developing the master plan included two public input sessions and three Steering Committee meetings with Woolpert. A consensus-building process was used to develop the master plan that included ideas generated by the public, Steering Committee, and staff for elements to be included in the park.

This plan represents approximately a $16 million investment. The consultant and staff are quick to share that this plan will be developed in five phases over at least a 10 to 15 year period. Funding will be from a number of sources including a commitment from the Western North Carolina Soccer Foundation to develop and maintain the soccer facilities.

36

The Parks and Recreation Advisory Board and staff recommend City Council approve the master plan for Azalea Road Park.

At the request of Steering Committee member Bette Jackson, Mr. Brinson said that the final Master Plan section would be amended to include specific language that the Steering Committee recommends that Azalea Road be gated.

Mr. Robert Born, member of the Steering Committee and speaking on behalf of the Viewpoint Homeowners Association Board of Directors, agreed that Azalea Road should be closed at Highway 81. In addition, his Association is strongly opposed to any truck traffic that goes through the Azalea Road park area.

Upon inquiry of Councilman Peterson, Mr. Brinson explained that since the WNC Soccer Foundation will be paying for the development and maintenance of the soccer fields, they would have the first right to use the soccer fields for games. The agreement being negotiated with the Soccer Foundation dealing with the financial side of this would be that they would have primary use of the soccer fields, however, the City would reserve the right to use those fields for other reasons. Mr. Brinson pointed out that there are a large number of areas adjacent to the soccer fields that will be seeded and open play areas.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-148 adopting the Azalea Road Master Plan. This motion was seconded by Councilwoman Field.

Councilman Peterson moved to amend the motion to add on page 5-2 before the fourth bullet under Final Master Plan that "The Steering Committee recommends Azalea Road be gated." This motion was seconded by Councilwoman Bellamy and carried unanimously.

The original motion, as amended, carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 462

ORDINANCE NO. 2849 – ORDINANCE AMENDING FISCAL YEAR 2001-02 BUDGET TO PROVIDE FOR CIVIC CENTER FACILITY FEE

Budget Director Ben Durant said that this is the consideration of an ordinance to allow the charging a $1.00 facility fee for all ticketed entertainment events and a $0.50 facility fee for all trade show events at the Asheville Civic Center.

The National Basketball Developmental League (NBDL) contract with the City of Asheville makes provisions for the collection of a $1.00 facility fee. City staff surveyed other civic center and entertainment facilities in the southeast of similar size to determine if they charged a similar fee and if there was a revenue sharing arrangement between the city and event promoters regarding facility fee proceeds.

Seven cities were included in the survey and they are as follows: Roanoke, Virginia; Huntsville, Alabama; Mobile, Alabama; Fayetteville, North Carolina; Spartanburg, South Carolina; and Johnson City, Tennessee. All cities in the survey either collected such a fee or anticipated charging one in the near future. In addition, unless otherwise expressed in a contract, all revenue generated from the facility fee was retained exclusively by the city.

Based on the results of the survey, staff recommends charging a facility fee of $1.00 on all entertainment tickets and $0.50 on all trade show tickets. Staff further recommends that the City retain all revenues generated from this fee unless other contractual provisions have been made. Staff estimates that if implemented for a full year, this fee could provide an additional $200,000 per year in revenues to the Center.

Staff further recommends this revenue be used in one or more of the following ways:

1) To fund capital maintenance projects;
2) To fund future expenses related to the on-going renovation efforts of the Civic Center Task Force;
3) To reduce the General Fund operating subsidy to the Center.

City staff recommends City Council adopt a $1.00 facility fee on all entertainment tickets and a fee of $0.50 on all trade show tickets to be effective immediately after Council adoption.

When Councilman Peterson questioned the immediate effective date, City Attorney Oast said that some issues have been raised about people who have advertised ticket prices in advance of knowing about this facility fee. He said he would research those issues and see what the contractual provisions say. But, rather than exempt them from the ordinance, he recommended Council adopt the ordinance so that the fee will be in place and then he can work with those organizations individually on a contractual and a fairness basis.

Councilman Peterson questioned how the funds will be accounted for in the budget. Mr. Durant explained that there is no firm estimate on what revenue will be produced from this fee at this time. Therefore, staff will monitor the revenues and then once they have a firm estimate, they will come back to Council with a specific plan and it will depend on Council's priorities as to how those expenditure will be made.

Councilman Hay felt the additional revenue, especially in the first year, should be dedicated to specific improvements at the Civic Center.

Councilman Peterson was concerned that the regular tenants had not been informed or involved in this new fee. Mr. Durant said that staff researched what other facilities were charging and then presented that information to the Civic Center Commission. The plan was to get the fee adopted and then inform the affected vendors as to how this might impact their events and make appropriate exceptions as needed.

Councilman Hay said that the Civic Center Commission did recommend that some of the primary tenants be contacted. Civic Center Director David Pisha said that he has contacted some of the Civic Center's major users and cleared up some misconceptions.

Upon inquiry of Councilwoman Bellamy, Mr. Durant said that the anticipated revenue can be used for reducing the subsidy to the Civic Center but that would be entirely up to Council on how they want that additional revenue spent.

At the request of Councilman Peterson, Mr. Durant explained the facility fee with regard to the National Basketball Development League (NBDL) and also why the staff is recommending a flat fee opposed to a percentage fee.

Mr. Fred English felt this was nothing more than a secret tax increase.

Mr. John Patterson, owner of Western Carolina Productions which produces events at the Civic Center, felt that there was not much input solicited from the tenants who use the Civic

38

Center. He said attendance at his events are down over the past three years by 28%. If this fee is implemented, attendance in the Civic Center will further deteriorate. He felt there must be other ways to raise fund to renovate the Civic Center.

Dr. Carl Mumpower, Chair of the civic Center Commission, said that the Commission is in support of this fee. The Commission felt it is a good opportunity to target taking care of what we have and they encourage City Council to earmark this money for improving the facility.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Hay moved for the adoption of Ordinance No. 2849. This motion was seconded by Councilwoman Field.

Vice-Mayor Cloninger felt this is a good opportunity for the City to put revenue towards improvements to the Civic Center.

Even though Councilman Peterson felt we need to generate more revenue from the users to provide for improvements to the Civic Center, he would have to vote against the ordinance because he felt the luxury boxes should be paying more than the cheap seats.

Councilwoman Bellamy felt that we are putting steps in place to show our state legislature as well as the community that we are thinking pro-actively about how we are going to fund improvements at the Civic Center.

The motion made by Councilman Hay and seconded by Councilwoman Field carried on a 6-1 vote, with Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 - PAGE 267

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CONDITIONAL USE PERMIT STANDARDS FOR APPROVAL

ORDINANCE NO. 2850 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CONDITIONAL USE PERMIT STANDARDS FOR APPROVAL

Mayor Sitnick opened the public hearing at 6:22 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise the findings for conditional uses. This public hearing was advertised on September 14 and 21, 2001.

The proposed ordinance amendment would revise two of the seven findings that must be made in order for City Council to grant a Conditional Use Permit. The findings currently in the ordinance are based upon wording found in enabling legislation and in ordinances across the state. While these findings are generally adequate to assess the impacts of proposed uses identified as conditional uses, some refinement is needed to assure that the findings address Asheville's unique conditions and meet the goals of the City.

One issue that has been identified during the review of Conditional Use Permit requests is how the proposed project would impact the natural and topographic features of the site. A proposed revision to finding # 2 would delete the need to find that the proposed use is reasonably necessary for the public health or general welfare. This finding would be revised to require the use or development to be reasonably compatible with significant natural and topographic features on and in the vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant. The proposed revision would reinforce the concern for protecting and maintaining the natural and topographic features that help define the character of the City of Asheville.

The findings currently address the need for the proposed use or development to conform with the City's comprehensive plan. However, there is no requirement that the use or development conform with the City's smart growth policies or sustainable economic development strategic plan. A proposed revision to finding # 5 identifies these policies and plans, noting that the use or development should comply with them.

The proposed revisions provide clear guidance for applicants in preparing applications for Conditional Use Permits and for the City Council in reviewing the requests. With the proposed revisions, the importance of preserving the City's natural and topographic features is made clear. In addition, the role of the City's smart growth policies and sustainable economic development strategic plan in guiding development is reinforced.

At their July 11, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the wording amendment revising the findings for conditional uses. The Planning and Development staff recommends approval of the wording amendment.

Upon inquiry of Councilman Peterson, Mr. Green gave examples of mitigation techniques.

Ms. Sharon Martin felt these two amendments go a long way to protect our environment.

Ms. Margaret Shook, 709 Crowfields, urged City Council to strengthen the requirements of the 1997 stormwater ordinance and not wait until March 2003 when the federal government mandates it.

Ms. Elaine Anderson, 711 Crowfield Condominiums, agreed with Ms. Shook in that something need to be done about the water runoff and the ordinance needs to be strengthened.

Mr. Jim Bannon, President of Smart Growth Partners, supported the ordinance changes.

Councilwoman Field suggested the Stormwater Task Force be reconstituted to look at revising the ordinance.

Mayor Sitnick agreed with Councilwoman Field and felt that Ms. Shook would be an excellent member of that Task Force.

Mayor Sitnick closed the public hearing at 6:40 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2850. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 269

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A NEW URBAN VILLAGE ZONING DISTRICT

ORDINANCE NO. 2851 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH A NEW URBAN VILLAGE ZONING DISTRICT

Mayor Sitnick opened the public hearing at 6:41 p.m.

Planning & Development Director Scott Shuford said that this is consideration of an ordinance to amend the Unified Development Ordinance (UDO) by adding the Urban Village Zoning District. This public hearing was advertised on September 14 and 21, 2001.

As part of City Council's Smart Growth initiative, staff has developed a new zoning district of Urban Village. Staff is expediting its review because there are two property owners who wish to have it applied to their property. The two projects where this new zoning district may be initially applied are the Biltmore Park Town Center, currently under construction, and the former Gerber site.

In preparing this ordinance, staff enlisted a focus group of local design professionals, Smart Growth advocates, and a Planning and Zoning Commissioner to review the original draft ordinance and provide comments.

The Urban Village District is generally intended to be used at the request of a property owner rather than being unilaterally applied to a site by the City. It is a large site zoning district, with a minimum initial property size of 10 acres. Its application will likely be limited to fairly level sites rather hillsides due to the requirement that the developer create an internal network of streets forming a series of blocks, however, a creative designer may be able to adapt it to a hilly situation.

This internal street network is the key to the Urban Village zoning district. The street network will shape the form that the development takes by providing a series of blocks that organize how the buildings are arranged, provide a place for on-street parking, and create a public sphere for community interaction. Off-street parking generally must be shielded from the street by buildings and incentives are provided for the use of structured parking. In effect, the district's requirements for an internal street system, on-street parking, and building setbacks create a small-scale replica of a traditional downtown.

As in a traditional downtown, there is considerable leeway given to the developer regarding building height (the district calls for most structures to be in a range from two to four stories, but some buildings can be single story and others can be as tall as eight stories), residential density (no formal density limits – the building size and placement will ultimately determine the number of units that can be placed in an Urban Village), on-street parking (the ability to count this parking toward the total parking required for the development), and development review (projects within an Urban Village are considered Level II projects for review purposes). In exchange for this flexibility, the developer must work within the provisions of the ordinance regarding site design and provide a traffic impact analysis.

The Planning and Zoning Commission voted unanimously to recommend adoption of the ordinance amendment. The Planning and Development Department staff supports the ordinance amendment.

As a result of Council's September 4, 2001, worksession, staff has developed some ideas for determining when revisions to an Urban Village District master plan require reconsideration by City Council. Staff is suggesting that revised Urban Village Districts would require review by Council if:

- There is an increase in overall development intensity.
- There is an increase in overall height.
- There is a decrease in perimeter open space or perimeter parking lot buffering.
- There is a reduction of 25% or more in the number of blocks created by the Urban Village street network.

Staff feels these provisions will address the key impacts to surrounding properties by any revisions to the Urban Village District master plan.

Also, as a result of further discussion at Council's September 18, 2001, worksession, over the issue of reconsideration involved when the mix of uses began to be altered over the course of construction, staff has included a quantifiable (25%) factor in the ordinance.

Ms. Anne Campbell, 102 Crowfields Drive, thought the idea of urban villages was a good one, however, she did have some concerns about the density. She felt that Crowfield Condominiums could be a model if designated as an Urban Village District. She did stress, however, that there is no provision for bus stops and there is a desperate need for a sidewalk on Hendersonville Road from Carolina Day School south.

Mayor Sitnick said that she has sent at least two letters to the N. C. Dept. of Transportation requesting sidewalks on Hendersonville Road, at least south of West Chapel Road.

Ms. Hazel Fobes spoke in favor of the Urban Village District designation.

Ms. Rebecca Campbell, 727 Haywood Road, supported the Urban Village concept. She felt that we did need to retrofit the sprawl in south Asheville and also need to deal with proper mitigation of stormwater.

Mr. Jim Bannon, representing Smart Growth Partners, spoke in support of the Urban Village District and explained why they feel this is a good development pattern for Asheville to adopt.

Mr. Pat Whalen, representing the Sustainable Economic Development Implementation Task Force, felt this new district is a useful tool in our development ordinance.

Mayor Sitnick closed the public hearing at 7:10 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2851. This motion was seconded by Councilwoman Bellamy and carried unanimously.

42

C. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED AT THE NORTHEAST CORNER OF HENDERSONVILLE ROAD AND GERBER ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO URBAN VILLAGE DISTRICT

ORDINANCE NO. 2852 - ORDINANCE TO REZONE PROPERTY LOCATED AT THE NORTHEAST CORNER OF HENDERSONVILLE ROAD AND GERBER ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO URBAN VILLAGE DISTRICT

Mayor Sitnick opened the public hearing at 7:11 p.m.

Urban Planner Alan Glines said that this is consideration of an ordinance to rezone property at the northeast corner of Hendersonville Road and Gerber Road to Urban Village District. This public hearing was advertised on September 14 and 21, 2001.

The property being reviewed is located on Hendersonville Road, which is 23 acres in size and was the site of the former Gerber Plant. This rezoning proposal is for only a portion of the original parcel (PIN No. 9655-09-26-4943) and is bordered by Hendersonville Road and Gerber Road (the property encompasses Gerber Road for a portion of the parcel). The parcel is a likely candidate for the Urban Village District zoning due to its location on Hendersonville Road and it relatively flat topography. The plans of the owner/developer will be a good fit for the Urban Village District. This proposed mixed use project embodies Smart Growth goals by providing higher densities where current infrastructure (roads, water and sewer) already exists. This project will also have the benefit of helping to discourage sprawl by re-developing an in-town brownfield site

He reviewed the master plan for the property which has been submitted. The master plan portrays a network of streets, sidewalks, on-street parking, open space and the building arrangement. The project will be a mixed-use and will have a strong residential component. A majority of buildings will be two to four stories. There will be a commercial node close to Hendersonville Road although commercial activities will be scattered throughout the District. Careful attention has been made to ensure that attractive pedestrian spaces are integrated into the streetscape.

The master plan will be made up of a mixture of the following uses:

- 465 Residential Units
- 100 Tourist Accommodation Units
- 220,000 gross square feet of retail, restaurant and other consumer commercial space (175,000 square feet net)
- 65,000 square feet of office space
- 20,000 gross square feet of other non-residential space

The property is surrounded by a variety of zoning districts including Industrial to the north, Highway Business across Hendersonville Road to the west, and Commercial Industrial to the east and south adjacent to the railroad tracks.

The site is currently vacant and the property is adequately served by water and sewer.

The Planning and Zoning Commission voted 6-0 to recommend application of the Urban Village District zoning to property at northeast corner of Hendersonville Road and Gerber Road. The Planning and Development Department staff also recommends application of the Urban Village District zoning to this site formerly known as the Gerber Plant.

Upon inquiry of Councilman Peterson about how much detail they need to submit with their master plan, Mr. Glines said that the first phase drawings are for buildings two and three stories tall. He said that 95% of the buildings will be between 2-4 stories tall for the full development. There will be potentially 5% of the buildings from the build-out will be one story to accommodate the ancillary uses. Planning & Development Director Scott Shuford further explained that Council is approving a building structure range from 1-4 stories in height. If there is anything taller than 4 stories, it would come back to City Council for re-consideration. He said that as long as they develop the property in the block pattern required and as long as they meet the Traffic Impact Analysis and other technical requirements of the ordinance, they would have some flexibility in how they develop the property.

Mr. Herbert Ellis, representing New Hope Presbyterian Church at 3070 Sweeten Creek Road, was concerned about (1) structures over 35 feet in height blocking the Church's view of the mountains; and (2) street lights that are also high enough to spoil the Church's view and might have glaring light directed toward the Church.

Mayor Sitnick closed the public hearing at 7:34 p.m.

In response to Mr. Ellis' concerns, Mr. Shuford said that in all likelihood, the streets will ultimately be public streets and they would have public street lights on it. Also, the railroad right-of-way is quite significant resulting in a much greater setback from the Church property than you would ordinarily see. He suggested Mr. Ellis attend the Technical Review Committee meeting on this project to have some of his concerns addressed.

Mr. Jackson Ward, property owner, said that they are willing to work with the neighbors and they do not intend to build multiple four-story units. They may build a few four-story units to create a diversity in the skyline of the project.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2852. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Councilwoman Bellamy felt this is a good development as this project support's our community's initiatives.

ORDINANCE BOOK NO. 19 – PAGE 283

At 7:50 p.m., Mayor Sitnick announced a short break.

D. PUBLIC HEARING TO CONSIDER REZONING PROPERTY KNOWN AS BILTMORE FARMS GARDEN HOMES/TOWN CENTER EAST LOCATED IN BILTMORE PARK FROM CENTRAL BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT

44

ORDINANCE NO. 2853 - ORDINANCE TO REZONE PROPERTY KNOWN AS BILTMORE FARMS GARDEN HOMES/TOWN CENTER EAST LOCATED IN BILTMORE PARK FROM CENTRAL BUSINESS DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT

Mayor Sitnick opened the public hearing at 8:06 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone Biltmore Park Town Center from Central Business District (CBD) and RS-8 Residential Single-Family High Density District to Urban Village District. This public hearing was advertised on September 14 and 21, 2001.

The Biltmore Park Town Center area is an urban village already under construction in the Biltmore Park development. It is a fine example of Smart Growth in that it creates a mixed use node that serves the surrounding residential and commercial uses within the Biltmore Park project. Its design establishes a street network that creates public space that promotes community interaction while allowing multimodal access both internally and externally.

Most of this area was recently zoned CBD in the extraterritorial jurisdiction initial zoning because that zoning was the most similar to the development pattern being undertaken by the developer. However, CBD zoning is not an ideal "fit" for the Town Center area because of a variety of factors. CBD zoning, while allowing minimal setbacks, is much more intensive than necessary to accomplish the development goals for this project – there are no height limits other than a requirement that buildings be a minimum of two stories in height, for example. For some of the smaller scale residential uses being proposed, CBD did not match at all due to these types of issues and other zoning districts had to be used in the initial zoning.

The Biltmore Park Town Center is projected to contain the following level of development. Ten to fifteen percent (10-15%) of the project's structures will be one story, 80-85% will be two to four stories in height, and five percent (5%) or less of the buildings will be taller than four stories.

- 290 Residential Units
- 350,000 square feet of Retail, Restaurant, and Other Consumer Commercial Space
- 200,000 square feet of Office Space
- 150,000 square feet of Other Non-Residential Space

The Urban Village District also provides for a mix of uses where the infrastructure is in place to support an urban pattern of development. The Urban Village District is designed to promote an internal street network that creates a public sphere, along with reduced setbacks and flexibility in land use types.

With regard to the zoning pattern, the property is surrounded by a variety of zoning districts consistent with the master plan for Biltmore Park. This site is already under construction as an urban village project. The Town Center area is adequately served by water and sewer.

The Planning and Zoning Commission voted 6-0 to recommend application of the Urban Village District zoning to the Biltmore Park Town Center. The Planning and Development Department staff also recommends application of the Urban Village District zoning to the Biltmore Park Town Center.

Mr. William Lapsley, consulting engineer representing Biltmore Farms, spoke in support of the rezoning and explained the project area.

Mayor Sitnick closed the public hearing at 8:12 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2853. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 285

E. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE REZONING FOR 1238 HENDERSONVILLE ROAD, KNOWN AS LAURELWOOD APARTMENTS, FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2854 - ORDINANCE TO REZONE 1238 HENDERSONVILLE HIGHWAY FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2855 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR 1238 HENDERSONVILLE ROAD

Councilman Hay moved to excuse Vice-Mayor Cloninger and Councilman Worley from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 8:18 p.m.

The following Council members disclosed that they had visited the site: Mayor Sitnick, Councilwoman Bellamy and Councilman Peterson. Mayor Sitnick and Councilwoman Field had a conversation with a representative of the owner to let them know this project was coming before Council, however, they have no special knowledge that will affect the decision.

Ms. Stacy Merten, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 9-25-01). This public hearing was advertised on September 14 and 21, 2001.

Ms. Merten said that this is the consideration of rezoning 1228 Hendersonville Road, known as Laurelwood Apartments, from RM-6 Residential Multi-Family Low Density District to

RM-16 Residential Multi-Family High Density District, and issuance of a conditional use permit (conditional use zoning).

On August 3, 2001, John Mock submitted plans for a conditional use rezoning for a 31.7 acre parcel located at 1238 Hendersonville Road (PIN No. 9656.09-05-9482). The request is to conditionally rezone the property from RM-6 to RM-16 (CU) to permit construction of a 440 unit multi-family development for a gross density of 13.88 units per acre. The existing zoning allows six units per acre and 190 dwellings could be placed on the property under that zoning.

The property is located in the City's extraterritorial jurisdiction area on the east side of Hendersonville Road approximately .5 miles north of the Blue Ridge Parkway (City Exhibit 3 - location map). Access to the property is via a driveway located to the north of Ballard Appliances and requires the crossing of the Norfolk Southern railroad line that runs behind the business (City Exhibit 4 – copy of site plan).

The site is partially wooded and currently used primarily for agriculture. There are also a limited number of residential dwellings on the property which will be demolished. The project consists of 21 buildings surrounding a central recreational area. The buildings will be three stories in height and consist of 11 with 20 units each, 7 with 22 units and 3 with 24 units. The project site design preserves existing tree canopy on the site to a significant extent. The buildings are clustered on the lower part of the property leaving a large wooded upland entirely intact .

The project has the potential to assist the City with its affordable housing problem. The anticipated rents for these units are accessible to moderate income residents.

The Planning & Zoning Commission and the Police & Fire Departments have identified access to the property as a concern as the property is "landlocked" except for the access across the railroad tracks. The applicant is working with surrounding property owners to obtain a secondary means of ingress and egress to the site. Additionally, the Fire Department recommends but does not require that the buildings be equipped with sprinklers.

This project will create an urban level of density in an area outside of the City's corporate limits. This requires an urban level of public safety services (Fire, Police and Emergency Medical Services). Voluntary annexation in phases would be one means of addressing this concern, although staff is open to considering other options.

The project consists of over 20 buildings of the same architectural style. The repetition of a single building style with little connection to the architectural character of Asheville was also identified as a concern by the Planning & Zoning Commission. However, it was also acknowledged that the affordability of the units must be taken into consideration. The applicant is willing to work with staff to improve the quality of design while keeping the project within an affordable price range.

All of the technical conditions have been met with a few minor exceptions. A Transportation Impact Analysis (TIA) was required for this project and has been reviewed by the City's Traffic Engineer (City Exhibit 5) . The TIA indicates that the nearby signalized intersections will experience slight increases in delay based on this project, but they will still be within acceptable levels. The TIA makes the following recommendations for the site driveway:

1. Construct the site driveway with one ingress lane and two egress lanes, one of which should be a right turn lane with 150 feet of full width storage. The plan includes a 200 ft. length right turn lane

2. Construct a southbound left turn lane into the site. This can be accommodated by using the existing two-way left turn lane.
3. Install a traffic signal at the site driveway upon full build-out of the development. The City's Traffic Engineer recommends that this traffic signal be required whenever the intersection actually meets signal warrants and is approved for construction by the N. C. Dept. of Transportation (NCDOT). A condition below reflects this recommendation.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must make the following findings based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]:

1) That the proposed use or development of the land will not materially endanger the public health or safety.

As proposed the project will have a single access via the Norfolk Southern Railroad line. Norfolk Southern has indicated that approximately 8-12 trains per day traverse the tracks at this location. The Asheville Police & Fire Departments have identified this as a public safety concern and have recommended that a secondary means of access be identified to serve the development that would not require emergency vehicles to cross the rail line.

Voluntary annexation of this property or some other method of enhancing security will insure that adequate public safety services will be available for an urban community of over 1,000 persons.

The site will be extensively buffered and the parking areas landscaped in order to mitigate any possible negative environmental impacts from dust, glare and fumes.

2) That the proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region.

The project will provide reasonably priced housing in a rapidly developing area of the City where there is a great need.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

It is recommended that the proposed development be designed and constructed with materials that will be long lasting and in a manner that will contribute to and enhance the surrounding community. If developed in this manner, it is not anticipated that the development would injure the value of adjoining property. The access and layout of the site do not pose a major impact on adjacent property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The project will be located adjacent to a heavily developed commercial corridor and in the general vicinity of other large scale multi-family development projects.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan and other official plans adopted by the City.

The Asheville City 2010 Plan indicates residential use for this area.

48

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed development is located in an existing developed area. The project received conditional approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, Metropolitan Sewerage District, Engineering Department and Public Works Department. The Technical Review Committee recommended certain conditions, which have been met. Sidewalks and a transit stop will be provided.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The developer has submitted a TIA which studies the traffic that is anticipated to be generated by the development. This TIA was completed according to the requirements of the City's ordinances, and the assumptions used have been approved by the City's Traffic Engineer. The City's Traffic Engineer has reviewed this project and the TIA. The Traffic Impact Analysis looked at pre- and post-development traffic conditions at three intersections along Hendersonville Road (US25): the site driveway, the existing signalized intersections at Rock Hill Road, and the existing signalized intersection at Harris Teeter and Carolina Day School. The TIA included a theoretical Traffic Signal Warrant Analysis at the site driveway.

While the nearby intersections are predicted to operate acceptably at build-out, the major roads in this area including Hendersonville Road are experiencing rapid traffic growth and will at some point reach capacity. Any increase in density will accelerate this traffic growth.

The City's Traffic Engineer made a suggestion to the developer to work with the owner of the adjacent property to try and create a new collector road that would connect between Hendersonville Road and Sweeten Creek Road. This would serve to potentially reduce long-term congestion in this area by providing more connectivity and improving the efficiency of existing roads in this area. The developer and the project's engineer decided not to pursue this option, likely due to topographical constraints, costs, and the fact that this road would split the property.

The Planning & Zoning Commission recommended approval with conditions. Based on information available to the Planning & Development Department in advance of the public hearing, staff recommends approval of the conditional use rezoning.

If Council takes action to approve the request, staff also recommends the following conditions:

- The applicant shall work with staff to determine appropriate changes to the building façades to increase variety and better incorporate the architectural character of Asheville while respecting the cost impact of these changes to rent affordability. Pursuant to this, the applicant is encouraged to consider: (1) A greater mix of materials; (2) including greater articulation in the roof line, possibly mixing hip and gabled roof styles; and (3) more variation in the window styles. Staff has worked with the applicant on this issue and they will review revised drawings reflecting the changes discussed.
    - Additional landscaping should be provided around the buildings to help break up the massing.
    - A greenway/trail system should be provided for additional recreation benefits.
    - A transit and school bus stop should be provided within the complex; if this proves infeasible after examination by both the City of Asheville's Transit Director and the Buncombe County School System, the applicant shall provide a bus shelter at Hendersonville Road at a location determined by the Transit Director and/or the Transportation Services Division.

- The developer has proposed building the traffic signal at the intersection of the site driveway and Hendersonville Road at project build-out. However, this signal must be constructed at a time when the intersection meets signal warrants based on the traffic counts at that time, as determined by the NCDOT. To accomplish this, the developer should place funds in escrow to pay for the traffic signal. This amount will be determined by the City Engineering Department based on recommendations from the NCDOT. The amount should include the costs of pedestrian signals and the costs of connecting this traffic signal to other signals in the area.
- The site access for this development is planned to be built between two existing driveways to existing buildings. The driveway spacing is already closer than optimal. The developer must work with the Engineering Department and the NCDOT to eliminate and/or restrict turning movements at some of the nearby driveways. Ideally, the adjacent parking lots can be connected to the site driveway so these properties can have access to the traffic signal for egress.
- A secondary emergency access is required in a location that will not require emergency vehicles to wait for a train. This access does not have to be available to the general public. If general public access is not provided, the blocking mechanism shall be equipped with an electronically operated device or other device acceptable to the Fire and Police Departments. At least 30 ft. of separation between buildings on the site must be maintained to accommodate the emergency access. This access must be constructed with an all-weather surface, but is not required to be paved. The developer has obtained an easement for this secondary emergency access.
- The applicant shall work with staff to insure that the urban level of density proposed in this project receives the urban level of public safety services.
- In order to insure that the grading, erosion control, landscaping, tree protection, access, and paving are consistent with the approved conditional use permit, the applicant shall submit any plans required by other government agencies (including Buncombe County and state agencies) to City staff for prior review. There shall be no City fees for such reviews pursuant to this purpose. If there are any City inspections during and after construction required as a result of this review, such inspections shall be coordinated by the City with the other affected agencies to minimize the potential for any duplication or confusion in requirements.

Ms. Merten said they have worked through the conditions with the developer and they are amenable to all the conditions.

Upon inquiry of Councilwoman Bellamy, Ms. Merten said the existing development next to the proposed subject development will continue to operate. The proposed easement for emergency access only will be on a lot that will still be developed as part of that subdivision and the access will be from the north side into the proposed development (City Exhibit 6).

Ms. Merten answered various questions from Council, some being, but are not limited to: how will the private road be improved; how far away will the first set of buildings begin with regard to the railroad tracks; are the units priced appropriately for the people who need housing; and will sidewalks be required.

Upon inquiry of Councilwoman Bellamy, Ms. Merten said that the Buncombe County Schools will only provide school bus service to a publicly maintained road. After working with the developer, the developer has proposed to make their access road off Hendersonville a publicly maintained road all the way into the development so the children would not have to cross the railroad tracks.

Traffic Engineer Michael Moule explained that the TIA looked at three major intersections with one being the site driveway and the second and third being the nearest signalized

50

intersections along Hendersonville Road. The study showed no significant increase in delay and no letter grade deterioration at either of the two intersections based on the traffic generated by this development. A signal will be warranted, however, at the site driveway at the proposed build-out year of 2004.

Mr. Louis Bissette, attorney representing the developer Carroll Investment Properties, gave a brief history of Carroll Investment Properties, stating they have an excellent reputation. They build clean, safe, affordable housing. The explained that the project will contain one, two and three bedrooms ranging from approximately $500-$800. He also described some of the amenities planned for the project (Applicant Exhibit 1). There is almost eight acres near the back of the project which will contain trails and picnic areas and they have designed the project to keep most of the large trees. The developer has had several meetings with City staff and have met with almost all the adjoining neighbors to explain the project and to answer questions. This project was approved by the TRC and unanimously by the Planning & Zoning Commission. The developer has agreed to additional landscaping, to put in a broader mix of materials to change the roof articulation, to change the detail on the windows, and a number of other changes that City staff has suggested. They have agreed to petition for voluntary annexation into the City so their residents will have all of the City services. In addition, they have agreed to the school bus stop and also agreed to build the entrance road to City standards so that the City can accept the road which would allow the school buses to come in, drive around the circle and drive back out. The road will actually be moved over to the north from where it is now so that it will "T" up with Eastwood Road coming out of Biltmore Forest with a traffic light. They have been in close contact with the railroad and they know what kind of gated crossing needs to be installed and they have an easement. He noted that while the project went through the TRC and then the Planning & Zoning Commission, no one mentioned the need for the emergency access easement. However, they have now secured, at some cost, an emergency access 20-foot wide easement from Swann Construction. They have met all the standards and they feel this is affordable housing in a location that will work. He said they did look at the connector road that the City Traffic Engineer recommended. But, behind their site is a mountain and they don't own the approximate one mile from this site to Sweeten Creek Road.

Mr. Chris Eller, Consulting Engineer with Civil Design Concepts, clarified some technical comments regarding the railroad easement and stormwater detention (City Exhibit 4).

Mr. John Mock, Project Manager for Carroll Investment Properties, passed out to Council a rendering of a typical building (Applicant Exhibit 2) and said they will strive to provide nice, affordable housing.

Mr. Roy Carroll, President of Carroll Development Properties, spoke in support of this new development.

Ms. Connie Starnes Driscoll, adjoining property owner, felt the developers have gone out of their way to address the neighbor's concerns.

Mr. Doug Morris, speaking on behalf of the school children of South Buncombe County, said at the present time Estes Elementary is at a 105% capacity. He said they do not have anymore room to put anymore children in the schools. He said that Buncombe County Superintendent Dodson is in opposition to this project because of the number of children already in the schools.

Upon inquiry of Mr. Adam Baylus, Mr. Rex Ballard explained the arrangements of the three tenants currently living in the houses which will be demolished.

Mr. Bill Samuels, Golf Course Superintendent at the Biltmore Forest Country Club, said their concern is stormwater runoff onto the golf course property (City Exhibit 7).

Mr. Eller explained their plans for stormwater detention. He said they have the opportunity in the lower portion of the property to utilize the railroad as a dry detention pond and allow it to retain water in the events of storms. In addition to that, if it looks as though it will not be enough, they do have opportunities to provide that underground with oversized pipes. He explained there are alternatives if need be to account for additional detention.

Mr. Bissette understood Mr. Morris' concern, however, noted for the record that Mr. Morris is not employed by the Buncombe County School System.

Mr. Shuford said that they recognize the school issue is a service issue, but not a service that the City provides in this area. He felt it would be a good idea to try to coordinate our development plans with both the City and the County school systems as applicable so they know these projects are coming online.

Upon inquiry of Councilman Peterson, Mr. Bissette said that as each phase of their project is complete, they will petition for voluntary annexation.

There being no request for rebuttal, Mayor Sitnick closed the public hearing at 9:30 p.m.

Councilwoman Field moved to adopt Ordinance No. 2854 to rezone 1238 Hendersonville Road, known as Laurelwood Apartments, from RM-6 Residential Multi-Family Low Density District to RM-16 Residential Multi-Family High Density District/Conditional Use. This motion was seconded by Councilman Hay and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 287

Councilman Hay moved to adopt Ordinance No. 2855 granting the conditional use permit for 1238 Hendersonville Road with the conditions outlined above by City staff, and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilwoman Field.

Mayor Sitnick asked if Council could include a condition with regard to stormwater retention. City Attorney Oast said that what Council has before them includes a fairly extensive stormwater control plan.

Mayor Sitnick also said that the City is growing and new schools need to be built to accommodate that growth.

Councilwoman Bellamy said that our community does have decent, safe and affordable housing developments that do receive government subsidies and have even been awarded state awards. She felt this project is smart growth development and it does increase the City's tax base. In addition, it does fill a vacant lot with higher density.

The motion made by Councilman Hay and seconded by Councilwoman Field carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 289

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 01-149 - RESOLUTION APPOINTING MEMBERS TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Vice-Mayor Cloninger said that the terms of Sherry Fitzpatrick and Francis Black, as members on the ADA Compliance Committee have expired.

On September 4, 2001, City Council instructed the City Clerk to prepare the proper paperwork to (1) reappoint Ms. Fitzpatrick (disabled community representative) to serve an additional three year term, term to expire August 22, 2004; and (2) to appoint Ms. Mary Robertson (disabled community) to serve a three year term, term to expire August 22, 2004.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-149. This motion was seconded by Councilman Hay and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 463

B. RESOLUTION NO. 01-150 - RESOLUTION REAPPOINTING CHAIR TO THE CIVIL SERVICE BOARD

Vice-Mayor Cloninger said that City Council must annually appoint the Chair to the Civil Service Board.

On September 4, 2001, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Mr. Gene Bell as Chairman of the Civil Service Board.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 01-150. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 464

C. RESOLUTION NO. 01-151 - RESOLUTION APPOINTING MEMBERS TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Vice-Mayor Cloninger said that the terms of Edward Metz, Ben Slosman, Gail McCarthy, Ken Fulford, Hunt Mallett, Laura Webb and Robert Camille, as members of the River District Design Review Committee, have expired.

At City Council's worksession on September 4, 2001, City Council instructed the City Clerk to prepare the proper paperwork to (1) reappoint Mr. Metz (at-large member); (2) reappoint Ms. McCarthy (member of RiverLink Board of Directors); (3) reappoint Mr. Fulford (design professional); (4) reappoint Mr. Hunt Mallett (owner of property located within the River District; (5) reappoint Ms. Webb (member of RiverLink Board of Directors; (6) reappoint Mr. Camille (design professional); and (7) appoint Marvin Slosman (owner of property located within the River District). All terms are to expire on September 1, 2004, or until their successors have been appointed.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Mayor Sitnick moved for the adoption of Resolution No. 01-151. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 465

VI. OTHER BUSINESS:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English spoke in support of the revised resolution which condemned terrorist attack and supported the President of the United States. He handed Mayor Sitnick a flag.

B. COMMENTS BY JAN KUBINEK HOWARD

Ms. Jan Kubinek Howard, 5 Reservoir Road, asked that Reservoir Road be closed to vehicular traffic. Mayor Sitnick said that she would have City staff contact Ms. Howard to arrange a meeting regarding her concern

C. COMMENTS BY PETER DAWES

Mr. Peter Dawes stated his disappointment of the dialogue that took place at the September 18, 2001, worksession regarding the resolution condemning terrorists and supporting the President of the United States.

D. COMMENTS BY REBECCA CAMPBELL

Ms. Rebecca Campbell questioned the City's legal authority to rescind a resolution.

E. COMMENTS BY MAYOR SITNICK

Mayor Sitnick said that she was not at the September 18, 2001, worksession when the now rescinded resolution condemning terrorists and supporting the President of the United States was adopted. On Wednesday, September 19, she signed her name to a resolution she didn't vote on as she has signed many other documents she didn't vote for. She said it was her opinion that the reason why she couldn't sleep several nights since then is that her signature didn't belong on that resolution. It wasn't what she felt and she wasn't even at the meeting. She felt it was horrible to academically, intellectualize semantics when the country was in mourning and she personally felt the acts were cowardly. She removed her signature from the resolution and asked Council if they would rescind the resolution signed on September 18 and adopt a new one. All of Council agreed and that is what Council adopted at this meeting.

F. CLAIMS

The following claims were received by the City of Asheville during the period of August 17-30, 2001: Bryan Fisher (Sanitation), Arrivelle Bolden (Transit Services), Cynthia Wade (Streets), Burgerland (Water), Priscilla Bearden (Water) and Martha Bradley (Streets).

The following claims were received by the City during the period of August 31-September 13, 2001: Land Design (Water), Buncombe County Child Care (Water), Slossman Corporation (Water), Ed Dyson (Police), Turtle Creek (Inspections), Ethel Pickett (Traffic Engineering), Tatanisha Davis (Transit Services), Sue Hunt (Streets), Jack Hobbs (Water), Kenny Hayes (Water) and Thelma Penland (Sanitation).

The following claims were received by the City during the period of September 14-20, 2001: William Allen Stewart (Parks & Recreation), Frank Covine (Streets), Teresa Dye (Streets), Nypro Asheville (Water), Debra Roher (Sanitation), Nypro Asheville (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

G. LAWSUIT

The City filed a lawsuit on September 14, 2001, against Kay T. George. The action was a Complaint, Injunction, Order of Abatement for removal of aesthetic junked vehicles vehicle are in violation of Section 10-31 of the City of Ordinances. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 9:57p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – October 2, 2001 - 3:00 p.m.

Worksession

Present:	Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson
Absent:	Councilman Brian L. Peterson

CONSENT:

Urban Trail Station 21

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Ed Anderson to construct the public art for Urban Trail Station 21 at the intersection of Market and Walnut Streets.

The City is in need of an artist to construct the Station 21 public art piece to be located on the right-of-way of Walnut Street at Market Street. In accordance with N.C. Gen. Stat. sec. 143-64.32, proposals were solicited. Ed Anderson's proposal was selected by the Urban Trail Design committee to be most consistent with the Urban Trail theme. Those submitting design proposals are listed below:

Contractor	Proposal
Ed Anderson/Kenn Kotara Design	$39,400
Pam Myers	No Construction Estimate
Tucker Cooke	No Construction Estimate

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget in accordance with the N. C. Dept. of Transportation Project E-4138 Urban Trail Grant.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into an agreement with Ed Anderson.

Motorola Service Agreement Renewal

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $11,553.90 per month.

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. Effective with the service agreement covering the period of September 1994 through August 1995, the maintenance cost per unit of equipment has remained fixed. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2001, through August 31, 2002, remains fixed at the original cost per unit.

This renewal agreement reflects a monthly decrease of $1,057.40. This is due to the fact that some radio equipment was dropped from maintenance this year, but the agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The monthly cost of this service is $11,553.90.

56

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

Budget Amendment for Social Work & Police Partnership Grant

Summary: The consideration of a budget amendment appropriating local matching funds in support of the Social Work and Police Partnership grant for the project's second year.

This amendment will provide the local match of $13,850 required for the second year of this grant funded project. The purpose of the project is to reduce family violence issues contributing to chronic juvenile runaway behavior.

The source of the local match is revenue received from North Carolina's Office of the State Treasurer pursuant to N. C. Gen. Stat. sec. 105-113.105, Unauthorized Substances Taxes.

City staff recommends adoption of the budget amendment.

Speed Limit Changes

Summary: The consideration of an ordinance to reduce speed limits on several city streets.

The streets listed below have been identified for speed concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions and/or speed studies. Many of these streets which exhibit the worst speeding problems are also being evaluated and prioritized for the installation of traffic calming measures per the Neighborhood Traffic Calming Policy. Determination of the appropriate speed limits for streets is one of the steps outlined in the Policy. The Police Department concurs with these recommendations.

10 Miles Per Hour
The following street is a residential alley that has a combination of street geometry features which warrants a very low speed limit. The alley is very narrow with driveways and garages that offer very little sight distance for vehicles entering the alley. In order to ensure safety, traffic on the alley should travel at a speed at which drivers can easily react to vehicles pulling or backing out of driveways or other activities that occur on the alley. The recommended safe operating speed on this street is 10 mph:

1. Cumberland Alley

15 Miles Per Hour
The following street is a downtown street that is designed as a pedestrianized street where the delineation between vehicular traffic and pedestrian traffic is minimal. Therefore, extremely slow vehicular speeds are necessary on this street. The recommended safe operating speed on this street is 15 mph:

2. Wall Street

20 Miles Per Hour
The following streets are local residential streets that have a combination of street geometry features which warrants speed limits slower than the typical speed limit for local residential

streets of 25 mph. These features may include narrow widths, frequent on-street parking, poor sight distance, lack of sidewalks, steep grades, or horizontal or vertical curves. The recommended safe operating speed on these streets is 20 mph:

3. Arthur Road
4. Balm Grove Avenue
5. Harmon Circle
6. Pennsylvania Place
7. Richmond Avenue
8. Sunset Summit
9. Westover Drive
10. Westwood Road

25 Miles Per Hour

Most of the following streets are typical local residential streets without street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. A few of these streets are residential collector streets which have a combination of street geometry features which warrants speed limits slower than the typical speed limit for residential collector streets of 30 mph. The recommended safe operating speed on these streets is 25 mph:

11. Blanton Street
12. Castle Street
13. Chestnut Street, between Furman Avenue and Charlotte Street
14. Chestnut Street, between Montford Avenue and Pearson Drive
15. Country Club Road
16. Craggy Avenue
17. Cub Road
18. Debra Lane
19. Edgemont Road
20. Flint Street
21. Holborn Avenue
22. Kentmere Lane
23. Kenton Lane
24. Majestic Avenue
25. Maney Avenue
26. Middlemont Avenue
27. Mountain Terrace Road
28. Oakmont Terrace
29. Pennsylvania Avenue
30. Phifer Street
31. Tanglewood Drive
32. West Chapel Road, between London Road and Caribou Road
33. West Chapel Road, between Caribou Road and Sweeten Creek Road
34. White Pine Drive
35. Whitson Road
36. Wild Cherry Road

30 Miles Per Hour

The following streets are typical residential collector streets without significant street geometry problems. The recommended safe operating speed on typical residential collector streets is 30 mph:

37. Cisco Road
38. Dover Street
39. London Road, between Bellview Road and West Chapel Road
40. Pinecroft Road
41. Rock Hill Road, between Sweeten Creek Road and West Chapel Road

42. South French Broad Avenue, between Choctaw Street and Livingston Street
43. Wolfe Cove Road
44. West Chapel Road, between Hendersonville Road and London Road

The Engineering Department requests that City Council approve the ordinance amending these speed limit changes.

Upon inquiry of Councilwoman Bellamy, Traffic Engineer Michael Moule said that in an effort to let people know of the changes, a press release will be prepared.

Truck Traffic Prohibited on Residential Streets

Summary: The consideration of an ordinance to prohibit through truck traffic on additional residential streets.

The Traffic Engineering staff has conducted field reviews and collected data on the streets listed below. These streets are residential streets that are not appropriate for truck traffic. Alternative roadways exist that are more appropriate for truck traffic.

1. Beaucatcher Road
2. College Street, between Beaucatcher Road and US-70 (College Street)
3. Mineral Springs Road, between Shaft Street and Beaucatcher Road
4. Montana Avenue
5. St. Dunstans Road

The Engineering Department requests that City Council approve the ordinance prohibiting trucks on various residential streets.

School Zone Speed Limit

Summary: The consideration of an ordinance to create additional school zones on several streets in the City.

The Traffic Engineering staff has performed the necessary traffic analysis and field review to determine locations for this school zone. For some of the streets listed below, the North Carolina Department of Transportation (NCDOT) has indicated that they plan to pass the school speed ordinances. The City Council must pass concurring ordinances in order for this process to be completed. The following streets have been identified for school speed zones during the times when students typically go to and leave school:

- T.C. Roberson High School – 25 mph between the hours of 7:30 a.m. and 8:30 a.m. and between the hours of 2:00 p.m. and 4:00 p.m. on school days.
    - Springside Road – between Springside Park and Overlook Road.
    - Overlook Road – between Briarcliff Drive and Long Shoals Road.
    - Long Shoals Road – between Overlook Road and a point 300 feet east of Miami Circle.
- Asheville Catholic School. Beaverdam Road (SR 2230) – 25 mph between Temple Avenue and a point 0.05 mile north of Culvern Street between the hours of 7:30 a.m. and 8:15 a.m. and between the hours of 2:45 p.m. and 3:30 p.m.
- Haw Creek Elementary School. New Haw Creek Road (SR 2032) – 25 mph between a point 0.18 mile north of Beverly Road and a point 0.38 mile north of Beverly Road, between the hours of 7:30 a.m. and 8:15 a.m. and between the hours of 2:15 p.m. and 3:00 p.m.

The Engineering Department requests that City Council approve the ordinance adding the above school zones.

Sewer Easement at Livingston Street Park

Summary: The consideration of a resolution authorizing sewer easement at Livingston Street Park.

During the summer, a sewer line that ran across Nasty Branch on or near the edge of Livingston Street Ballfield failed. Some emergency maintenance returned it to barely functional condition, but MSD has determined that that section of the line needs to be replaced in order to effect a satisfactory and lasting repair. In order to avoid demolishing a bridge, the new line is proposed to be located slightly further within the park boundary. It will be buried. Parks and Recreation staff have reviewed the proposed new location, and confirm that it will not interfere with the City's use of the park. MSD is requesting both a temporary construction easement and a permanent easement.

Adoption of the resolution is recommended.

Kenilworth Inn at 60 Caledonia Road as a Local Historic Landmark

Summary: The consideration of a public hearing on October 23, 2001, to consider an ordinance designating the Kenilworth Inn located at 60 Caledonia Road, Asheville, N.C., as a local historic landmark.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

HOUSING TRUST FUND

Due to a conflict of interest, Councilman Worley moved to excuse Councilwoman Bellamy from participating in this matter. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to offer construction loans for in-fill new housing construction from the Housing Trust Fund program.

As part of the 2001-02 budget, City Council approved an allocation of $400,000 to be added to the City's Housing Trust Fund. An additional $100,000 will be repaid from earlier loans by the end of December, making a total of at least $500,000 available for lending in this fiscal year.

The Housing and Community Development Committee (H & CD Committee) has reviewed the first year's program and proposes the following action to allocate this year's funds.

1) General policies and procedures for the management and use of the Fund will remain unchanged;
2) Approximately $250,000 will be allocated in interest-free construction loans for developers of new housing for rent or for home-ownership on small in-fill sites on existing streets;
3) In conjunction with the loan offer, the City will offer to sell some potential in-fill sites which it owns;

4) The remaining funds will be reserved to assist suitable larger scale affordable housing projects as they are presented. The replacement of single room occupancy (SRO) units lost during the past year is seen as a high priority if suitable locations are available.

She reported the following suggested changes for the second year program: (1) emphasize construction loans for rapid pay-back of a large part of funds; (2) focus on projects where for-profits can readily compete with non-profits; (3) extend homeownership targeting into median income range; (4) include outside expertise on application review panel; and (5) retain some funds for flexible use as other good projects are presented.

Applications for loans will be reviewed by the H & CD Committee, which will make recommendations to Council for the award of the loans in February or March 2002.

City staff recommends City Council approve the resolution to offer Housing Trust Funds loans for the construction of new housing on in-fill sites.

Councilman Hay, member of the H & CD Committee, explained in detail why the Committee is recommending the allocation of this year's funding, realizing that the money is City money and they are not tied down to rules and regulations like Community Development Block Grant and HOME funds.

Councilwoman Field, Chair of the H & CD Committee, brought to Council's attention some issues raised to her: (1) zero percentage interest; (2) how long do we let people go without accessing the funds allocated; (3) accessibility issue; (4) concerns raised about the point system; and (5) how do we deal with partnerships.

Discussion occurred regarding deferred loans, how to get for-profits involved, and zero interest loans.

Councilwoman Field felt that as the years progress, we will see more activity in this fund, especially if Buncombe County becomes involved.

Councilwoman Bellamy felt City Council needed a worksession on affordable housing in general, to include what are tax credits, how do they work and how are they leveraged. Mayor Sitnick suggested the H & CD Committee structurally organize the topics and then have staff schedule it for a worksession. Councilwoman Bellamy asked to participate in this organization.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

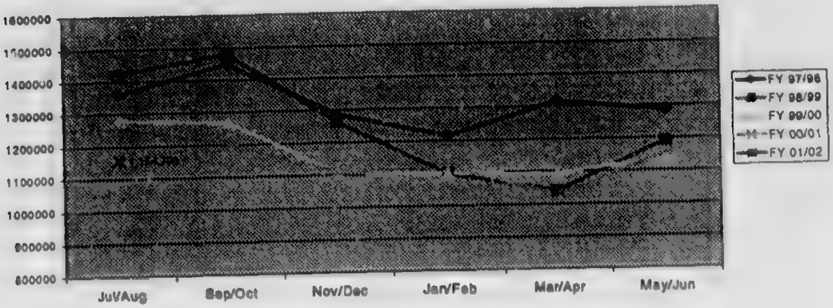
UPDATE ON WATER CONSUMPTION TRENDS

Interim Director of Water Resources David Hanks said that this is an update on water consumption trends that shows a decline in demand for water in recent months.

The Fiscal ear 2002 Water Fund Budget of $21,801,019, which was approved by the City Council in June 2001, is based on the assumption that the average annual growth rate in demand for all customer classes will be approximately 1.2%. This projection was based on historical growth in demand over the past six years.

According to demand data collected in recent months, this projection may need to be adjusted downward. He reviewed a chart which shows water consumption from Fiscal Year 1997-98 through the first bimonthly period of Fiscal year 2001-02.

Total Bimonthly Consumption in Ccf



The number of customers added to the water system has increased as predicted each year, so growth in our service area is occurring. However, consumption has either leveled off or declined. Declines in consumption are due primarily to the loss of some of our largest industrial water users as well as to the conservation efforts of customers. The sharp drop in demand that occurred in January/February 1999 was due largely to the conservation measures put into place by customers in response to a severe drought that required the implementation of water restrictions and surcharges in December 1998. The loss of two of the largest industrial water users is reflected in Fiscal Year 1999-00 demand figures, and the Fiscal Year 2000-01 demand figures reflect a 70% reduction in water consumption by a third large industrial user. In addition to the loss of three major water users, several other industrial customers implemented permanent water efficiency measures. Single-family residential consumption was estimated to increase 1.2% annually following the drought of 1998-99; however, it has leveled off and has not grown at all.

An aggressive water conservation program during and following the drought of 1998-99 has contributed to changing water use patterns in both the residential and non-residential sectors. This decline in consumption has been offset somewhat by an increase in consumption in the commercial light and multi-family residential sectors. Now it appears that demand across all customer classes has either leveled off or dropped. If growth does not occur as predicted or if it continues to decline, a revenue shortfall will occur. Depending upon what happens with demand over the next few months, revenue could be $500,000 to $1,000,000 below what was projected.

Staff has been taking steps to reduce operating expenses over the past few months in order to offset possible deficits in revenue. Purchases of some capital equipment are being postponed and some positions are being held vacant. There was $1.25 million budgeted for replacement of our aging infrastructure this year, and some of these capital improvements may need to be deleted or postponed.

Mayor Sitnick asked City staff to explore the costs of setting up a water bottling company.

Staff will be closely monitoring consumption over the next several months and will notify Council if further budget adjustments are necessary to offset a possible revenue shortfall.

UPDATE ON FISCAL YEAR 2000-01 TRAFFIC CALMING PROJECTS

Traffic Engineer Michael Moule said that the purpose of this report is to update City Council on the status of the 2001 Traffic Calming Projects.

South French Broad Avenue – Citizens collected the 40% signatures needed to initiate project development. The first public meeting was held on April 2, 2001, the YWCA. The preliminary design was completed by staff and a second meeting was held with the community on July 26, 2001. Staff delivered the petitions to the neighborhood contact person in August. The residents are in the process of obtaining the 60% signatures required to advance this project to the final design and construction phase. We are waiting to receive the signed petitions from the community.

Gracelyn Road - Citizens collected the 40% signatures needed to initiate project development. The first public meeting was held on April 19, 2001 at Grace Episcopal Church. The preliminary design was completed by staff and a second meeting was held with the community on July 9, 2001. We sent the petitions to neighborhood residents in August. They are in the process of obtaining the 60% signatures required to advance this project to the final design and construction phase. So far, about half of the necessary signatures have been received from the residents. We are waiting to receive the remainder of the signed petitions from the community.

Caribou Road - Citizens collected the 40% signatures needed to initiate project development. The first public meeting was held on March 12, 2001, at the Shiloh Recreation Center. The preliminary design was completed by staff and a second meeting was held with the community on July 19, 2001. We sent the petitions to neighborhood residents in September. They are in the process of obtaining the 60% signatures required to advance this project to the final design and construction phase. We are waiting to receive the signed petitions from the community.

Florida Avenue - Citizens collected the 40% signatures needed to initiate project development. The first public meeting was held on March 5, 2001. The preliminary design was completed by staff and a second meeting was held with the community on July 12, 2001. We sent the petitions to neighborhood residents in September. They are in the process of obtaining the 60% signatures required to advance this project to the final design and construction phase. We are waiting to receive the signed petitions from the community.

Wyoming Avenue - Citizens collected the 40% signatures needed to initiate project development. The first public meeting was held on March 26, 2001. The preliminary design was completed by staff and a second meeting was held with the community on July 16, 2001. There was a fair amount of opposition to the project at this meeting. Staff has been unable to identify enough residents willing to distribute the petitions in order to obtain the 60% signatures required to advance this project to the final design and construction phase. This is a relatively small petition area and staff will be taking on the task of gathering signatures in order to see if this project can move forward.

Wood Avenue - Staff was unable to get enough citizens willing to gather signatures toward the 40% signatures to initiate project development. Without this support from within the neighborhood, the project has been cancelled for this year. Staff anticipates that as more traffic calming projects are installed in Asheville, there will be more resident support for these projects. It may be a good idea to select this area for a project in upcoming years.

This has been our first year of implementation for the Traffic Calming Policy. As a result, the projects have moved along more slowly than we originally anticipated. However, we think that the time commitment will result in several successful traffic calming projects for this community.

A brief discussion was held about other ways to get community support other than getting signatures on a petition and also if staff is looking at creative ways to fund more traffic calming projects.

SELECTED TRAFFIC CALMING PROJECTS FOR FISCAL YEAR 2001-0

Traffic Engineer Michael Moule described the procedures in Asheville's Neighborhood Traffic Calming Policy adopted by City Council in February 2000. Engineering Department staff have preliminarily selected street segments for traffic calming projects for this fiscal year. He then summarized his report on the street segment ranking and project selection process, described the selected project areas, and described the time frame for implementing these projects during this fiscal year.

The Neighborhood Traffic Calming Policy clearly outlines the rating criteria for prioritizing street segments for traffic calming. The streets segments are rated on speed and volume of existing traffic as determined by electronic tube counters, crash history, nearby pedestrian generators, roadway geometry, residential density, and the presence of existing sidewalks. Traffic Engineering staff has collected speed and volume data on approximately 175 street segments. Of these, 136 street segments met the initial threshold for going through the full ranking process. All of the rating criteria except crash history have been evaluated for all 133 segments.

At this time, City staff does not have access to any crash report databases that can provide the necessary information with a reasonable amount of staff time and effort. An appropriate database may be forthcoming, but to complete the rankings used to select this year's projects, staff used the following process. First, the street segments were ranked based on the point total for all criteria except crash history. Then, the top 26 were selected at a threshold where it could reasonably be assumed that projects below that threshold could not move up high enough to be selected (based on the fact that only 10 points out of a total possible 100 points are available for crash history). A staff person went through the tedious process of reviewing each crash report on or near those 26 street segments, identifying the crashes that occurred on each street segment. Finally, these 26 street segments were ranked based on the total points for all seven rating criteria.

The Traffic Calming Policy states that once the prioritized list is complete, projects will be selected based on the rankings and several other factors. One of these factors is regional equity; traffic calming projects should be dispersed throughout the City. In addition, the Policy is intended to provide traffic calming on both residential local service streets and residential collector streets, but the rating criteria will generally rank collector streets higher. Therefore, some flexibility in the project selection is necessary to realize the goal of regional equity and to be sure to include projects on residential local service streets. This flexibility is the reason why some street segments with lower rankings were selected instead of streets with higher rankings.

The selected street segments are listed below in order of the ratings they received in the prioritization process discussed above. Additional street segments that may be included in each project are also described.

- **Kenilworth Road**: This residential collector street is located in the Kenilworth neighborhood in central Asheville. It carries fairly high traffic volumes of through traffic due to its use as part of a popular short cut through the Kenilworth neighborhood. The highest ranked segment of Kenilworth Road is between Aurora Drive and Beaucatcher

Road, and the segment between Wyoming Road and Aurora Drive is also ranked very high. In order to maintain project continuity, the segment from Forest Hill Drive to Wyoming Road will also be included. The anticipated project limits are from Forest Hill Drive to Beaucatcher Road.

- **Fairview Avenue**: This street is located in the Oakley Community in east Asheville. This is a local service residential street that runs parallel to Fairview Road, a minor arterial in Oakley. A fair amount of traffic uses this street as a short cut. The selected street segment is from Fairview Road to Cedar Street. The segment of Fairview Avenue from Cedar Street to Stevens Street and Stevens Street itself will be evaluated for inclusion in this project. Two nearby streets (Wood Avenue and Cedar Street) were selected for a traffic calming project for FY 2000-2001. However, City staff could not get enough community support to move forward with this project. Staff feels that it will be easier to gain support on Fairview Avenue. A successful traffic calming project on Fairview Avenue, could help bolster support for nearby streets, possibly allowing the City to select Wood Avenue and Cedar Street in an upcoming year.
- **Murdock Avenue**: This is a north Asheville street that carries collector street volumes but has the features of a typical residential local service street. The segment of Murdock from Evelyn Place to Hillside Street was selected based on its ranking, but the project will also include the segment from Merrimon Avenue to Evelyn Place, which also garnered a fairly high ranking. It is anticipated that this street can be treated without having significant negative affects on nearby streets.
- **Wellington Street**: This west Asheville street is built like a typical residential local service street but carries fairly high volumes. The segment from State Street to Ridgelawn Road was selected. Wellington Street from Ridgelawn Road to Haywood Road and Ridgelawn Road itself will be evaluated for inclusion in this project.

It is very critical that the next steps in the project development process happen in a timely manner. Immediately after presenting the selected projects to City Council, Engineering Department staff will contact residents who live in the vicinity of the selected projects and who have previously contacted the Engineering Department about traffic concerns. An educational meeting is scheduled for October 15 where residents from all project areas will attend and be informed about the process for project development. Before or soon after this meeting, a citizen committee for each project will be formed to assist City staff in contacting other residents and garnering support. City Staff will meet with these committees to finalize the petition area and the committees will be sent out to gather signatures toward the 40% of households needed to hold public meetings. It is the goal of the Engineering Department to have signatures in hand and initial project development public meetings scheduled to occur in December or January. This will allow the second public meetings to occur in late spring with anticipated construction during the summer of 2002.

COMMUNITY MEETING

It was the consensus of City Council to cancel the Tuesday, October 30, 2001, community meeting.

UPDATE ON 2025 CITY PLAN

Planning & Development Director Scott Shuford said that the City Plan Advisory Committee (CPAC) continues to work very hard as a full group and in subcommittees developing the public involvement program for this comprehensive plan update project. This planning work is nearly complete and CPAC has reached the following decisions regarding public involvement:

✓ An **informational video** has been produced to stimulate interest in and provide an educational opportunity for the City Plan project. This video will begin airing on Channel 20 early October as public relations for the public forums and input opportunities described below.

✓ **Public forums** will be held the second full week in November. These forums will be geographically distributed (north, east, south and west) and two forums will be held in each area. There will be early afternoon and early evening forums in each geographic area; this is intended to maximize the opportunity for participation. A final forum will be held on a Saturday morning in a central location. Staff is in the process of determining locations for these meetings.

✓ **Forum content** will consist of: Introductory **statements; a review** of the video; small group discussions; and large group prioritization of issues. On September 26, CPAC held a "dry run" of this format and will make a few minor adjustments to insure smoothly-running forums. Feedback from the forums will be posted on the City Plan website.

✓ Public comment will also be taken through the Internet (a **City Plan website** will be created) and through hard copy **survey forms**. We will also open a storefront office called the "**Plan-A-Terrium**" where a variety of City plans will be displayed and where there will be opportunities for people to be educated about the planning process.

✓ After this initial public input, staff will develop a draft plan over the winter months. This plan will be reviewed by CPAC for consistency with the public comments and then it will receive a public review at several well-promoted meetings. CPAC will make a final recommendation on the plan and it will be forwarded to the Planning and Zoning Commission for their review and recommendation, then on to Council for consideration and adoption. We anticipate having our public review meetings in the early spring and having the plan to Council in late spring.

Mr. Shuford then showed the informational video.

When Councilwoman Bellamy said that she had several observations with regard to the video, Mr. Shuford said that he would be happy to meet with her.

REPORTS ON BOARDS AND COMMISSIONS

It was the consensus of City Council to have City Attorney Oast prepare an amendment to the River District Design Review Committee to include two neighborhood representatives.

City Council instructed the City Clerk to distribute the current Civic Center Commission resource list to members of Council as there is a vacancy on this Commission.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 5:25 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

66

Wednesday – October 10, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Barbara Field

INVOCATION

Councilman Peterson gave the invocation.

MISCELLANEOUS ITEMS

Mayor Sitnick noted that Councilwoman Barbara Field is not at this meeting due to her father's illness.

Mayor Sitnick recognized the 6th graders of Carolina Day School.

I. PROCLAMATIONS:

A. PRESENTATION OF AWARD FROM AMERICANSTYLE MAGAZINE

Ms. Marilyn Patton, owner of Grovewood Galleries, presented Mayor Sitnick, on behalf of the City of Asheville, an award as Asheville was chosen as the 8th top arts destination.

B. PROCLAMATION PROCLAIMING OCTOBER 10, 2001, AS "JOHN LANTZIUS DAY"

Mayor Sitnick read the proclamation proclaiming October 10, 2001, as "John Lantzius Day" in the City of Asheville in honor of his work in downtown Asheville. She presented the proclamation to Mr. Lantzius.

Mayor Sitnick asked the City Attorney to draft an ordinance that will allow the City to require removal of graffiti on private property.

C. JOHN BENJAMIN LEWIS SOCCER CENTER

Mr. Lloyd Sigman, President of the WNC Soccer Foundation, recognized Ben and Becky Lewis.

Mr. and Mrs. Lewis said that in honor of their late son, they pledged $350,000 ($35,000 over ten years) to establish and maintain the John Benjamin Lewis Soccer Center at Azalea Road Park. His 16-year old son, who was killed in an automobile accident three years ago, was an avid soccer player and in honor of his spirit to create a positive and enduring community legacy in his beloved memory, and to begin the foundations fund-raising efforts, they pledged the $350,000.

On behalf of the entire Council and community, Mayor Sitnick thanked Mr. and Mrs. Lewis for their generous gift.

D. GRANT FROM SUZANNE MARCUS COLLINS FOUNDATION

Mr. Peter D. Collins, Executive Director of the Suzanne Marcus Collins Foundation, pledged $175,000 to cover the costs of the programming related to the performing arts center in the next phase of the Civic Center project. He said his organization was thrilled at the prospect of a new performing arts center.

On behalf of the entire Council and community, Mayor Sitnick thanked Mr. Collins for this generous support.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 25, 2001, AND THE WORKSESSION HELD ON OCTOBER 2, 2001

B. RESOLUTION NO. 01-152 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ED ANDERSON TO CONSTRUCT THE PUBLIC ART FOR URBAN TRAIL STATION 21 AT THE INTERSECTION OF MARKET STREET AND WALNUT STREET

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Ed Anderson to construct the public art for Urban Trail Station 21 at the intersection of Market and Walnut Streets.

The City is in need of an artist to construct the Station 21 public art piece to be located on the right-of-way of Walnut Street at Market Street. In accordance with N.C. Gen. Stat. sec. 143-64.32, proposals were solicited. Ed Anderson's proposal was selected by the Urban Trail Design committee to be most consistent with the Urban Trail theme. Those submitting design proposals are listed below:

Contractor	Proposal
Ed Anderson/Kenn Kotara Design	$39,400
Pam Myers	No Construction Estimate
Tucker Cooke	No Construction Estimate

Funding for this project has already been allocated in the Public Works Department's Capital Improvement budget in accordance with the N. C. Dept. of Transportation Project E-4138 Urban Trail Grant.

The Public Works Department staff recommends City Council adopt the resolution authorizing the City Manager to enter into an agreement with Ed Anderson.

RESOLUTION BOOK NO. 26 – PAGE 466

C. RESOLUTION NO. 01-153 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SERVICE AGREEMENT RENEWAL WITH MOTOROLA COMMUNICATIONS AND ELECTRONICS INC. TO PROVIDE MAINTENANCE TO THE CITY'S RADIO COMMUNICATION SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to execute a service agreement renewal with Motorola Communications and Electronics, Inc. to provide maintenance of the City's radio communication system for another year at a cost of $11,553.90 per month.

68

Motorola Communications and Electronics, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. Effective with the service agreement covering the period of September 1994 through August 1995, the maintenance cost per unit of equipment has remained fixed. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2001, through August 31, 2002, remains fixed at the original cost per unit.

This renewal agreement reflects a monthly decrease of $1,057.40. This is due to the fact that some radio equipment was dropped from maintenance this year, but the agreement covers additional equipment purchased by the City that has come out of warranty during the past year. The monthly cost of this service is $11,553.90.

Funds have been appropriated in the Finance Department, Information Services Division, in Account No. 110-1005-415-3001 C44108 to cover the monthly cost of this agreement.

City staff recommends City Council adopt the resolution which authorizes the City Manager to execute a renewal of the service agreement with Motorola Communications and Electronics, Inc. to provide maintenance to the City's radio communication system.

RESOLUTION BOOK NO. 26 – PAGE 467

D. ORDINANCE NO. 2856 - ORDINANCE REDUCING SPEED LIMITS ON VARIOUS CITY STREETS

Summary: The consideration of an ordinance to reduce speed limits on several city streets.

The streets listed below have been identified for speed concerns by residents, City boards and commissions, City Council, the Asheville Police Department, Transportation Services Division staff, or other City staff. Transportation Services Division staff has conducted field reviews of street geometry and conditions and/or speed studies. Many of these streets which exhibit the worst speeding problems are also being evaluated and prioritized for the installation of traffic calming measures per the Neighborhood Traffic Calming Policy. Determination of the appropriate speed limits for streets is one of the steps outlined in the Policy. The Police Department concurs with these recommendations.

10 Miles Per Hour
The following street is a residential alley that has a combination of street geometry features that warrants a very low speed limit. The alley is very narrow with driveways and garages that offer very little sight distance for vehicles entering the alley. In order to ensure safety, traffic on the alley should travel at a speed at which drivers can easily react to vehicles pulling or backing out of driveways or other activities that occur on the alley. The recommended safe operating speed on this street is 10 mph: Cumberland Alley

15 Miles Per Hour
The following street is a downtown street that is designed as a pedestrianized street where the delineation between vehicular traffic and pedestrian traffic is minimal. Therefore, extremely slow vehicular speeds are necessary on this street. The recommended safe operating speed on this street is 15 mph: Wall Street

20 Miles Per Hour
The following streets are local residential streets that have a combination of street geometry features which warrants speed limits slower than the typical speed limit for local residential streets of 25 mph. These features may include narrow widths, frequent on-street parking, poor

sight distance, lack of sidewalks, steep grades, or horizontal or vertical curves. The recommended safe operating speed on these streets is 20 mph:

Arthur Road
Balm Grove Avenue
Harmon Circle
Pennsylvania Place
Richmond Avenue
Sunset Summit
Westover Drive
Westwood Road

25 Miles Per Hour

Most of the following streets are typical local residential streets without street geometry problems. The appropriate speed limit for typical local residential speeds is 25 mph. A few of these streets are residential collector streets which have a combination of street geometry features which warrants speed limits slower than the typical speed limit for residential collector streets of 30 mph. The recommended safe operating speed on these streets is 25 mph:

Blanton Street
Castle Street
Chestnut Street, between Furman Avenue and Charlotte Street
Chestnut Street, between Montford Avenue and Pearson Drive
Country Club Road
Craggy Avenue
Cub Road
Debra Lane
Edgemont Road
Flint Street
Holborn Avenue
Kentmere Lane
Kenton Lane
Majestic Avenue
Maney Avenue
Middlemont Avenue
Mountain Terrace Road
Oakmont Terrace
Pennsylvania Avenue
Phifer Street
Tanglewood Drive
West Chapel Road, between London Road and Caribou Road
West Chapel Road, between Caribou Road and Sweeten Creek Road
White Pine Drive
Whitson Road
Wild Cherry Road

30 Miles Per Hour

The following streets are typical residential collector streets without significant street geometry problems. The recommended safe operating speed on typical residential collector streets is 30 mph:

Cisco Road
Dover Street
London Road, between Bellview Road and West Chapel Road

70

Pinecroft Road
Rock Hill Road, between Sweeten Creek Road and West Chapel Road
South French Broad Avenue, between Choctaw Street and Livingston Street
Wolfe Cove Road
West Chapel Road, between Hendersonville Road and London Road

The following street is a residential arterial street that is maintained by the North Carolina Department of Transportation. The NCDOT has made a request to the City to pass a concurring ordinance to make the speed limit 30 mph.

Brevard Road (N.C. 191), from the westbound I-240 exit ramps, northward to US 19-23 Business in Asheville

The ordinance also includes several changes that are necessary to take out obsolete references to streets and clean up other errors.

The Engineering Department requests that City Council approve the ordinance amending these speed limit changes.

ORDINANCE BOOK NO. 19 – PAGE 296

E. ORDINANCE NO. 2857 - ORDINANCE PROHIBITING TRUCK TRAFFIC ON VARIOUS CITY STREETS

Summary: The consideration of an ordinance to prohibit through truck traffic on additional residential streets.

The Traffic Engineering staff has conducted field reviews and collected data on the streets listed below. These streets are residential streets that are not appropriate for truck traffic. Alternative roadways exist that are more appropriate for truck traffic.

1. Beaucatcher Road
2. College Street, between Beaucatcher Road and US-70 (College Street)
3. Mineral Springs Road, between Shaft Street and Beaucatcher Road
4. Montana Avenue
5. St. Dunstans Road

The Engineering Department requests that City Council approve the ordinance prohibiting trucks on various residential streets.

ORDINANCE BOOK NO. 19 – PAGE 300

F. ORDINANCE NO. 2858 - ORDINANCE CREATING ADDITIONAL SCHOOL ZONES ON SEVERAL STREETS IN THE CITY

Summary: The consideration of an ordinance to create additional school zones on several streets in the City.

The Traffic Engineering staff has performed the necessary traffic analysis and field review to determine locations for this school zone. For some of the streets listed below, the North Carolina Department of Transportation (NCDOT) has indicated that they plan to pass the school speed ordinances. The City Council must pass concurring ordinances in order for this process to be completed. The following streets have been identified for school speed zones during the times when students typically go to and leave school:

- T.C. Roberson High School – 25 mph between the hours of 7:30 a.m. and 8:30 a.m. and between the hours of 2:00 p.m. and 4:00 p.m. on school days.
    - Springside Road – between Springside Park and Overlook Road.
    - Overlook Road – between Briarcliff Drive and Long Shoals Road.
    - Long Shoals Road – between Overlook Road and a point 300 feet east of Miami Circle.
- Asheville Catholic School. Beaverdam Road (SR 2230) – 25 mph between Temple Avenue and a point 0.05 mile north of Culvern Street between the hours of 7:30 a.m. and 8:15 a.m. and between the hours of 2:45 p.m. and 3:30 p.m.
- Haw Creek Elementary School. New Haw Creek Road (SR 2032) – 25 mph between a point 0.18 mile north of Beverly Road and a point 0.38 mile north of Beverly Road, between the hours of 7:30 a.m. and 8:15 a.m. and between the hours of 2:15 p.m. and 3:00 p.m.

The Engineering Department requests that City Council approve the ordinance adding the above school zones.

ORDINANCE BOOK NO. 19 – PAGE 301

G. ORDINANCE NO. 2859 - BUDGET AMENDMENT TO SUPPORT THE SOCIAL WORK AND POLICE PARTNERSHIP GRANT PROJECT

Summary: The consideration of a budget amendment appropriating local matching funds in support of the Social Work and Police Partnership grant for the project's second year.

This amendment will provide the local match of $13,850 required for the second year of this grant funded project. The purpose of the project is to reduce family violence issues contributing to chronic juvenile runaway behavior.

The source of the local match is revenue received from North Carolina's Office of the State Treasurer pursuant to N. C. Gen. Stat. sec. 105-113.105, Unauthorized Substances Taxes.

City staff recommends adoption of the budget amendment.

ORDINANCE BOOK NO. 19 – PAGE 303

H. RESOLUTION NO. 01-154 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A SEWER EASEMENT AT LIVINGSTON STREET PARK

Summary: The consideration of a resolution authorizing sewer easement at Livingston Street Park.

During the summer, a sewer line that ran across Nasty Branch on or near the edge of Livingston Street Ballfield failed. Some emergency maintenance returned it to barely functional condition, but MSD has determined that that section of the line needs to be replaced in order to effect a satisfactory and lasting repair. In order to avoid demolishing a bridge, the new line is proposed to be located slightly further within the park boundary. It will be buried. Parks and Recreation staff have reviewed the proposed new location, and confirm that it will not interfere with the City's use of the park. MSD is requesting both a temporary construction easement and a permanent easement.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 26 – PAGE 468

I. RESOLUTION NO. 01-155 - RESOLUTION FIXING DATE OF PUBLIC HEARING FOR OCTOBER 23, 2001, ON THE QUESTION OF VOLUNTARY ANNEXATION OF PROPERTY KNOWN AS BRAESIDE, SECTION 6 OF BILTMORE PARK

RESOLUTION BOOK NO. 26 – PAGE 470

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A TELECOMMUNICATIONS TOWER TO BE LOCATED AT 740 TUNNEL ROAD, ASHEVILLE, N.C.

At the request of City staff, this public hearing will need to be postponed until further notice and advertisement.

B. PUBLIC HEARING TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO EXEMPT AGRICULTURAL USES FROM ZONING REGULATION, DEFINE ANIMAL FEEDING OPERATION, ADD RESEARCH AND TECHNOLOGY PRODUCTION AS A PERMITTED USE IN CERTAIN BUSINESS DISTRICTS AND TO ELIMINATE LEVEL III SITE PLAN REVIEW OF INDUSTRIAL USES

ORDINANCE NO. 2860 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO EXEMPT AGRICULTURAL USES FROM ZONING REGULATION AND TO DEFINE ANIMAL FEEDING OPERATION

Mayor Sitnick opened the public hearing at 5:30 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to exempt agricultural uses from zoning regulation, to define confined animal feeding operation, to add research and technology production as a permitted use in certain business districts, and to eliminate level III site plan review of industrial uses. This public hearing was advertised on September 28 and October 5, 2001.

The proposed ordinance amendment would make several small changes in the UDO in an effort to address several small issues that have been identified by the staff and the public. These changes, though minor, will make it easier to undertake a variety of business activities in the City of Asheville and its jurisdiction while protecting the public interest. The proposed changes and the impacts of each change are described below:

- Exemption of bona fide agricultural uses from zoning regulation. This amendment codifies the City's existing approach to regulation of bona fide agricultural uses. An agricultural use recognized as such for tax purposes would be exempt from all zoning regulations. In order to recognized as a bona fide agricultural use, the use would have to meet minimum acreage, income, and production standards. Confined animal feeding operations would not be exempt from zoning regulation.

- Confined animal feeding operations are defined as operations where the animal (or poultry) is confined inside a building for at least 60% of its life with waste products collected from the building and treated either on-site or off-site. Operations of this type can produce adverse environmental impacts and therefore would not be exempt from zoning regulation.
- Research and technology production uses are identified as permitted uses in several business districts. As our economy changes, we find that most high tech production activities do not create the type of adverse impacts typically associated with manufacturing and production activities. Research and technology production is often carried out in conjunction with retail operations. The proposed change would permit research and technology production uses in the Community Business II and higher intensity business districts, providing more opportunities for the location of businesses of this type.
- Elimination of the requirement that large industrial development projects be subject to the level III site plan review process. The level III site plan review process requires projects with potential community wide impacts to be reviewed and approved by City Council as conditional uses. Requirements already in place for industrial development projects would ensure that any impacts of these developments would be mitigated and industrial zones are located in areas that minimize the potential for such impacts. Elimination of this requirement would ensure that the City is committed to proactive economic development.

The proposed amendments would address issues that have come to staff's attention during the extension of the City's extraterritorial jurisdiction area and through discussions with persons involved in economic and industrial development. In presenting these amendments, the staff is being responsive to the reasonable needs of the community.

At their August 23, 2001, meeting, the Planning and Zoning Commission voted 6 to 0 to recommend approval of the wording amendment. The Planning and Development staff recommends approval of the wording amendment.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford gave examples of industrial developments that would not be receiving Level III site plan review. He said that there would still be public input through the Technical Review Committee (TRC) process. Public notice will still be given to the surrounding property owners and they would have the opportunity to come to the TRC Committee to make comments. He said even though the City cannot put conditions on the developer above what the ordinances require, the developer could take into account comments made by the public at that meeting.

Mr. Shuford responded to questions/comments from Council, some being, but are not limited to: what other districts are industrial development projects allowed in, what requirements are already in place that will ensure that the impact of industrial development projects would be mitigated, what is the appeal process for the developer if the TRC denies the project because it doesn't meet requirements, and describe the notification process for public comment.

Councilman Peterson noted that even though City Council has approved several conditional use permits, the Council has been able to approve them with conditions. With the elimination of the Level III City Council approval of industrial uses, the Council will not have the ability to place conditions on the project they feel will protect neighboring properties or enhance the project.

Councilman Peterson suggested the elimination of Level III review of industrial uses be voted on separately and it was the consensus of Council to do that.

Mr. Shuford suggested Council take action on the other amendments and refer the elimination of Level III review back to Planning staff to resolve some issues. He will then bring

74

this issue back to the Council unless it requires Planning & Zoning Commission consideration first.

Councilman Worley asked Mr. Shuford to include in his report back to Council if there are any differences between the current Level III process and what we can impose as a conditional use in conditional use zoning.

With regard to the amendment to add research and technology production as a permitted use in certain business districts, Mayor Sitnick said that research can imply all kinds of things, like bio-research, bio-technology, and voiced concern over the possibility of incompatible intermingling of certain research opportunities. Mr. Shuford said there are separate environmental rules for those types of uses that would cover them in no matter what zoning district they might be in, but suggested this text amendment be excluded from the ordinance before Council to be reported on at a separate date as well.

Mayor Sitnick closed the public hearing at 5:55.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved to adopt Ordinance No. 2860 to exempt agricultural uses from zoning regulations and adopt the definitions of "confined animal feeding operations" and "research and technology production uses." This motion was seconded by Councilwoman Bellamy and carried unanimously.

Vice-Mayor Cloninger moved that amendments to add research and technology production as a permitted use in certain business districts and to eliminate Level III review of industrial uses be postponed indefinitely until either Planning staff brings a report back to Council or the Planning & Zoning Commission makes their recommendation if changes are made by City staff. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 305

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. ORDINANCE NO. 2861 - BUDGET AMENDMENT FOR THE NEXT PHASE OF THE CIVIC CENTER PROJECT

RESOLUTION NO. 01-156 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HEERY INTERNATIONAL INC. FOR PROGRAMMING, FUNDING ANALYSIS AND PARTIAL SCHEMATIC DRAWINGS FOR THE CIVIC CENTER

City Engineer Cathy Ball said that this is the consideration of (1) a budget amendment, in the amount of $175,000 from private contributions and a transfer of $85,000 from Contingency, for contract with Heery International Inc. for next Civic Center phase; and (2) a resolution authorizing the City Manager to sign a contract with Heery International Inc. for programming, funding, and partial schematic design of the Civic Center.

In January 2001, City Council contracted with Heery International, Inc. to perform the architectural feasibility study for the Civic Center. This architectural study determined that the existing site should be utilized by renovating the arena, restoring the Thomas Wolfe Auditorium to a Great Hall and constructing a new performing arts center east of the arena.

The next step in the process is to complete the programming, funding, and partial schematic design for the project. In an effort to create a name for the entire complex, staff has developed the acronym of HEART District. HEART stands for Historic Entertainment, Arts and Recreation Triangle.

In an effort to keep the project moving, the Civic Center Task Force asked Heery to provide a proposal for completing the programming, funding, and partial schematic design of HEART District. Their proposal has been provided for your review.

The Task Force unanimously voted to move forward with this phase of the project on October 2, 2001. They are recommending that City Council approve a contract with Heery International, Inc. in the amount of $260,000 to complete this phase of the work.

The Task Force has received a donation in the amount of $175,000 to pay for this work. The additional $85,000 would come from the City's contingency fund.

The consideration of a resolution authorizing the City Manager to sign a contract with Heery International, Inc., and an associated budget amendment.

Upon inquiry of Councilman Peterson, Ms. Ball said that the $260,000 is for renovating the arena, restoring the Thomas Wolfe Auditorium and constructing a new performing arts center east of the arena. She said that because all three pieces fit together, it was very difficult for them to break down the costs for each of the three projects. She said Heery noted that the programming is not as much for the arena and the Thomas Wolfe Auditorium because it is an existing building.

At the request of Councilman Worley, Ms. Ball explained that all three pieces fit into a business plan so the deliverable on will be a business plan and that document will be used to secure additional funding, possibly go to the state for funding, etc.

Mayor Sitnick stressed that the Council fully intends to seek revenue sources from everywhere and anywhere they can. That process has already started as seen by the pledge by the Suzanne Marcus Collins Foundation donation of $175,000. In addition, the Council has recently adopted a facility fee at the Civic Center which is a wonderful mechanism to spread the burden for the needs of the building.

Councilman Worley said a lot of questions have been raised about the seating capacity and seating arrangement in the arena portion and the programming piece will enable us to determine exactly what this community wants and be certain that can be accomplished in a way that is satisfactory to the entire community and satisfactory to the events.

At the request of Councilman Peterson, Ms. Ball explained that Heery could have looked at only studying the performing arts center as a stand-alone. But one of the issues they brought up during those discussions was for instance, a restaurant. It's hard to program a restaurant that wouldn't be used by all three facilities. If you had a restaurant that you could build above the arena, it could be used by the performing arts center. Maybe the facility itself would be located in the arena, but the use could be shared by all three buildings. Their concern is that you would limit revenue potential.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the ordinance and resolution and they would not be read.

76

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2861. This motion was seconded by Councilwoman Bellamy.

Councilman Peterson said that the arena renovations do not have the support from the public or the members of the legislative delegation. However, he felt that there is support in the community for the performing arts center. He would be willing to move ahead on the performing arts center, but he doesn't think it is a good use of funds with regard to the arena, given the lack of support.

Councilman Hay said that we have a comprehensive plan and each piece relates to the other. It makes no economic sense and certainly no design sense not to relate each one to the other. For example, the conceptual plan uses the arena floor connected to the new renovated Thomas Wolfe Auditorium, which is also connected to the new performing arts center, which is all joined by restaurants, etc. It is truly all one facility. To look at them one at a time makes no financial sense at all. The Future of the Civic Center Task Force is firm in seeing it all done together because they feel that is the best product. He also thought that the $175,000 pledge, which is meant to move them along on the entire project, could not be recharacterized as just being dedicated to the performing arts center. He has not heard from the legislative delegation that they are not interested in renovating the arena. What he's heard from them is for us to show them a plan and how it all fits together with funding mechanisms independent upon what the legislature might be considering. What we will be presenting to them is a funding plan that has the financial support of a lot of people who want to see it happen.

When Councilwoman Bellamy asked if we can take two separate actions with regard to the budget amendment – one being accepting the $175,000 pledge and one taking $85,000 from the contingency fund. Councilman Hay explained that the $175,000 pledge from Mr. Collins is a pledge made if the City moves forward now with the recommendations of the Future of the Civic Center Task Force. If we don't adopt the report then the pledge doesn't stand.

Mayor Sitnick said that she has clearly heard that the community does want the City to move forward.

Councilman Worley pointed out that it will cost $25 Million to rebuild within the existing shell of the arena. A comparable arena at a new location would cost estimated $40 Million, plus site preparation cost and parking which would be an additional $10 Million.

Councilman Hay also noted that the two anchor tenants in the Civic Center (hockey and basketball) also favor the rebuilding within the existing Civic Center.

Mr. Mickie MaHaffey said that there are a lot of residents in Asheville that are struggling to pay their water bills and there are more critical needs of taxpayers other than rebuilding the Civic Center.

Councilman Hay didn't want to lose the perspective that if we do nothing and don't have a plan, then we must spend $15 Million now to keep the Civic Center open. Keeping it open still gives us an obsolete facility and we then lose many of the revenue generating events there and the deficit continues to build.

Mr. Fred English spoke in opposition to this and felt that it will end up costing $75-80 Million when it is finally built.

Ms. Susan O'Neil asked Council to make a concerted effort to endorse a higher minimum wage and a living wage for the new jobs they say will be brought to Asheville.

Mayor Sitnick encouraged the private business sector to pay living wages.

Upon inquiry of Councilman Peterson, City Manager Westbrook said that he does have the authority to transfer certain funds from the General Fund Contingency, however, he always gets that approval from Council first. He said that the General Fund Contingency for this Fiscal Year started out at $300,000 and during the budget process City Council made some adjustments to $150.000. He believed Council made one transfer out of it but he didn't recall what that transfer was.

In response to Councilman Peterson, Councilman Hay said that the project can be phased in, but the legislative support is not being asked for the arena itself, it's being asked for the overall complex. He said that it is conceivable that, depending on how the funding comes together, we can phase the project in one at a time.

The motion made by Vice-Mayor Cloninger and seconded by Councilwoman Bellamy carried on a 5-1 vote with Councilman Peterson voting "no."

ORDINANCE BOOK NO. 19 – PAGE 307

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-156. This motion was seconded by Councilman Worley and carried on a 5-1 vote with Councilman Peterson voting "no"..

RESOLUTION BOOK NO. 26 – PAGE 472

B. RESOLUTION OFFERING CONSTRUCTION LOANS FOR IN-FILL NEW HOUSING CONSTRUCTION FROM THE HOUSING TRUST FUND PROGRAM

At the request of City staff, this matter was pulled from the agenda and will be brought before Council at a future date.

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of September 21-27, 2001: Communication Ser. (Parks & Recreation), Susan Roemisch (Streets), John T. Davidson (Streets), Arlington T. Bridges (Streets) and Virginia Fortune (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUITS

The City filed a Complaint on October 1, 2001, in the matter of City v. William Griffin Porter as a Complaint for money owed for parking tickets. Also the City filed a Complaint on October 1, 2001, in the matter of the City v. Mark Christian McClure as a Complaint for money owed for parking tickets. Both matters will be handled in-house.

The City was served with a Complaint on October 4, 2001, by Robert Daryl Fisher, and wife Kimberly Hall Fisher and, Ronald E. Sneed, Guardian Ad Litem for Parker Daryl Fisher. The nature of the proceedings is compensatory damages for alleged birth defects and other medical problems due to presence of carbon monoxide level incident in Municipal Building during renovations. This matter will be handled by outside attorneys.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English briefed Council on a trip he made in which he drove 2,800 miles going through very small towns and very large towns. His point was that they all had Wal-Mart Superstores and Asheville should have allowed that store to be located in Asheville when they applied for a permit.

B. COMMENTS BY MICKIE MAHAFFEY

Mr. Mickie MaHaffey voiced concern over the renegotiation of the water agreement and the necessary time restraints and focus on the negotiations necessary by Mayor Sitnick and Councilman Worley.

C. CLOSED SESSION

At 6:45 p.m., Vice-Mayor Cloninger moved to go into closed session to consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(2). This motion was seconded by Councilman Worley and carried unanimously.

At 7:13 p.m. Councilman Worley moved to come out of closed session. This motion was seconded by Councilwoman Bellamy and carried unanimously.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 7:13 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – October 23, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson (arrived at meeting at 5:15 p.m.).; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilman Worley gave the invocation.

MISCELLANEOUS ITEMS

Councilwoman Field thanked everyone for their kind thoughts, letters and cards regarding the recent passing of her father Mr. Stanton Field.

Mayor Sitnick thanked the City volunteers who worked on the NC League of Municipalities meeting held in Asheville on October 13-16, 2001.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 28 – NOVEMBER 4, 2001, AS "PORNOGRAPHY AWARENESS WEEK"

Mayor Sitnick read the proclamation proclaiming October 28-November 4, 2001, as "Pornography Awareness Week" in the City of Asheville. She presented the proclamation to Ms. Gail Harding, who briefed City Council on what can be done to combat pornography.

II. CONSENT:

Due to a conflict of interest, Vice-Mayor Cloninger asked that Consent Agenda Item B be removed from the Consent Agenda.

Due to conflict of interest, Councilwoman Bellamy asked that Consent Agenda Item C be removed from the Consent Agenda.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 10, 2001

B. RESOLUTION ACCEPTING THE STREET MAINTENANCE OF COLE RIDGE ROAD

This item was removed from the Consent Agenda due to a conflict of interest.

C. MOTION SETTING A PUBLIC HEARING FOR NOVEMBER 13, 2001, TO AMEND THE COMMUNITY DEVELOPMENT BLOCK GRANT/HOME CONSOLIDATED ACTION PLAN

This item was removed from the Consent Agenda due to a conflict of interest.

80

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilman Hay moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA DUE TO A CONFLICT OF INTEREST

RESOLUTION NO. 01-157 - RESOLUTION ACCEPTING THE STREET MAINTENANCE OF COLE RIDGE ROAD

Councilman Worley moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Summary: The consideration of a resolution to accept Cole Ridge Road as a public right-of-way and City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public use be accepted by resolution of City Council.

Cole Ridge Road is a newly constructed street servicing residential structures. The street has been constructed and inspected in accordance with the City of Asheville Standard Specifications and Details Manual. The street is a dead end street that is approximately 1276 feet long and has an average width of 18 feet.

The developer is required to provide a two year warranty for major repairs to the street from the date of City Council's acceptance of the street.

Following City Council's approval of this resolution, Cole Ridge Road will be added to the official Powell Bill list.

Staff request City Council accept Cole Ridge Road as a public right-of-way and City maintained street.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-157. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 473

MOTION SETTING A PUBLIC HEARING FOR NOVEMBER 13, 2001, TO AMEND THE COMMUNITY DEVELOPMENT BLOCK GRANT/HOME CONSOLIDATED ACTION PLAN

Vice-Mayor Cloninger moved to excuse Councilwoman Bellamy from participating in this item. This motion was seconded by Councilman Worley and carried unanimously.

Councilman Worley moved to set a public hearing on November 13, 2001, to amend the Community Development Block Grant/HOME Consolidated Action Plan. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING ON THE CONSIDERATION OF THE VOLUNTARY ANNEXATION OF A CONTIGUOUS AREA KNOWN AS BRAESIDE, SECTION 6 OF BILTMORE PARK

ORDINANCE NO. 2862 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE AREA KNOWN AS BRAESIDE, SECTION 6 OF BILTMORE PARK

Mayor Sitnick opened the public hearing at 5:17 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville on property located west of Overlook Road and identified as Braeside, Section 6, Biltmore Park. This public hearing was advertised on October 12 and 19, 2001.

Biltmore Farms, Inc. and four other property owners have submitted an annexation petition for Braeside, Section 6, Biltmore Park. This area is north of and adjacent to Braeside, Section 5, which has been previously annexed and is within the corporate limits. Biltmore Park is generally located west of Overlook Road and north of Long Shoals Road. This annexation is pursuant to an agreement between Biltmore Farms Inc. and the City of Asheville.

The area proposed for annexation consists of 17.4 acres and is platted for 10 single-family residential lots. The area will be accessed by Braeside Circle, Braeside Lane and South Braeside Court.

Utilities and streets are being developed by Biltmore Farms Inc. City services will begin on the effective date of annexation. Biltmore Farms, Inc. has requested that the effective date of annexation be six months from the adoption of the ordinance.

City staff recommends City Council adopt an ordinance extending it's corporate limits to the area known as Braeside, Section 6, Biltmore Park.

Upon inquiry of Councilwoman Bellamy, City Manager Westbrook said that he would provide Council with how much tax base has been added to the City as a result of the 22 Biltmore Park voluntary annexations.

Mayor Sitnick closed the public hearing at 5:21 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 2862. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 310

B. PUBLIC HEARING TO REZONE 9 WEDGEFIELD DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 2863 - ORDINANCE TO REZONE 9 WEDGEFIELD DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Sitnick opened the public hearing at 5:22 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance to rezone the Super 8 Motel at 9 Wedgefield Drive from RM-16 Residential Multi-Family High Density District. to Community Business II District. This public hearing was advertised on October 12 and 19, 2001.

The City staff has initiated this rezoning to implement the original intent of the staff to zone all of the hotels in the Wedgefield Drive/Rocky Ridge Road area of the recent extraterritorial jurisdiction (ETJ) extension Community Business II. During the zoning process for the 1,163 properties in the "west" ETJ area, the Super 8 property was unintentionally zoned RM-16. The Planning and Zoning Commission, at their October 3, 2001, meeting, reviewed, and by unanimous vote, recommended this rezoning.

Staff has received no comments of concern or opposition to the proposed rezoning.

The Planning and Development staff and the Planning and Zoning Commission recommend that City Council adopt an ordinance rezoning the property at 9 Wedgefield Drive from RM-16 Residential Multi-Family High Density District to Community Business II District.

Mayor Sitnick closed the public hearing at 5:25 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2863. This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 312

C. **PUBLIC HEARING TO PERMANENTLY CLOSE CHERRY STREET FROM MARIGOLD STREET TO SHILOH ROAD**

RESOLUTION NO. 01-158 - RESOLUTION TO PERMANENTLY CLOSE CHERRY STREET FROM MARIGOLD STREET TO SHILOH ROAD

Mayor Sitnick opened the public hearing at 5:25 p.m.

Mr. David Foster, Project Coordinator for the Public Works Department, said that this is the consideration of a resolution to close the unopened right-of-way known as Cherry Street. This public hearing was advertised on September 28, October 5, 12, and 19, 2001.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process, Matney and Associates Law Firm, on behalf of M Realty Limited Partnership, has requested to close Cherry Street.

Public Works Department staff has determined that the right-of-way known as Cherry Street, beginning at Shiloh Road, and ending at the Marigold Street, as shown on Plat Book 6 at Page 137, is not part of an adopted street plan and is not a City maintained right-of-way.

City staff recommends City Council adopt the resolution to close the unopened right-of-way known as Cherry Street.

Ms. Norma Baynes, representing the Shiloh Community Association, stated their concerns are what the property owner will do if this portion of road is closed. At one time the owner wanted to build a parking lot and City Council denied that request, so they just want to make sure this will not permit him to do that.

Planning & Development Director Scott Shuford said that the unopened right-of-way will revert back to the property owners on either side of the right-of-way. This closing does not change the underlying zoning which is single-family residential. It is his understanding that Mr. Morosani (property owner) is pursuing some form of residential development of that property that fronts on Shiloh.

Mayor Sitnick was concerned that if Council closes the right-of-way now and in the future the owner comes back and asks that this property be rezoned for commercial development or a parking lot, then this would take away one of the impediments. Mr. Shuford responded that if Council were interested in a rezoning that would allow something to occur there and they were willing to take that action, they would probably also be willing to take the street closing action that is being proposed now.

Councilman Peterson wondered if by leaving the right-of-way open, would it be easier for someone to build another residence in the back part of the lot. Mr. Shuford said that there would be the possibility of getting additional lots in the interior but it would be an expensive proposition because they would have to build a public street to serve what would amount to probably no more than four additional lots.

Councilman Hay felt that the concern here is that this may be a different way to get a parking lot built in this area when City Council denied the commercial proposal several months ago. He didn't feel this closing would allow that to occur.

Councilwoman Bellamy confirmed that if Mr. Morosani wants to do something on that property other than residential he will have to come back to City Council.

Mayor Sitnick closed the public hearing at 5:45 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-158. This motion was seconded by Councilman Hay and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 474

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE REZONING FOR PROPERTY ON CHARLOTTE STREET AT GROVE PARK FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2864 - ORDINANCE TO REZONE PROPERTY ON CHARLOTTE STREET AT GROVE PARK FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO NEIGHBORHOOD BUSINESS DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2865 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY ON CHARLOTTE STREET AT GROVE PARK

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 5:47 p.m.

Ms. Stacy Merten, Urban Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 10-23-01). This public hearing was advertised on October 12 and 19, 2001.

Ms. Merten said that this is the consideration of an ordinance to conditionally rezone property located on Charlotte Street at Grove Park from RS-4 Residential Single-Family Medium Density District and RM-6 Residential Multi-Family Low Density District to Neighborhood Business/Conditional Use.

On August 22, 2001, the City of Asheville submitted an application for conditional use rezoning of the E. W. Grove Park and Office Building as Neighborhood Business/Conditional Use (PIN No. 9649.11-66-1122). The parcel is currently split zoned RS-4 and RM-6 (Location Map attached to City Exhibit 3). The 3.16 acre site is located between Charlotte Street and Gertrude Place, north of Celia Place. The office building is located at the southeast corner of the property near the intersection of Charlotte Street and Celia Place. The park is in the middle of a residential neighborhood and surrounded by RS-4 and RM-6 zoning.

The conditional use zoning would allow the Preservation Society of Asheville & Buncombe County to occupy the building for their headquarters office (Proposed Site Drawing attached to City Exhibit 3). The building has been vacant for over 10 years and is suffering from deterioration and neglect. The Preservation Society has proposed to undertake the restoration at a cost of approximately $80,000, in exchange for a long-term lease of the building from the City. The building will not be altered except to allow handicap access, replacement of all mechanical system and general maintenance and repair to both the interior and exterior. The Preservation Society would also like to make a small conference room in the building available, as a meeting place, for other groups such as neighborhood and community associations.

As proposed under this conditional use zoning request, the use of the building would be limited to use by the Preservation Society of Asheville & Buncombe County for office and community space (City Exhibit 4). In addition, the park area would remain in its current configuration and undeveloped state.

The Planning & Zoning Commission reviewed this project at their October 3, 2001, meeting and voted 6-1 to recommend approval of the project with conditions.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must find that all seven standards (this application was received prior to the recent changes adopted to the conditional use standards) for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary review, absent the benefit of public input, is that all seven standards appear to be met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed use is the leasing of an existing building by the Preservation Society of Asheville & Buncombe County for use as an office and community center. The building is currently vacant and in a deteriorating state. The Preservation Society proposes to rehabilitate the building in accordance with state building code. The proposed use will not materially endanger the public health or safety if developed in accordance with the approved site plans and applicable regulations.

2) That the proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the community or region.

The proposed use will greatly enhance the successful operation of the area by allowing an adaptive reuse of a previously vacant historic structure. The proposed use will allow the park to remain in use for the surrounding community and also provide a convenient location for community groups to meet.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The proposed use will be very low impact with no substantive changes to the existing park or building. It is not anticipated that the use would have a negatively affect on the value of adjoining or abutting property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

As stated above, the proposed use will be very low impact with no substantive changes to the existing park or building and therefore in keeping with the existing character, scale and density of the neighborhood.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan and other official plans adopted by the City.

The Comprehensive Plan indicates residential and institutional uses for this area.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed use is located in an existing building in a developed area. The project received approval from City's Technical Review Committee, including the Water Resources Department, the Fire Department, MSD, Engineering and Public Works. Due to the minor level of traffic activity under this request, no traffic impact analysis is required.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The existing building is less than 1,000 sq. ft. and will house one full time employee, who will secure a parking space at a nearby church. Traffic generation will be minimal.

Planning & Development Staff recommend approval of the conditional use rezoning with the following conditions:

1) Engineering & Planning staff should work with the Preservation Society to insure there is adequate on street parking and to locate a spot for a handicap accessible parking space on the street.
2) The hours of operation should be limited from 7:30 a.m. to 10:00 p.m.
3) The existing undeveloped area of the park should remain undeveloped, per the site plan.
4) The building should be limited to use by the Preservation Society of Asheville & Buncombe County for office and community space.

Mr. Allen Fleishel, Executive Director of the Preservation Society, said that the Preservation Society thinks that the building and park is very significant to our local history and they will be good stewards of the property.

Ms. Harriette Winner, President of the Preservation Society, stated how excited they were to be able to restore this building. They have a letter from the Unitarian Church that allows them to use their parking space at anytime other than Sunday morning and whenever they have special events.

Mr. Bridgett Eckert, resident on Charlotte Street, felt the Preservation Society will be a good tenant for the building, however, asked that the hours of operation be more closely to reflect the actual hours of operation, e.g. 8:00 a.m. to 5:00 p.m. Monday through Friday.

Councilman Hay said that since the City actually owns the property, there will be a lease between the City and the Preservation Society in which things like hours of operation, etc., can be negotiated and made part of the lease.

Mr. Bill Wescott, Board Member of the Preservation Society, appreciated Council's support in helping them bring this building back to life. He said that meetings will be held in the building that lasts sometimes until 6:30 p.m. or 7:00 p.m.

There being no request for rebuttal, Mayor Sitnick closed the public hearing at 6:00 p.m.

City Attorney Oast said that the lease with the Preservation Society will be coming back to City Council for approval and specifics like hours of operation and parking can be dealt with at that time.

Vice-Mayor Cloninger moved to adopt Ordinance No. 2864 to rezone property on Charlotte Street at Grove Park from RS-4 Residential Single-Family Medium Density District and RM-6 Residential Multi-Family Low Density District to Neighborhood Business District/ Conditional Use. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 314

Vice-Mayor Cloninger moved to adopt Ordinance No. 2865 granting the conditional use permit for E.W. Grove Park and Office Building with the following conditions: (1) Engineering & Planning staff should work with the Preservation Society to insure there is adequate on street parking and to locate a spot for a handicap accessible parking space on the street; (2) The hours of operation should be limited from 7:30 a.m. to 10:00 p.m.; (3) The existing undeveloped area of the park should remain undeveloped, per the site plan; and (4) The building should be limited to use by a tax exempt local historic preservation organization for office and community space; and to instruct the City Attorney to prepare the Order for the Mayor's signature This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 316

E. PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Sitnick opened the public hearing at 6:02 p.m.

Ms. Stacy Merten, Urban Planner, said that this is the consideration of an ordinance to rezone a portion of 1153 Sweeten Creek Road from RS-8 Residential Single-Family High Density District to Commercial Industrial District. This public hearing was advertised on October 12 and 19, 2001.

On August 28, 2001, Chris Jarrett submitted an application for the rezoning of the eastern portion of the property located at 1153 Sweeten Creek Road (PIN No. 9657.18-30-1919). The property is located on the east side of Sweeten Creek Road, between W. Chapel and Busbee View Road. The parcel is currently split zoned, with the front portion, adjacent to Sweeten Creek, zoned Commercial Industrial and the back portion zoned RS-8. The rezoning request is for the back portion of the property only, which is approximately 2.5 acres. The entire parcel is approximately 4 acres and 745 feet deep, extending into a residential neighborhood. The only access to the parcel is via Sweeten Creek Road.

In recognition of the unique nature of the parcel in question, Planning & Development staff recommend that the property be rezoned to Community Business II, instead of Commercial Industrial. CBII is designed to provide areas for medium to high-density business and service uses along major or minor thoroughfares. Although many of the uses allowed in CBII overlap with those allowed in CI, the CB II is a less intensive zone than CI and would provide a more appropriate transition from the existing portion of the property to the residentially zoned property surrounding the parcel. The Planning & Zoning Commission reviewed this at their meeting on October 3, 2001, and recommend 6-1 to approve with conditions that the parcel be rezoned CBII.

Ms. Merten said that the applicant's primary concern was not necessarily that did not really want the CI designation, but he was after

Councilwoman Bellamy pointed out several uses that would be allowed in the CBII district, including barber shops, salons, bars, nightclubs, convenience stores, etc.

Upon inquiry of Mayor Sitnick, Ms. Merten said that the applicant mainly wanted his property all zoned commercially so that it would be marketed as such, but he was not adamant that it be zoned Commercial Industrial.

Mr. Chris Jarrett, property owner, said that his main reason for this rezoning request is to get the property zoned the same for marketability. Prior to adoption of the Unified Development Ordinance most of the lot was zoned Commercial Industrial. He said that his property does not touch Rock Hill Road and noted that there currently exists housing that faces Rock Hill Road, with their back to his property.

Upon inquiry of Councilman Hay, Mr. Jarrett explained that the property is not marketable as residential in the back because the person would have to drive through the industrial part first at the front of the lot to get to the residential part in the back of the lot.

Mr. Samuel Mohamed Abdu-Allah, speaking on behalf of his brother who lives on the corner of West Chapel Road and Rock Hill Road, felt that surrounding property owners did not want to be around commercial development.

Ms. Annie W. Harrison, resident on Rock Hill Road, voiced concern over what will be built on the property if rezoned to Commercial Industrial.

Ms. Norma Baynes, representing the Shiloh Community Association, felt that the property is almost totally surrounded by residential homes and noted that if the property is zoned something other than residential, there will be increased traffic on the area roads.

Mr. Ben Baker, realtor speaking on behalf of Mr. Jarrett, spoke in support of the rezoning request. He noted that it would really be hard to develop the rear part of the property as residential when you have to access it through a heavy commercial area. Allowing the property to remain residential, with the access problem, would create a hardship on Mr. Jarrett as far as the value of the property is concerned.

Upon inquiry of Councilman Hay, Mr. Baker said that even zoning the back portion multi-family residential would still have the same problem of having people access their homes through a commercial area.

Upon inquiry of Councilwoman Field, Ms. Merten said that buffering requirements between the two zones would range from 15 feet to 30 feet, depending on the use and the intensity of the use. If the property remains split zoned, a buffer will still be required between the uses if the back portion is developed.

Councilman Worley asked if there has been any discussion with the applicant about the desirability of waiting until there is a proposed use and then going forward with a conditional use permit (CUP). Ms. Merten said that it was discussed with the applicant, however, he preferred to request the straight rezoning of the property, because it's her understanding that they do intend to sell the property. Mr. Baker also responded that in not knowing what the zoning will be, it severely affects the marketability of the property.

Mr. James Harrison spoke against the requested rezoning and asked Council to keep the property zoned residential because of the number of uses which are allowed even under the Community Business II District.

Ms. Merten responded to Councilman Peterson's question about size limitations in the CBII District.

When Mr. Keith Thomson wondered if this would be good for the new Urban Village District, Mr. Shuford said that the Urban Village District is a 10-acre minimum and this entire parcel is only four acres. In addition, it does not meet some other criteria for the new district.

Mr. Shuford said that this property would best be handled through a conditional use rezoning where you had a particular use and you could address those concerns. He said that Planning staff recognized that right at the start but they also recognized too that the applicant was not interested in developing the property. The compromise, recognizing that it was a split-zoned lot, was to try to go to a commercial (Community Business II) classification that would signal to any prospective buyer that something more intense than an RS-8 zoning would be acceptable to the City. But, at the same time, be less intensive than the Commercial Industrial in order to encourage the ultimate owner to come back and do a conditional use rezoning. Another alternative might even be CB I, which would be much less intense and probably result in that same thing.

Upon inquiry of Councilman Worley, City Attorney Oast said that ordinarily you can't have something in a conditional use classification for which a use is not specified.

Along those lines, City Attorney Oast said that a solution might be to design a zone for this property and specify a range of uses. He said that he would be willing to work on that with the property owner and Planning staff.

Councilwoman Bellamy did not favor zoning the property to either Community Business I or II. She felt that this residential area gets more commercial encroachment than other areas in Asheville and we need to hold the line on that. She felt that an RM-16 zoning could work, citing River Ridge being residential next to commercial uses, and the property owner could get more money for his land with that designation.

Vice-Mayor Cloninger moved to continue this public hearing until December 18, 2001, in order to give the staff time to work with the property owner and his realtor to refine the uses and at the same time to work with the neighborhood to coordinate the uses through them. This motion was seconded by Councilwoman Bellamy and carried unanimously.

F. PUBLIC HEARING TO CONSIDER THE DESIGNATION OF THE KENILWORTH INN AT 60 CALEDONIA ROAD AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 2866 - ORDINANCE DESIGNATING THE KENILWORTH INN AT 60 CALEDONIA ROAD AS A LOCAL HISTORIC LANDMARK

Mayor Sitnick opened the public hearing at 6:47 p.m.

Historic Resources Director Maggie O'Connor said that this is the consideration of an ordinance designating the Kenilworth Inn located at 60 Caledonia Road, Asheville, N.C., as a local historic landmark. This public hearing was advertised on October 12 and 19, 2001.

In 1918, James Madison Chiles built the Kenilworth Inn. Mr. Chiles was the driving force behind the establishment of the Town of Kenilworth. The Inn's impressive porte cochere, built entirely of granite is the focal point of the main façade and is accented by granite wrap-around porches and terraces. Much of the granite used in the construction of Kenilworth Inn was mined from a quarry located at the bottom of the hill behind 33 Chiles Avenue in Kenilworth. The Inn served as a military hospital during World War I and World War II and as a mental health facility known as Appalachian Hall from 1931 until 2000. The Kenilworth Inn is one of the few remaining wood framed luxury hotels constructed before 1920 in Asheville and Buncombe County.

Designation of this building as a local historic landmark makes the property owner eligible for a 50% reduction in property taxes. Currently the assessed value of the property is $1,637,300 and the total taxes paid for this year were $22,758.47. If the Kenilworth Inn is designated a local historic landmark the taxes would be reduced by half to $11,379.24. However, the current owners plan to convert the building into 91 apartment units at a projected rehabilitation cost of $4,300,000.

When a property is designated historic, restrictions are placed on the property and on any exterior improvements or interior improvement where interiors are designated as significant. Any modification to the structures or land must receive a Certificate of Appropriateness from the Historic Resources Commission of Asheville and Buncombe County (HRC) and all improvements must follow the Secretary of the Interior's Standards for Rehabilitation and Illustrated Guidelines for Rehabilitating Historic Buildings.

It is important that properties of local significance are preserved and protected for cultural, historic, and economic reasons for future generations.

The HRC, by unanimous vote, recommends to City Council that the Kenilworth Inn be designated a local historic landmark. Staff concurs with the recommendation of the HRC to designate the Kenilworth Inn a local historic landmark.

City staff recommends City Council consider an ordinance designating the Kenilworth Inn as a local historic landmark.

Mr. Frank Thomson, Ms. Leah Karpen and Mr. John Chiles all spoke in support of this designation and were pleased that the owners will be renovating this beautiful cornerstone of the community.

Mayor Sitnick closed the public hearing at 6:54 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2866. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 322

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. ASHEVILLE FILM BOARD

Vice-Mayor Cloninger, member of the Asheville Film Board, said that after lengthy discussion and consideration, they request City Council change their name from the Asheville Film Board to the Asheville Film Commission. They believe the title "Asheville Film Board" handicaps their effectiveness within the entertainment industry, evoking images of censorship and control, rather than growth and development. He said that the name change would not affect the powers of the board.

It was the consensus of City Council to instruct the City Attorney to prepare the proper ordinance to change the name of the Asheville Film Board to the Asheville Film Commission and to bring it back to Council as a consent agenda item.

B. SCHOOL BOARD SUPERINTENDENT; CHAIRMAN OF CIVIL SERVICE BOARD

Councilwoman Bellamy, liaison to the Asheville School Board, noted that the School Board has hired a new Superintendent, Mr. Robert Logan. She hoped that after Mr. Logan takes office in December that City Council will invite him to a worksession to talk about what his plans are and how the City Council can support him in his endeavors.

Councilwoman Bellamy also noted that Mr. Gene Bell, Chair of the Civil Service Board, is in the hospital and on behalf of City Council wishes him well and a speedy recovery.

C. CLAIMS

The following claims were received by the City of Asheville during the period of September 28-October 11, 2001: Jewel Jones (Water), Evelyn Boone (Water), Janet Miller (Parks & Recreation), Osmose (Water) and Dian Robinson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

D. LAWSUITS

The City received the following Complaint on October 17, 2001, by Frank J. Covine: Complaint for money owed for property damage to an automobile. This matter will be handled in-house.

The City filed the following Complaint on October 19, 2001, against Luis Trejo Hernandez and Francesca Jimenez: Complaint for money owed for property damage to an automobile. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY PETER DAWES

Mr. Peter Dawes asked City Council to reconsider having a place marked off on the floor for the media to video from. He felt that as long as the media is does not disturb the meetings, they should be able to film from any place in the Chamber.

B. COMMENTS BY LULA MOON

Ms. Lula Moon asked City Council to direct the City to enforce the zoning violation complaint filed August 28, 2001, regarding the noisy 24-hour recycling center that is operating illegally next door to her home at 41 Long Street, which is a narrow residential street. Using pictures, she showed trash and debris around the area and the traffic problems associated with the center. She briefed Council on the violations of the Asheville Standard Specifications and Details Manual with regard to street width, the Noise Ordinance, development parking requirements, and the State of N.C. Standard Fire Prevention Code. She noted that the property is now being requested to be rezoned, however, felt the rezoning request should be denied due to unfeasibility of meeting applicable codes. She urged the City to find a new location for the recycling center.

City Manager Westbrook said that he is pursuing all avenues with regard to Ms. Moon's complaint and will continue to work with her to address her concerns.

92

C. CLOSED SESSION

At 7:24 p.m., Councilwoman Bellamy moved to go into closed session in order to (1) consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: James E. Martin, Jeffrey A. Martin, Susanne A. Zuerner, Donald E. Williams, Paul E. Fruits, B. Joy MacFadyen Bulluck, Buncombe County, and City of Asheville - G.S. 143-318.11(a)(3); and (2) To consider the qualifications, competence, performance, character, or fitness of an individual public officer or employee - G.S. 143-318.11(a)(3); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act - G.S. 143-318.11(a)(2). This motion was seconded by Vice-Mayor Cloninger and carried unanimously.

At 8:05 p.m., Councilman Hay moved to go out of closed session. This motion was seconded by Councilman Worley and carried unanimously.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 8:05 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Wednesday – November 7, 2001 - 3:00 p.m.

Worksession

Present: Vice-Mayor M. Charles Cloninger, Presiding; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Mayor Leni Sitnick

CONSENT:

Vice-Mayor Cloninger noted that he had a conflict of interest on "Setting public hearing on December 18, 2001, to close portion of Porter Street from Pond Avenue to Rosscraggon Road and the 15-foot alleyway from Porter Street to Lee Street" and also the "Parking Easement on Grove Street".

Setting Public Hearing on December 18, 2001, to Close Portion of Porter Street from Pond Avenue to Rosscraggon Road and the 15-foot alleyway from Porter Street to Lee Street

Amendment to Personnel Policy regarding Military Leave

Summary: The consideration of a resolution amending Section 49, Military Leave, of the City of Asheville's Personnel Policy.

Section 49(2)(a), Military Leave, of the City's Personnel Policy currently provides that, in the event of national emergency or war, the health and dental insurance (including family coverage) of any City employee who is called-up for active military duty would continue until the employee's military insurance became effective.

The resolution amends this section of the City's Personnel Policy to continuously provide any benefit plan(s) in which the employee participates as if the employee were still working - regardless of any insurance that may be provided to these employees by the military.

Staff recommends the adoption of the resolution.

New Street Name of Glesta Knoll Drive

Summary: The consideration of a resolution accepting the new proposed street name "Glesta Knoll Drive."

Mr. Tommy Pressley, owner of lots in Glesta Knoll Subdivision, has petitioned the City of Asheville to accept the street name " Glesta Knoll Drive." The new street will begin at Eliada Home Road and end at cul-de-sac on Glesta Knoll Drive.

City staff recommends adoption of the resolution.

Amendment to Water Bond Capital Improvements Fund

Summary: The consideration of a budget amendment to the 29 Fund (Water Bond Capital Improvements Fund) to reflect an increase in the Pipeline Replacement Phase II (Bee Tree Crossing), an increase in the N. C. Dept. of Transportation (NCDOT) Betterment Projects, and a decrease in the Building Safety Improvements.

Funding for the Pipeline Phase II (Bee Tree Crossing Project) needs to be increased by $20,000 to cover the multiple change orders that have been necessary since this project was first initiated in 1996. There are also additional engineering expenses that have accumulated due to the time extension and changes in the project.

Funding also needs to be increased for two NCDOT Betterment Projects totaling $147,630. The Utility Agreements for Sweeten Creek Phase I and Pisgah Highway Phase I included construction estimates that were lower than actual costs. The invoice from NCDOT for Sweeten Creek Phase I is $69,125 more than NCDOT's construction estimate and Pisgah Highway Phase I is $78,505 more.

Funding is available in the Building Safety Project since it has been determined that this project needs to be deleted to provide additional funding for NCDOT Non-Betterment Projects in Fiscal year 2003-2005. There is currently $1 million available and $167,630 of it is being redistributed to the Bee Tree Crossing and the NCDOT Non-Betterment Projects described above. The remaining $832,370 can be used to fund additional NCDOT projects that were initially planned to be funded with a second Revenue Bond Issue in Fiscal Year 2003. The City will not be issuing additional revenue bonds at this time. NCDOT Projects in Fiscal Year 2003 through 2005 total approximately $4 million. If sufficient revenue is not generated to pay for these projects on a pay-as-you-go basis, it will be necessary to set up a payment plan with NCDOT.

Staff recommends approval of the budget amendment to the 29 Fund to reflect the changes identified above.

City Council Meetings to be Rescheduled

Summary: Due to the upcoming holidays the City Council meeting schedule will need to be modified as follows: (1) December 4, 2001, should be the organizational meeting beginning at 4:00 p.m. in the Council Chamber followed by the formal meeting at 5:00 p.m. in the Council Chamber; (2) December 11, 2001, needs to be a worksession beginning at 3:00 p.m. in the First Floor North Conference Room; (3) December 18, 2001, needs to be a formal meeting beginning at 5:00 p.m. in the Council Chamber; (4) December 25, 2001, meeting needs to be cancelled; and (5) January 1, 2002, meeting needs to be cancelled.

Donation for Douglas Ellington Collection

Summary: The Asheville Art Museum has requested the donation of several items from City Hall for the Douglas Ellington collection.

Over the past several years, the Asheville Art Museum has become a major repository for Douglas Ellington's architectural drawings, correspondence and other materials from the City Hall Building. The museum is trying to preserve and document his work in Asheville as a major figure in the art culture arena. They are working closely with his family to preserve his work and his legacy. The museum is requesting that the City donate a chair from the Council Chamber as well as two pieces of terra cotta from the roof of the City Hall Building. (We have several pieces of terra cotta that they could have.) The City would be placing these objects with the Asheville Art Museum in trust for their Douglas Ellington collection.

Staff recommends that Council approve the donation of a chair from the Council Chamber and two pieces of terra cotta from the City Hall roof to the Asheville Art Museum.

Semi-Annual Update of the Regional Water Authority's Activities

Summary: Update on Regional Water Authority's past six month's activities.

Parking Easement on Grove Street

Summary: The consideration of a resolution authorizing City to enter into an easement for parking at the Senior Opportunity Center on Grove Street.

Earlier this year, the City agreed to sell certain property located at 36 Grove Street. The property is situated between the building currently occupied by the Employment Security Commission at 48 Grove Street and the building used by the City for the Senior Opportunity Center (SO). The property is used for parking for both buildings and has some metered spaces on it. The buyers also own the 48 Grove Street building and intend to expand and renovate it, and acquired the City property for parking and access in connection with this expansion. This conveyance was subject to the City retaining an easement to allow for continued parking at the SOC.

The City has now negotiated that easement, which allows for the City to use the lot for parking for the SOC during non-business hours and on weekends, when it will not interfere with the use by the 48 Grove Street building, but also when its need by the SOC is highest. The easement is personal in nature, and terminates when the City ceases its use of the SOC. The parking spaces right next to the SOC were not part of the property conveyed and will continue to be available for daytime use by staff and visitors.

Adoption of the resolution authorizing the City to execute the easement.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UDO AMENDMENT REVIEWS

Revision of Process for Review of Ancillary Use Requests in Residential Districts

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which are scheduled for Tuesday, November 27, 2001. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise the process for the review of requests for ancillary uses in residential districts.

The Planning and Zoning Commission is recommending adoption of an amendment to the UDO revising the process for reviewing requests for ancillary uses in residential districts and changing the name of this provision. The change in the review process is proposed in response to concerns regarding the current process voiced by citizens and Council members. This issue was discussed at a Planning and Zoning Commission meeting, with the changes proposed in the ordinance amendment identified by the Commission. The following revisions are proposed by the proposed wording amendment:

- The name of the use will be changed from "Ancillary Non-Residential Uses" to "Ancillary Commercial Uses in Residential Districts"; and
- The Technical Review Committee will have the authority to send, at its discretion, requests that are controversial to the Planning and Zoning Commission for review and recommendation, following a public hearing. The recommendation of the Commission will be

96

forwarded with the request to City Council for final action. Currently all requests are sent directly to the City Council following TRC review.

The name change will clarify the types of uses permitted through this permitting process. By providing provide an opportunity for additional public input on controversial requests, the revised review process will provide time to resolve issues before requests are heard by City Council.

Staff has received no comments in opposition to the proposed revisions.

At their October 3, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

A brief discussion surrounded the name of the use. It was the consensus to change the name of the use to Ancillary Non-Residential Uses in Residential Districts.

A brief discussion occurred after Councilwoman Bellamy stated her concerns that this amendment does not address the problems regarding the number of spaces, buffering, traffic flow, etc. Mr. Green responded that the Planning & Zoning Commission realized that as this is a conditional use, Council would have the discretion to make requirements on a case by case basis as the need arose, rather than trying to find one, for instance, buffer, to fit all needs.

In response to Councilwoman Bellamy, City Attorney Oast said that we do encourage developers to meet with the surrounding neighborhood and business property owners, however, it would be difficult to require that without specifically designating the neighborhood representatives and the specific business property owners.

Councilman Peterson said that he plans to make a motion to delete the entire provision since we do have the process for conditional use rezoning. Mr. Green responded that this, however, does not require a zoning change.

Councilman Peterson stated that the difference between rezoning and this being a non-rezoning is the protest petition process which gives the nearby property owners that added protection that requires the approval by the super majority of Council. He asked if the ordinance could be amended to include provisions for a protest petition process with the same voting requirements. Mr. Green responded that the protest petition procedure is established by state statutes and very specifically applies only to rezonings, not to conditional use processes. City Attorney Oast also responded that in fact, with respect to conditional use permits, that the statute says that a simple majority vote is all that is required. If it is a rezoning, then the protest petition procedure would apply, but we couldn't incorporate into the ordinance a protest petition procedure applicable to a particular kind of conditional use permit.

Revision of Certain Development Standards in the Central Business District

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise certain development standards in the Central Business District.

The Planning and Zoning Commission is recommending adoption of an amendment to the UDO revising certain development standards in the Central Business District (CBD). The proposed revisions address issues that were identified during the process of extending the CBD zoning to areas adjacent to the current CBD. With these revisions, the creation of non-conforming uses will be avoided and continuation of the historic urban development pattern in the

CBD will be encouraged. The proposed revisions would make the following changes in the development standards in the CBD:

- Identify automobile sales as a conditional use in the CBD and establish standards for this use. The proposed standards include:
  - Minimum lot size of one acre;
  - In order to maintain an urban streetscape the number of automobiles that can be stored outside an enclosed building shall be limited to not more than 25% of the total offered for sale, or, alternately, the outdoor storage of automobiles for sale shall be screened by buildings occupying at least 75% of the street frontage of the property;
  - Prohibit outdoor storage of autos needing repair or, alternately, require autos needing repair to be screened from all public rights-of-way; and
  - New structures proposed within the Downtown Design Review Area must substantially comply with the Downtown Design Review Guidelines.
- Identify government buildings and uses as conditional uses and establish conditions for these buildings and uses. The proposed conditions include:
- The proposed location of the building or use will not restrict the availability of key land for private development;
- No alternative location for the building exists within areas previously developed for government buildings and/or uses; and
- New structures proposed within the Downtown Design Review Area must substantially comply with the Downtown Design Review Guidelines.
- Clarifies the standard for a zero front setback and provides the Downtown Commission or the Planning and Development director with the authority to allow greater setbacks if certain conditions are met.

The proposed revisions are designed to strengthen the development pattern in the CBD while providing for some flexibility in the standards for development. The need for the revisions was identified by staff and the Planning and Zoning Commission while listening to comments from the property owners during the discussion of the extension of the CBD boundaries.

Staff has received no comments in opposition to the proposed revisions.

At their October 3, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Councilwoman Field thought it might be a good idea for the Planning staff and Planning & Zoning Commission to review the Downtown Design Review Guidelines which are still in draft form after several years.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearings on November 27, 2001.

BUILDING CODE PILOT PROGRAM

Director of Building Safety Terry Summey said that this is the consideration of a resolution acknowledging the City of Asheville as a participant in the pilot program for rehabilitating existing buildings in the City of Asheville and adopting the Pilot Code, currently being prepared by Mecklenburg County.

Mr. Summey said that North Carolina General Assembly approved Session Law 2001-373, Senate Bill 633 on August 17, 2001, which is an act to establish a building code pilot program for rehabilitating existing buildings. The pilot code is based upon the New Jersey Uniform Construction Code Rehabilitation Subcode, which has received national praise and attention.

In 1999 the State of New Jersey's Rehabilitation Subcode was a winner of the "Innovations In American Government Award, an award competition of the Ford Foundation, the John F. Kennedy School of Government at Harvard University and Council for Excellence in Government." Their prize of $100,000 recognized their innovation and leadership of implementing a user friendly rehab code.

Benefits of the Rehabilitation Subcode in New Jersey included:

- Dramatic increase in the estimated dollar amount of rehabilitation work undertaken in New Jersey's urban areas during the first year that the rehabilitation subcode was in place.
- Takes a common sense approach and applies building code requirements to the rehabilitation of existing buildings in a rational manner, protecting the safety of building occupants without imposing needless requirements or unnecessary additional costs.
- Eliminate building code requirements as a disincentive to the rehabilitation of existing buildings

Senate Bill 633 authorizes a lead local jurisdiction in North Carolina to develop a pilot rehabilitation building code based upon the New Jersey Subcode. Substantive changes to the New Jersey model are not allowed. The pilot code may then be administered by local building inspection departments that have been approved by the Building Code Council to do local plan reviews. Asheville obtained local plan review approval in December 1997.

In order to participate in the pilot program, the eligible local jurisdiction's governing body must adopt the pilot code. Mecklenburg County, the lead local jurisdiction is currently in the process of finalizing the pilot code. It is anticipated the pilot code will be available for use before April, 2002.

Mr. Jim Bartl, Director of the Land Use and Environmental Services Agency Code Enforcement Department for Mecklenburg County, gave a brief summary of the 15-month effort to initiate the pilot rehab code for existing structures.

Mr. Summey recommended City Council approve the resolution acknowledging the City of Asheville as a participant in the pilot program for rehabilitating existing buildings and further recommends adopting the pilot code.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

PARKS AND RECREATION SUMMER ACTIVITIES REPORT

Recreation Division Superintendent Butch Kisiah highlighted activities and programs offered to the City of Asheville during the summer of 2001 (May – August).

Mr. Kisiah responded to Councilman Peterson regarding the City's summer employment for young people.

Councilman Peterson encouraged the City to participate more in education by possibly providing facilities for tutoring and mentoring.

Vice-Mayor Cloninger thanked Mr. Kisiah and the entire Parks and Recreation Department for the activities they offer.

ANNUAL COMMUNITY DEVELOPMENT BLOCK GRANT/HOME REPORT

Councilman Peterson moved to excuse Councilwoman Bellamy from participating in this discussion. This motion was seconded by Councilman Worley and carried unanimously.

Ms. Charlotte Caplan, Community Development Director said that the this is the review of information on the City's Consolidated Annual Performance and Evaluation Report.

The Community Development Division has submitted to HUD on September 28, 2001, its annual performance report on our Community Development Block Grant (CDBG) and HOME programs. The City spent a total of $2,779,361 CDBG and HOME funds, leveraging at least $11,543,000 in other funding. Key performance indicators are as follows:

- ⇒ 424 units of housing production (367 with CDBG or HOME assistance and 57 through fee rebates and Housing Trust Fund assistance), comprising:
    - 20 owner-occupied houses completely rehabilitated
    - 157 rental units rehabilitated
    - 54 homes given urgent repairs
    - 40 new houses built and sold to first-time homebuyers
    - 6 other new homeowners received down-payment assistance
    - 100 new rental units built and leased
    - 47 households received rent assistance to avoid homelessness;
- ⇒ 158 people helped with jobs or self-employment;
- ⇒ 3500 people helped through other programs (housing counseling, homeless shelter youth activities, etc).

These figures greatly exceed the targets set in the Strategic Plan for 2000-2005 and represent a year of record achievement by the City and its many non-profit and for-profit partners.

Ms. Caplan answered various questions from Councilman Peterson with regard to the Report.

AMENDMENT TO COMMUNITY DEVELOPMENT BLOCK GRANT/HOME CONSOLIDATED PLAN

Councilman Peterson moved to excuse Councilwoman Bellamy from participating in this discussion. This motion was seconded by Councilman Worley and carried unanimously.

Ms. Charlotte Caplan, Community Development Director said that the this is the review of an amendment to the Community Development Block Grant (CDBG)/HOME Consolidated Plan.

The City's Consolidated Action Plan, approved in May each year, allocates our annual entitlement of CDBG and HOME funds to specific projects. From time to time, amendments are needed to deal with cancelled projects, cost over-runs, new urgent projects, or differences between actual and estimated program income. At this time, staff recommends the following amendments:

A. HOME Funding

The Board of the Asheville Regional Housing Consortium recommends the following amendments:

1. **Cancellation of Neighborhood Housing Services' multi-family rehabilitation project.** NHS used $103,500 in 1998 HOME funds to rehabilitate 14 apartments in three buildings in the Montford and midtown neighborhoods. However, NHS did not have enough other funding to bring the units completely up to standard and has decided to sell the buildings "as is" as part of its financial restructuring. The tenants have been relocated with help from the City, and NHS is repaying the HOME investment as each building is sold. $70,700 has already been repaid. These funds will be returned to the City's HOME Fund for future use on eligible activities.

2. **Reduction in funding for Rankin Heights project.** The construction of infrastructure for 17 new single family homes on Buttonwood Court in West Asheville was completed in 1999, slightly under budget. $4,469 is available to be re-allocated.

3. **Reduction in funding for HOME Administration.** Up to 10% of HOME funds may be set aside for the planning and administration of the program. The City of Asheville and the other Member Governments of the Regional Housing Consortium have consistently used only 6%-7% for this purpose. The Board recommends reducing the administrative allocation for 2001 by $43,000 and allocating that amount to projects instead.

4. **New HOME loan to Mountain Housing Opportunities to acquire land in Woodfin ($118,169)** Mountain Housing Opportunities plans to acquire a 9-acre site on Reynolds Mountain Blvd, off Weaverville Highway in Woodfin, for the construction of 70 affordable family apartments to be called Northpoint Commons. MHO currently holds an option on the site which is about to expire. It proposes to use HOME funds and private financing to acquire the site for a total price of $405,000. MHO intends to apply for Low Income Housing Tax Credits in the 2002 round and start construction in fall 2002.

5. **Cancellation of Probart Hills Subdivision Project in Brevard and Reallocation of unexpended funds to scattered site development.** Transylvania Housing Development Corporation was allocated a total of $233,889 in HOME funds in 1998 and 2000 to acquire land and develop a new S/F subdivision in Brevard. The agency was unable to obtain other funding needed for the development and now plans to sell the land and reimburse the HOME Investment Fund the $128,609 already expended on the project. The Agency and the City of Brevard have requested that the remaining $105,280 be re-allocated to assist the construction of three single family homes on scattered sites in Brevard. A public hearing will be held on this project in Brevard.

Financial Summary of Proposed HOME Amendments

Year	Project	Source	Original	Amended	Difference
1998	NHS M/F Rehabilitation	HOME	103,500	-0-	(103,500)
1995	Rankin Heights Infrastructure	HOME	248,000	243,531	(4,469)

B. CDBG Funding

The City's Housing and Community Development Committee recommends the following amendments:

1. $210,000 Float Loan to Neighborhood Housing Services, for Single Family New Construction
NHS has requested additional assistance in the construction of three new homes on Buttonwood Court (site of the former Rankin School). In order to reduce financing costs it has requested a short-term CDBG construction loan from the City in addition to a permanent HOME subsidy already allocated. The loan would be secured by an irrevocable letter of credit from a bank and repaid in July 2002. This type of loan can be "floated" by using funds already allocated to other projects which have not yet been spent and are unlikely to be spent in that time frame. Staff have identified the project to redevelop South Pack Square (current CDBG balance $500,000) as such a project.

2. Revised Certification on Low- and Moderate-Income Benefit.
HUD rules require not less than 70% of CDBG funds to be used for activities that directly benefit residents with income less than 80% of area median. This threshold may be met annually, or by averaging over three years. The City usually spends over 95% of its CDBG funds on such activities annually. However, we expect that expenditure on the revitalization of South Pack Square, which primarily addresses slum and blight, will cause the City to fall short of this threshold next year. Staff recommends revising the City's certification to HUD to specify the three-year period for meeting the threshold.

City staff recommends approval of the amendments.

Vice-Mayor Cloninger asked that the record show that City Council has received this information and instructs the City Manager to proceed with the appropriate public hearing on November 13, 2001.

RESOLUTION NO. 01-159 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ASHEVILLE PAVING COMPANY TO PREPARE THE SURFACE AND REPAVE THE .3 MILE OVAL AT THE FRENCH BROAD RIVER PARK PHASE IV

Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Bellamy and carried unanimously.

It was the consensus of City Council that Councilman Worley chair this portion of the meeting due to the conflict of interest of Vice-Mayor Cloninger.

City Manager Westbrook said that because of the weather, he asked that City Council consider at this meeting a resolution authorizing the City Manager to enter into a contract with Asheville Paving Company to prepare the surface and repave the .3 mile oval at French Broad River Park Phase IV.

The City of Asheville is continuing its development of the French Broad River Park Phase IV, which entails numerous recreational activities within the western most tract of land along Amboy Road. Among these activities is the old .3 mile oval that is being used for cycling, roller blading, and a variety of other fitness activities. It is necessary to repave the track to provide a quality surface that will be safe for the users of the facility. The project is funded through City of Asheville funds which are supplemented by the Parks and Recreation Trust Fund Grant. The Asheville Paving Company was the lowest responsible bidder to repave the track at a cost of $42,430.00.

The Parks and Recreation Department recommends the City Manager to authorized to enter into a contract with Asheville Paving Company to repair and repave the existing .3 mile oval at French Broad River Park Phase IV.

Councilman Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Hay moved to waive the rules and take formal action at this meeting. This motion was seconded by Councilwoman Field and carried unanimously.

Councilwoman Bellamy moved to adopt Resolution No. 01-159. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 476

BOARDS AND COMMISSIONS

City Council gave directions to City Clerk Burleson on interviews on various boards.

ADJOURNMENT:

Vice-Mayor Cloninger adjourned the meeting at 5:00 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – November 13, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

Due to a conflict of interest by Councilwoman Bellamy, Consent Agenda Item "F" was removed from the Consent Agenda to be voted on separately.

Due to a conflict of interest by Vice-Mayor Cloninger , Consent Agenda Items "H" and "J" were removed from the Consent Agenda to be voted on separately.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 23, 2001, AND THE WORKSESSION HELD ON NOVEMBER 7, 2001

B. RESOLUTION NO. 01-160 - RESOLUTION RECOGNIZING THE CITY OF ASHEVILLE AS A PARTICIPANT IN THE PILOT PROGRAM FOR REHABILITATING EXISTING BUILDINGS

Summary: the consideration of a resolution acknowledging the City of Asheville as a participant in the pilot program for rehabilitating existing buildings in the City of Asheville and adopting the Pilot Code, currently being prepared by Mecklenburg County.

The North Carolina General Assembly approved Session Law 2001-373, Senate Bill 633 on August 17, 2001, which is an act to establish a building code pilot program for rehabilitating existing buildings. The pilot code is based upon the New Jersey Uniform Construction Code Rehabilitation Subcode, which has received national praise and attention.

In 1999 the State of New Jersey's Rehabilitation Subcode was a winner of the "Innovations In American Government Award, an award competition of the Ford Foundation, the John F. Kennedy School of Government at Harvard University and Council for Excellence in Government." Their prize of $100,000 recognized their innovation and leadership of implementing a user friendly rehab code.

Benefits of the Rehabilitation Subcode in New Jersey included:

- Dramatic increase in the estimated dollar amount of rehabilitation work undertaken in New Jersey's urban areas during the first year that the rehabilitation subcode was in place.
- Takes a common sense approach and applies building code requirements to the rehabilitation of existing buildings in a rational manner, protecting the safety of building occupants without imposing needless requirements or unnecessary additional costs.

- Eliminate building code requirements as a disincentive to the rehabilitation of existing buildings

Senate Bill 633 authorizes a lead local jurisdiction in North Carolina to develop a pilot rehabilitation building code based upon the New Jersey Subcode. Substantive changes to the New Jersey model are not allowed. The pilot code may then be administered by local building inspection departments that have been approved by the Building Code Council to do local plan reviews. Asheville obtained local plan review approval in December 1997.

In order to participate in the pilot program, the eligible local jurisdiction's governing body must adopt the pilot code. Mecklenburg County, the lead local jurisdiction is currently in the process of finalizing the pilot code. It is anticipated the pilot code will be available for use before April, 2002.

The Director of Building Safety recommends City Council approve the resolution acknowledging the City of Asheville as a participant in the pilot program for rehabilitating existing buildings and further recommends adopting the pilot code.

RESOLUTION BOOK NO. 26 – PAGE 477

C. RESOLUTION NO. 01-161 - RESOLUTION AMENDING THE SCHEDULED CITY COUNCIL MEETINGS

Summary: (1) December 4, 2001, will be the organizational meeting beginning at 4:00 p.m. in the Council Chamber followed by the formal meeting at 5:00 p.m. in the Council Chamber; (2) December 11, 2001, will be a worksession beginning at 3:00 p.m. in the First Floor North Conference Room; (3) December 18, 2001, will be a formal meeting beginning at 5:00 p.m. in the Council Chamber; (4) December 25, 2001, meeting will be cancelled; and (5) January 1, 2002, meeting will be cancelled.

RESOLUTION BOOK NO. 26 – PAGE 478

D. RESOLUTION NO. 01-162 - RESOLUTION AMENDING PERSONNEL POLICY REGARDING MILITARY LEAVE

Summary: The consideration of a resolution amending Section 49, Military Leave, of the City of Asheville's Personnel Policy.

Section 49(2)(a), Military Leave, of the City's Personnel Policy currently provides that, in the event of national emergency or war, the health and dental insurance (including family coverage) of any City employee who is called-up for active military duty would continue until the employee's military insurance became effective.

The resolution amends this section of the City's Personnel Policy to continuously provide any benefit plan(s) in which the employee participates as if the employee were still working - regardless of any insurance that may be provided to these employees by the military.

Staff recommends the adoption of the resolution.

RESOLUTION BOOK NO. 26 – PAGE 479

E. RESOLUTION NO. 01-163 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "GLESTA KNOLL DRIVE" OFF OF ELIADA HOME ROAD

Summary: The consideration of a resolution accepting the new proposed street name "Glesta Knoll Drive."

Mr. Tommy Pressley, owner of lots in Glesta Knoll Subdivision, has petitioned the City of Asheville to accept the street name " Glesta Knoll Drive." The new street will begin at Eliada Home Road and end at cul-de-sac on Glesta Knoll Drive.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 26 - PAGE 480

F. MOTION SETTING A PUBLIC HEARING ON NOVEMBER 27, 2001, TO CONSIDER THE PROPOSED SALE OF PROPERTY ON BROTHERTON AVENUE TO MORSE PROPERTIES INC. FOR AFFORDABLE HOUSING DEVELOPMENT SITE AND THE AMENDMENT OF THE 2001 ACTION PLAN TO INCREASE COMMUNITY DEVELOPMENT BLOCK GRANT FUNDING FOR THE PROJECT

This item was removed from the Consent Agenda due to a conflict of interest by Councilwoman Bellamy.

G. ORDINANCE NO. 2868 - BUDGET AMENDMENT TO THE WATER 29 FUND

Summary: The consideration of a budget amendment to the 29 Fund (Water Bond Capital Improvements Fund) to reflect an increase in the Pipeline Replacement Phase II (Bee Tree Crossing), an increase in the N. C. Dept. of Transportation (NCDOT) Non-Betterment Projects, and a decrease in the Building Safety Improvements.

Funding for the Pipeline Phase II (Bee Tree Crossing Project) needs to be increased by $20,000 to cover the multiple change orders that have been necessary since this project was first initiated in 1996. There are also additional engineering expenses that have accumulated due to the time extension and changes in the project.

Funding also needs to be increased for two NCDOT Non-Betterment Projects totaling $147,630. The Utility Agreements for Sweeten Creek Phase I and Pisgah Highway Phase I included construction estimates that were lower than actual costs. The invoice from NCDOT for Sweeten Creek Phase I is $69,125 more than NCDOT's construction estimate and Pisgah Highway Phase I is $78,505 more.

Funding is available in the Building Safety Project since it has been determined that this project needs to be deleted to provide additional funding for NCDOT Non-Betterment Projects in Fiscal year 2003-2005. There is currently $1 million available and $167,630 of it is being redistributed to the Bee Tree Crossing and the NCDOT Non-Betterment Projects described above. The remaining $832,370 can be used to fund additional NCDOT projects that were initially planned to be funded with a second Revenue Bond Issue in Fiscal Year 2003. The City will not be issuing additional revenue bonds at this time. NCDOT Projects in Fiscal Year 2003 through 2005 total approximately $4 million. If sufficient revenue is not generated to pay for these projects on a pay-as-you-go basis, it will be necessary to set up a payment plan with NCDOT.

Staff recommends approval of the budget amendment to the 29 Fund to reflect the changes identified above.

ORDINANCE BOOK NO. 19 – PAGE 327

H. RESOLUTION CALLING FOR A PUBLIC HEARING ON DECEMBER 18, 2001, TO CLOSE A PORTION OF PORTER STREET FROM POND AVENUE TO ROSSCRAGGON ROAD AND THE 15-FOOT ALLEYWAY FROM PORTER STREET TO LEE STREET

This item was removed from the Consent Agenda due to a conflict of interest by Vice-Mayor Cloninger.

I. MOTION APPROVING THE DONATION OF A CHAIR FROM THE COUNCIL CHAMBER AND TWO PIECES OF TERRA COTTA FROM THE CITY HALL ROOF TO THE ASHEVILLE ART MUSEUM FOR THE DOUGLAS ELLINGTON COLLECTION

Summary: The Asheville Art Museum has requested the donation of several items from City Hall for the Douglas Ellington collection.

Over the past several years, the Asheville Art Museum has become a major repository for Douglas Ellington's architectural drawings, correspondence and other materials from the City Hall Building. The museum is trying to preserve and document his work in Asheville as a major figure in the art culture arena. They are working closely with his family to preserve his work and his legacy. The museum is requesting that the City donate a chair from the Council Chamber as well as two pieces of terra cotta from the roof of the City Hall Building. (We have several pieces of terra cotta that they could have.) The City would be placing these objects with the Asheville Art Museum in trust for their Douglas Ellington collection.

Staff recommends that Council approve the donation of a chair from the Council Chamber and two pieces of terra cotta from the City Hall roof to the Asheville Art Museum.

J. RESOLUTION AUTHORIZING EXECUTION OF A PARKING EASEMENT AT 36 GROVE STREET

This item was removed from the Consent Agenda due to a conflict of interest by Vice-Mayor Cloninger.

K. RESOLUTION NO. 01-164 - RESOLUTION FIXING DATE OF PUBLIC HEARING FOR NOVEMBER 27, 2001, ON THE QUESTION OF VOLUNTARY ANNEXATION OF PROPERTY KNOWN AS GARDEN HOMES AT BILTMORE PARK

RESOLUTION BOOK NO. 26 – PAGE 481

L. ORDINANCE NO. 2869 - ORDINANCE CHANGING THE NAME FROM THE ASHEVILLE FILM BOARD TO THE ASHEVILLE FILM COMMISSION

Summary: The consideration of an ordinance changing the name of the Asheville Film Board to Asheville Film Commission.

As Council requested last month, the ordinance changes the name of the "Asheville Film Board" to "Asheville Film Commission" and change "board" to "commission" where it appears in the ordinance. There are no changes to the Board's/Commission's powers or duties in connection with this name change. This name change has no budgetary implications. Some changes were also made to paragraph (b) to remove an apparent redundancy, and to paragraph (d) to make it read more smoothly.

Adoption of the ordinance is recommended.

ORDINANCE BOOK NO. 19 – PAGE 329

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Field and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA TO BE VOTED ON SEPARATELY

MOTION SETTING A PUBLIC HEARING ON NOVEMBER 27, 2001, TO CONSIDER THE PROPOSED SALE OF PROPERTY ON BROTHERTON AVENUE TO MORSE PROPERTIES INC. FOR AFFORDABLE HOUSING DEVELOPMENT SITE AND THE AMENDMENT OF THE 2001 ACTION PLAN TO INCREASE COMMUNITY DEVELOPMENT BLOCK GRANT FUNDING FOR THE PROJECT

Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Councilman Worley moved to set a public hearing on November 27, 2001, to consider the proposed sale of property on Brotherton Avenue to Morse Properties Inc. for affordable housing development site and the amendment of the 2001 Action Plan to increase Community Development Block Grant funding for the project. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION NO. 01-165 - RESOLUTION CALLING FOR A PUBLIC HEARING ON DECEMBER 18, 2001, TO CLOSE A PORTION OF PORTER STREET FROM POND AVENUE TO ROSSCRAGGON ROAD AND THE 15-FOOT ALLEYWAY FROM PORTER STREET TO LEE STREET

Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Councilman Hay moved for the adoption of Resolution No. 01-165. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 483

RESOLUTION NO. 01-166 - RESOLUTION AUTHORIZING EXECUTION OF A PARKING EASEMENT AT 36 GROVE STREET

Councilman Hay moved to excuse Vice-Mayor Cloninger from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Worley and carried unanimously.

Summary: The consideration of a resolution authorizing City to enter into an easement for parking at the Senior Opportunity Center on Grove Street.

Earlier this year, the City agreed to sell certain property located at 36 Grove Street. The property is situated between the building currently occupied by the Employment Security

Commission at 48 Grove Street and the building used by the City for the Senior Opportunity Center (SOC). The property is used for parking for both buildings and has some metered spaces on it. The buyers also own the 48 Grove Street building and intend to expand and renovate it, and acquired the City property for parking and access in connection with this expansion. This conveyance was subject to the City retaining an easement to allow for continued parking at the SOC.

The City has now negotiated that easement, which allows for the City to use the lot for parking for the SOC during non-business hours and on weekends, when it will not interfere with the use by the 48 Grove Street building, but also when its need by the SOC is highest. The easement is personal in nature, and terminates when the City ceases its use of the SOC. The parking spaces right next to the SOC were not part of the property conveyed and will continue to be available for daytime use by staff and visitors.

Adoption of the resolution authorizing the City to execute the easement.

Mayor Sitnick said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Worley moved for the adoption of Resolution No. 01-166. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 484

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO AMEND THE COMMUNITY DEVELOPMENT BLOCK GRANT/HOME CONSOLIDATED ACTION PLAN

RESOLUTION NO. 01-167 - RESOLUTION AMENDING THE COMMUNITY DEVELOPMENT BLOCK GRANT/HOME CONSOLIDATED ACTION PLAN

Councilman Worley moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

Mayor Sitnick opened the public hearing at 5:07 p.m.

Community Development Charlotte Caplan said that this is consideration of an amendment Community Development Block Grant (CDBG)/HOME Consolidated Plan.

The City's Consolidated Action Plan, approved in May each year, allocates our annual entitlement of CDBG and HOME funds to specific projects. From time to time, amendments are needed to deal with cancelled projects, cost over-runs, new urgent projects, or differences between actual and estimated program income. At this time, staff recommends the following amendments:

A. HOME Funding

The Board of the Asheville Regional Housing Consortium recommends the following amendments:

1. **Cancellation of Neighborhood Housing Services' multi-family rehabilitation project.**

NHS used $103,500 in 1998 HOME funds to rehabilitate 14 apartments in three buildings in the Montford and midtown neighborhoods. However, NHS did not have enough other funding to bring the units completely up to standard and has decided to sell the buildings "as is" as part of its financial restructuring. The tenants have been relocated with help from the City, and NHS is repaying the HOME investment as each building is sold. $70,700 has already been repaid. These funds will be returned to the City's HOME Fund for future use on eligible activities.

2. Reduction in funding for Rankin Heights project.
The construction of infrastructure for 17 new single family homes on Buttonwood Court in West Asheville was completed in 1999, slightly under budget. $4,469 is available to be re-allocated.

3. Reduction in funding for HOME Administration.
Up to 10% of HOME funds may be set aside for the planning and administration of the program. The City of Asheville and the other Member Governments of the Regional Housing Consortium have consistently used only 6%-7% for this purpose. The Board recommends reducing the administrative allocation for 2001 by $43,000 and allocating that amount to projects instead.

4. New HOME loan to Mountain Housing Opportunities to acquire land in Woodfin ($118,169)
Mountain Housing Opportunities plans to acquire a 9-acre site on Reynolds Mountain Blvd, off Weaverville Highway in Woodfin, for the construction of 70 affordable family apartments to be called Northpoint Commons. MHO currently holds an option on the site which is about to expire. It proposes to use HOME funds and private financing to acquire the site for a total price of $405,000. MHO intends to apply for Low Income Housing Tax Credits in the 2002 round and start construction in fall 2002.

5. Cancellation of Probart Hills Subdivision Project in Brevard and Reallocation of unexpended funds to scattered site development.
Transylvania Housing Development Corporation was allocated a total of $233,889 in HOME funds in 1998 and 2000 to acquire land and develop a new S/F subdivision in Brevard. The agency was unable to obtain other funding needed for the development and now plans to sell the land and reimburse the HOME Investment Fund the $128,609 already expended on the project. The Agency and the City of Brevard have requested that the remaining $105,280 be re-allocated to assist the construction of three single family homes on scattered sites in Brevard. A public hearing will be held on this project in Brevard.

Financial Summary of Proposed HOME Amendments

Year	Project	Source	Original	Amended	Difference
1998	NHS M/F Rehabilitation	HOME	103,500	-0-	(103,500)

B. CDBG Funding

The City's Housing and Community Development Committee recommends the following amendments:

1. $210,000 Float Loan to Neighborhood Housing Services, for Single Family New Construction
NHS has requested additional assistance in the construction of three new homes on Buttonwood Court (site of the former Rankin School). In order to reduce financing costs it has requested a short-term CDBG construction loan from the City in addition to a permanent HOME subsidy already allocated. The loan would be secured by an irrevocable letter of credit from a bank and repaid in July 2002. This type of loan can be "floated" by using funds already allocated to other projects which have not yet been spent and are unlikely to be spent in that time frame. Staff have identified the project to redevelop South Pack Square (current CDBG balance $500,000) as such a project.

2. Revised Certification on Low- and Moderate-Income Benefit.
HUD rules require not less than 70% of CDBG funds to be used for activities that directly benefit residents with income less than 80% of area median. This threshold may be met annually, or by averaging over three years. The City usually spends over 95% of its CDBG funds on such activities annually. However, we expect that expenditure on the revitalization of South Pack Square, which primarily addresses slum and blight, will cause the City to fall short of this threshold next year. Staff recommends revising the City's certification to HUD to specify the three-year period for meeting the threshold.

City staff recommends approval of the amendments.

Ms. Caplan responded to Councilman Peterson's questions regarding the three-year period for meeting the threshold with regard to the City's certification to HUD.

Mayor Sitnick closed the public hearing at 5:31 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Field moved for the adoption of Resolution No. 01-167. This motion was seconded by Councilman Hay and carried unanimously.

RESOLUTION BOOK NO. 26 – PAGE 485

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

At the request of City Attorney Oast, Vice-Mayor Cloninger moved to defer the following Board appointments until the next worksession in order to give the City Attorney time to research an issue that has arisen regarding potential appointments made by the present City Council. Said board appointments include the (1) ABC Board; (2) Sustainable Economic Development Strategic Plan Implementation Task Force; (3) Fair Housing Commission; (4) Firemen's Relief Fund; (5) Greenway Commission; (6) MSD Board; (7) Public Art Board; (8) Transit Commission; and (9) Tree Commission. This motion was seconded by Councilwoman Bellamy and carried unanimously.

VI. OTHER BUSINESS:

OUTSIDE MAGAZINE

Mayor Sitnick announced that Asheville is one of the top ten favorite "outdoor towns" of Outside Magazine.

SPONSORSHIPS AVAILABLE FOR BUS SHELTERS AND BENCHES

Mayor Sitnick announced that if anyone is interested in sponsoring a bus shelter and/or bus bench to contact Transit Services Director Bruce Black.

STATE OF THE CITY ADDRESS

Mayor Sitnick announced that the State of the City Address, which is a four year compilation of accomplishments and challenges, is available in the City Clerk's Office.

CLAIMS

The following claims were received by the City of Asheville during the period of October 12-25, 2001: Lula Mayes (Water), Beverly Workman (Parks & Recreation), Seth Allcorn (Water), Anna Arevalo (Sanitation), Paul Fleischer (Water), Melanie Grooms (Sanitation), BellSouth (Water), Laurie McKenzie (Sanitation), Michelle Stymacks (Streets) and James Conner (Sanitation).

The following claims were received by the City during the period of October 26-November 1, 2001: Mary Dowdle (Fire), Allen Yowell (Water), Sandra Webb (Police), Shawn Stirewalt (Transit Services), Don McCurry (Water) and Civic Center.

The following claims were received by the City during the period of November 2-9, 2001: David Gullyes (Streets), Mary Alice Nard (Water), Stephanie Miller (Streets), Dane Gumbinger (Streets), Jonathan H. Dorsey (Transit Services), and Steve Hughes (Civic Center.)

These claims have been referred to Asheville Claims Corporation for investigation.

LAWSUIT

The City filled a Complaint on October 30, 2001, against David Hamilton regarding violation of Section 10-31 of the Code of Ordinances regulating abandoned or junked motor vehicles. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

COMMENTS BY FRED ENGLISH

Mr. Fred English explained why he felt why race car drivers Bob Presley, Robert Presley and Jack Ingram should be given special recognition by the City of Asheville. He also questioned Asheville's enforcement of the vagrancy laws in the downtown area.

COMMENTS BY WALTER PLAUE

Mr. Walter Plaue asked City Council for suggestions on how to work with the School Board on enforcement of the truancy program which would address the high drop-out rate in our area.

112

COMMENTS BY HAZEL FOBES

Ms. Hazel Fobes urged City Council to write and call our legislators to enact the Clean Smokestack Act.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 6:01 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – November 20, 2001 - 3:00 p.m.

Worksession

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr. (excused from meeting at 3:45 p.m.); Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Lease for Rock House

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease agreement with the Preservation Society of Asheville and Buncombe County for the use of the Rock House at Grove Park.

For several months, the Parks and Recreation Department has been working with the Preservation Society for the renovation and use of the Rock House at Grove Park on Charlotte Street. The Rock House was the original office building for E. W. Grove. This facility has been vacant for at least 10 years and has continued to deteriorate from lack of upkeep. The Preservation Society wishes to move their offices to the Rock House. This agreement calls for the Preservation Society to make all necessary renovations and improvements to the facility in order to obtain a Certificate of Occupancy. The rent will be deferred for a period of time in an effort to recoup their costs for this renovation. This lease will allow for the building to be brought back into a state of repair and will allow for a tenant in the facility that will continue to maintain the facility. The City of Asheville will not have any costs associated with this renovation and will maintain ownership of the facility. This agreement will greatly benefit both the Preservation Society and the City of Asheville.

The Parks and Recreation Department recommends that City Council authorize the City Manager to enter into a lease agreement with the Preservation Society of Asheville and Buncombe County for the use of the Rock House at Grove Park.

Parks & Recreation Director Irby Brinson responded to questions from Councilwoman Bellamy as they related to some of the concerns expressed by the neighbors with regard to the hours the building would be open.

Agreement with Lewis' for Funding of Soccer Fields at Azalea Road Park

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement amongst the Western North Carolina Soccer Foundation, Ben and Becky Lewis, and the City of Asheville for funding for the John B. Lewis Soccer Complex at Azalea Road.

Ben and Becky Lewis have donated $350,000 to the Western North Carolina Soccer Foundation for construction of a soccer complex at Azalea Road in memory of their son, John, and avid soccer player, who tragically lost his life in a car accident several years ago. The Western North Carolina Soccer Foundation, in turn, will make grant payments to the City of Asheville in the amount of $35,000 per year over a ten-year period to support construction of the soccer complex.

In order to begin construction within the next year, the City will need funding in advance of the $35,000 annual payments from the Soccer Foundation. To provide the necessary advance funding, staff plans to request from an appropriation of $350,000 from Council in the upcoming budget process. This amount will be reimbursed over a ten-year period as the Western North Carolina Soccer Foundation makes the annual grant payments to the City.

The agreement will allow the City, through communication with the Soccer Foundation, the right to use the soccer complex for other uses. We anticipate this funding will assist in securing additional funds in the future from both grants and corporate sponsorships.

The Parks and Recreation Department requests City Council to authorize the City Manager to enter into an agreement with Western North Carolina Soccer Foundation and Ben and Becky Lewis for $350,000 for the construction of the John B. Lewis Soccer Complex.

Parks & Recreation Director Irby Brinson answered various questions from Councilman Peterson and Councilwoman Bellamy regarding how this affects the budget process, if the fields will be available for public use, and how this fits in with other priorities.

License Agreement Amendment for US Cellular at White Fawn

Summary: The consideration of a resolution authorizing City Manager to execute Amendment #2 to the lease with North Carolina RSA #4, Inc. for tower and ground space at 36 Reservoir Road

The property at 36 Reservoir Road is the site of the former White Fawn Reservoir. In recent years the site was used as a beneficial fill site for the City of Asheville. Currently, three telecommunication towers are located on the property and the City leases antenna space on two of the towers and ground space for related equipment for a total of eight tenants. One tower is not in use. The property is the proposed future site of the "Sister Cities Park."

North Carolina RSA #4, Inc. (formerly U.S. Cellular "USC") has leased tower and ground space at the site since 1987. The site is the location of USC's primary mobile telephone switching office (MTSO) for Western North Carolina. Due to service demand, USC has requested an amendment to its lease in order to expand the MTSO facility and provide better all-weather access to the site. The proposed lease amendment will enable USC to expand the MTSO facility and separate the tower access from the proposed park access.

The lease currently is in a rent credit stage amortizing an original construction cost of $76,500. Over $20,000 construction cost remains to be credited at $400 per month. Under the current lease terms, beginning in 2006 when the construction cost is fully credited, building rent in the amount of $550 per month would begin making a total rent of $950 per month payable until 2017. The present value of the current lease is approximately $67,262. Under the proposed amendment both the rent credit and the building rent would be eliminated and a total monthly rent of $1,500 would begin no later than January 1, 2002. The rent would be adjusted annually based on the Consumer Price Index. The term of the lease would remain unchanged. The present value of the proposed amendment is approximately $228,507.

In addition to the above, USC will construct a separate access at a cost of approximately $50,000 and remove the abandoned tower and equipment shed on the site. The appearance of the building will be upgraded along with the expansion and buffer planting will be added.

Planning Department staff recommends adoption of the resolution.

Grove Arcade Sidewalk and Bulb-Out Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Weaver Cooke Construction, LLC, to construct sidewalks and bulb-outs located along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade in Asheville, N.C.

The City is in need of a contractor to provide sidewalk and bulb-out construction services for sidewalks and bulb-outs along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade. In accordance with N.C. Gen. Stat. sec. 143-131, informal bids for sidewalk and bulb-out construction services were solicited and five responses were received, with two qualified bids received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Weaver Cooke Construction, LLC	0%	Yes	No	$ 71,000.00
Candler Concrete Works Inc.	0%	Yes	No	$136,868.60

Funding for this project has been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Weaver Cooke Construction LLC to construct sidewalks and bulb-outs along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade.

Cost Sharing Agreement with Mountain Housing Opportunities

Summary: The consideration of a resolution authorizing a cost sharing agreement between the City of Asheville and Mountain Housing Opportunities (MHO) to resurface and construct sidewalks located along Hilliard Avenue in Asheville, North Carolina.

In conjunction with the West End-Clingman Avenue Neighborhood (WE-CAN project, Mountain Housing Opportunities will resurface and install sidewalks along a portion of Hilliard Avenue. The City had previously identified Hilliard Avenue as a potential resurfacing project. The City and MHO wish to enter into an agreement for MHO to extend the limits of its project to resurface and install sidewalks along the entire length of West Hilliard Avenue. MHO will comply with all bidding laws as required of the City, specifically with N.C. Gen. Stat. sec. 143-129.

Funding for this project has been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into agreement with Mountain Housing Opportunities to resurface and construct sidewalks along West Hilliard Avenue.

Parking Citations Management Agreement

Summary: The consideration of a resolution authorizing the City Manager to execute an agreement with Complus Data Innovations, Inc. for parking citations management services.

In April 1992 the City entered into an agreement with Complus Data Innovation, Inc. for parking citation management services. The agreement was for a period of three years with two additional automatic one year extensions. In June 1997 the original agreement was extended for two years with an option for two additional one-year extensions – through 2001. Complus provides the City with data automation equipment (handheld ticket writing devices, bar code reader, desktop computer with parking citation management software and modem), communications links with Complus' nationwide citation management system, nationwide research of vehicle owners and addresses and mailing of delinquent citation notices. In exchange for these services, the City reimburses Complus a percentage of the revenue received from citations issued through the Complus system (14.5% for tickets issued to North Carolina registered vehicles and 20% for out of state vehicles). Complus' equipment and delinquent citation follow-up services have been instrumental in improving the City's parking citation collection rates and increasing associated revenues.

The proposed new agreement is for a period of three years with an automatic option for one additional three year period unless either party gives sixty days notice of their intent not to enter into the option. Reimbursements to Complus in Fiscal Year '01-'02 are included in the Finance Department Collections Division Contracted Services budget.

City Council approve the proposed resolution which authorizes the City Manager to execute the agreement.

Olympic Torch Run Relay Agreement

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Salt Lake Organizing Committee (SLOC) to provide services for the Olympic Torch Relay in Asheville on December 5, 2001.

The SLOC for the Olympic Winter Games of 2002 approached the Mayor and City Manager and requested the City of Asheville's participation in the Olympic Torch Relay.

The Olympic Torch Relay is scheduled to come through Asheville on Wednesday, December 5, 2001, arriving at approximately 10:30 a.m. and departing at approximately 12:30 p.m. The Relay will begin in South Asheville on Hendersonville Road and depart from I-240. At approximately 12:15 p.m., the Relay will take an official break in downtown Asheville in City-County Plaza. Consultation with the Police Department for security and traffic procedures has been performed.

A Task Force was formed through the Parks and Recreation Department to coordinate this effort. Representatives from the City, the United Way of Asheville and Buncombe County, the Volunteer Center, Buncombe County Recreation Services, the Community Foundation of WNC, Henderson County, the Asheville Track Club, Asheville High School, and the Mayor's Committee on the Disabled serve on this Task Force.

The Parks and Recreation Department recommends the City of Asheville to enter into an agreement with the Salt Lake Organizing Committee for the Olympic Torch Relay for the Olympic Winter Games of 2002.

Budget Amendment regarding Outside Professional Fees

Summary: The consideration of an amendment to the Fiscal Year 2001-2002 Budget Ordinance to provide for legal and professional services.

The budget for fiscal year 2001-2002 provided $30,000 for legal services and $1,000 for other professional services in the City Attorney's Office. Due primarily to costs associated with the defense of the challenges to the annexation ordinances adopted by the City in 2000, these line items are nearly depleted.

Two more legal challenges to the 2000 annexations will be tried during the current fiscal year. Additionally, there will be other matters arising during the remainder of the fiscal year for which outside counsel and professional services are required or are typically used.

We estimate that an additional $40,000 will be needed for outside counsel to assist in our defense of annexation challenges and other matters and $10,000 will be needed for the other professional services. A proposed ordinance making a $50,000 appropriation from fund balance to cover these additional legal expenses has been prepared.

Adoption of the ordinance is recommended.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

BOARD APPOINTMENTS

Councilwoman Bellamy moved to waive the rules and take action on the following four board appointments at this meeting. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION NO. 01-168 - RESOLUTION APPOINTING A MEMBER TO THE ABC BOARD

Vice-Mayor Cloninger said that this is the consideration of appointing a member to the Alcoholic Beverage Control Board.

The term of Gene Ellison, as a member on the ABC Board, expired on November 13, 2001.

Councilman Worley moved to excuse Councilwoman Field from participating in this item. This motion was seconded by Councilman Hay and carried unanimously.

Councilwoman Bellamy moved to appoint Barbara Field to serve a three year term, term to begin December 5, 2001, and expire November 13, 2004, or until her successor has been appointed. This motion was seconded by Councilman Worley and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 1

RESOLUTION NO. 01-169 - RESOLUTION APPOINTING A MEMBER TO THE AIRPORT AUTHORITY

Vice-Mayor Cloninger said that this is the consideration of appointing a member to the Asheville Regional Airport Authority.

Mr. William Moore has resigned from the Asheville Regional Airport Authority, thus leaving an unexpired term until June 30, 2002.

On November 13, 2001, City Council interviewed Rod Whiteside, Edison Seel, George Keller, John Mills, Rhett Grotzinger and Barbara Shagan-Dave.

Mr. Rhett Grotzinger received seven votes, therefore, Mr. Grotzinger was appointed to serve the unexpired term of William Moore, term to expire June 30, 2002, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 2

RESOLUTION NO. 01-170 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE

Vice-Mayor Cloninger said that there currently exists four vacancies on the Sustainable Economic Development Strategic Plan Implementation Task Force: Ben Slosman, David Brown, Theo Pritchett and Brenda Webster. Said terms will expire June 30, 2003.

The Task Force has presented City Council with the following list of people who have been contacted and who have confirmed their willingness to serve, if asked: Paula O'Hara (New South Business Ventures); Marvin Slosman (Slosman Development); Oscar Wong (Highland Brewing); Gene Bell (Housing Authority); Tom Hallmark (Asheville Merchants Association); David Phillips (Carolina Power & Light Company); Brady Blackburn; Mike Greene (Wick and Greene); Valerie Dennis (Anaya Gallery); and Barbara Field.

Councilwoman Barbara Field asked that her name be removed from consideration due to her recent appointment to the ABC Board.

David Phillips received 6 votes; Gene Bell received 6 votes; Marvin Slosman received 4 votes; Paula O'Hara received 3 votes; Tom Hallmark received 2 votes; Valerie Dennis received 2 votes; Brady Blackburn received 2 votes; Mike Greene received 2 votes; and Oscar Wong received 1 vote. Therefore, Paula O'Hara, Marvin Slosman, Gene Bell and David Phillips are hereby appointed until June 30, 2003, or until their successors have been appointed.

After Councilwoman Bellamy pointed out that there is no African American female on this Task Force and that Valerie Dennis would fill that spot, City Clerk Burleson noted that there is still a vacancy on this Task Force as Council set the Task Force up to a maximum of 19 members. Councilwoman Field also pointed out that it would be good to have the Chairman of the MSD Board (Brady Blackburn) as a member on the Task Force.

Councilwoman Bellamy moved to appoint Valerie Dennis as a member to the Sustainable Economic Development Implementation Plan Task Force to serve until June 30, 2003, or until her successor has been appointed. This motion was seconded by Councilman Peterson and carried on a 6-1 vote, with Councilwoman Field voting "no".

RESOLUTION BOOK NO. 27 – PAGE 3

RESOLUTION NO. 01-171 - RESOLUTION APPOINTING MEMBERS TO THE FILM COMMISSION

Vice-Mayor Cloninger said that this is the consideration of appointing members to the Asheville Film Commission.

The terms of Vice-Mayor Chuck Cloninger, Gayle Wurthner, Lee Nesbitt, Andrea Dray, Kathleen Bobak, Guy Chancey, Diana Bilbrey, and David Quinn, as members on the Asheville Film Commission, expired on November 1, 2001. In addition, Sarah Blankenship has resigned her position, thus leaving an unexpired term until November 1, 2003.

At their November meeting, the Asheville Film Commission recommended City Council (1) reappoint Gayle Wurthner, Lee Nesbitt, Andrea Dray, Kathleen Bobak, and Guy Chancey to each serve a three year term, terms to expire November 1, 2004; and (2) appoint Councilwoman Terry Bellamy to serve a three year term, term to expire November 1, 2004, or whenever her term of City Council ends.

In addition, the Commission requested City Council readvertise for the other three positions currently left vacant by the resignations of David Quinn, Diana Bilbrey and Sarah Blankenship. The Commission members were not comfortable making recommendations from the applications received from City residents. The Film Commission members will actively recruit for qualified candidates.

Mayor Sitnick moved to (1) reappoint Gayle Wurthner, Lee Nesbitt, Andrea Dray, Kathleen Bobak, and Guy Chancey to each serve a three year term, terms to expire November 1, 2004; and (2) appoint Councilwoman Terry Bellamy to serve a three year term, term to expire November 1, 2004,or until her term on City Council ends. This motion was seconded by Councilwoman Field and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 4

BOARD VACANCIES THAT EXPIRE ON OR AFTER 12/31/01

City Attorney Oast explained that the City Council in office at the time the vacancies occur hold the power to fill those vacancies. Therefore, it was the consensus of City Council to defer action on the following boards/commissions that will have vacancies that expire on or after 12/31/01 to the new Council: Board of Adjustment, Community Relations Council, Fair Housing Commission, Firemen's Relief Fund, Greenway Commission, Metropolitan Sewerage District Board of Directors, Public Art Board, Transit Commission and Tree Commission.

At 3:45 p.m., Councilman Worley moved to excuse Councilman Hay from the meeting. This motion was seconded by Councilwoman Bellamy and carried unanimously.

AZALEA ROAD BENEFICIAL FILL REPORT

Public Works Director Mark Combs said that in June City Council directed staff to investigate practicable sites for the long term disposal of beneficial fill materials.

The Public Works and Water Departments dispose of approximately 11,000 tons of old concrete, asphalt and dirt each year. In February the City's White Fawn Reservoir fill site reached maximum capacity, which necessitated disposal at the Buncombe County landfill.

In October of 1997 staff instituted a site selection team for the purpose of finding a new disposal/fill site. In June of 1998 staff selected a site on Azalea Road and started negotiations with the property owner. After numerous public hearings, a citizen/staff task force developed a request for proposal (RFP) to conduct a feasibility study of this site. In January 2001, Woolpert LLC (Engineering Firm who conducted feasibility study) presented their report to City Council and advised further development and subsequent operations.

On May 15, 2001, staff requested and received a $75,000 appropriation to pay for anticipated tip fees due to the closing of White Fawn. Through October, 19, 2001, the City has paid tip fees of $234,329.28. In the same meeting Council directed staff to conduct a thorough investigation into all potential sites and report their findings when completed.

In the current fiscal year (4 months), Public Works spent $52,341 for tip fees, which is $22,341 more than the $30,000 originally budgeted. Staff had anticipated the final site selection would be completed by the second quarter.

Mr. Combs then explained that a beneficial fill is defined as including only used asphalt and inert debris such as concrete, brick, concrete block, uncontaminated soil, rock and gravel. No permit is required so long as (1) fill activity involves no excavation; and (2) the purpose is to improve land use potential.

A letter received on June 15, 2001, from Mr. Dan LaMontagne, Head of the State's Superfund, stated that "no hazardous substances can be associated with the Azalea Road landfill and no release of hazardous substances from the landfill have been documented …"

Mr. Richard Grant, Solid Waste Manager, explained that the following sites were investigated: Azalea Road, Bartlett Street (Murray Hill), Beaverdam Baptist Church, Buncombe County Landfill, Burney Mountain Road Fairview, Gaston Street, Hawthorne Drive (Beverly Hills), Houston Street and Courtland Avenue (Montford), Memorial Stadium property, Moore Street (Sycamore Hollow), and Richmond Hill Drive (Richmond Hill). Locations evaluated included: Azalea Road, Buncombe County Landfill, Burney Mountain Road (Fairview), Houston Street and Courtland Avenue (Montford), Memorial Stadium property, Moore Street (Sycamore Hollow) and Richmond Hill Drive (Richmond Hill).

Mr. Grant explained the estimated yearly tonnage from the Street Division and from the Water Resources Department. He then went into detail on each one of the site locations mentioned above outlining the tangible costs (with and without recycling) which included: mileage costs, labor costs (transportation), operational costs, site costs, land costs and tip fees.

Mr. Grant then explained the site evaluation criteria used for the seven locations which included cost, capacity, homes in 500-foot buffer, and homes on route.

Mr. Combs explained that as a result of this detailed investigation, City staff recommends the Azalea Road site. It is City-owned property, has 20 + years life, has the least neighborhood impact, the feasibility study and operations plan have been completed, and it can be integrated with the Parks & Recreation Master Plan.

Mr. Combs and Mr. Grant answered various questions from Council, some being, but are not limited to: how does recycling come into play regarding the life of the particular sites; how many years will be added to the life of the site with recycling; what were the reasons why smaller sites where not investigated; what is the value of some of the smaller sites vs. what their value would be if they were filled in and built on; what is involved with building on sites once they are filled; and how was the viewshed factored into the criteria.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

BROTHERTON SITE DEVELOPMENT CONTRACT

Community Development Director Charlotte Caplan said that this is the consideration of (1) the sale and development of the City-owned site on Brotherton Avenue; and (2) amendment of the City's 2001-02 Consolidated Action Plan to allocate program income from the sale of the site to site development

The City has allocated a total of $370,000 in Community Development Block Grant (CDBG) funds for the purchase and improvement of a 7.3 acre site at the intersection of Virginia and Brotherton Avenues, with the intention of developing it for affordable homeownership on the "cohousing" model. A cohousing development is characterized by:

- Resident involvement in the design process;
- Physical design that deliberately encourages a sense of community;
- Extensive common facilities, including a common house;
- Complete resident management when the development is complete.

An excellent example is the Westwood cohousing community on Vermont Place, about a mile to the west..

In September 2000, the City purchased the site from the Housing Authority for $120,000. In March 2001 the City issued a Request for Proposals (RFP) for a developer. Two proposals were received, but only one was fully responsive to the terms of the RFP. This proposal from Morse Properties, Inc. is for a mixed-income development of 38 homes, 26 of which would be subsidized to be affordable to families with incomes less than 80% of area median. The Housing and Community Development Committee has reviewed the proposal and recommends acceptance.

To comply with CDBG regulations, the $250,000 in CDBG funds already allocated for site improvements must be expended while the property is in public ownership. Additionally, to comply with State law, the property must be sold to the developer at not less than the current appraised value of $147,000. Staff therefore recommend the following steps for approval by Council at this time:

1. Entering into a contract for sale of the site to Morse Properties, subject to City approval of the final design for the development (including all necessary planning and technical approvals) and satisfactory completion of site improvements;
2. Amendment of the 2001-02 Action Plan to recognize the anticipated receipt of the sales proceeds and allocation of the same amount to site development.
3. Entering into a CDBG funding agreement with Morse Properties for a total of $397,000 CDBG subsidy for site improvements, to be passed on as subsidy to the 26 income-eligible homebuyers.

Steps 1 and 2 require a public hearing. As soon as these steps are implemented, the developer will develop a final site design which we expect will be submitted for approval as a Planned Unit Development early next year. Consultation with neighborhood residents will be an important part of this process.

Staff and the Housing and Community Development Committee recommend approval of the resolution for the sale of the property, the funding agreement, the amendment of the Action Plan, and a budget amendment regarding the increase in the CDBG budget to recognize receipt of program income from sale of land and allocation of sale proceeds to the Brotherton Avenue development project.

Ms. Caplan responded to several questions from Councilman Peterson regarding the infrastructure in the area.

Upon inquiry of Councilwoman Bellamy, Mr. Morse said that the estimated cost of the entire project is approximately $4.2 Million with infrastructure improvements totaling approximately $440,000.

Councilwoman Bellamy was concerned that the co-housing will not be filled by local residents.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

122

AMENDMENT TO ASHEVILLE SMOKE CONTRACT

Civic Center David Pisha said that this is the consideration of a resolution authorizing the City Manager to enter into an amended lease agreement with Asheville Professional Hockey, Ltd., for the use of the Civic Center.

For several months, the Civic Center Department has been working with the Asheville Smoke Hockey to amend the lease for use of the Civic Center for their games. The purpose of these discussions was to simplify the lease for both parties. At the same time, the Civic Center wanted to ensure a greater rent payment through all levels of attendance. As negotiated, the primary changes in the agreement are essentially the terms that would automatically go into effect in the option years (years 6 and 7) of the contract with the following exceptions: (a) The rent per game is $250.00 higher than in the option years. Depending on attendance, this could be as much as $1,000 higher than is currently charged per game; (b) the City agrees to assume the payments on the ice rink cover for the remaining three years; (c) no further rink reimbursement would be required of the team.

The changes are as follows:

- A flat rent per game of $1,750. This replaces a floating rent that can vary between $750 per game up to $1,500 per game based on attendance.
- The City will assume the remaining payments on the ice rink cover.
- The City will cease collecting any ice rink reimbursement fees.
- The City will share concession revenues with the team after the first $200,000 in sales. After deducting taxes and food costs the team would receive 10% of the resulting net.

Mr. Pisha responded to several questions from Councilman Peterson regarding the projected financial results of these changes.

The Civic Center Department recommends that City Council authorize the City Manager to enter into an amended lease agreement with the Asheville Professional Hockey.

Mayor Sitnick asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 5:29 p.m.

Magdalen Burleson
CITY CLERK

Leni Sitnick
MAYOR

Tuesday – November 27, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Leni Sitnick, Presiding; Vice-Mayor M. Charles Cloninger; Councilwoman Terry Bellamy; Councilwoman Barbara Field; Councilman Edward C. Hay Jr.; Councilman Brian L. Peterson; and Councilman Charles R. Worley; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Mayor Sitnick gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER 27, 2001, AS "CITY PLANNING DAY"

Mayor Sitnick read the proclamation proclaiming November 27, 2001, as "City Planning Day" in the City of Asheville. She presented the proclamation to Mr. Jan Davis, Chairman of the Planning & Zoning Commission, who thanked City Council on their excellent staff and initiatives of smart growth.

B. PROCLAMATION PROCLAIMING DECEMBER 1, 2001, AS "WORLD AIDS DAY"

Mayor Sitnick read the proclamation proclaiming December 1, 2001, as "World AIDS Day" in the City of Asheville. She presented the proclamation to Ms. Amy Pruett who briefed City Council on some activities taking place during that day.

C. RESOLUTION OF APPRECIATION TO INDIVIDUALS FOR THEIR WORK REGARDING THE REVITALIZATION OF DOWNTOWN ASHEVILLE

Mayor Sitnick said that as a result of the death of Mr. Julian Price, this resolution will be postponed.

II. CONSENT:

Councilwoman Bellamy asked that Consent Agenda Item "F" be removed from the Consent Agenda due to her conflict of interest.

Mayor Sitnick asked that Consent Agenda Item "K" be removed from the Consent Agenda for comments from Mr. Dan Wilhelm, President/Owner of the Asheville Smoke.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 13, 2001, AND THE WORKSESSION HELD ON NOVEMBER 20, 2001

B. RESOLUTION NO. 01-172 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH THE PRESERVATION SOCIETY OF ASHEVILLE AND BUNCOMBE COUNTY FOR THE USE OF THE ROCK HOUSE AT GROVE PARK

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease agreement with the Preservation Society of Asheville and Buncombe County for the use of the Rock House at Grove Park.

For several months, the Parks and Recreation Department has been working with the Preservation Society for the renovation and use of the Rock House at Grove Park on Charlotte Street. The Rock House was the original office building for E. W. Grove. This facility has been vacant for at least 10 years and has continued to deteriorate from lack of upkeep. The Preservation Society wishes to move their offices to the Rock House. This agreement calls for the Preservation Society to make all necessary renovations and improvements to the facility in order to obtain a Certificate of Occupancy. The rent will be deferred for a period of time in an effort to recoup their costs for this renovation. This lease will allow for the building to be brought back into a state of repair and will allow for a tenant in the facility that will continue to maintain the facility. The City of Asheville will not have any costs associated with this renovation and will maintain ownership of the facility. This agreement will greatly benefit both the Preservation Society and the City of Asheville.

The Parks and Recreation Department recommends that City Council authorize the City Manager to enter into a lease agreement with the Preservation Society of Asheville and Buncombe County for the use of the Rock House at Grove Park.

RESOLUTION BOOK NO. 27 – PAGE 5

C. RESOLUTION NO. 01-173 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE WESTERN NORTH CAROLINA SOCCER FOUNDATION AND BEN AND BECKY LEWIS FOR $350,000 FOR THE CONSTRUCTION OF THE JOHN B. LEWIS SOCCER COMPLEX AT AZALEA ROAD PARK

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement amongst the Western North Carolina Soccer Foundation, Ben and Becky Lewis, and the City of Asheville for funding for the John B. Lewis Soccer Complex at Azalea Road.

Ben and Becky Lewis have donated $350,000 to the Western North Carolina Soccer Foundation for construction of a soccer complex at Azalea Road in memory of their son, John, and avid soccer player, who tragically lost his life in a car accident several years ago. The Western North Carolina Soccer Foundation, in turn, will make grant payments to the City of Asheville in the amount of $35,000 per year over a ten-year period to support construction of the soccer complex.

In order to begin construction within the next year, the City will need funding in advance of the $35,000 annual payments from the Soccer Foundation. To provide the necessary advance funding, staff plans to request from an appropriation of $350,000 from Council in the upcoming budget process. This amount will be reimbursed over a ten-year period as the Western North Carolina Soccer Foundation makes the annual grant payments to the City.

The agreement will allow the City, through communication with the Soccer Foundation, the right to use the soccer complex for other uses. We anticipate this funding will assist in securing additional funds in the future from both grants and corporate sponsorships.

The Parks and Recreation Department requests City Council to authorize the City Manager to enter into an agreement with Western North Carolina Soccer Foundation and Ben and Becky Lewis for $350,000 for the construction of the John B. Lewis Soccer Complex.

RESOLUTION BOOK NO. 27 – PAGE 6

D. RESOLUTION NO. 01-174 - RESOLUTION AUTHORIZING THE AMENDMENT TO THE LEASE WITH THE NORTH CAROLINA RSA #4 INC. (FORMERLY US CELLULAR) FOR TOWER AND GROUND SPACE AT WHITE FAWN RESERVOIR

Summary: The consideration of a resolution authorizing City Manager to execute Amendment #2 to the lease with North Carolina RSA #4, Inc. for tower and ground space at 36 Reservoir Road

The property at 36 Reservoir Road is the site of the former White Fawn Reservoir. In recent years the site was used as a beneficial fill site for the City of Asheville. Currently, three telecommunication towers are located on the property and the City leases antenna space on two of the towers and ground space for related equipment for a total of eight tenants. One tower is not in use. The property is the proposed future site of the "Sister Cities Park."

North Carolina RSA #4, Inc. (formerly U.S. Cellular "USC") has leased tower and ground space at the site since 1987. The site is the location of USC's primary mobile telephone switching office (MTSO) for Western North Carolina. Due to service demand, USC has requested an amendment to its lease in order to expand the MTSO facility and provide better all-weather access to the site. The proposed lease amendment will enable USC to expand the MTSO facility and separate the tower access from the proposed park access.

The lease currently is in a rent credit stage amortizing an original construction cost of $76,500. Over $20,000 construction cost remains to be credited at $400 per month. Under the current lease terms, beginning in 2006 when the construction cost is fully credited, building rent in the amount of $550 per month would begin making a total rent of $950 per month payable until 2017. The present value of the current lease is approximately $67,262. Under the proposed amendment both the rent credit and the building rent would be eliminated and a total monthly rent of $1,500 would begin no later than January 1, 2002. The rent would be adjusted annually based on the Consumer Price Index. The term of the lease would remain unchanged. The present value of the proposed amendment is approximately $228,507.

In addition to the above, USC will construct a separate access at a cost of approximately $50,000 and remove the abandoned tower and equipment shed on the site. The appearance of the building will be upgraded along with the expansion and buffer planting will be added.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE 7

E. RESOLUTION NO. 01-175 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WEAVER COOKE CONSTRUCTION LLC TO CONSTRUCT SIDEWALKS AND BULB-OUTS ALONG BATTLE SQUARE, BATTERY PARK AVENUE, PAGE AVENUE, AND O.HENRY AVENUE ADJACENT TO THE GROVE ARCADE

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Weaver Cooke Construction, LLC, to construct sidewalks and bulb-outs located along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade in Asheville, N.C.

The City is in need of a contractor to provide sidewalk and bulb-out construction services for sidewalks and bulb-outs along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade. In accordance with N.C. Gen. Stat. sec. 143-

131, informal bids for sidewalk and bulb-out construction services were solicited and five responses were received, with two qualified bids received. The bidders are listed below:

Company	MB Part	Drug Free	Bond	Bid
Weaver Cooke Construction, LLC	0%	Yes	No	$ 71,000.00
Candler Concrete Works Inc.	0%	Yes	No	$136,868.60

Funding for this project has been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Weaver Cooke Construction LLC to construct sidewalks and bulb-outs along Battle Square, Battery Park Avenue, Page Avenue, and O.Henry Avenue adjacent to the Grove Arcade.

RESOLUTION BOOK NO. 27 – PAGE 8

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A COST-SHARING AGREEMENT WITH MOUNTAIN HOUSING OPPORTUNITIES FOR RESURFACING HILLIARD AVENUE

This item was removed from the Consent Agenda due to a conflict of interest by Councilwoman Bellamy.

G. RESOLUTION NO. 01-176 - RESOLUTION FIXING DATE OF PUBLIC HEARING FOR DECEMBER 28, 2001, ON THE QUESTION OF VOLUNTARY ANNEXATION OF PROPERTY KNOWN AS OLMSTED, SECTION 2, OF BILTMORE PARK

RESOLUTION BOOK NO. 27 – PAGE 9

H. RESOLUTION NO. 01-177 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH COMPLUS DATA INNOVATIONS INC. FOR PARKING CITATIONS MANAGEMENT SERVICES

Summary: The consideration of a resolution authorizing the City Manager to execute an agreement with Complus Data Innovations, Inc. for parking citations management services.

In April 1992 the City entered into an agreement with Complus Data Innovation, Inc. for parking citation management services. The agreement was for a period of three years with two additional automatic one year extensions. In June 1997 the original agreement was extended for two years with an option for two additional one-year extensions – through 2001. Complus provides the City with data automation equipment (handheld ticket writing devices, bar code reader, desktop computer with parking citation management software and modem), communications links with Complus' nationwide citation management system, nationwide research of vehicle owners and addresses and mailing of delinquent citation notices. In exchange for these services, the City reimburses Complus a percentage of the revenue received from citations issued through the Complus system (14.5% for tickets issued to North Carolina registered vehicles and 20% for out of state vehicles). Complus' equipment and delinquent citation follow-up services have been instrumental in improving the City's parking citation collection rates and increasing associated revenues.

The proposed new agreement is for a period of three years with an automatic option for one additional three year period unless either party gives sixty days notice of their intent not to enter into the option. Reimbursements to Complus in Fiscal Year '01-'02 are included in the Finance Department Collections Division Contracted Services budget.

City Council approve the proposed resolution which authorizes the City Manager to execute the agreement.

RESOLUTION BOOK NO. 27 – PAGE 12

I. RESOLUTION NO. 01-178 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE SALT LAKE ORGANIZING COMMITTEE TO PROVIDE SERVICES FOR THE OLYMPIC TORCH RELAY IN ASHEVILLE ON DECEMBER 5, 2001

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Salt Lake Organizing Committee (SLOC) to provide services for the Olympic Torch Relay in Asheville on December 5, 2001.

The SLOC for the Olympic Winter Games of 2002 approached the Mayor and City Manager and requested the City of Asheville's participation in the Olympic Torch Relay.

The Olympic Torch Relay is scheduled to come through Asheville on Wednesday, December 5, 2001, arriving at approximately 10:30 a.m. and departing at approximately 12:30 p.m. The Relay will begin in South Asheville on Hendersonville Road and depart from I-240. At approximately 12:15 p.m., the Relay will take an official break in downtown Asheville in City-County Plaza. Consultation with the Police Department for security and traffic procedures has been performed.

A Task Force was formed through the Parks and Recreation Department to coordinate this effort. Representatives from the City, the United Way of Asheville and Buncombe County, the Volunteer Center, Buncombe County Recreation Services, the Community Foundation of WNC, Henderson County, the Asheville Track Club, Asheville High School, and the Mayor's Committee on the Disabled serve on this Task Force.

The Parks and Recreation Department recommends the City of Asheville to enter into an agreement with the Salt Lake Organizing Committee for the Olympic Torch Relay for the Olympic Winter Games of 2002.

RESOLUTION BOOK NO. 27 – PAGE 13

J. ORDINANCE NO. 2870 - BUDGET AMENDMENT TO PROVIDE LEGAL AND PROFESSIONAL FEES

Summary: The consideration of an amendment to the Fiscal Year 2001-2002 Budget Ordinance to provide for legal and professional services.

The budget for fiscal year 2001-2002 provided $30,000 for legal services and $1,000 for other professional services in the City Attorney's Office. Due primarily to costs associated with the defense of the challenges to the annexation ordinances adopted by the City in 2000, these line items are nearly depleted.

Two more legal challenges to the 2000 annexations will be tried during the current fiscal year. Additionally, there will be other matters arising during the remainder of the fiscal year for which outside counsel and professional services are required or are typically used.

We estimate that an additional $40,000 will be needed for outside counsel to assist in our defense of annexation challenges and other matters and $10,000 will be needed for the other professional services. A proposed ordinance making a $50,000 appropriation from fund balance to cover these additional legal expenses has been prepared.

Adoption of the ordinance is recommended.

ORDINANCE BOOK NO. 19 – PAGE 331

K. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AMENDMENT WITH ASHEVILLE SMOKE PROFESSIONAL HOCKEY, LLC

This item was removed from the Consent Agenda to allow comments from Mr. Dan Wilhelm, President/Owner of the Asheville Smoke.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Cloninger moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Worley and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 01-179- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A COST-SHARING AGREEMENT WITH MOUNTAIN HOUSING OPPORTUNITIES FOR RESURFACING HILLIARD AVENUE

Councilman Hay moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Field and carried unanimously.

Summary: The consideration of a resolution authorizing a cost sharing agreement between the City of Asheville and Mountain Housing Opportunities (MHO) to resurface and construct sidewalks located along Hilliard Avenue in Asheville, North Carolina.

In conjunction with the West End-Clingman Avenue Neighborhood (WE-CAN project, Mountain Housing Opportunities will resurface and install sidewalks along a portion of Hilliard Avenue. The City had previously identified Hilliard Avenue as a potential resurfacing project. The City and MHO wish to enter into an agreement for MHO to extend the limits of its project to resurface and install sidewalks along the entire length of West Hilliard Avenue. MHO will comply with all bidding laws as required of the City, specifically with N.C. Gen. Stat. sec. 143-129.

Funding for this project has been allocated in the Public Works Department's Capital Improvement budget.

The Public Works Department staff recommends City Council adopt a resolution authorizing the City Manager to enter into agreement with Mountain Housing Opportunities to resurface and construct sidewalks along West Hilliard Avenue.

Mayor Sitnick said that City Council has previously received a copy of the resolution and it will not be read.

Councilman Worley moved for the adoption of Resolution No. 01-179. This motion was seconded by Councilman Hay and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 14

RESOLUTION NO. 01-180 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AMENDMENT WITH ASHEVILLE SMOKE PROFESSIONAL HOCKEY, LLC

Summary: The consideration of a resolution authorizing the City Manager to enter into an amended lease agreement with Asheville Professional Hockey, Ltd., for the use of the Civic Center.

For several months, the Civic Center Department has been working with the Asheville Smoke Hockey to amend the lease for use of the Civic Center for their games. The purpose of these discussions was to simplify the lease for both parties. At the same time, the Civic Center wanted to ensure a greater rent payment through all levels of attendance. As negotiated, the primary changes in the agreement are essentially the terms that would automatically go into effect in the option years (years 6 and 7) of the contract with the following exceptions: (a) The rent per game is $250.00 higher than in the option years. Depending on attendance, this could be as much as $1,000 higher than is currently charged per game; (b) the City agrees to assume the payments on the ice rink cover for the remaining three years; (c) no further rink reimbursement would be required of the team.

The changes are as follows:

- A flat rent per game of $1,750.00. This replaces a floating rent that can vary between $750.00 per game up to $1,500.00 per game based on attendance.
- The City will assume the remaining payments on the ice rink cover.
- The City will cease collecting any ice rink reimbursement fees.
- The City will share concession revenues with the team after the first $200,000.00 in sales. After deducting taxes and food costs the team would receive 10% of the resulting net.

The Civic Center Department recommends that City Council authorize the City Manager to enter into an amended lease agreement with the Asheville Professional Hockey.

Mr. Dan Wilhelm, President/Owner of the Asheville Smoke, spoke in favor of the amended lease agreement.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilman Hay moved for the adoption of Resolution No. 01-180. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE 21

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE PROCESS FOR REVIEW OF ANCILLARY USE REQUESTS IN RESIDENTIAL DISTRICTS

ORDINANCE NO. 2871 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE PROCESS FOR REVIEW OF ANCILLARY USE REQUESTS IN RESIDENTIAL DISTRICTS

Mayor Sitnick opened the public hearing at 5:22 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise the process for the review of requests for ancillary uses in residential districts. This public hearing was advertised on November 16 and 23, 2001.

The Planning and Zoning Commission is recommending adoption of an amendment to the UDO revising the process for reviewing requests for ancillary uses in residential districts and changing the name of this provision. The change in the review process is proposed in response to concerns regarding the current process voiced by citizens and Council members. This issue was discussed at a Planning and Zoning Commission meeting, with the changes proposed in the ordinance amendment identified by the Commission. The following revisions are proposed by the proposed wording amendment:

- The name of the use will be changed from "Ancillary Non-Residential Uses" to "Ancillary Commercial Uses in Residential Districts"; and
- The Technical Review Committee will have the authority to send, at its discretion, requests that are controversial to the Planning and Zoning Commission for review and recommendation, following a public hearing. The recommendation of the Commission will be forwarded with the request to City Council for final action. Currently all requests are sent directly to the City Council following TRC review.

The name change will clarify the types of uses permitted through this permitting process. By providing provide an opportunity for additional public input on controversial requests, the revised review process will provide time to resolve issues before requests are heard by City Council.

Staff has received no comments in opposition to the proposed revisions.

At their October 3, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

As a result of the November 7, 2001, worksession, the name of the use was changed to "Ancillary Non-Residential Uses in Residential Districts."

Councilman Peterson asked City Attorney Oast if he could make a motion to delete the entire ordinance that allows ancillary non-residential uses in residential districts. City Attorney Oast said that the ordinance before Council is limited in effect by only changing the name and tweaking the procedure. It was his opinion that to delete the entire ordinance is a substantial enough change which would require sending it back through the zoning amendment process. The Planning & Zoning Commission would review and make a recommendation and then it would be sent again to City Council for advertisement and a public hearing. He felt that the appropriate step would be to direct City staff to begin the process to revise the UDO to delete the entire ordinance that allows ancillary non-residential uses in residential districts.

Councilman Peterson then asked if a motion could be made to just delete parking as an ancillary non-residential use allowed in a residential district. City Attorney Oast explained that this would also require sending it back through the zoning amendment process because he felt it is going beyond the scope of what was advertised.

Upon inquiry of Mayor Sitnick, Mr. Green said that if the ancillary use provision is deleted from the ordinance, in order for a commercial entity to have a parking lot in a residential district they would need to have that property rezoned, which is a more intrusive type of procedure.

In response to Councilwoman Field, Mr. Green explained that ancillary non-residential uses in residential districts were introduced to improve the development review process and provide some flexibility in the use of property, especially transition properties between commercial and residential properties, to provide a way to make more effective use of that property without changing the zoning.

Mr. Walter Plaue questioned at what stages would public comments be taken. Mr. Green responded that public comment would be taken at the TRC meeting, Planning & Zoning Commission meeting and City Council meeting, however at the TRC meeting, comment would be limited to the technical requirements.

Mr. Roger James felt this entire issue needs to be revisited in that once a parking lot is built, even though the property is zoned residential, chances are that property will not be used as residential again.

Ms. Jane Mathews felt that once you allow ancillary non-residential uses in residential districts, it's basically zoning without some of the tools, such as protest petitions. The community is very limited in counteracting that impact. She also felt it was bad policy in terms of Council's smart growth agenda to allow parking to encroach into residential areas.

Mr. Scott Riviere felt since a parking lot is a commercial use, they should ask that the property be rezoned to a commercial use.

Mr. Mike Lewis felt that parking as an ancillary non-residential use should not be allowed in a residential district. He felt this ordinance sanctions commercial intrusion into neighborhoods.

Mr. and Mrs. Harry Kirby both spoke about the need to delete parking as an ancillary non-residential use in a residential district.

Mayor Sitnick closed the public hearing at 5:45 p.m.

Councilman Hay said the intent of this ordinance was for it to be a neighborhood friendly tool, but Council's experience has been different.

Councilwoman Field did not support the deletion of the entire ordinance in that landscaping and stormwater detention are also included as ancillary non-residential uses in residential districts. She did not feel those were being intrusive at all in neighborhoods. Since the concerns seem to be about parking, then the parking piece alone should be revisited.

Councilman Worley felt that trying to do away with this tool is short-sighted. He felt the problems will not go away, but you can make the problems worse if you make this tool go away.

He felt it is a valuable tool that Council should retain, but Council may want to look at some of the terms and conditions about how it is applied.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Hay moved to adopt Ordinance No. 2871 to (1) change the name of the use to "Ancillary Non-Residential Uses in Residential Districts;" (2) provide an opportunity for additional public input on controversial requests; and (3) delete parking as an ancillary non-residential use allowed in a residential district. This motion was seconded by Vice-Mayor Cloninger and carried on a 5-2 vote, with Councilwoman Field and Councilman Worley voting "no".

Councilman Hay felt this was an opportunity for a proposal to be brought back into the ordinance that does adopt parking in a way that people think is more appropriate.

ORDINANCE BOOK NO. 19 - PAGE 333

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE CERTAIN DEVELOPMENT STANDARDS IN THE CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 2872 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE CERTAIN DEVELOPMENT STANDARDS IN THE CENTRAL BUSINESS DISTRICT

Mayor Sitnick opened the public hearing at 6:02 p.m.

Chief Planner Gerald Green said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to revise certain development standards in the Central Business District. This public hearing was advertised on November 16 and 23, 2001.

The Planning and Zoning Commission is recommending adoption of an amendment to the UDO revising certain development standards in the Central Business District (CBD). The proposed revisions address issues that were identified during the process of extending the CBD zoning to areas adjacent to the current CBD. With these revisions, the creation of non-conforming uses will be avoided and continuation of the historic urban development pattern in the CBD will be encouraged. The proposed revisions would make the following changes in the development standards in the CBD:

- Identify automobile sales as a conditional use in the CBD and establish standards for this use. The proposed standards include:
  - Minimum lot size of one acre;
  - In order to maintain an urban streetscape the number of automobiles that can be stored outside an enclosed building shall be limited to not more than 25% of the total offered for sale, or, alternately, the outdoor storage of automobiles for sale shall be screened by buildings occupying at least 75% of the street frontage of the property;
  - Prohibit outdoor storage of autos needing repair or, alternately, require autos needing repair to be screened from all public rights-of-way; and
  - New structures proposed within the Downtown Design Review Area must substantially comply with the Downtown Design Review Guidelines.

- Identify government buildings and uses as conditional uses and establish conditions for these buildings and uses. The proposed conditions include:
  - The proposed location of the building or use will not restrict the availability of key land for private development;
  - No alternative location for the building exists within areas previously developed for government buildings and/or uses; and
  - New structures proposed within the Downtown Design Review Area must substantially comply with the Downtown Design Review Guidelines.
- Clarifies the standard for a zero front setback and provides the Downtown Commission or the Planning and Development Director with the authority to allow greater setbacks if certain conditions are met.

The proposed revisions are designed to strengthen the development pattern in the CBD while providing for some flexibility in the standards for development. The need for the revisions was identified by staff and the Planning and Zoning Commission while listening to comments from the property owners during the discussion of the extension of the CBD boundaries.

Staff has received no comments in opposition to the proposed revisions.

At their October 3, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the proposed ordinance amendment. The Planning and Development staff also recommends approval of the amendment.

Upon inquiry of Councilman Peterson, Mr. Green said the definition of a government building is a building where the principle use or occupancy of the building is for governmental purposes.

Mr. Keith Thomson spoke in support of this UDO amendment.

Public hearing closed at 6:11 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 2872. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 339

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A TELECOMMUNICATIONS TOWER TO BE LOCATED AT 740 TUNNEL ROAD, ASHEVILLE, N.C.

ORDINANCE NO. 2873 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A TELECOMMUNICATIONS TOWER TO BE LOCATED AT 740 TUNNEL ROAD, ASHEVILLE, N.C.

City Attorney Oast reviewed with Council the conditional use permit process. This process is the consideration of granting a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Sitnick opened the public hearing at 6:14 p.m.

There was no disclosure by City Council members that they had any special knowledge of this issue that may affect their decision.

Mr. Gerald Green, Chief Planner, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 11/27/01 with application packets), and City Exhibit 4 (Consultant's Technical Review Analysis dated October 1, 2001).

Mr. Green said that this is the consideration of a motion to issue a conditional use permit for a telecommunications tower in a Highway Business District to be located at 740 Tunnel Road, Asheville, N.C. (Charlie Aiken Used Car sales lot). This public hearing was advertised on November 16 and 23, 2001.

American Tower Corporation has submitted an application to the City of Asheville for a Conditional Use Permit to allow the construction of a telecommunications facility to be located at 740 Tunnel Road (City Exhibit 5). The property to be leased for the tower location contains 2500 square feet. The facility is proposed to be located at the rear of the Charlie Aiken Used Car sales lot (City Exhibit 6). The original submittal proposed the construction of a 100' tall monopole with the capacity to accommodate three carriers. A solid wood fence will surround this building, with trees buffering the sides facing adjacent properties (City Exhibit 7). A tower of that height would not be required to have lights on it. Due to concerns expressed by neighboring property owners and the City of Asheville regarding the aesthetic impact of the monopole, the applicant has revised their plan. They are now proposing the construction of a 100' tall flagpole. The telecommunications antennae will be concealed within the flagpole to minimize aesthetic impacts. A United States flag was going to be flown at all times, but because the United States flag has to be lighted at night there was fear that the light would disturb the neighborhood. Therefore, they decided to fly the North Carolina flag at all times. In addition to the telecommunications facility, an equipment building will also be located on the property (City Exhibit 8).

As required by the City of Asheville's Telecommunications Facility Ordinance, a balloon test was conducted at the site on June 18, 2001 from 7:00 a.m. until wind forced the balloon down. The purpose of the balloon test was to provide an indication of the visual and aesthetic impact of the proposed facility.

The City of Asheville's Telecommunications Facility Ordinance encourages co-location and the use of existing facilities rather than building new structures. A telecommunications tower is currently located at the NC Highway Patrol division headquarters approximately 1/4 mile from the project site. The applicant considered using this existing tower, but a structural analysis of the tower showed that it could not accommodate additional users. A review of the structural analysis by the City's consultant confirmed this finding. The applicant also investigated the feasibility of constructing a facility at the East Asheville Community Center/Library/ Fire Station. However there is insufficient ground space at that location for a tower and related equipment.

A consultant retained by the City reviewed the application submitted to the City for this telecommunications facility. The consultant found that this area does have insufficient service at this time, that the proposed facility would improve service in the area, and that the proposed location appears to be the best location for the facility. The City's Technical Review Committee at their May 21, 2001, meeting reviewed the application for compliance with the City's technical standards. The applicant has met all TRC conditions. No Traffic Impact Analysis is required for the project, as the only traffic generated by the use will be a monthly maintenance check.

The Conditional Use Permit findings and staff analysis for each finding is:

1. The proposed use of the land will not materially endanger the public health or safety. The radio frequency emissions are regulated by the Federal Communications Commission to protect the health and safety of the general public. The tower is designed to withstand forces of nature much more severe than those common in this area. In addition, a fall zone must be maintained around the tower to reduce the chance of damage to adjacent residential uses.
2. The proposed use is reasonably necessary for the public health or general welfare, such as by enhancing the successful operation of the surrounding area in its basic community functions or by providing an essential service to the region. The facility will enhance the level of telecommunication service to customers in the area.
3. The proposed use of the land will not substantially injure the value of adjoining or abutting property. Tunnel Road is a commercial corridor with a variety of land uses, none of which will be adversely impacted by the proposed use. The equipment building and other portions of the facility visible to adjacent residential properties will be screened with an 8' tall fence supplemented by vegetation, including hemlocks, white pine, and leyland cypress.
4. The proposed use of the land will be in harmony with the bulk, scale, coverage, density, and character of the area in which it is located. The proposed facility will be in harmony with the commercial character of the area. There is another tower 200' in height approximately ½ mile from the subject site.
5. The use of the land will generally conform with the comprehensive plan and other official plans adopted by the City. Telecommunications facilities are not addressed in any of the City's plans. The zoning district in which the site is located permits telecommunications facilities as a conditional use.
6. The proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. The plans for the proposed facility were reviewed by the Technical Review Committee, which found that all services and facilities were available to meet the needs of the proposed use.
7. The proposed use will not cause undue traffic congestion or create a traffic hazard. The only traffic to the use will be a service technician who will visit the site approximately once a month.

The request is for a conditional use permit to allow construction of a 100' tall telecommunications tower or flagpole on property located at 740 Tunnel Road. The applicant, American Tower, has complied with all the requirements established by the City of Asheville's Telecommunications Facilities Ordinance. A consultant retained by the City has confirmed that this is an area of poor service, that the proposed facility will result in improved service in the area, and that there are no other existing facilities in the area on which additional equipment could be co-located. The applicant has evaluated alternative sites, including the existing tower at the Highway Patrol station, and found them to be inadequate to meet their needs. The property on which the facility is proposed, the Charlie Aiken Used Car Sales lot, has been the subject on some concern from the neighboring residential property owners. These concerns are related to the use of an outdoor PA system, glare from outdoor lighting, and placement of automobiles near a street intersection making it difficult to see on-coming traffic. Staff is proposing conditions to address these concerns that may be attached to the issuance of a conditional use permit for the telecommunications facility. These recommended conditions are:

- The outdoor PA system be dismantled and not used in the future;
- All outdoor lights be replaced with light fixtures that are full cut-off and shielded so as not to cast light or glare onto residential uses; and
- The area at the intersection of Tunnel Road and Mountain View Road be maintained so as not to create a line of sight problem for traffic exiting Mountain View onto Tunnel Road.

The Asheville Planning and Zoning Commission did not review this request.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends approval with the conditions identified above.

Mr. Green said that City Attorney Oast has advised him that the three conditions recommended by City staff cannot be attached to the conditional use permit. These three concerns are not related to the application before City Council but that they relate to another use on the site. Therefore, Mr. Green said that the only condition recommended to be attached to the conditional use permit is that all antennas must be located (hidden) within the flagpole.

Mr. Don Nielsen, attorney representing American Tower Corporation, spoke in support of the telecommunications tower and showed some pictures of what they are proposing (Applicant Exhibits 1 and 2).

Mr. Dan Zorn, resident on Arco Road, appreciated the work the applicant has put into the design of the flagpole. He did note that the neighbors have a history with the owner of the lot and requested Council's assistance in getting Mr. Aiken to angle his lights in the back down.

Ms. Martha Lane, resident on Mountain View, spoke in support of this flagpole and thanked the developer for working on this compromise.

Mr. Mike Lewis felt that this is a stellar example of how businesses and neighborhoods should get along.

There being no request from the applicant for rebuttal, Mayor Sitnick closed the public hearing at 6:54 p.m.

Mayor Sitnick thanked Vice-Mayor Cloninger for taking the lead on the telecommunication tower ordinance.

Councilman Peterson questioned if Council could include a condition that the outdoor lights fixtures at the back of the lot immediately adjacent to the telecommunication tower facility be shielded or have full cut-off features. City Attorney Oast felt that condition would be subject to a legal challenge if Council tried to address that concern through the conditional use permit process.

When Councilman Worley asked if Council could include in the motion a request that the property owner take these neighborhood concerns into consideration, City Attorney Oast did not see that as a problem. City Attorney Oast explained that as long as it's clear that failure to address the concerns adequately over matters that can't be controlled by the applicant would not result in revocation of the permit.

At the request of Mayor Sitnick, City Manager Westbrook said that City staff will act on the safety concern regarding the sight distance problem for traffic exiting from Mountain View onto Tunnel Road.

Vice-Mayor Cloninger moved to adopt Ordinance No. 2873 to approve the conditional use permit for a telecommunications tower to be located at 740 Tunnel Road with the condition that all antennas must be located (hidden) within the flagpole. Said motion is to include a request that the property owner take the three neighborhood concerns into consideration. In addition, said motion instructed the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilman Worley and carried unanimously.

Vice-Mayor Cloninger said this is an example of our new telecommunications tower ordinance working. The ordinance is stringent so as to protect the beauty of our area. He stated that with today's technology, there is no excuse for another conventional telecommunications tower to be erected inside the City limits again. He implored the Planning staff that when these requests come to them in the future that they go the extra mile and put in the extra time to make the companies use stealth technology and alternatives to protect the beauty of our area.

ORDINANCE BOOK NO. 19 – PAGE 343

D. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTIES LOCATED AT THE SOUTHERN SLOPE AREA, AND THE EAST AND WEST OF THE EXISTING CENTRAL BUSINESS DISTRICT FROM REGIONAL BUSINESS DISTRICT, HIGHWAY BUSINESS DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 2874 - ORDINANCE TO REZONE PROPERTIES LOCATED AT THE SOUTHERN SLOPE AREA, AND THE EAST AND WEST OF THE EXISTING CENTRAL BUSINESS DISTRICT FROM REGIONAL BUSINESS DISTRICT, HIGHWAY BUSINESS DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO CENTRAL BUSINESS DISTRICT

Mayor Sitnick opened the public hearing at 6:56 p.m.

Upon inquiry of Councilman Hay and Councilman Peterson about whether there is a conflict of interest for them in this matter due to their law firms owning property in this area, City Attorney Oast felt that they did not need to be excused due to a conflict of interest.

Chief Planner Gerald Green said that this is the consideration of an ordinance to rezone property located south, east, and west of the current Central Business District from Regional Business District, Highway Business District and Community Business II District to Central Business District. This public hearing was advertised on November 16 and 23, 2001.

The City staff is requesting the extension of the Central Business District to approximately 175 properties located south, west, and east of the current CBD. Most of these properties are currently zoned Regional Business, with some properties zoned Highway Business and Community Business II. The development in these areas has historically followed more of a traditional urban pattern, with minimal setbacks and little off-street parking. When the properties were zoned as part of the UDO, a number of the existing uses would have been non-conforming in the CBD zone. Recent land use changes have almost entirely eliminated the concern that CBD zoning would create non-conforming uses. These land use changes and redevelopment activities have highlighted the need for zoning of these properties that will reinforce and preserve the historic urban development pattern of the areas. The current zoning of the properties, particularly the Regional Business zoning with its requirement for large lot size, setbacks, and significant off-street parking, makes many of the properties non-conforming and complicates redevelopment efforts. The proposed extension of the CBD zone to these properties will not only reinforce the historic development pattern of the areas, it will inspire redevelopment by lessening many of the development standards and by increasing the range of permitted uses.

A public meeting, to which owners of all properties in the affected areas were invited, was held in late August. The proposed rezoning was discussed at this meeting, with the pros and cons of the zoning change identified. No objections or concerns were voiced by the approximately 25 property owners who attended this meeting. The Downtown Commission unanimously endorsed the CBD extension at their September meeting.

Staff has received no comments in opposition to the requested rezoning. There have been requests for zoning to CBD of properties located in the areas for which the zoning change is proposed. City Council recently approved a rezoning to CBD for four properties located in one of the areas for which the change is proposed.

At their October 3, 2001, meeting, the Planning and Zoning Commission voted 7 to 0 to recommend approval of the rezoning of the areas located south, east, and west of the current CBD from Regional Business District, Highway Business District and Community Business II District to Central Business District. The Planning and Development staff recommends approval of the requested rezoning.

Upon inquiry of Councilwoman Bellamy, Mr. Green said that this does not include any of the residential uses in the West End/Clingman Avenue neighborhood.

Upon inquiry of Mr. Jesse Ray, Mr. Green pointed out some negative impacts of extending this district, noting that the positives far outweigh the negatives.

Mayor Sitnick closed the public hearing at 7:05 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Worley moved for the adoption of Ordinance No. 2874. This motion was seconded by Councilwoman Field and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 348

E. PUBLIC HEARING TO CONSIDER THE PROPOSED SALE OF PROPERTY ON BROTHERTON AVENUE TO MORSE PROPERTIES INC. FOR AFFORDABLE HOUSING DEVELOPMENT AND THE AMENDMENT OF THE 2001 ACTION PLAN TO INCREASE COMMUNITY DEVELOPMENT BLOCK GRANT FUNDING FOR THE PROJECT

RESOLUTION NO. 01-181 - RESOLUTION APPROVING SALE OF PROPERTY AND AN AMENDMENT TO THE COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM IN THE 2001 CONSOLIDATED ACTION PLAN

ORDINANCE NO. 2875 - BUDGET AMENDMENT REGARDING THE INCREASE IN THE CDBG BUDGET TO RECOGNIZE RECEIPT OF PROGRAM INCOME FROM SALE OF LAND AND ALLOCATION OF SALE PROCEEDS TO BROTHERTON AVENUE DEVELOPMENT PROJECT

Mayor Sitnick opened the public hearing at 7:06 p.m.

Planning & Development Director Scott Shuford said that this is a public hearing to consider the sale of property on Brotherton Avenue to a private developer for an affordable housing development site. Additionally, Council will be asked to consider an amendment to the 2001 Action Plan to provide Community Development Block Grant (CDBG) funding for the project. This public hearing was advertised on November 16 and 23, 2001.

When the City began this process, he was skeptical of our ability to attract a quality cohousing developer. However, he was pleased to say that we have attracted an award-winning cohousing developer, Mr. Jack Morse. Mr. Morse and his design team have built an outstanding, nationally and internationally recognized cohousing development in the Atlanta area called East

Lake Commons. He and Community Development Director Charlotte Caplan have visited this development and they were very impressed with both its quality and function.

The preliminary development proposal for the site incorporates a number of smart growth development features, such as clustering of development on the most buildable part of the property, promoting internal and external pedestrian access, providing for mix of incomes within the project, developing an infill site at a density and scale that is compatible with the surrounding neighborhood, and preserving a significant part of the property as open space. he submitted to Council that this is precisely the type of development that this city needs. As an added bonus, this project enables us to meet many of our affordable housing goals through a private sector initiative.

Should Council choose to follow the staff recommendation to allow this land sale to proceed, the developer will be required to submit a detailed site plan that will address such issues as water and sewer availability, fire flow, landscaping and buffering, site lighting, and similar technical issues, some of which are a particular concern to the surrounding neighborhood. This site plan will be brought back before City Council as part of a Planned Unit Development zoning overlay and Council will have an opportunity to consider the final development of this site at another public hearing.

Community Development Director Charlotte Caplan said that the City has allocated a total of $370,000 in Community Development Block Grant (CDBG) funds for the purchase and improvement of a 7.3 acre site at the intersection of Virginia and Brotherton Avenues, with the intention of developing it for affordable homeownership on the "cohousing" model. A cohousing development is characterized by:

- Resident involvement in the design process;
- Physical design that deliberately encourages a sense of community;
- Extensive common facilities, including a common house;
- Complete resident management when the development is complete.

An excellent example is the Westwood cohousing community on Vermont Place, about a mile to the west..

In September 2000, the City purchased the site from the Housing Authority for $120,000. In March 2001 the City issued a Request for Proposals (RFP) for a developer. Two proposals were received, but only one was fully responsive to the terms of the RFP. This proposal from Morse Properties, Inc. is for a mixed-income development of 38 homes, 26 of which would be subsidized to be affordable to families with incomes less than 80% of area median. The Housing and Community Development Committee has reviewed the proposal and recommends acceptance.

Ms. Caplan said that there will be a clustering of homes and the community building on the upper flat part provides a housing density of 5.5 units per acre while leaving the steeper half of the site as a natural wooded area with walking trails. It will be economical on infrastructure because of no new streets. This is an excellent example of smart growth on an in-fill site.

She said that the developer wants to make sure that the design fits in with the neighborhood. He will be meeting with the neighborhood residents to get their input. The City will upgrade the sewer line below the site. Area residents will be able to enjoy the woodland trails and very likely community activities in the common house.

The Housing & Community Development Committee recommends sale of land and award of $397,000 CDBG subsidy to Jack Morse Properties Inc. That's a subsidy of about

$15,000 per unit which compares well with other developments we have supported, like Habitat communities.

To comply with CDBG regulations, the $250,000 in CDBG funds already allocated for site improvements must be expended while the property is in public ownership. Additionally, to comply with State law, the property must be sold to the developer at not less than the current appraised value of $147,000. Staff therefore recommend the following steps for approval by Council at this time:

1. Entering into a contract for sale of the site to Morse Properties, subject to City approval of the final design for the development (including all necessary planning and technical approvals) and satisfactory completion of site improvements;
2. Amendment of the 2001-02 Action Plan to recognize the anticipated receipt of the sales proceeds and allocation of the same amount to site development.
3. Entering into a CDBG funding agreement with Morse Properties for a total of $397,000 CDBG subsidy for site improvements, to be passed on as subsidy to the 26 income-eligible homebuyers.

Steps 1 and 2 require a public hearing. As soon as these steps are implemented, the developer will develop a final site design which we expect will be submitted for approval as a Planned Unit Development early next year. Consultation with neighborhood residents will be an important part of this process.

Staff and the Housing and Community Development Committee recommend approval of the resolution for the sale of the property, the funding agreement, and the amendment of the Action Plan.

Ms. Caplan responded to several questions from City Council, some being, but are not limited to: will most of the units be duplexes, what comes with ownership of co-housing, how does co-housing differ from owning a condominium, what percentage of the entire project will be the common areas, what is the cost of construction of the common house, and how do these net unit prices compare with some of the other projects that CDBG funds have been used for.

Mr. Richard Nantelle, President of the West Asheville Community League, wanted to make sure that the potential owner has been accurately informed of the following: the present water supply available remains inadequate to support development of this nature and that upgrading of this aged and deteriorating system is not in the City's foreseeable future; the only access to this site is a highly congested traffic hazard producing facilities and personal injuries and these conditions have been ignored by the City for at least 30 years; the close proximity of this site to illegal 24 hour a day drug trafficking; over 200 neighbors surrounding this site joined together and had their property rezoned for the sole purpose of protecting the physical character of their neighborhood so that they could eliminate the possibility of any contradictory development at this location as this proposal, by its cloistering, depicts; the same 200 neighbors surrounding this site and along it's path have vehemently and rigidly opposed this site development on each of the past rising occasions for these very same reasons and they are prepared to continue doing so even to the point of seeking relief through further legal action in the courts if necessary to stop it; the proposal fails to meet at least three out of the seven requirements for a conditional use permit; and this proposal is completely out of financial character in this neighborhood and that the result will either be false inflation of tax values of surrounding properties causing them to become unaffordable or it will deflate the value of this proposed investment, making it unappreciable if not both. He said that these existing conditions, along with others not mentioned, are most definitely detrimental to the safe and successful development of this site.

Mr. Dick Rice, speaking on behalf of the West Asheville Business Association, briefed Council on the background of this site. He stressed that there is insufficient fire flow in the hydrants to effectively protect lives and property. Neighboring property owners want traditional single-family homes built on that property. He briefed Council on some specifics losses in the area due to inadequate water.

Mr. Fred English, resident in Haw Creek, said that he has low water pressure too and his sewer line needs to be repaired.

Mr. Carlos Montgomery felt that family housing development is good, but in this area it is not safe due to the insufficient fire flow in the hydrants.

Ms. Sharon Martin, resident on Virginia Avenue, felt that this is the right idea, but at the wrong place. She expressed concern about the speeding traffic on Virginia Avenue and bringing in multi-family housing will not help.

Ms. Rebecca Campbell, Southeast Network for Intentional Communities - West Asheville, felt there is a considerable infrastructure problem. She felt the proposal is excellent but perhaps at a different location. Creative ideas need to happen about how Asheville's infrastructure needs can be repaired so that any sustainable development can happen without major conflict.

Ms. Karen Keenan, Executive Director of the Affordable Housing Coalition, voiced her concern that there is the potential of compromising the opportunity to increase our tremendously needed affordable housing units due to a challenge around infrastructure.

Ms. Tonya Davis acknowledged that we do have a significant infrastructure problem in this City and the City needs to address both affordable housing and the infrastructure simultaneously.

Mr. Keith Thomson felt that this is a good project with good values, but at the wrong site. He too acknowledged that the City has serious infrastructure and affordable housing problems.

Mr. Walter Plaue agreed that this is an interesting proposal. He felt, however, that we need to give people safe housing and due to the inadequate fire flow in the hydrants, we would be placing peoples lives in jeopardy.

Ms. Kate O'Hara felt that if infrastructure is the only major concern with this proposal, then this matter should be continued until further research can be done. She stressed we need housing that people can afford.

Mr. Shuford explained that basically this is a first step of multi-step process and that is to recognize and commit funds to a project with the understanding that technical requirements have to be addressed - the same technical requirements that would be done for a project where the units would cost $500,000 a piece. Also a separate zoning action has to be taken. He urged Council to move forward to see if this project can be built on this site. The property is zoned RS-8 which allows 56 units on this 7 acre site but the proposal is for 38 units. The water supply is probably sufficient for domestic use, but for fire protection we know that we have a problem and there are multiple ways to solve that problem. One way would be to provide for a sprinkler system that would be on-site. Another possibility would be to fix the system for the entire neighborhood. Those are things that will have to be explored. He urged City Council to commit the funding with the understanding that other things have to be done before this can occur. The developer is committed to meeting with the neighborhood and to address their concerns. Mr. Shuford felt that the traffic issue may be solved with a traffic calming solution.

Mr. Jack Morse, developer, stated that he does live in co-housing in Atlanta and is looking forward to working with staff and the neighborhood.

When Councilwoman Field asked Mr. Morse if anything he heard at this meeting has deterred him from moving forward, Mr. Morse replied no and that there are many ways to solve issues.

Fire Chief Greg Grayson said that they performed eight different flows. They are trying to do flowing at night and in the day so there can be an average to represent a more realistic flow. When they cumulated two hydrants with four flows each, they came up with an average of 423 gallons per minute. In the Asheville Standard Specifications Manual the minimum flows begin at 500, so this is below the minimum flows. However, in that Manual it does allow for any property with the flow that is available to have an approved automatic sprinkler system. The system has to be engineered to work with what is available. Whether than can be done or not would require an engineer study. He noted that they apply those development standards to new construction, not existing.

Fire Chief Grayson responded to questions from Councilwoman Field on what the response would be if there was a fire in that area even if this development was not built.

Upon inquiry of Councilman Worley, Mr. Rice said that there is a five-inch line at Brotherton and Virginia Avenues.

Mayor Sitnick closed the public hearing at 8:26 p.m.

Councilwoman Field felt that this property is one site in which affordable housing can be built. We at least have a developer who is willing to proceed with a plan to see if the proposal of cohousing can work on that site.

Mayor Sitnick said that members of Council have previously received a copy of the resolution and budget amendment and they would not be read.

Councilwoman Field moved to adopt Resolution No. 01-181. This motion was seconded by Councilman Hay.

Councilman Hay said that this will initiate what may result in development on that property. All the infrastructure problems have to be addressed or the project will not go forward.

Councilwoman Bellamy agreed with Councilwoman Field and Councilman Hay. She said that existing organizations, non-profit entities and for-profit entities provide affordable and regular housing and they do upgrade the infrastructure. The infrastructure improvements they provide just doesn't benefit their developments, but also benefits surrounding properties. Affordable housing sites are limited in our City and we do have to work with what we have. We have to deal with the infrastructure problems and see what we can do through some collaborations with MSD, the Water Authority and the developer. She believed that the infrastructure improvements can be made.

Councilman Worley supported the resolution but with reservations that center around the infrastructure problems, in particularly the fire flow. He pointed out that the resolution is not selling the property, it's a resolution that approves entering into a contract for sale, subject to City approval of the design for the development (and that means dealing with the infrastructure problems), satisfactory completion of site improvements, etc. City Council will have another opportunity to determine whether this contract for sale actually goes forward and that is when those design components come back to City Council for approval.

Mayor Sitnick stated that she is in favor of co-housing. However, she wants to be absolutely clear that if we approve this resolution in order to move forward and explore it further, that this project will not be built if the safety of the citizens who exist there now and the safety of the citizens who will buy these homes cannot be guaranteed, specifically having to do with fire protection. Mr. Shuford responded that this project will have to meet all of the same development standards as any other project would need to meet.

Mayor Sitnick said that if the responsibility of repairing water lines to the whole area, which might be necessary, is the Water Authority's responsibility and the Water Authority does not have it on their priority needs list, does that mean this project will not go forward. Mr. Shuford said that it depends upon who ends up needing to make the improvements and how extensive they are, but if we can't make it work, it won't go forward.

The motion made by Councilwoman Field and seconded by Councilman Hay carried on a 6-1 vote, with Councilman Peterson voting "no".

RESOLUTION BOOK NO. 27 – PAGE 16

Vice-Mayor Cloninger moved for the adoption of Ordinance No. 2875. This motion was seconded by Councilwoman Field and carried on a 6-1 vote, with Councilman Peterson voting "no".

ORDINANCE BOOK NO. 19 – PAGE 351

At 8:45 p.m., Mayor Sitnick announced a 15 minute break.

F. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY KNOWN AS GARDEN HOMES AT BILTMORE PARK

ORDINANCE NO. 2876 - ORDINANCE TO EXTEND THE CORPORATE LIMITS TO INCLUDE GARDEN HOMES AT BILTMORE PARK

Mayor Sitnick opened the public hearing at 9:02 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance extending the corporate limits of the City of Asheville to property located north of Long Shoals Road and identified as Garden Homes at Biltmore Park. This public hearing was advertised on November 16, 2001.

Biltmore Farms, Inc. and 14 other property owners have submitted annexation petitions for Garden Homes at Biltmore Park. This area is contiguous to the existing corporate limits, being bordered to the north, south and west by sections of Biltmore Park that have been previously annexed

The area proposed for annexation consists of 10.0 acres and is platted for 45 single-family residential lots. The area will be accessed by White Ash Drive East. This area is within the extraterritorial jurisdiction area and is currently zoned RS-8.

Biltmore Farms Inc. is developing utilities and streets. City services will begin on the effective date of annexation. Biltmore Farms, Inc. has requested that the effective date of annexation be six months from the adoption of the ordinance.

This would be the 23rd section of the Biltmore Park development to be annexed. Tax valuation of the area annexed to date is $106, 608,100.

City staff recommends City Council adopt an ordinance extending the corporate limits of the City of Asheville to property located north of Long Shoals Road and identified as Garden Homes at Biltmore Park.

Mayor Sitnick closed the public hearing at 9:03 p.m.

Mayor Sitnick said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Hay moved for the adoption of Ordinance No. 2876. This motion was seconded by Councilman Worley and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 353

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 01-186 - RESOLUTION AUTHORIZING THE CITY MANAGER TO PROCEED WITH THE OPERATIONAL PLAN FOR THE AZALEA ROAD BENEFICIAL FILL SITE

Public Works Director Mark Combs said that in June City Council directed staff to investigate practicable sites for the long term disposal of beneficial fill materials.

The Public Works and Water Departments dispose of approximately 11,000 tons of old concrete, asphalt and dirt each year. In February the City's White Fawn Reservoir fill site reached maximum capacity, which necessitated disposal at the Buncombe County landfill.

In October of 1997 staff instituted a site selection team for the purpose of finding a new disposal/fill site. In June of 1998 staff selected a site on Azalea Road and started negotiations with the property owner. After numerous public hearings, a citizen/staff task force developed a request for proposal (RFP) to conduct a feasibility study of this site. In January 2001, Woolpert LLC (Engineering Firm who conducted feasibility study) presented their report to City Council and advised further development and subsequent operations.

On May 15, 2001, staff requested and received a $75,000 appropriation to pay for anticipated tip fees due to the closing of White Fawn. Through October, 19, 2001, the City has paid tip fees of $234,329.28. In the same meeting Council directed staff to conduct a thorough investigation into all potential sites and report their findings when completed.

In the current fiscal year (4 months), Public Works spent $52,341 for tip fees, which is $22,341 more than the $30,000 originally budgeted. Staff had anticipated the final site selection would be completed by the second quarter.

Mr. Combs then explained that a beneficial fill is defined as including only used asphalt and inert debris such as concrete, brick, concrete block, uncontaminated soil, rock and gravel. No permit is required so long as (1) fill activity involves no excavation; and (2) the purpose is to improve land use potential.

A letter received on June 15, 2001, from Mr. Dan LaMontagne, Head of the State's Superfund, stated that "no hazardous substances can be associated with the Azalea Road landfill and no release of hazardous substances from the landfill have been documented ..."

He explained that the following sites were investigated: Azalea Road, Bartlett Street (Murray Hill), Beaverdam Baptist Church, Buncombe County Landfill, Burney Mountain Road Fairview, Gaston Street, Hawthorne Drive (Beverly Hills), Houston Street and Courtland Avenue (Montford), Memorial Stadium property, Moore Street (Sycamore Hollow), and Richmond Hill Drive (Richmond Hill). Locations evaluated included: Azalea Road, Buncombe County Landfill, Burney Mountain Road (Fairview), Houston Street and Courtland Avenue (Montford), Memorial Stadium property, Moore Street (Sycamore Hollow) and Richmond Hill Drive (Richmond Hill).

Mr. Combs explained the estimated yearly tonnage from the Street Division and from the Water Resources Department. He then went into detail about the tangible costs which included: mileage costs, labor costs (transportation), operational costs, site costs, land costs and tip fees.

He then explained the site evaluation criteria used for the seven locations which included cost, capacity, homes in 500-foot buffer, and homes on route. He reviewed with Council on each of the seven locations evaluated their costs per ton, their estimated life capacity (in years), the number of homes on route and the number of homes in the 500 foot buffer.

Mr. Combs said that as a result of this detailed investigation, City staff recommends the Azalea Road site. It is City-owned property, has 20 + years life, has the least neighborhood impact, the feasibility study and operations plan have been completed, and it can be integrated with the Parks & Recreation Master Plan.

At the request of Councilman Worley at the November 20, 2001, worksession, Mr. Combs provided information from an architect, structural engineer, soils engineer and code enforcement officer regarding housing construction on a beneficial fill.

Mr. Mike Moody presented Council with a memo dated November 27, 2001, which reads that "we petition the Asheville City Council to postpone any decision related to the location of a specific beneficial landfill site for the following reasons: (1) All of the consultant's reports and NC DENR requirements, related to the Azalea Road site, have not been thoroughly reviewed by the Staff and made accessible to the public; (2) Public affirmation has not been presented, such that, the City has secured the indisputable right for access to the site and use of the existing bridge; (3) The total cost of all site preparations, together with sedimentation and erosion control plans has not been made public; and (4) We request further review of the proposal, presented by the Public Works Department, as it relates to revising weighting of criteria."

The report read "A review of the study, prepared by the Public Works Department and presented at a recent work session of the Asheville City Council, leaves several issues unresolved: (1) A January 2001 study of the Azalea Road site, prepared by Woolpert LLP, indicated that the '...existing fill area must be further defined by geotechnical testing to be sure that it will support additional material.' Of particular interest is the consultant's finding that '...measures must be installed to protect the side slopes' to prepare for additional fill material. If this involves excavation, it would be contrary to the statutory conditions for a beneficial fill. Additional required studies, indicated by Woolpert LLP, included a wetland review and BFE changes related to bridge construction; (2) Some months ago, the City Council approved a second study for the Azalea Road site termed 'An Operational Analysis'. However, the public, and perhaps the City Council, have not seen the study results or been given a chance to review the document(s). In fact, the study was sent to NC DENR for approval on Tuesday, November 20, 2001. This approval process could take as long as 30 days; and (3) At the City Council work session, November 21, 2001, the Public Works Department presented an evaluation of seven (7) sites for a proposed beneficial fill. The 'Evaluation Summary' seems to be weighted in such a way as to make the findings difficult to understand. The following table is the same data, without subjective weighing: (overall evaluation summary table shown). If the more tangible criteria are considered, namely cost and capacity, then the following chart is applicable: (cost and capacity

146

evaluation table shown). In both evaluations, Azalea Road does not appear to be the location of choice. The most obvious detriment to Azalea Road is the cost. To date, we the taxpayers, have spent almost $90,000 for a feasibility study at Azalea and another $40,000 for an operational plan at Azalea. The Public Works Department now estimates that the annual operating cost for Azalea is $140,000. This brings the total for this 'money pit,' or should it be called a 'money mound,' to $3,112,000. The consultant indicates that most of this amount will need to be spent up front before the first load of debris is dumped. By the way, the taxpayers have bought an additional 131 acres around this site, for a park at a cost of $1,400,000. The total investment, if nothing has been overlooked (such as requirements from NC DENR) is just under $5,000,000. Can, or should, the taxpayers carry this burden when less costly options have been presented?

"Any alternative does not absolve the City of Asheville of its responsibility to recycle all materials as permitted. The residents of the City are mandated to recycle household refuse – the City staff should be equally obligated. It is apparent that the cost to recycle inert debris will decrease as the supply of natural resources diminishes. In fact, the data from Public Works indicates present savings of $7.64 per ton if material is recycled while utilizing the Buncombe County landfill. In retrospect, the City of Asheville could have saved $70,033 of taxpayer money, just since the closing of White Fawn in February of this year (or $84,040 per year). This amount would pay for the estimated $80,000 to purchase equipment that separates these materials in preparation for recycling.

"A final observation is that the proposed Azalea Road park/soccer complex and a landfill do not seem to be compatible uses for the site. A very real hazard exists when vans full of soccer players mix with City trucks on a narrow road. Unfortunately, safe access, for children and their families, to these facilities was not considered as criteria for any of the sites. To upgrade Azalea Road and associated intersections would be another unbearable expense to taxpayers. Again, until we have all of the facts and know all of the cost, your vote today may be 'out of order.'"

Mr. Combs passed out his responses to Mr. Moody's report. Regarding Concern No. 1 Mr. Combs said that the operational plan will specify the working and final grade slope. The "measures" that must be installed involve competent heavy equipment operation, the moving and re-moving of new and/or existing material and landscaping. In addition he said "excavation" for the purpose of re-filling with beneficial fill is indeed contrary to statutory definitions; however, re-contouring a site to improvement and/or prepare an old existing site is appropriate.

With regard to Concern No. 2, Mr. Combs said that on May 22, 2001, City Council appropriated $39,500 to Woolpert, LLC to prepare an operation plan which consists of drilling services, laboratory testing (of soils), professional services (labor) and miscellaneous/contingency. The soil analysis is to best determine how to implement operations and not to determine the feasibility of the site, which was reported by Woolpert (presented January 23, 2001) as feasible for beneficial fill use.

Mr. Combs said that regarding Concern No. 3, staff assigned a scale of 0 to 10 as a proportion to percentages in order to more fairly "weigh" the four areas of concern. Simple ranking is not accurate. For example, Mr. Moody assigned a rank of "2" ("homes on route") for two (2) homes on the route to Azalea, and a rank of "3" for five (5) homes on the route to Moore Street, which represents a 150% increase. Richmond Hill has 26 times more homes than Azalea but only received a "7" rank from Mr. Moody, which obviously is not in proportion to the difference of the data compiled. Regard cost, Azalea's cost ($140,030) is 30% of Buncombe County's $461,120. By assigning a 0-10 scale proportion, Azalea's score of "6" (compared to Buncombe County) is a conservative interpretation of the proportions.

Mr. Combs addressed another concern in the report. Going to Buncombe County to dispose of 11,000 tons costs $461,120/year or $41.92/ton. To Buncombe County with recycling costs $377,080/year or $34.28 ton. Going to Azalea Road to dispose of 11,000 tons costs $140,030/year or $12.73/ton. To Azalea Road with recycling costs $16,380/year or $14.58/ton. The potential savings per year utilizing Azalea Road compared to Buncombe County is $321,090 without recycling and $216,700/year with recycling.

Mr. Combs said that Mr. Moody's report mentioned the hazard of children and their families with City trucks on a narrow road. He said that there are narrow roads throughout the City and he hoped that could be solved at a later date.

Mr. John Richardson, President of the Land-of-Sky Chapter of Trout Unlimited, said they are concerned about the siting of a beneficial landfill on Azalea Road. They have looked forward to working with the City on the in-stream rehabilitation of Swannanoa River as it flows through the park. Having examined the Public Works Department site investigation report, they have many reservations about the methods and their final recommendation to Council. First of all, using a strict cost benefit analysis, homes in the 500-foot buffer and homes on the route are not valid site criteria. Moreover, even if they are included, they should not be given the same equal weight as cost and capacity. To give them equal weight is to manage by conflict avoidance. If one had used the strict cost benefit analysis, then the Memorial Stadium site would have been the clear winner. It has the lowest cost and it has a capacity greater than all but Burney Mountain Road (Fairview) site and the Buncombe County landfill. Secondly, he felt that staff was not consistent in it's evaluation ratings. For example, the Burney Mountain Road/Fairview site was given a weight of 7 for it's capacity. By contract, the Azalea Road site was given a weight of 9. However, the Burney Mountain Road site has an estimated life, according to Mr. Combs, of 30 + years without recycling. Whereas, Azalea Road has only 21.3 year life without recycling. Similarly, the way City staff applied the rankings to homes in the buffer and homes on the route showed a lack of consistency. Thirdly, the analysis of landfill capacity is flawed. City staff came up with a fairly precise capacity of 21.3 years for the Azalea Road site. They then compared this fairly precise estimate with all the other sites. Some of the other sites were given the life span of 10-30 years or 10-20 years. Comparing the favorite site, whose life span was determined fairly precisely with other sites whose life spans were determined by a sophisticated guess does not serve public policy. Fourth, there are other criteria that should have been included. Primary among those would be the environmental impact. This landfill is within the viewshed of the Blue Ridge Parkway, which is not an enhancement for the Parkway. Nor should putting a landfill next to a park and greenspace be considered an enhancement. Along with the environmental impact is the safety issue. Kids play in parks and they are not watching where they are going. Having large dump trucks accessing the landfill by going through part of the Park is a greater safety hazard than the number of homes along the route of the trucks. He urged Council to postpone any decision on the Azalea Road site and send it back to City staff for further review. The current recommendation is based upon a flawed analysis, incomplete data, inconsistent evaluation weightings, and narrow criteria that were primarily designed to favor this site and this site alone.

Ms. Laura Rotegard, representing the Blue Ridge Parkway, said that the Blue Ridge Parkway has been working with the City fairly continuously since this came up six years ago as a flea market proposal. We have been working with you to resolve the issues that we think this land use will pose to being adjacent to a national park. We feel that we have been successful in defining the extent of the impact to the visual resource but not sure an agreement has been reached on how to mitigate that impact. She was confident, however, that we will find a solution. However, they are very concerned they have reached an impasse on the issue about the access. In January of 1999 after the flea market issue, we did research and discovered that the history on that road segment had been abandoned. We then sent a letter to the Mayor explaining what we had found suggesting that that road segment and the bridge does not have a public use on it and stating that in that case, when you were preparing for a bond referendum that we suggested that public use not be encouraged on that road -- since there was no legal right to the use on that road. The only reserved right was for the Cove Ministries, which was deeded at the time of the abandonment. The City responded in a letter suggesting that our research was inaccurate and a meeting was agreed upon. Prior to that meeting, we had a meeting with Parks and Recreation and they asked us about what sort of instruments could be used for a special permitting process and we showed willingness to explore that with the City. In March of this year, the staff and the City staff attorney and our staff and our solicitor from Atlanta met to discuss why we have a difference of opinion about this. We left that meeting not changed in our positions but requested that the solicitor and your attorney continue to talk about the different approaches to the research that the Parkway pursued. To date we haven't had any continuing conversation and that concerns us. We thought we had asked that fairly clearly of the City to continue that conversation with our solicitor. In the meantime a number of other small things happened that are important to share. We found that our locks had been changed on the road access to the gate. We found out how and where those were changed and they were City locks. We had a meeting with City staff and come to a courtesy agreement as to how to use that road system temporarily and in an intermittent process to further the designs and studies requirements to pursue the information on this site. Through the summer we have experienced some management problems with that gate being a shared process. We've had a violent crime committed on lands that would normally be locked behind that gate. We've had park lands accidentally bush-hogged when someone was in bush-hogging City property. And we've had other uses that we didn't necessarily verbally agree to in the luncheon meeting. To date we are perplexed and puzzled and in a very awkward situation. She said there are still two key points that their position rests on and we are open to continue conversations on this. One is that our solicitor's position is that the road and the roadway was appropriately abandoned in the 1970's and by state law that ownership reverts back to the National Park Service. We own the bridge and we own the road. There is no public use on that road allowed. Park Service policies and public laws that establish the National Park prohibit us from giving uses to individual or specialized entities, the City being one of those. We have the authority to grant a special use permit in this case for a temporary, short-term use that cannot exceed five years. But in doing that we have to abide by all the laws that govern us regarding the National Environmental Policy Act. We have to take that permitting process through an environmental assessment or an environmental impact statement. That process will take anywhere from six months to eighteen months depending on whether it's elevated to an EIS. To date we have received four comments requesting that it go to an EIS, asking us to hold this study to the highest test of compliance that we can. We may have the authority to permit this use, but we are not, at this point in time, able to commit to giving that use. We have to go through that environmental assessment process before we can legally do anything. And that is going to take some time. We realize that in previous conversations we have indicated our willingness to explore all these possibilities and we are concerned that we will do this only through the need for process. While we share your concern that we all find very expeditious and economical disposal for this inert waste, we just want to be noted that this process, for doing this through National Park lands, is not easy, convenient, nor at this point legally clean.

Mr. Combs said that the City is more than willing to work with the Park Service and they hope we can come to some agreement. Mr. Combs also explained the instance with the locks.

City Attorney Oast said that it's the City's contention that the road has not been abandoned the way it should have been and that access would be available. Resolving that situation will take some time and we are working cooperatively with the Parkway to use some short-term access. This is the first he has heard of a special use permit being available and that is something that we will want to explore. He is continuing to gather information on the status of the bridge.

Councilman Peterson asked what will the City do if the Parkway closes the bridge and it takes up to a year to get access to the bridge. Mr. Combs replied that we do have some alternatives in mind for some other sites until we can develop this one. Building a low water bridge is also something that can be constructed in 5-10 days after a permit is obtained from the Corp of Engineers, which is not a very lengthy process because it is a short-term permit.

The following individuals spoke against the beneficial fill in the Azalea Road area for various reasons, some being, but are not limited to: a beneficial fill cannot be placed in the middle of a river channel; land should be preserved for its highest and best use; use of bridge and road is being contested; environmental concerns; viewshed from the Parkway is a concern; floodplain insurance issue and safety concerns:

Mr. Robert Born, Registered Civil Engineer and Vice-Chairman of the View Pointe Homeowners Association
Mr. Michael Miller, representing RiverLink
Mr. Frank Hankey, resident in View Pointe
Ms. Rebecca Campbell

Mr. Combs responded to questions from Councilman Peterson with regard to using other smaller sites.

Mayor Sitnick said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Cloninger moved for the adoption of Resolution No. 01-186. This motion was seconded by Councilwoman Field.

Vice-Mayor Cloninger stated that Azalea Road is the most cost effective site for the City and will save taxpayers money. He's confident City staff will maintain the site to meet environmental requirements and that City staff will work with the Blue Ridge Parkway regarding the viewshed issue. He would rather have this located on land that the City owns and controls so that we can better ensure and control what goes on there.

Councilman Worley agreed with Vice-Mayor Cloninger and understood the concerns of the Beverly Hills and View Pointe residents, however, he didn't see how this will impact those communities. He supported this site on the condition that truck traffic using the site will be from Tunnel Road and not from Swannanoa River Road.

Councilman Peterson didn't believe Azalea Road is the best site. He felt there will be extra expenses and those expenses will not make the site as cost effective. He was concerned about mixing City truck traffic with the Park traffic. He felt a better approach would be to have smaller scattered sites, thereby reducing transportation costs.

Mayor Sitnick personally felt she did not have enough answers to the questions raised and was not comfortable in voting in favor of this site.

The motion made by Vice-Mayor Cloninger and seconded by Councilwoman Field carried on a 5-2 vote with Mayor Sitnick and Councilman Peterson voting "no".

RESOLUTION BOOK NO. 27 – PAGE 21

VI. OTHER BUSINESS:

A. COMMENTS BY COUNCILWOMAN BELLAMY

Councilwoman Bellamy said that she will be travelling to Charlotte, N. C., tomorrow to hear a presentation regarding the introduction of the Rehab Code concept, focusing on its impact

150

on adaptive reuse and the preservation of housing stock. She felt this will be very good for our community.

B. LAWSUIT

The City was served with the following Complaint on December 16, 2001: Michael James Gosnell v. City of Asheville. The nature of the proceeding is a Complaint for compensation for conspiracy to murder. This matter will be handled in-house.

C. PRIMARY ELECTION RESULTS - CITY OF ASHEVILLE - OCTOBER 9, 2001 GENERAL ELECTION RESULTS - CITY OF ASHEVILLE, NOVEMBER 6, 2001

Attached hereto as Exhibit "A" is the abstract containing the number of legal votes cast in the Primary Election, City of Asheville, held on October 9, 2001. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville, held on November 6, 2001.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English commented about downtown Asheville being a dangerous place.

B. COMMENTS BY REBECCA CAMPBELL

Ms. Rebecca Campbell spoke farewell words to the outgoing City Council members.

VIII. ADJOURNMENT:

Mayor Sitnick adjourned the meeting at 10:28 p.m.

Magdalen Burleson

Tuesday - December 4, 2001 - 4:00 p.m.

ORGANIZATIONAL SESSION:

Mayor-Elect Charles R. Worley welcomed everyone to the organizational session. He then asked that everyone stand and recite the Pledge of Allegiance. Mayor-Elect Worley then introduced Rev. Kimberly Richter from Grace Covenant Presbyterian Church who gave the invocation.

Mayor-Elect Worley stated that he submitted his letter of resignation as a Council member of the Asheville City Council effective December 4, 2001, in order to take his position as Mayor of the City of Asheville. This resignation results in an unexpired term until December of 2003.

The Honorable Robert F. Orr, Associate Justice, Supreme Court of North Carolina, administered the Oath of Office to the following:

Mayor Charles R. Worley
Councilman Joseph C. Dunn
Councilwoman Diana Hollis Jones
Councilman R. Carl Mumpower

RESOLUTION NO. 01-182 - RESOLUTION OF APPRECIATION FOR MAYOR LENI SITNICK

Mayor Worley read the resolution.

Resolution No. 01-182 was adopted by acclamation.

Mayor Worley presented Ms. Sitnick with the resolution, a plaque, her name plates and a City pen.

RESOLUTION BOOK NO. 27 - PAGE 17

RESOLUTION NO. 01-183 - RESOLUTION OF APPRECIATION FOR VICE-MAYOR M. CHARLES "CHUCK" CLONINGER

Mayor Worley read the resolution.

Resolution No. 01-183 was adopted by acclamation.

Mayor Worley presented Mr. Cloninger with the resolution, a plaque, his name plates and a City pen.

RESOLUTION BOOK NO. 27 - PAGE 18

RESOLUTION NO. 01-184 - RESOLUTION OF APPRECIATION FOR COUNCILWOMAN BARBARA FIELD

Mayor Worley read the resolution.

Resolution No. 01-184 was adopted by acclamation.

Mayor Worley presented Ms. Field with the resolution, a plaque, her name plates and a City pen.

RESOLUTION BOOK NO. 27 - PAGE 19

RESOLUTION NO. 01-185 - RESOLUTION OF APPRECIATION FOR COUNCILMAN EDWARD C. HAY JR.

Mayor Worley read the resolution.

Resolution No. 01-185 was adopted by acclamation.

Mayor Worley presented Mr. Hay with the resolution, a plaque, his name plates and a City pen.

RESOLUTION BOOK NO. 27 - PAGE 20

ELECTION AND OATH OF OFFICE OF THE SEVENTH MEMBER OF THE ASHEVILLE CITY COUNCIL

Councilwoman Jones nominated James E. Ellis to fill the unexpired City Council term left vacant by Mayor Worley, as Mr. Ellis received the 4th highest votes from the November 6, 2001, General Election. Councilman Peterson seconded the nomination.

After hearing no more nominations, Mayor Worley closed the floor for nominations.

Councilwoman Bellamy said that over the course of the last few months, the former Council had informally decided not to address this issue because they did want to leave it up to the incoming Council. They have just been sworn in and are now faced with a decision without the opportunity for discussion. She didn't feel that the entire community is comfortable with this process. With that, she would not support the motion. She felt Council should discuss this matter in detail with public input and possibly change the process so this will not occur again.

Councilman Peterson agreed that the process needs to be addressed. He suggested the City Attorney review possible options that might be available to the City Council if this situation were to arise again.

Councilwoman Jones felt that this is a way City Council can recognize what many people in this community wanted to see happen. Mr. Ellis has shared with the community his ideas and his love for this community. She said she would be privileged to work with him.

Councilman Dunn felt that Mr. Ellis has served his country and community well as seen by his repertoire of service and would be an excellent addition to City Council.

Councilman Mumpower was glad Mr. Ellis was willing to serve.

By a show of hands, James E. Ellis was appointed to serve the unexpired term until December, 2003, on a 5-1 vote, with Councilwoman Bellamy voting "no."

The Honorable Robert F. Orr, Associate Justice, Supreme Court of North Carolina, administered the Oath of Office to Councilman James E. Ellis.

ELECTION OF VICE-MAYOR

Councilman Peterson nominated Councilwoman Bellamy as Vice-Mayor of the City of Asheville. Councilman Mumpower seconded the nomination.

After hearing no more nominations, Mayor Worley closed the floor for nominations.

162

Councilman Peterson then moved to appoint Councilwoman Bellamy as Vice-Mayor by acclamation. This motion was seconded by Councilman Mumpower and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 11, 2001 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Appointment to the Minority Business Commission

Summary: The consideration of a resolution confirming the appointment of one member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan (subsequent amendments to the Minority Business Plan were adopted by City Council in November 1998 and December 1999).

The composition of the Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Mr. Marvin Vierra has been named by the Asheville Business Development Center to represent them on the Minority Business Commission. Mr. Vierra has been nominated to fill the position left vacant by Mr. Ronnie Blythe and his term will run through August, 2002.

City staff recommends City Council adopt a resolution confirming the appointment of one member of the Minority Business Commission.

Vice-Mayor Bellamy wanted to thank Ronald Blythe for his many years of service on the Commission.

Minority Business Commission Annual Report

Summary: Presentation of the Minority Business Program Annual Report for Fiscal Year 2000 - 2001.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998 and December 1999, to clarify provisions of the Plan and to expand participation in the Mentor-Protégé Program.

The Plan requires the Office of Minority Affairs to present to the City Council and County Commissioners an Annual Report on the effectiveness of implementation of the Plan. The Report shall include, but not be limited to: the number of minority businesses; percentage of minority businesses contracting with the County and City either as a prime contractor or as a subcontractor; percentage of overall reported contracts awarded to minority businesses; percentage of contractors complying with good faith efforts; percentage of goals achieved and goals waived. The City of Asheville improved by 170% from last year's 1.4% to 3.8% this year.

The Annual Report for Fiscal Year 2000 – 2001 has been reviewed by the Minority Business Commission and approved at its meeting on October 19, 2001.

No formal action is required.

Revisions to the Minority Business Plan

Summary: The consideration of a resolution to amend the Minority Business Plan in order to further enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998, to expand participation in the Mentor-Protégé Program; and again in December 1999 to clarify the provisions of the Plan.

At their meeting on August 16, 2001, the Minority Business Commission recommended that the Plan be amended to further enhance and clarify provisions of the Plan. (A copy of the Plan with recommended changes shown in blue is attached hereto.) The most significant change is the requirement of certification renewal every two years instead of annually (page 13). In addition, the options to meet the annual training requirement have been expanded and the complete list is now included in the Plan.

The resolution amends the Plan as recommended by the Minority Business Commission. The recommended revision to the Plan will also be presented to the Buncombe County Commission for their consideration and adoption.

Intent to Enter into License Agreement with Circle Net Inc.

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed License Agreement with Circle Net, Inc. for antennas at 36 Reservoir Road.

The property at 36 Reservoir Road is the site of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

Circle Net, Inc. has offered to enter into a license agreement for space on the tower known as the "U. S. Cellular Tower". The proposed License Agreement will enable Circle Net to operate antennas and related equipment at the site. There is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Circle Net will pay a License Fee of $7,800 for the first term with a 5% increase annually thereafter. In addition to the License Fee, Circle Net will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the resolution.

Mr. Ed Vess, Field Services Coordinator, responded to questions from Council regarding how the license fee and utility fees were determined.

Budget Amendment re: Grant for Van for Senior Citizen Program

Summary: The consideration of a budget amendment, in the amount of $19,000, from the annual appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging, and private donations via the Asheville Parks and Greenway

Foundation to establish a budget for the purchase of a 15-passenger van for Parks and Recreation's Senior Citizen Program.

The City of Asheville received approval for $11,364 in October 2001 for the 2001 Senior Center General Purpose Funding from the State of North Carolina, Department of Health and Human Services, Division on Aging. Donations totaling $7,636 is available via the Asheville Parks and Greenway Foundation. The funds will be used to purchase a 15-passenger van to transport senior citizens to five senior centers and community centers to participate in nutrition programs and recreation activities. The van will serve 30% more seniors, thus allowing them to benefit from the senior citizen services of Parks and Recreation.

The Parks and Recreation Department recommends City Council approve the budget amendment to establish a budget for the purchase of a 15-passenger van.

NC Local Government Debt Setoff Program

Summary: The consideration of a resolution authorizing the Mayor and the City Manager to execute documents and agreements necessary to participate in the NC Local Government Debt Setoff Program and designating both William L. Schaefer, Jr., Finance Director, and Cynthia A. Miller, Finance Operations Manager, and their successors as the persons to conduct necessary proceedings.

During the 1997 General Assembly session, the North Carolina Association of County Commissioners (NCACC) and the North Carolina League of Municipalities (NCLM) were successful in having enacted a legislative goal enabling counties and cities to participate in the state's income tax debt setoff program. The program permits counties and cities to submit any outstanding delinquent debt ($50 or more) through a local government clearinghouse to the NC Department of Revenue, to attempt to match these debts against individual income tax refunds. The local government clearinghouse is also charged with disbursing offset funds back to the receiving county and/or city. NCACC and NCLM have organized a joint NC Local Government Debt Setoff Clearinghouse to make this program available to all North Carolina counties and cities. N. C. Gen. Stat. sec. 105A authorizes county and city participation in the debt setoff program through a clearinghouse function, and limits clearinghouse participation to only counties and cities.

Delinquent debt is a sum that is at least $50 owed to a county or city (claimant agency) that has accrued through contract, subrogation, tort, operation of law, or any other legal theory regardless of whether there is an outstanding judgment for the sum. A full 60 days must lapse after a local government labels the debt as delinquent before the debt can be submitted to the clearinghouse. The county or city must furnish the full name and social security number of each debtor. Costs of participation will be $15 for each successful match of debt against an individual debtor's tax refund. No charges will accrue unless a successful tax refund setoff is made. The $15 cannot be charged to the debtor but must be paid by the participating agency. Procedures are in place to notify a debtor of a proposed setoff, to allow a debtor who decides to contest a proposed setoff to receive a hearing with the designated hearing officer and, further, to file a petition with the Courts if desired. No debt can be submitted to the clearinghouse until the entire notification and appeals process is completed for that debt.

NCACC and NCLM have contracted with Five Star Computing, Inc. of Columbia, S.C., to administer the program. Five Star has managed the South Carolina Association of Counties debt setoff program since its inception five years ago.

City staff recommends City Council adopt the resolution.

Agreement with NC DOT for Reimbursement of Light Transit Vehicles

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for funding the three light transit vehicles recently purchased by the Transit Services Department.

The NC DOT requires an agreement between the City and the NC DOT for reimbursement of up to $26,250.00 for purchase of three Light Transit Vehicles and associated equipment. The state will reimburse the City up to 10% of the total expended amount. All funds must be expended by June 30, 2003. Most, but not all, funds have been expended and the remainder will be expended for radios and tires by June 30, 2002.

City staff recommends adoption of the resolution.

Adoption of Budget Schedule

Summary: The consideration of a motion approving the Fiscal Year 2002/2003 budget schedule.

The proposed Fiscal Year 2002/2003 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Certain administrative phases of the budget process including the distribution of budget materials and instructions have already begun or have been previously approved by City Council (i.e., City Council Retreat). Other key phases include submission of departmental requests, presentation of the proposed budget to City Council, a public hearing and formal adoption. Adoption of the Fiscal Year 2002/2003 budget is scheduled for June 25, 2002.

City staff recommends City Council to adopt the Fiscal Year 2002/2003 budget schedule.

Budget Amendment re: Transit State and Federal Grant Funds

Summary: The consideration of a budget amendment, in the amount of $633,062, to reflect additional and appropriated revenue and offsetting expenses in the Transit Services Department.

The City of Asheville expects to receive $317,447 in additional state grant funds during the current fiscal year which are earmarked for transit operations in Fiscal Year 2001-2002. Additionally, the Transit Services Department is requesting the re-appropriation of unspent federal and state grant funds from Fiscal Year 2000-2001 in the amount of $315,615. These are funds earmarked for operations and capital project funds. Staff is requesting that these funds be appropriated in the current fiscal year to further enhance transit service.

Transit Service Enhancements include:

- the revision of service delivery to address scheduling and capacity problems,
- an increase in marketing capability
- an increased ability to implement the capital portions of the Transit Improvement Plan, including
  - Radios and tires for new Light Transit Vehicles
  - Insulation of wash tunnel
  - the purchase and installation of additional shelters
  - budget for additional Cross Walks on city streets
  - security enhancements
  - other capital projects

City staff recommends City Council adopt a budget amendment to reflect additional revenue and offsetting expenses in the Transit Services Department.

Budget Amendment for Outdoor Recreation Program

Summary: The consideration of a budget amendment, in the amount of $6,774.00, to allow the Outdoor Recreation Program to collect fees and expend these fees to pay for a weekend snow skiing trip to Snowshoe, West Virginia.

The Outdoor Recreation Program of the Parks and Recreation Department offers a variety of opportunities for all ages and abilities to enjoy the outdoors. Attached to this staff report is a partial listing of these opportunities. One of the most successful activities offered through this program is the learn-to-ski snow skiing instructional program offered each winter in conjunction with the French Swiss Ski College at Appalachian ski Mountain. This learn-to-ski program is celebrating its 30th year in 2002. During the past 30 years, the program has offered participants from time to time an opportunity to travel to a more advanced skiing destination. This year, participants have requested that staff organize a trip to Snowshoe, West Virginia. The cost of the activity, including charter bus transportation, lodging, lift tickets and taxes/fees will be paid by the participants. It is estimated that the total cost of this activity is $6,774.00, which is based on a minimum of 30 participants. Revenue from the participants will cover the expenses of the trip with no cost to the City of Asheville.

City staff recommends City Council adopt the budget amendment.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

TRANSPORTATION PRIORITY NEEDS LIST

Mr. Dan Baechtold, Metropolitan Planning Organization Coordinator, said that this is a presentation to City Council on the Transportation Priority Needs List for the 2004-2010 Transportation Improvement Program.

On December 11, the Council will appoint two council members to the Transportation Advisory Committee (TAC) of the Asheville Area Metropolitan Planning Organization (MPO). Those two members will be asked to adopt the Transportation Priority Needs List at the regularly scheduled TAC meeting to be held on December 20, 2001.

The Asheville Area MPO is the transportation decision-making body for the urbanized areas of Buncombe County, including Asheville, Biltmore Forest, Black Mountain, Weaverville, Woodfin, and the Town of Fletcher in Henderson County. The City of Asheville serves as the lead planning agency for the MPO, and receives federal funding to conduct transportation planning and provide staff services.

The MPO is made up of two primary committees. The policy-making committee is the Transportation Advisory Committee (TAC), which is made up of two members of the Asheville City Council, one elected official from each of the other member governments, and the North Carolina Board of Transportation representative for a total of ten members. The other committee is the Technical Coordinating Committee, which is a staff level committee that provides recommendations to the TAC concerning transportation decisions.

One of the duties of the MPO is the development of a list of the top transportation priorities for the Asheville area, known as the Priority Needs List. The list is then submitted to the North Carolina Department of Transportation for their consideration as they develop the draft Transportation Improvement program (TIP) for North Carolina.

168

The Transportation Advisory Committee will be asked to approve this list at their regularly scheduled meeting on December 20, 2001. It is important that the list is adopted on this date in order to meet the deadlines set by the North Carolina Department of Transportation (NC DOT). Listed below are the key dates associated with the development of the Priority Needs List (PNL).

Priority Needs List Key Dates

November 18, 2001	Technical Coordinating Committee develops draft PNL
November 19, 2001	Beginning of 30-day public comment period for PNL
December 17, 2001	End of public comment period
December 20, 2001	Transportation Advisory Committee adopts PNL
January 1, 2001	Deadline to submit the PNL to NCDOT
June, 2002	NCDOT produces draft Transportation Improvement Program

The Technical Coordinating Committee for the MPO developed the Draft Priority Needs List that is now in the public comment period. Copies are available at all Buncombe County libraries, the Asheville City Building, and the town hall buildings at each of the other municipalities. In addition, the document can be viewed on the City's web site.

The Priority Needs List outlines transportation needs in several categories including roadway improvements, pedestrian and bicycle projects, and public transit. The document includes a balance of transportation needs from Asheville, Biltmore Forest, Black Mountain, Fletcher, Weaverville, Woodfin, and unincorporated Buncombe County. Listed below are the top transportation priorities in the City of Asheville's jurisdiction:

Existing Project Priorities
I-26 Connector
Sweeten Creek Road Improvements
Traffic Signal System Upgrade

New Project Priorities
Merrimon Avenue
Mill's Gap Road
Riverside Parkway (entire river corridor)
I-240/Merrimon Avenue Interchange
New Haw Creek Road (upgrade only)
Overlook Road (upgrade only)
Beaverdam Road (upgrade only)

Pedestrian Priorities
Patton Avenue Sidewalk
Hendersonville Road Sidewalk
Oakley to River Ridge Sidewalk
Merrimon Avenue Sidewalk
Haw Creek Road Sidewalk
Beaverdam Road
Brevard Road Sidewalk

Bicycle Priorities
Amboy Road Extension
Swannanoa River Road Route
Railroad Crossing Improvements

Greenway Priorities (Transportation Enhancements)
French Broad River Park Phase IV Greenway
Azalea Road Greenway

Transit Priorities
Traffic Signal Priority for Transit Vehicles (and Emergency Vehicles)
Super Stops for Nodal Transit System
Compressed Natural Gas Fueling Station
Purchase of Trolley Bus

Upon inquiry of Councilwoman Jones, Mr. Baechtold said that none of the new project priorities two years ago actually advanced to the TIP by the NC DOT. However, some projects are being completed so there may be some opportunities for some of these projects to make the list.

Councilman Peterson asked who did the rankings. Mr. Baechtold responded that they are done by the Technical Coordinating Commission by consensus. Some of the projects that did not rank high are having some improvements made even if they don't get in the TIP.

City Manager Westbrook said that it is our challenge in this year's budget to develop a revenue source to be able to go to the NC DOT and say that we have local funds we can contribute to this project. Then, perhaps, the NC DOT may feel that the City is really committed in completing this project and it will get on the priority list of funding. He also recommended City Council establish a relationship with our local NC DOT representatives who can carry the City's needs to the Raleigh office.

When Councilman Peterson asked about certain districts receiving a sum of money, Mr. Baechtold did say that a certain amount of money is allocated to DOT districts, but their funding process is hard to understand. Therefore, we just prioritize our list and hope that some of our projects makes it to the TIP for funding.

Upon inquiry of Councilman Peterson about the transit priorities, Mr. Baechtold said that these come out of a separate funding source. City Manager Westbrook said that the compressed natural gas fueling station was awarded funding, but that grant was frozen. However, the City has now applied to another state agency for funding of that station and it looks promising at this point.

ANNUAL AUDIT REPORT

Finance Director Bill Schaefer said that this is the presentation of the City of Asheville annual audit report for the Fiscal Year Ended June 30, 2001.

City Council retained an independent audit firm, Crisp Hughes Evans LLP of Asheville, N.C., to perform an audit of the City of Asheville for the fiscal year ended June 30, 2001, as required by North Carolina General Statute 159-34. The auditors gave the City an unqualified audit opinion. (The term "unqualified" means that the auditors' opinion that the financial statements present fairly the financial position of the City is not modified by reservations or restrictions.)

Mr. Brian Broom, Director of Crisp, Hughes Evans LLP, gave a brief presentation of their findings. He said their report for the 2001 audit expresses and unqualified opinion (clean) on the fair representation of the general purpose financial statements in all material respects, in conformity with generally accepted accounting principles. The Local Government Commission recommends governmental entities maintain, at a minimum fund balance equal to 8% of expenditures. The City's fund balance for 2001 is about 12-13%.

Mr. Schaefer answered various questions from Council regarding the financial report.

Upon inquiry of Councilwoman Jones, Mr. Schaefer updated Council on the Governmental Accounting Standards Board's new reporting standard.

NEXT COMMUNITY MEETING LOCATION ON JANUARY 29, 2002

At the suggestion of City Manager Westbrook, it was the consensus of City Council to hold the January 29, 2002, City Council community meeting at Skyland Volunteer Fire Department, if available, beginning at 7:00 p.m.

Councilman Peterson suggested coordinating the City neighborhood walks with a couple of weeks from a City Council's community meeting in the same area.

WATER AUTHORITY APPOINTMENT

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Mayor Worley to fill the position on the Water Authority left vacant by Tommy Sellers, term to expire September 11, 2004, or until his successor has been appointed.

CITY COUNCIL LIAISON ASSIGNMENTS

City Council members were assigned various liaison and member positions on it's various boards and commissions.

DISCUSSION ON LAST QUARTERLY APPOINTMENT PROCESS

It was the consensus of City Council to discuss the last quarterly appointment process at the January 15, 2002, worksession with the intent to give City Clerk Burleson instructions for interviews or appointments. In addition, the City Clerk was instructed to re-advertise for all board vacancies until January 4, 2002.

Councilman Dunn requested City Council consider amending it's rules to allow only American citizens be appointed to their boards.

Vice-Mayor Bellamy asked City Council to consider appointment Buncombe County residents to the Film Commission.

After discussion, it was the consensus of City Council for the City Council Boards/Commissions Committee review these requests, and more mentioned during the discussion, at an upcoming date and report back to the full Council with their recommendations.

MEETING TIME CHANGE

Due to a recent Institute of Government class being held for newly elected Council Members, Vice-Mayor Bellamy moved to waive the rules and take formal action at this meeting to change the time of the formal meeting on Tuesday, January 8, 2002, from 5:00 p.m. to 6:00 p.m. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilman Mumpower moved to change the time of the formal meeting on Tuesday, January 8, 2002, from 5:00 p.m. to 6:00 p.m. This motion was seconded by Councilman Dunn and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:15 p.m. p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – December 18, 2001 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; and Councilman R. Carl Mumpower; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brian L. Peterson

INVOCATION

Mayor Worley gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. **APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON NOVEMBER 27, 2001, THE ORGANIZATIONAL MEETING HELD ON DECEMBER 4, 2001, AND THE WORKSESSION HELD ON DECEMBER 11, 2001**

B. **RESOLUTION NO. 01-187 - RESOLUTION ADOPTING THE 2002 SCHEDULED CITY COUNCIL MEETINGS**

RESOLUTION BOOK NO. 27 – PAGE [illegible] 22

C. **RESOLUTION NO. 01-188 - RESOLUTION AUTHORIZING THE CITY CLERK TO PUBLISH A NOTICE OF INTENT TO ENTER INTO A LICENSE AGREEMENT WITH CIRCLE NET INC. FOR ANTENNAS AND RELATED EQUIPMENT AT 36 RESERVOIR ROAD (FORMERLY WHITE FAWN RESERVOIR)**

Summary: The consideration of a resolution directing the City Clerk to publish a Notice of Intent regarding a proposed License Agreement with Circle Net, Inc. for antennas at 36 Reservoir Road.

The property at 36 Reservoir Road is the site of telecommunication towers owned by the City of Asheville. The City leases antenna space on the towers and ground space for related equipment.

Circle Net, Inc. has offered to enter into a license agreement for space on the tower known as the "U. S. Cellular Tower". The proposed License Agreement will enable Circle Net to operate antennas and related equipment at the site. There is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Circle Net will pay a License Fee of $7,800 for the first term with a 5% increase annually thereafter. In addition to the License Fee, Circle Net will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE ~~22~~ 23

D. RESOLUTION NO. 01-189 - RESOLUTION CONFIRMING A MEMBER TO THE MINORITY BUSINESS COMMISSION

Summary: The consideration of a resolution confirming the appointment of one member of the Minority Business Commission.

On May 26, 1998, City Council adopted Resolution No. 98-63 adopting a City-County Minority Business Plan (subsequent amendments to the Minority Business Plan were adopted by City Council in November 1998 and December 1999).

The composition of the Minority Business Commission consists of 13 members, 10 of whom are nominated by various groups and three of whom are minority business owners nominated by the Minority Business Commission. All nominees are considered and appointed by both the City Council and County Commission.

Mr. Marvin Vierra has been named by the Asheville Business Development Center to represent them on the Minority Business Commission. Mr. Vierra has been nominated to fill the position left vacant by Mr. Ronnie Blythe and his term will run through August, 2002.

City staff recommends City Council adopt a resolution confirming the appointment of one member of the Minority Business Commission.

RESOLUTION BOOK NO. 27 – PAGE 24

E. RESOLUTION NO. 01-190 - RESOLUTION AMENDING THE MINORITY BUSINESS PLAN

Summary: The consideration of a resolution to amend the Minority Business Plan in order to further enhance and clarify provisions of the Plan.

In May of 1998, City Council adopted the Asheville-Buncombe Minority Business Plan. The Plan was subsequently amended in November 1998, to expand participation in the Mentor-Protégé Program; and again in December 1999 to clarify the provisions of the Plan.

At their meeting on August 16, 2001, the Minority Business Commission recommended that the Plan be amended to further enhance and clarify provisions of the Plan. The most significant change is the requirement of certification renewal every two years instead of annually. In addition, the options to meet the annual training requirement have been expanded and the complete list is now included in the Plan.

The resolution amends the Plan as recommended by the Minority Business Commission. The recommended revision to the Plan will also be presented to the Buncombe County Commission for their consideration and adoption.

RESOLUTION BOOK NO. 27 – PAGE 25

F. ORDINANCE NO. 2877 - BUDGET AMENDMENT FOR THE PURCHASE OF A 15-PASSENGER VAN FOR THE SENIOR CITIZEN PROGRAM

Summary: The consideration of a budget amendment, in the amount of $19,000, from the annual appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging, and private donations via the Asheville Parks and Greenway Foundation to establish a budget for the purchase of a 15-passenger van for Parks and Recreation's Senior Citizen Program.

The City of Asheville received approval for $11,364 in October 2001 for the 2001 Senior Center General Purpose Funding from the State of North Carolina, Department of Health and Human Services, Division on Aging. Donations totaling $7,636 is available via the Asheville Parks and Greenway Foundation. The funds will be used to purchase a 15-passenger van to transport senior citizens to five senior centers and community centers to participate in nutrition programs and recreation activities. The van will serve 30% more seniors, thus allowing them to benefit from the senior citizen services of Parks and Recreation.

The Parks and Recreation Department recommends City Council approve the budget amendment to establish a budget for the purchase of a 15-passenger van.

ORDINANCE BOOK NO. 19 – PAGE 355

G. RESOLUTION NO. 01-191 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE DOCUMENTS AND AGREEMENTS NECESSARY TO PARTICIPATE IN THE N.C. LOCAL GOVERNMENT DEBT SETOFF PROGRAM

Summary: The consideration of a resolution authorizing the Mayor and the City Manager to execute documents and agreements necessary to participate in the NC Local Government Debt Setoff Program and designating both William L. Schaefer, Jr., Finance Director, and Cynthia A. Miller, Finance Operations Manager, and their successors as the persons to conduct necessary proceedings.

During the 1997 General Assembly session, the North Carolina Association of County Commissioners (NCACC) and the North Carolina League of Municipalities (NCLM) were successful in having enacted a legislative goal enabling counties and cities to participate in the state's income tax debt setoff program. The program permits counties and cities to submit any outstanding delinquent debt ($50 or more) through a local government clearinghouse to the NC Department of Revenue, to attempt to match these debts against individual income tax refunds. The local government clearinghouse is also charged with disbursing offset funds back to the receiving county and/or city. NCACC and NCLM have organized a joint NC Local Government Debt Setoff Clearinghouse to make this program available to all North Carolina counties and cities. N. C. Gen. Stat. sec. 105A authorizes county and city participation in the debt setoff program through a clearinghouse function, and limits clearinghouse participation to only counties and cities.

Delinquent debt is a sum that is at least $50 owed to a county or city (claimant agency) that has accrued through contract, subrogation, tort, operation of law, or any other legal theory regardless of whether there is an outstanding judgment for the sum. A full 60 days must lapse after a local government labels the debt as delinquent before the debt can be submitted to the clearinghouse. The county or city must furnish the full name and social security number of each debtor. Costs of participation will be $15 for each successful match of debt against an individual debtor's tax refund. No charges will accrue unless a successful tax refund setoff is made. The $15 cannot be charged to the debtor but must be paid by the participating agency. Procedures are in place to notify a debtor of a proposed setoff, to allow a debtor who decides to contest a proposed setoff to receive a hearing with the designated hearing officer and, further, to file a petition with the Courts if desired. No debt can be submitted to the clearinghouse until the entire notification and appeals process is completed for that debt.

NCACC and NCLM have contracted with Five Star Computing, Inc. of Columbia, S.C., to administer the program. Five Star has managed the South Carolina Association of Counties debt setoff program since its inception five years ago.

City staff recommends City Council adopt the resolution.

RESOLUTION BOOK NO. 27 – PAGE ~~25~~ 26

H. RESOLUTION NO. 01-192 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR REIMBURSEMENT OF THREE LIGHT TRANSIT VEHICLES

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for funding the three light transit vehicles recently purchased by the Transit Services Department.

The NC DOT requires an agreement between the City and the NC DOT for reimbursement of up to $26,250.00 for purchase of three Light Transit Vehicles and associated equipment. The state will reimburse the City up to 10% of the total expended amount. All funds must be expended by June 30, 2003. Most, but not all, funds have been expended and the remainder will be expended for radios and tires by June 30, 2002.

City staff recommends adoption of the resolution.

RESOLUTION BOOK NO. 27 – PAGE ~~26~~ 27

I. MOTION ADOPTING THE 2002-03 BUDGET SCHEDULE

Summary: The consideration of a motion approving the Fiscal Year 2002/2003 budget schedule.

The proposed Fiscal Year 2002/2003 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Certain administrative phases of the budget process including the distribution of budget materials and instructions have already begun or have been previously approved by City Council (i.e., City Council Retreat). Other key phases include submission of departmental requests, presentation of the proposed budget to City Council, a public hearing and formal adoption. Adoption of the Fiscal Year 2002/2003 budget is scheduled for June 25, 2002.

City staff recommends City Council to adopt the Fiscal Year 2002/2003 budget schedule.

J. ORDINANCE NO. 2878 - BUDGET AMENDMENT TO APPROPRIATE ADDITIONAL STATE AND FEDERAL GRANT FUNDS FOR TRANSIT SERVICES

Summary: The consideration of a budget amendment, in the amount of $633,062, to reflect additional and appropriated revenue and offsetting expenses in the Transit Services Department.

The City of Asheville expects to receive $317,447 in additional state grant funds during the current fiscal year which are earmarked for transit operations in Fiscal Year 2001-2002. Additionally, the Transit Services Department is requesting the re-appropriation of unspent federal and state grant funds from Fiscal Year 2000-2001 in the amount of $315,615. These are funds earmarked for operations and capital project funds. Staff is requesting that these funds be appropriated in the current fiscal year to further enhance transit service.

Transit Service Enhancements include:

- the revision of service delivery to address scheduling and capacity problems,
- an increase in marketing capability
- an increased ability to implement the capital portions of the Transit Improvement Plan, including
  - Radios and tires for new Light Transit Vehicles
  - Insulation of wash tunnel
  - the purchase and installation of additional shelters
  - budget for additional Cross Walks on city streets
  - security enhancements
  - other capital projects

City staff recommends City Council adopt a budget amendment to reflect additional revenue and offsetting expenses in the Transit Services Department.

ORDINANCE BOOK NO. 19 – PAGE 357

K. ORDINANCE NO. 2879 - BUDGET AMENDMENT FOR THE OUTDOOR RECREATION PROGRAM

Summary: The consideration of a budget amendment, in the amount of $6,774.00, to allow the Outdoor Recreation Program to collect fees and expend these fees to pay for a weekend snow skiing trip to Snowshoe, West Virginia.

The Outdoor Recreation Program of the Parks and Recreation Department offers a variety of opportunities for all ages and abilities to enjoy the outdoors. One of the most successful activities offered through this program is the learn-to-ski snow skiing instructional program offered each winter in conjunction with the French Swiss Ski College at Appalachian ski Mountain. This learn-to-ski program is celebrating its 30th year in 2002. During the past 30 years, the program has offered participants from time to time an opportunity to travel to a more advanced skiing destination. This year, participants have requested that staff organize a trip to Snowshoe, West Virginia. The cost of the activity, including charter bus transportation, lodging, lift tickets and taxes/fees will be paid by the participants. It is estimated that the total cost of this activity is $6,774.00, which is based on a minimum of 30 participants. Revenue from the participants will cover the expenses of the trip with no cost to the City of Asheville.

City staff recommends City Council adopt the budget amendment.

ORDINANCE BOOK NO. 19 – PAGE 359

L. RESOLUTION NO. 01-193 - RESOLUTION APPOINTING A MEMBER TO THE REGIONAL WATER AUTHORITY

Summary: The consideration of appointing a member to the Regional Water Authority of Asheville, Buncombe and Henderson.

The term of Tommy Sellers, as a member on the Regional Water Authority, expired on September 30, 2001.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Mayor Charles Worley to serve a three year term, term to expire September 30, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE 17

M. RESOLUTION NO. 01-194 - RESOLUTION APPOINTING A MEMBER TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: The consideration of appointing a member to the ADA Compliance Committee.

Councilman Peterson has resigned from the ADA Compliance Committee, thus creating a vacancy.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Councilman Carl Mumpower as the elected representative to the ADA Compliance Committee to serve a term according to his Council term of office.

RESOLUTION BOOK NO. 27 – PAGE ~~28~~ 29

N. RESOLUTION NO. 01-195 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: The consideration of appointing a member to the Citizens/Police Advisory Committee.

Councilman Peterson has resigned as the City Council representative on the Citizens/Police Advisory Committee thus leaving a vacancy.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Councilman Joe Dunn as the non-voting City Council member on the Citizens/Police Advisory Committee to serve a term according to his Council term of office.

RESOLUTION BOOK NO. 27 – PAGE ~~29~~ 30

O. RESOLUTION NO. 01-196 - RESOLUTION APPOINTING A MEMBER TO THE CRIME STOPPERS BOARD OF DIRECTORS

Summary: The consideration of appointing a member to the Asheville-Buncombe Crime Stoppers Board of Directors.

Vice-Mayor Bellamy has resigned as the City Council representative on the Asheville-Buncombe Crime Stoppers Board of Directors.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Councilman Joe Dunn as the City Council representative on the Asheville-Buncombe Crime Stoppers Board of Directors to serve the unexpired term of Vice-Mayor Bellamy, term to expire June 30, 2002, and then to serve a full three year term, term to expire June 30, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 27 – PAGE ~~30~~ 31

P. RESOLUTION NO. 01-197 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE DOWNTOWN COMMISSION

Summary: The consideration of appointing a member to the Asheville Downtown Commission.

The terms of Barbara Field and Chuck Cloninger, as City Council representatives on the Downtown Commission have expired.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Councilman Jim Ellis as the City Council representative on the Asheville Downtown Commission to serve a term according to his Council term of office.

RESOLUTION BOOK NO. 27 – PAGE 32

Q. RESOLUTION NO. 01-198 - RESOLUTION APPOINTING AN EX-OFFICIO MEMBER TO THE TOURISM DEVELOPMENT AUTHORITY

Summary: The consideration of appointing a member to the Buncombe County Tourism Development Authority.

Due to the Barbara Field's term ending as a City Council member, there exists a need to appoint a City Council representative as the ex-officio non-voting member on the Buncombe County Tourism Development Authority.

On December 11, 2001, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Vice-Mayor Terry Bellamy as the ex-officio non-voting City Council representative on the Buncombe County Tourism Development Authority to serve a term according to her Council term of office.

RESOLUTION BOOK NO. 27 – PAGE 33

R. RESOLUTION NO. 01-199 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN EASEMENT FOR RELOCATION OF A POWER LINE AT THE ASHEVILLE REGIONAL AIRPORT

Summary: The consideration of a resolution authorizing the City Manager to execute an easement for relocation of a power line at the Asheville Regional Airport.

In connection with some other work currently being done at the Asheville Regional Airport, Carolina Power & Light plans to relocate an existing overhead power line and put most of it underground. The Airport's engineer has reviewed and approved the plans. The City owns the property, and Council approval is required for this easement.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 27 – PAGE 34

S. RESOLUTION NO. 01-200 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE ASHEVILLE CITIZEN-TIMES FOR RETAIL ADVERTISING

Summary: The consideration of a resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

Each year City staff and the staff of the Asheville Citizen-Times reviews retail advertising that the City has placed during the year to determine what rates the City will qualify for the following year. Last year all departments in the City ran a total of 32 column inches per week in the Asheville Citizen-Times. This qualifies the City to take advantage of a weekly frequency rate running 16 to 31 column inches per week.

The open rate for advertising in the Asheville Citizen-Times is $47.02 per column inch daily and $62.18 per column inch on Sunday. This contract will allow the City to advertise for $29.85 per column inch daily and $39.84 per column inch on Sunday. Based on the amount of advertising placed in 2001, the City saves $29,618 by signing the weekly frequency contract.

This contract is valid for all City departments that advertise with the Asheville Citizen-Times, including the Asheville Civic Center.

Staff recommends approval of the resolution authorizing the City Manager to sign a weekly frequency advertising contract with the Asheville Citizen-Times.

RESOLUTION BOOK NO. 27 – PAGE [illegible] 36

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Vice-Mayor Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO REZONE A PORTION OF PROPERTY LOCATED AT 1153 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

At the request of the petitioner, Councilwoman Jones moved to continue this public hearing until January 22, 2002. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY KNOWN AS OLMSTED, SECTION 2 OF BILTMORE PARK

ORDINANCE NO. 2880 - ORDINANCE TO EXTEND THE CORPORATE LIMITS TO INCLUDE OLMSTED, SECTION 2 AT BILTMORE PARK

Mayor Worley opened the public hearing at 5:03 p.m.

Urban Planner Paul Benson said that this is the consideration of an ordinance extending the corporate limits of the City of Asheville to property located north of Long Shoals Road and identified as Olmsted, Section 2 of Biltmore Park. This public hearing was advertised on December 7, 2001.

Biltmore Farms, Inc. and seven other property owners have submitted annexation petitions for Olmsted, Section 2 at Biltmore Park. This area is contiguous to the existing corporate limits, being bordered to the north, south and east by sections of Biltmore Park that have been previously annexed

The area proposed for annexation consists of 30 acres and is platted for 26 single-family residential lots, and a common area. The area will be accessed by primarily by Olmsted Drive. This area is within the ETJ and is currently zoned RS-8.

180

Biltmore Farms Inc. is developing utilities and streets. City services will begin on the effective date of annexation. Biltmore Farms, Inc. has requested that the effective date of annexation be six months from the adoption of the ordinance.

This would be the 24th section of the Biltmore Park development to be annexed. Tax valuation of the area annexed to date is $106, 608,100.

City staff recommends City Council adopt a resolution fixing the date of a public hearing on December 18, 2001, on the question of annexation of property located north of Long Shoals Road and identified as Olmsted, Section 2 at Biltmore Park.

Upon inquiry of Vice-Mayor Bellamy, City Manager Westbrook explained the Biltmore Park development.

When Councilman Dunn said that there is an area in the City that has been annexed and is not receiving City garbage service. City Manager Westbrook asked for that information in order to make sure that this service is provided.

Mayor Worley closed the public hearing at 5:13 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2880. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 361

C. PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF 2360 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 2881 - ORDINANCE TO REZONE A PORTION OF 2360 SWEETEN CREEK ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:13 p.m.

Urban Planner Stacy Merten said that this is the consideration of an ordinance to rezone a portion of 2360 Sweeten Creek Road from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on December 7 and 14, 2001.

On September 28, 2001, the Givens Estates submitted an application for the rezoning of the eastern portion of the property identified as 2360 Sweeten Creek Road from RS-8 to RM-16 (PIN No. 9655.07-58-3386). The property is located on the east side of Sweeten Creek Road, between the existing Givens Estate property and Park Avenue. The entire parcel is 72 acres, but the rezoning request is only for the 55 acre portion of the property fronting on Sweeten Creek Road.

The RM-16 District, which allows up to 16 units per acre, is established to permit a full range of high density multi-family housing types along with limited public, institutional and commercial uses. It is intended that this district be located near employment centers, shopping, roads and other urban infrastructure capable of supporting the demand generated by higher density residential development. The maximum height in the RM-16 District is 40 feet as is the existing RS-8 District.

The RS-8 District is a higher density single family district allowing up to eight units per acre and is established where public infrastructure is sufficient to support such development, while providing the necessary stability to protect the district's residential character.

Givens Estates, an existing multi-family retirement community, is planning an expansion that will encompass this parcel, which lies to the north of the existing development. The requested zoning will allow the expansion to continue as planned. The topography and urban infrastructure are capable of accommodating the increased density. The proposed parcel area to be rezoned is over 50 acres and continues an existing zoning pattern, thus it would not constitute spot zoning. The 2010 Plan indicates residential uses for this area. Any high density residential development that is built adjacent to existing single family development will require a full landscaped buffer up to 25 ft. in width per the Unified Development Ordinance.

Ms. Merten said that the maximum height of any building would be 40 feet as in the existing district, the buffer would depend on the density of the use but would be between 20-25 feet, and the setback would depend on the size of the building, but a maximum of 50 feet.

Planning & Development staff recommend approval of the rezoning request. The Planning & Zoning Commission reviewed this at their meeting on November 7, 2001, and unanimously recommended that the parcel be rezoned to RM-16 Residential Multi-Family High Density District

Mr. W. Louis Bissette Jr., attorney representing the Givens Estate, explained the project to Council.

City Attorney Oast reminded Council that if Council rezones this property, they will be rezoning it for any uses allowed in the RM-16 district classification.

Mayor Worley closed the public hearing at 5:17 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 2881. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 364

D. PUBLIC HEARING TO CLOSE A PORTION OF PORTER STREET FROM POND AVENUE TO ROSSCRAGGON ROAD AND THE 15-FOOT ALLEYWAY FROM PORTER STREET TO LEE STREET

RESOLUTION NO. 01-201 - RESOLUTION TO CLOSE A PORTION OF PORTER STREET FROM POND AVENUE TO ROSSCRAGGON ROAD AND THE 15-FOOT ALLEYWAY FROM PORTER STREET TO LEE STREET

Mayor Worley opened the public hearing at 5:21 p.m.

Mr. David Foster, Public Works Project Coordinator, said that this is the consideration of a resolution to close a portion of Porter Street from Pond Avenue to Rosscraggon Road and the fifteen foot alleyway from Porter Street to Lee Street. This public hearing was advertised on November 23, 30, December 7 and 14, 2001.

According to N. C. Gen. Stat. sec. 160-299, a City has the authority to permanently close a street or alley without regard to whether it has actually been opened.

To proceed with this process, McGuire, Wood and Bissette, Law Firm, on behalf of Balus and Margaret Chastain, has requested to close a portion of Porter Street from Pond Avenue to Rosscraggon Road and the fifteen-foot alleyway from Porter Street to Lee Street.

Public Works Department staff has determined that the right-of-way known as Porter Street, beginning at Pond Avenue, and ending at Rosscraggon Road and the fifteen foot alleyway, beginning at Porter Street and ending at Lee Street as shown in Plat Book 1771, Page 0552 is not part of an adopted street plan and is not a City maintained Right of Way.

City staff recommends City Council adopt the resolution closing a portion of Porter Street from Pond Avenue to Rosscraggon Road and the fifteen foot alleyway from Porter Street to Lee Street, subject to retaining a sewer easement for MSD.

Mayor Worley closed the public hearing at 5:25 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 01-201. This motion was seconded by Councilman Ellis and carried unanimously.

RESOLUTION BOOK NO. 27 – PAGE ~~35~~ 36

E. PUBLIC HEARING TO CONSIDER THE REZONING OF 14 FOREST RIDGE DRIVE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT, AND ISSUANCE OF A CONDITIONAL USE PERMIT (CONDITIONAL USE ZONING)

ORDINANCE NO. 2882 - ORDINANCE TO REZONE 14 FOREST RIDGE DRIVE FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2883 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR 14 FOREST RIDGE DRIVE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:27 p.m.

Chief Planner Gerald Green submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 12/18/01). This public hearing was advertised on December 7 and 14, 2001.

Mr. Green said that this is the consideration of an ordinance to conditionally rezone property located on at 14 Forest Ridge Drive from RM-6 Residential Multi-Family Low Density District to Community Business II District/ Conditional Use, and issuance of a conditional use permit for an automobile and motorcycle repair business.

At their November 7, 2001, meeting, the Planning and Zoning Commission recommended rezoning of property located at 14 Forest Ridge Drive from RM-6 to Community Business II. Paul Carroll is the owner and applicant. The one acre site is located on Forest Ridge Drive, just off Old County Home Road in the City's extraterritorial jurisdiction area (Location Map – attached to City Exhibit 3). The site is bounded by Smith Mill Creek and a portion of the site is located within a designated flood hazard area. Forest Ridge Drive provides access to the site. A variety of land uses are located along Old County Home Road, but the uses in the immediate vicinity of the site are residential. Surrounding zoning is RM-6. Properties fronting on Leicester Highway east of Old County Home Road are zoned CB II.

The request is to conditionally zone the property as Community Business II/Conditional Use to allow the owner to operate an automobile and motorcycle repair business on the property in addition to the owner's home, which is currently located on the property. The owner's home is approximately 1200 square feet and would continue to be used as a residence. A building, not to exceed 1200 square feet initially, would be constructed on the property to house the auto repair business. The owner has asked that he be permitted to expand the building at a later date up to 2,200 square feet. The proposed building would be buffered from adjacent residential properties by a wood privacy fence and vegetation (Site Plan – attached to City Exhibit 3). Most of the repair work would take place inside the proposed building, although cars needing and/or undergoing repair would be parked outside the building on a gravel lot.

The Technical Review Committee has not reviewed this project. A Transportation Impact Analysis was not required for this project.

City Council must take formal action as set forth in section 7-5-5(e) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval for conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary opinion, absent the benefit of public input, is that all seven standards appear to be met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed use will require the construction of a building on the property to house the repair of automobiles and motorcycles. The operation of an automobile and motorcycle repair business on this site will not materially endanger the public health or safety if the site is developed in accordance with the approved site plan and applicable regulations.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The proposed development of the land is compatible with natural and topographic features on the site and within the immediate vicinity. Some fill will be required adjacent to the designated flood hazard area, but the fill will not be located within the flood area.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

Mr. Green pointed out that staff's initial recommendation was for denial of this project. The Planning & Zoning Commission unanimously recommended approval of the project based on public input and the feeling that this use would be compatible with adjacent properties. Some of these standards and findings have changed in light of the Planning & Zoning Commission's recommendations from those first presented by the Planning & Development staff. The revised response is that:

The project will be screened from abutting property to mitigate the potential adverse impact associated with the automobile/motorcycle repair business.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The structure to be constructed on the site is in harmony with the scale and bulk of other structures in the area. The proposed 1200 square foot structure will be located on a one acre lot on which only one other structure, a single family home, is located. The development will be in harmony with the coverage and density found in the area. The area in which the site is located has a mixture of uses, from what appear to be junkyards to nice single family homes.

5) That the proposed use or development of the land will generally conform to the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the City.

The Comprehensive Plan appears to indicate low density residential uses for this area. A home would continue to be located on the property under this proposal. The operation of an automobile repair business in a residential area is not addressed in any of the City's official plans.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

All services and facilities are available to meet the needs of the proposed use.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed use will be a small-scale automobile/motorcycle repair business with one employee. Traffic generation will be minimal. A Traffic Impact Analysis is not required for the proposed use.

To recap, the proposed project is a 1200 square foot building that will house an automobile/motorcycle repair business. Future plans call for the expansion of the building up to 2,200 square feet. The 1.0 acre site also contains the home of the property owner/applicant. Construction of the building in accordance with the site plan and adherence to the conditions recommended for the approval of the conditional use permit for this project would ensure that the impacts on surrounding property owners are mitigated.

The Planning and Zoning Commission reviewed the requested conditional use rezoning and the site plan for the proposed use at their November 7, 2001, meeting. No one spoke in opposition to the requested rezoning or the proposed use during the public hearing held by the Planning and Zoning Commission. After reviewing the request and the site plans, the Planning and Zoning Commission voted unanimously (6 – 0) to recommend approval of the conditional use rezoning, subject to the conditions identified by staff. The Commission's recommendation for approval included the future expansion of the building up to 2,200 square feet.

Based on information available to the Planning and Development Department in advance of this public hearing, staff recommends that the City Council approve the requested conditional use rezoning and issue the conditional use permit with the following conditions: (1) The owner of the automobile/motorcycle repair business must live on the site; and (2) Inoperable automobiles cannot be stored on the property.

Mr. Green entered into the record a note from William B. Simpson, 16 Forest Ridge Drive (City Exhibit 4). He also stated that he received a call from a neighbor about the noise from the motorcycles.

There was considerable discussion amongst Council members regarding the noise from testing engines in the evening hours.

Vice-Mayor Bellamy recommended hours of operation be included as a condition in this permit.

Vice-Mayor Bellamy questioned the condition recommended by staff that no automobiles be stored on the property and what would happen if a vehicle could not be repaired in one day. Mr. Green suggested a definition of inoperable be included, e.g., a vehicle that remains on the site unable to be operated for a period of two weeks. City Attorney Oast felt, however, that it may be easier to enforce a limit on the number of vehicles that can be stored on the property, whether they are operable or not.

Councilman Mumpower was hesitant to add more restrictions on this property owner since the City currently has a noise ordinance and a junked vehicle ordinance.

Councilman Dunn was also concerned about the Council putting restrictions on a small businessman and telling him when he can and can't work at his trade. He felt the owner should be allowed to work anytime, day or night, as long as his noise at night does not negatively impact his neighbors.

Mr. Green entered into the record City Exhibit 5 which was a petition signed by 17 area residents who had "no objections to Paul & Lisa Carroll to rezoning their property … from RM-6 to CBII."

Mr. Paul Carroll, petitioner, did not want Council to restrict his working hours in that he had every intention of being respectful of his neighbors with regard to noise. He said that he does have a building and he will work in the building at night. He said that he did go door to door and talked to everyone in the neighborhood about this proposed change.

Upon inquiry of Councilwoman Jones, Mr. Carroll said that he usually does not do any business after 7:00 p.m.

Vice-Mayor Bellamy suggested a condition that there will be no testing of engines outside of the building before 7:00 a.m. or after 7:00 p.m.

There being no request for rebuttal, Mayor Worley closed the public hearing at 6:00 p.m.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2882 to rezone property at 14 Forest Ridge Drive from RM-6 Residential Multi-Family Low Density District to Community Business II District/Conditional Use. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 366

When Mr. Carroll said that he would be happy to abide by the City's noise ordinance, it was determined that this property lies in the extraterritorial jurisdiction area and is not subject to the City's noise ordinance. However, Buncombe County does have a noise ordinance that would apply.

Vice-Mayor Bellamy moved to adopt Ordinance No. 2883 granting the conditional use permit for 14 Forest Ridge Drive with the following conditions: (1) the owner of the automobile/motorcycle repair business must live on the site; (2) inoperable automobiles cannot be stored on the property; and (3) that there will be no testing of engines outside of the building before 7:00 a.m. or after 7:00 p.m.; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilwoman Jones.

Councilman Mumpower said that on the basis that the City cannot enforce it's noise ordinance on this property, he would be willing to support the motion.

Councilman Ellis agreed with Councilman Mumpower but felt it was not fair to put restrictions on property that is stronger than if that property were in the City.

Upon inquiry of Vice-Mayor Bellamy, Mr. Green said that Leicester Highway is about 800-1,000 feet from this property and about 100 feet from the residential areas.

Councilman Mumpower didn't think the Council should set up a special noise standard for Mr. Carroll's neighborhood than is different than other neighbors in the City of Asheville.

Vice-Mayor Bellamy amended the third condition in her motion to read "that the applicant will adhere to the City's noise ordinance between 7:00 a.m. and 10:00 p.m. Councilwoman Jones accepted the amendment to the motion. Said amended motion carried on a 5-1 vote, with Councilman Dunn voting "no".

ORDINANCE BOOK NO. 19 – PAGE ~~366~~ 368

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

A. BUNCOMBE COUNTY ECONOMIC DEVELOPMENT COMMISSION

As discussed at the December 11, 2001, worksession, Councilman Ellis moved to appoint Councilman Dunn as the City representative to the Buncombe County Economic Development Commission. This motion was seconded by Councilman Mumpower and carried unanimously.

B. UPDATE ON NATIONAL LEAGUE OF CITIES CONFERENCE

Vice-Mayor Bellamy updated City Council on her recent trip to the National League of Cities Conference held in Atlanta, Georgia. The following are three issues she briefed Council on: (1) the need to call our legislators for home security funds; (2) during the water agreement negotiations, City Council should limit their agreement for five years; and (3) need to make sure our boards and commissions reflect our City make-up.

C. CLAIMS

The following claims were received by the City of Asheville during the period of November 9 – 29, 2001: Greg Northrup (Streets), Lindsey Miguelez (Sanitation), Robert Mirabal (Civic Center), Dianna Smith (Streets), Nickie Ballard (Parks & Recreation), BellSouth (Water), BellSouth (Water), Ken Myrick (Water), Laurel Frick (Fire) and Slade Smith (Transit Services).

The following claims were received by the City during the period of November 30-December 6, 2001: Albert Spack (Streets), Herman Brown (Water), Natasha Watkins (Police) and Earl Stuckenbruck (Water).

The following claims were received by the City during the period of December 7-13, 2001: Robin Elliott (Water), James Lanstra (Transit Services), Paul Thomas (Streets) and Rachel Eunice (Finance).

These claims have been referred to Asheville Claims Corporation for investigation.

D. LAWSUIT

The City was served with the following Complaint from Ronald L. Levitan on November 1, 2001: Complaint for money owed for damage to automobile due to negligent maintenance of city-owned manhole cover. This matter will be handled in-house.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. COMMENTS BY FRED ENGLISH

Mr. Fred English commented on various issues ranging from the appointment of the seventh member of City Council on December 4, 2001, to urging City Council not to allow football.

B. COMMENTS BY MIKE MORGAN

Mr. Mike Morgan asked City Council to investigate the strong sewer order from a small restaurant in West Asheville.

C. COMMENTS FROM KEVIN NUTTELL

Mr. Kevin P. Nuttell, advocate for people living with HIV and AIDS and Director of Public Policy in Government Relations for the North Carolina AIDS Policy Center, questioned Councilwoman Jones's seat on the Western North Carolina HIV AIDS Consortium.

188

D. COMMENTS FROM WALTER PLAUE

Mr. Walter Plaue suggested City Council look to the Hispanic and Native American communities for additional representation on City boards and commissions. He also felt that more information should be on the agenda regarding impacts to the City's budget.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:43 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 8, 2002 - 6:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor Terry M. Bellamy; Councilman Joseph C. Dunn; Councilman James E. Ellis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; and Councilman Brian L. Peterson; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

INVOCATION

Vice-Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 18, 2001

B. RESOLUTION NO. 02-1 - RESOLUTION MODIFYING THE CITY COUNCIL MEETING SCHEDULE TO INCLUDE A COMMUNITY MEETING ON TUESDAY, JANUARY 29, 2002, BEGINNING AT 7:00 P.M. AT THE SKYLAND VOLUNTEER FIRE DEPARTMENT LOCATED AT 9 MILLER ROAD, ASHEVILLE, NC

RESOLUTION BOOK NO. 27 – PAGE 38

C. RESOLUTION NO. 02-2 - RESOLUTION APPOINTING A MEMBER TO THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Summary: The consideration of appointing a member to the Educational Access Channel Commission.

Ordinance No. 2554 adopted on March 9, 1999, established an Educational Access Channel Commission. On May 25, 1999, members to the Commission were appointed.

On December 12, 2001, Superintendent of Asheville City Schools Robert L. Logan recommended Mr. Charlie Glazener be appointed as one of the representatives of Asheville City Schools to replace Dr. Patti Cutspec. Mr. Glazener will be filling the unexpired term of Dr. Cutspec, whose term will expire on June 1, 2005, or until his successor is appointed.

Staff recommends City Council adopt the resolution appointing Mr. Charlie Glazener to the Educational Access Channel Commission.

RESOLUTION BOOK NO. 27 – PAGE 39

D. RESOLUTION NO. 01-3 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LICENSE AGREEMENT WITH CIRCLE NET INC. FOR ANTENNAS AND RELATED EQUIPMENT AT 36 RESERVOIR ROAD (FORMERLY WHITE FAWN RESERVOIR)

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Circle Net, Inc. for an antenna at 36 Reservoir Road.

On December 28, 2001, pursuant to City Council Resolution No.01-188 the City Clerk published a public notice of City Council's intent to consider a license agreement with Circle Net, Inc.

Circle Net, Inc. has offered to enter into a license agreement for space on the tower owned by the City and known as the "U. S. Cellular Tower". The proposed License Agreement will enable Circle Net to operate antennas and related equipment at the site. There is a provision which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be 3 years with 2 renewal periods of 3 years. Circle Net will pay a License Fee of $7,800 for the first term with a 5% increase annually thereafter. In addition to the License Fee, Circle Net will pay a Utility Fee of $150.00 per annum.

Planning Department staff recommends adoption of the Resolution.

RESOLUTION BOOK NO. 27 – PAGE [illegible] 46

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Bellamy and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE REZONING OF THREE LOTS LOCATED AT YORKSHIRE STREET AND REED STREET (BILTMORE HEIGHTS PROFESSIONAL PARK) FROM OFFICE DISTRICT TO OFFICE II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2884 - ORDINANCE TO REZONE THREE LOTS LOCATED AT YORKSHIRE STREET AND REED STREET (BILTMORE HEIGHTS PROFESSIONAL PARK) FROM OFFICE DISTRICT TO OFFICE II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 2885 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THREE LOTS LOCATED AT YORKSHIRE STREET AND REED STREET (BILTMORE HEIGHTS PROFESSIONAL PARK

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:03 p.m.

Urban Planner Stacy Merten submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), City Exhibit 3 (Staff Report dated 1/8/02). This public hearing was advertised on December 28, 2001, and January 4, 2002.

Ms. Merten said that this is the consideration of an ordinance to conditionally rezone three lots on Yorkshire Street and Reed Street (Biltmore Heights Professional Park) from Office District to Office II District/Conditional Use, and issuance of a conditional use permit.

On October 26, 2001, Dr. William Chambers submitted an application for conditional use rezoning from Office District to Office II District/Conditional Use for the Biltmore Heights Professional Park (PIN Nos. 9647.12-85-2947, 9647.12-86-3084 and 9647.12-86-3131). The 2.92 acre site is located at the corner of Reed and Yorkshire Streets (Location Map – Attached to City Exhibit 3). The site has undergone Level I review and been approved for the construction of three, 2 story office buildings (Site Plan – Attached to City Exhibit 2). Two of the buildings (B & C) have been completed.

The proposal is to conditionally zone the property as Office II District/Conditional Use to allow the construction of a 13,000 square ft., 2 story building, which is 5,000 square ft. larger than the 8,000 square ft. maximum allowed for multi-story buildings in the Office zoning district. The reason for the request is to accommodate a more marketable building that works better with the existing site conditions for the construction of building A. Both buildings B & C received variances from the Zoning Board of Adjustment and are larger than the underlying Office zoning allows.

The Technical Review Committee reviewed this project at their meeting on December 3, 2001, and recommended that the project be forwarded to the Planning & Zoning Commission with the conditions that the size of the project be limited to 13, 000 sq. ft. and that a revised landscape plan be submitted showing both existing and proposed landscaping. A Transportation Impact Analysis was not required for this project.

City Council must take formal action as set forth in section 7-9-9(c) (4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case [UDO 7-16-2 (c)]. Staff's preliminary review, absent the benefit of public input, indicates that all seven standards appear to be met.

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed use is for an office building which is allowed in the existing zoning district and as such would not materially endanger the public health or safety if developed in accordance with the approved site plans and applicable regulations.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The building design makes maximum use of the property given the amount of grading that would be necessary regardless of the size of the building, thus the proposed project will be better able to work with the exiting site conditions.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The larger building will be located on the site uphill and away from the adjacent residential property and adequate buffers will be provided. It is not anticipated that the use would have a negative affect on the value of adjoining or abutting property.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed use will be similar in size, scale and materials to the existing buildings on the site. The surrounding properties to the north and east are zoned Institutional and Highway Business respectively and are developed with higher intensity uses. The project will be adequately buffered from the adjacent residential uses and landscaped in accordance with the UDO, thus it will be in keeping with the existing character, scale and density of the neighborhood.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The Comprehensive Plan indicates commercial uses for this area. The proposed use will be in keeping with smart growth policies in that it is promoting compatible higher density commercial development. It is also encouraging the expansion of medical services in keeping with the economic development strategic plan.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

The proposed use is located in an existing developed area. The original project, with a smaller building, received informal approval from the City's Technical Review Committee, including the Water Resources Department, the Fire Department, Engineering and Public Works.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed building is 5,000 sq. ft. larger than would be allowed under the current zoning. A transportation impact analysis is not required as traffic generation will be minimal.

The Planning & Zoning Commission reviewed this project at their December 5, 2001, meeting and voted unanimously to recommend approval of the project with conditions. Planning & Development staff recommend approval of the conditional use rezoning with the following conditions: (1) The size of the building should be limited to 13,000 sq. ft.; and (2) The revised site plan should include the landscaping, existing and proposed.

There was a brief discussion about why the Board of Adjustment approved variances for Buildings B and C, but denied the variance for Building A. Mr. Carroll Hughes, President of Spaceplan, gave his recollection of the Board of Adjustment decision to Council stating that his rationale for the variance was the same for Building A as it was for Buildings B and C. He did not quite understand why the Board of Adjustment denied the variance petition for Building A. City Attorney Oast stated that the conditional use zoning of this property is the appropriate way to get the use out of the property that Mr. Hughes is seeking. Ms. Merten also noted that when the first building variance was applied for, the City did not have the conditional use process in place.

There being no request for rebuttal, Mayor Worley closed the public hearing at 6:17 p.m.

Councilman Ellis moved to adopt Ordinance No. 2884 to rezone three properties at Yorkshire Street and Reed Street from Office District to Office II District/Conditional Use. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 372

Vice-Mayor Bellamy moved to adopt Ordinance No. 2885 granting the conditional use permit for Biltmore Heights Professional Park with the following conditions: (1) The size of the building should be limited to 13,000 sq. ft.; and (2) The revised site plan should include the landscaping, existing and proposed; and to instruct the City Attorney to prepare the Order for the Mayor's signature. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 19 – PAGE 374

B. PUBLIC HEARING RELATIVE TO REZONING 669 BREVARD ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 2886 - ORDINANCE TO REZONE 669 BREVARD ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 6:18 p.m.

Urban Planner Alan Glines said that this is the consideration of the rezoning of property located at 669 Brevard Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on December 28, 2001, and January 4, 2002.

This proposal is to consider the rezoning of property located at 669 Brevard Road from Commercial Industrial District to Highway Business District. The PIN No. is 9627-20-92-8325 and is located within the City limits. The parcel is the site of an older single story brick house located on Brevard Road which is becoming a commercial corridor. The parcels immediately to the north and west of the parcel are zoned Commercial Industrial. The contiguous parcels to the south which have frontage along Brevard Road are zoned Highway Business. The parcel is approximately .69 acre. The parcel is an ideal location for a small business and would follow a similar pattern in the area of changes in use from residential to business uses along this important corridor between I-26 and I-40.

The Planning and Zoning Commission voted 7 to 0 to recommend approval of the rezoning of the property located at 669 Brevard Road from Commercial Industrial District to Highway Business District. The Planning and Development staff recommend the approval of the requested rezoning.

Mayor Worley closed the public hearing at 6:21 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 2886. This motion was seconded by Councilman Peterson and carried unanimously.

ORDINANCE BOOK NO. 19 - PAGE 379

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 02-4 - RESOLUTION ACKNOWLEDGING REPAYMENT OF DEBT OWED BY EAGLE/MARKET STREETS DEVELOPMENT CORPORATION TO THE CITY OF ASHEVILLE

Ms. Heather Dickens, Community Development Analyst, said that this is the consideration of a resolution to accept the value of space provided free of charge to the Asheville Police Department by Eagle/Market Streets Development Corporation at 70 South Market Street as repayment in-kind of the $14,000 debt owed to the City.

Eagle/Market Streets Development Corporation (EMSDC) has submitted a request to the City of Asheville for forgiveness of the $14,000 debt owed to the City in exchange for rental space provided at no cost to the Asheville Police Department (APD) from August 1999 through December 2001. From August 1999 to present, the APD has operated a substation and occupied the north half of the building, Suite A, of 70 S. Market Street. Suite A includes 1200 square feet of office and meeting space, valued at an area market rate of $750 a month. The total value of in-kind rent provided by EMSDC to APD is $21,750.

The initial debt arose in 1998 when EMSDC purchased 70 S. Market Street for $14,000 more than the appraised value. Community Development Block Grant (CDBG) funds were used to pay for the property acquisition. After review, the Dept. of Housing and Urban Development disallowed the $14,000 excess payment and required the City to repay the difference from general fund to the CDBG fund. As a result EMSDC agreed to repay $14,000 to the City.

The request from EMSDC is for the City to accept the value of space provided for APD as full and satisfactory repayment of the $14,000 owed to the City. EMSDC plans to continue partnering with the APD and will establish a new lease agreement for the terms of the space beginning January 1, 2002, where services will be provided in lieu of rent.

City staff recommends approval of the resolution and that the $14,000 owed to the City by EMSDC be regarded as paid in full.

Upon inquiry of Vice-Mayor Bellamy, City Manager Westbrook said that City does not pay rent in facilities where we have a substation because usually those facilities are City-owned.

When Councilman Dunn asked why EMSDC purchased the property more than the appraised value, Ms. Dickens explained that when CDBG funds were used for the purchase of 70 S. Market Street, an appraisal did not accompany the payment for that purchase. When later reviewed, the appraisal price was for less than the purchase price. Therefore, CDBG funds could only be used for the full appraisal value. The City does not now pay out CDBG funds without a full appraisal.

Councilman Peterson and Mayor Worley both agreed that a police substation at this location is a big benefit and good partnership for the area.
